

Quarterly Report on Homeless Deaths #5
New York City Department of Health and Mental Hygiene
Bureau of Vital Statistics
Local Law 63 of 2005
July 1, 2006 - September 30, 2006

This report has been prepared and submitted pursuant to Local Law 63 of 2005 (LL63) amending the Administrative Code of the City of New York, in relation to requiring the New York City (NYC) Department of Health and Mental Hygiene (DOHMH) to track and report deaths of homeless persons in the City of New York. This is the fifth deliverable prepared under the law, which requires quarterly and annual reports. Data contained in this report are for the period July 1, 2006 - September 30, 2006 and were provided by the NYC Office of the Chief Medical Examiner (OCME), the NYC Department of Homeless Services (DHS), the NYC Department of Housing Preservation and Development (HPD) and the NYC Human Resources Administration (HRA) to the DOHMH. DHS, HPD and HRA maintain records on the homeless individuals for whom they provide temporary housing in New York City. OCME, through its responsibilities investigating NYC deaths, investigates the deaths of some homeless individuals. Data from these agencies and OCME were compiled, matched against NYC death certificates and analyzed by the DOHMH's Office of Vital Statistics and is presented herein.

As defined in LL63, a "homeless person" is "a person who at the time of death did not have a known street address of a residence at which he or she was known or reasonably believed to have resided." A "homeless shelter resident" is "a person who at the time of death lived in a homeless shelter..." A "homeless shelter" is "(i) a residence operated by or on behalf of the department of homeless services; (ii) an emergency residence operated by or on behalf of the department of social services/human resources administration which is available primarily for homeless persons with HIV or AIDS related illness; or (iii) a residence operated by or on behalf of the department of housing preservation and development to the extent that such residence houses clients of the department of homeless services; provided, however, that such term shall not include any residence that is available primarily for battered women."

Based on definitions above, incident reports were provided by OCME, DHS and HPD. Information from corresponding NYC death certificates were used to validate agency reports and remove any duplicates among them (i.e. some DHS cases were also OCME cases). Data from HRA did not disclose any identifiable information on HRA homeless residents, per Article 27-F of the New York State Public Health Law, which prohibits disclosure of information that could reasonably identify someone as having an HIV-related illness or AIDS. *Therefore, corresponding death certificates for HRA-reported homeless deaths could not be identified and may duplicate reports from OCME.*

DEATHS TO HOMELESS PERSONS AND HOMELESS SHELTER RESIDENTS

Reported Homeless Deaths

OCME, DHS and HPD reported a total of 29 homeless deaths between July 1 and September 30, 2006; 42 had been reported during each of the previous two quarters (Table 1). Of the total reported, 24 were investigated by OCME.

Twenty of the 29 deaths occurred in Manhattan, 5 in the Bronx and 4 in Brooklyn; none were

reported in either Queens or Staten Island.

HRA reported 18 homeless deaths this quarter as compared to 8 reported in the previous quarter (Table 1). Among the 18 HRA deaths reported, 14 were in Manhattan and 3 were in the Bronx; the borough of death for the remaining HRA resident was reported as Unknown.

Decedent Shelter Residency Status and Shelter Location

Among the 29 OCME, DHS and HPD-reported homeless deaths 24 (83%) reported to have been a resident of a shelter system at the time of death; 5 (17%) were not. Of the 24 sheltered homeless decedents identified by OCME, DHS and HPD, 15 were sheltered in Manhattan, 3 in the Bronx, 4 in Brooklyn, 1 in Queens and none in Staten Island; 1 was sheltered outside of NYC (Table 2).

Please note that HRA reports “homeless” residents as living in Single Room Occupancies (SROs). SROs are not considered homeless shelters by HRA, but they are included in this report because they are homeless shelter residents according to LL63. The location of HRA resident shelters by borough was not reported.

Homeless Decedents Investigated by OCME

Among the 29 homeless deaths reported by OCME, DHS and HPD, most (24 or 83%) were investigated by OCME; 5 (17%) were not. Among the 24 sheltered, 19 (79%) were investigated by OCME, 5 (21%) were not; among the 5 non-sheltered and sheltered status-unknown decedents, all were investigated by OCME (Table 1).

Homeless Decedent Location of Death by Borough and Community District

The locations of OCME, DHS and HPD reported deaths (i.e., in shelter, in a hospital, outdoors or other), disaggregated by borough, community district and shelter residency status are shown in Table 3. HRA’s homeless deaths by location of death are presented separately in Table 4 by borough only, as required by LL63. Please note that deaths of persons in nursing homes are currently not included in the tables as we have not had any reports of death in nursing homes through September 2006. Nursing Homes are generally considered permanent placements. When considered a permanent placement for a formerly homeless client, nursing homes are responsible for placing clients in permanent housing, upon discharge. As a result, we do not anticipate homeless death reports that have occurred in Nursing Homes from any of our reporting agencies.

