

**Quarterly Report on Homeless Deaths # 9**  
**New York City Department of Health and Mental Hygiene**  
**Bureau of Vital Statistics**  
**Local Law 63 of 2005**  
**July 1, 2007 – September 30, 2007**

**Introduction.** This report has been prepared and submitted pursuant to Local Law 63 of 2005 (LL63) amending the Administrative Code of the City of New York to track and report deaths of homeless persons in the City of New York. Data contained in this report are for the quarter period of July 1, 2007 – September 30, 2007 and were provided by the NYC Office of the Chief Medical Examiner (OCME), the NYC Department of Homeless Services (DHS), the NYC Department of Housing Preservation and Development (HPD) and the NYC Human Resources Administration (HRA) to the Department of Health and Mental Hygiene (DOHMH).

DHS, HPD and HRA maintain records on the homeless individuals for whom they provide temporary housing in New York City. OCME, through its responsibilities investigating NYC deaths, investigates the deaths of some homeless individuals. Data from these agencies were compiled, matched against NYC death certificates and analyzed by the DOHMH Office of Vital Statistics and is presented herein.

**Definitions.** As defined in LL63, a “homeless person” is a person who at the time of death did not have a known street address of a residence at which he or she was known or reasonably believed to have resided. A “homeless shelter resident” is “a person who at the time of death lived in a homeless shelter. A “homeless shelter” is “(i) a residence operated by or on behalf of the department of homeless services; (ii) an emergency residence operated by or on behalf of the department of social services/human resources administration which is available primarily for homeless persons with HIV or AIDS related illness; or (iii) a residence operated by or on behalf of the department of housing preservation and development to the extent that such residence houses clients of the department of homeless services; provided, however that such term shall not include any residence that is available primarily for battered women.”