Among the 29 OCME, DHS and HPD deaths, 6 (21%) occurred at a shelter, 15 (52%) in a hospital, 6 (21%) outdoors and 2 (6%) in an “other” location (Table 3). Among the 6 outdoor deaths, 4 were in Manhattan, 1 was in the Bronx, 1 was in Brooklyn; none died in Queens or Staten Island; 4 were found in a park area, 1 on the sidewalk or street and 1 at a subway or train station. One of the 2 “other” deaths occurred in Manhattan; the other in the Bronx; both found in an hotel/apartment or house.

The distribution of location of death among the 24 sheltered homeless decedents is as follows: 14 died in the hospital, 6 died at the homeless shelter, 2 died “outdoors” - 1 found in a park and 1 found on the sidewalk or street, and 2 died in “other” circumstances – 1 found in a hotel room, the other at a friend’s home.

The distribution of location of death among the 5 non-sheltered and sheltered status-unknown decedents is as follows: 1 died in the hospital and 4 died “outdoors” – 3 found in a park area and 1 found at a subway or train station (Table 3).

All 18 of the HRA-reported homeless persons' deaths were residents of SRO housing and as such defined as sheltered, when they died. Nine were reported as dying in the hospital and 7 in an HRA emergency housing facility (shelter); the location of death of 2 other decedents was reported as unknown (Table 4).

Deaths reported by OCME, DHS and HPD cannot be added to deaths reported by HRA. As stated above, death certificates for HRA-reported homeless persons' deaths may not be identified by law and may duplicate reports from OCME.

Homeless Decedents' Age and Gender by Borough and Community District

Of the 29 OCME, DHS and HPD deaths, 21 (72%) were males and 8 (28%) were females (Table 5). The 3 (10%) decedents between 0-24 years of age were infants ranging between the ages of 4 and 28 weeks. All were sheltered, pronounced dead in a hospital, and were investigated by OCME; 2 were female and one male.

Twelve (42%), 7 male and 5 female, of the 29 homeless decedents were between the ages of 25 and 44 years, another 13 (45%), 12 male and 1 female were between the ages of 45 and 64 years, 1 (3%) male was older than 65 years of age. The age and gender distribution disaggregated by borough and community district are found in Table 5.

Among the 18 HRA homeless persons' deaths, 14 (78%) were male and 4 (22%) were female. Five, 3 male and 2 female, were between the ages of 25 and 44 years and 13, 11 male and 2 female, were between the ages of 45 and 64. The age and gender distribution by borough can be found in Table 6.

NEXT STEPS

Manual matching to New York City death certificates has resolved duplicates and confirmed OCME investigation – in those situations when death was reported by DHS or HPD but not by OCME. A data user agreement between DOHMH and DHS is currently being signed to enable DHS to review any case known to OCME which DHS did not also report to ensure that they were not known to DHS shelters or outreach teams/drop-in centers. We are currently working on developing new tables that will provide some cumulative data on homeless deaths for future reporting.

Table 1: Deaths of Homeless Persons By Shelter Residency Status and Borough of Death, Jul. 1 - Sep. 30, 2006	Deaths Reported By OCME, DHS, and HPD									Deaths Reported By *HRA		
	Total			Shelter Residency Status						**Total	Shelter Residency Status

Bronx	5	4	1	4	3	1	1	1	3	3	0	
Brooklyn	4	3	1	3	2	1	1	1	0	0	0	
***Borough Unknown	0	0	0	0	0	0	0	0	1	1	0	

* All HRA deaths occurred to homeless placed in Single Room Occupancy (SRO). SROs are not considered homeless shelters by HRA, but they are included in this report because they are homeless shelter residents according to Local Law No. 63 of 2005 (codified at New York City Administrative Code Section 17-190) definitions #2 Homeless shelter resident and #3 Homeless shelter were classified as homeless sheltered residents. See: <http://webdocs.nycouncil.info/attachments/66681.htm>

**HRA homeless sheltered deaths are reported separately and should not be added to other homeless sheltered deaths as there may be duplication. To comply with Article 27-F of the New York state Public Health Law which prohibits disclosure of any information that could reasonably identify someone having an HIV related illness or AIDS, personal identifiers on HRA homeless deaths were not provided; hence corresponding death certificates could not be reviewed to determine whether deaths were also reported by OCME

*** Borough of death was reported as "unknown" by HRA