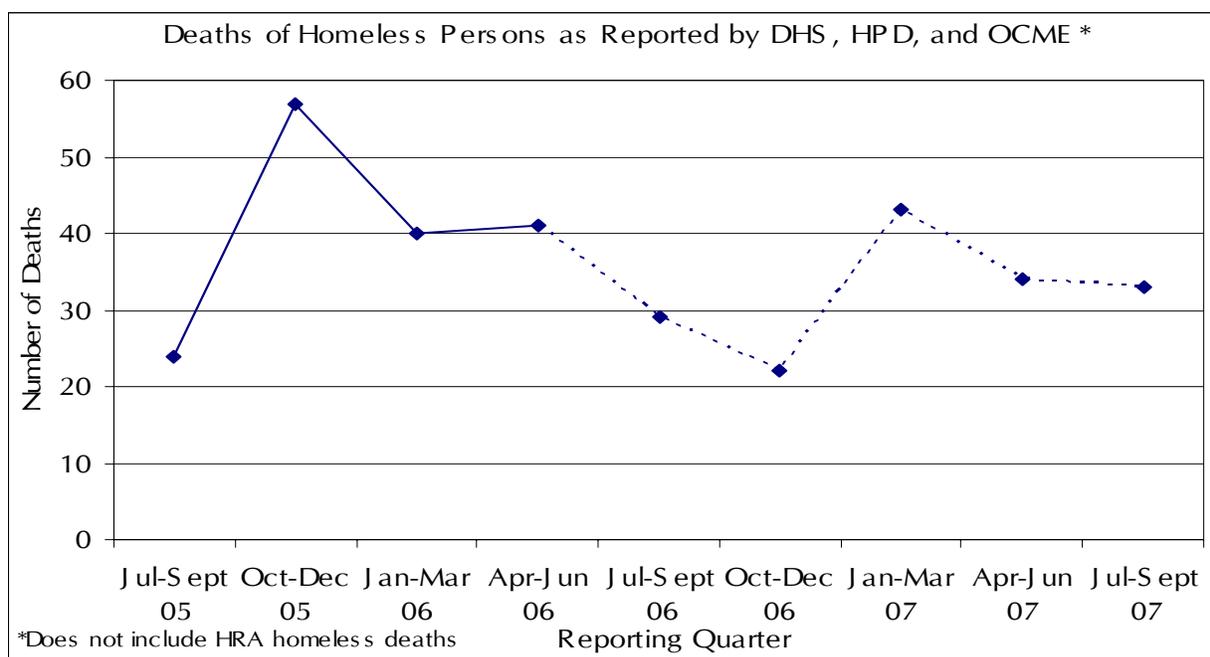

**Methods.** Based on definitions above, incident reports were provided by OCME, DHS and HPD. Information from corresponding NYC death certificates were used to validate agency reports and remove any duplicates among them (i.e. when DHS cases are also OCME cases). HRA did not disclose any identifiable information on HRA homeless residents, per Article 27-F of the New York State Public Health Law, which prohibits disclosure of information that could reasonably identify someone as having an HIV-related illness or AIDS. As a result HRA homeless deaths cannot be combined with DHS, HPD and OCME deaths and total NYC homeless deaths cannot be ascertained.

## DEATHS OF HOMELESS PERSONS AND HOMELESS SHELTER RESIDENTS

### *Reported Homeless Deaths*

OCME, DHS and HPD reported a total of 33 homeless deaths between July 1 and September 30, 2007. Of the total reported this quarter, 30 were investigated by OCME. On average, over the previous 8 quarters, 37 deaths have been reported per quarter. The number of deaths also ranged from 24 to 57 during the previous 8 quarters. There were 34 deaths in the previous quarter.

The trend chart below looks at deaths over all 9 quarters. Quarters 1-4 were included in the first annual report. The data for quarters 5-9 are preliminary, which is reflected with a dashed line in the chart. The numbers may change with late reporting, which would be indicated in the annual reports. Any changes in quarters 5-8 will be indicated in the second annual report, which will be released in January 2008.

Ten of the 33 deaths occurred in Manhattan, 13 in the Bronx, 7 in Brooklyn, 3 in Queens, and none in Staten Island.

HRA reported 12 homeless deaths this quarter as compared to 12 reported in the previous quarter (Table 1). Among the 12 HRA deaths reported, 5 were in Manhattan, 4 in the Bronx, 3 in Brooklyn, none in Queens, and none in Staten Island.

### Decedent Shelter Residency Status and Shelter Location

Among the 33 OCME, DHS and HPD-reported homeless deaths, 18 (55%) were reported to have been a resident of a shelter system at the time of death, 15 (45%) were not sheltered (Table 1). Of the 18 sheltered, 3 died in Manhattan, 7 in Bronx, 6 in Brooklyn, 2 in Queens, and none in Staten Island. Of the 15 unsheltered, 7 died in Manhattan, 6 in Bronx, 1 in Brooklyn, 1 in Queens, and none in Staten Island.

The proportion of sheltered homeless decedents has ranged from 35% to 86% during the previous 8 quarters. Of the 18 sheltered homeless decedents identified by OCME, DHS and HPD this quarter, 5 were sheltered in Manhattan, 4 in Bronx, 7 in Brooklyn, 2 in Queens, and none in Staten Island (Table 2).

Please note that HRA reports “homeless” residents as living in Single Room Occupancies (SROs). SROs are not homeless shelters. These decedents had been provided with temporary emergency housing and according to LL63 definition, are classified as homeless sheltered residents.

#### Homeless Decedents Investigated by OCME

Of the 33 homeless deaths reported by OCME, DHS and HPD, 30 (91%) were investigated by OCME (Table 1). While the proportion of deaths investigated by the OCME fluctuates, communication amongst OCME, DHS, and DOHMH has improved. As a result of the initiatives discussed in the first annual report, a Memorandum of Understanding between DHS and DOHMH was signed to permit detailed data sharing. OCME also notifies DHS in real time of every suspected homeless death.

#### Homeless Decedent Location of Death by Borough and Community District

The location of OCME, DHS and HPD reported deaths (i.e. in shelter, in a hospital, outdoors or other), disaggregated by borough, community district and shelter residency status are shown in Table 3. HRA homeless deaths by location of death are presented separately in Table 4 by borough only, as required by LL63.

Among the 33 OCME, DHS and HPD deaths, 9 (27%) occurred at a shelter, 12 (36%) in a hospital, 6 (18%) outdoors and 6 (18%) in an “other” location. The number of homeless decedents who died outdoors has ranged from 3 to 20 decedents per quarter over the previous 8 quarterly reports. Those who died in “other” locations ranged from 1 to 11 decedents per quarter in the same time period. Among the 6 outdoor deaths reported this quarter, 2 were in Manhattan, 3 in the Bronx, 1 in Queens, and none in Brooklyn and Staten Island. Three were found on the sidewalk or street, 2 in parks (1 was found in a restroom), and 1 in an empty lot. Among the 6 “other” location deaths, 1 died in Manhattan, 6 in the Bronx, 1 in Brooklyn, and none in Queens and Staten Island. One was found on the subway tracks, 1 outside a storage locker, 3 in friends’ apartments, and 1 in a basement apartment.

The distribution of location of death among the 18 sheltered homeless decedents was as follows: 6 died in the hospital, 9 died at the homeless shelter and 3 died in “other” locations – 2 in friends’ apartments and 1 in a basement apartment (Table 3).

The location distribution among the 15 non-sheltered was as follows: 6 died in a hospital, 6 outdoors and 3 in “other” locations. All 6 outdoor deaths occurred to non-sheltered decedents, and were found in the locations described above. Of the 3 “other” deaths - 1 was found on the subway tracks, 1 outside a storage locker, 1 in a friend’s apartment.

All 12 of the HRA-reported homeless persons’ deaths were residents of SRO housing and as such defined as sheltered, when they died. Five were reported as dying in the hospital, 5 in an HRA emergency housing facility (shelter), and 2 in unknown locations (Table 4).

*Deaths reported by OCME, DHS and HPD cannot be added to deaths reported by HRA. As stated above, death certificates for HRA-reported homeless persons' deaths may not be identified by law and may duplicate reports from OCME.*

Homeless Decedents' Age and Gender by Borough and Community District

Of the 33 OCME, DHS and HPD deaths, 19 (60%) were male and 14 (40%) were female (Table 5). One (3%) was an infant, female, 2 months old. The infant was a sheltered resident and was investigated by OCME.

One (3%, male) of the 33 decedents was between the ages of 1 and 24 years, 9 (27%, 5 male and 4 female) were between the ages of 25 and 44 years, another 17 (52%, 10 male and 7 female) were between the ages of 45 and 64 years, and 4 (12%, 2 male and 2 female) were older than 65 years of age. One (3%, male) was of an unknown age.

Of the 12 HRA homeless decedents, 7 (58%) were male and 5 (42%) were female. Two were between 25 and 64 years of age (17%, female), and 10 were between 45 and 64 years (83%, 7 male and 3 female). The age and gender distribution by borough can be found in Table 6.

**Comments**

Since the last quarterly report, there have been two changes in how homeless deaths are tabulated. These changes are incorporated in this report, and will also be reflected for quarters 5-8 in the 2<sup>nd</sup> annual report, which will be released in January 2008. Previously, all cases with OCME numbers were considered to be investigated by the OCME. However, OCME numbers are also assigned to decedents for tracking purposes when no investigation has taken place, e.g. clearance for cremation. Beginning this quarter, cases are considered to be OCME-investigated only when the certifier on the death certificate is a medical examiner. In addition, all subway deaths were previously categorized as outdoor deaths. Since there is usually protection from weather elements in subway stations, platforms, and tracks, subway deaths are now categorized as "other" deaths.

NYC Local Law 63: Reporting Deaths Of Homeless Persons, Qtr. 9 (Jul. 1 - Sept. 30, 2007)

Queens	3	3	0	2	2	0	1	1	0	0	0	0
Staten Island	0	0	0	0	0	0	0	0	0	0	0	0

\* All HRA deaths occurred to homeless placed in Single Room Occupancy (SRO). SROs are not considered homeless shelters by HRA, but they are included in this report because they are homeless shelter residents according to Local Law No. 63 of 2005 (codified at New York City Administrative Code Section 17-190) definitions #2 Homeless shelter resident and #3 Homeless shelter were classified as homeless sheltered residents. See: <http://webdocs.nycouncil.info/attachments/66681.htm>

HRA homeless sheltered deaths are reported separately and should not be added to other homeless sheltered deaths as there may be duplication. To comply with Article 27-F of the New York state Public Health Law which prohibits disclosure of any information that could reasonably identify someone having an HIV related illness or AIDS, personal identifiers on HRA homeless deaths were not provided; hence corresponding death certificates could not be reviewed to determine whether deaths were also reported by OCME.
