

Quarterly Report on Homeless Deaths #4
New York City Department of Health and Mental Hygiene
Bureau of Vital Statistics
Local Law 63 of 2005
April 1, 2006 - June 30, 2006

This report has been prepared and submitted pursuant to Local Law 63 of 2005 (LL63) amending the Administrative Code of the City of New York, in relation to requiring the New York City (NYC) Department of Health and Mental Hygiene (DOHMH) to track and report deaths of homeless persons in the City of New York. This is the third deliverable prepared under the law, which requires quarterly and annual reports. Data contained in this report are for the period April 1, 2006 - June 30, 2006 and were provided by the NYC Office of the Chief Medical Examiner (OCME), the NYC Department of Homeless Services (DHS), the NYC Department of Housing Preservation and Development (HPD) and the NYC Human Resources Administration (HRA) to the DOHMH. DHS, HPD and HRA maintain records on the homeless individuals for whom they provide temporary housing in New York City. OCME, through its responsibilities investigating NYC deaths, investigates the deaths of some homeless individuals. Data from these agencies and OCME were compiled, matched against NYC death certificates and analyzed by the DOHMH's Office of Vital Statistics and is presented herein.

As defined in LL63, a "homeless person" is "a person who at the time of death did not have a known street address of a residence at which he or she was known or reasonably believed to have resided." A "homeless shelter resident" is "a person who at the time of death lived in a homeless shelter..." A "homeless shelter" is "(i) a residence operated by or on behalf of the department of homeless services; (ii) an emergency residence operated by or on behalf of the department of social services/human resources administration which is available primarily for homeless persons with HIV or AIDS related illness; or (iii) a residence operated by or on behalf of the department of housing preservation and development to the extent that such residence houses clients of the department of homeless services; provided, however, that such term shall not include any residence that is available primarily for battered women."

Based on definitions above, incident reports were provided by OCME, DHS and HPD. Information from corresponding NYC death certificates were used to validate agency reports and remove any duplicates among them (i.e. some DHS cases were also OCME cases). Data from HRA did not disclose any identifiable information on HRA homeless residents, per Article 27-F of the New York State Public Health Law, which prohibits disclosure of information that could reasonably identify someone as having an HIV-related illness or AIDS. *Therefore, corresponding death certificates for HRA-reported homeless deaths could not be identified and may duplicate reports from OCME.*

DEATHS TO HOMELESS PERSONS AND HOMELESS SHELTER RESIDENTS
Reported Homeless Deaths

OCME, DHS and HPD reported a total of 42 homeless deaths between April 1 and June 30, 2006, equal to the number reported in the previous quarter (Table 1). Of the total reported, 38 were investigated by OCME.

Twenty-four of the 42 deaths occurred in Manhattan, 6 in the Bronx, 7 in Brooklyn, 5 in Queens, and none in Staten Island.

HRA reported 8 homeless deaths this quarter as compared to 13 reported in the previous quarter (Table 1). Among the 8 HRA deaths reported, 6 were in Manhattan and 2 were in the Bronx; none in Brooklyn, Queens or Staten Island.

Decedent Shelter Residency Status and Shelter Location

Among the 42 OCME, DHS and HPD-reported homeless deaths 20 (48%) reported to have been a resident of a shelter system at the time of death; 22 (52%) were not. Of the 20 sheltered homeless decedents identified by OCME, DHS and HPD, 8 were sheltered in Manhattan, 4 in the Bronx, 5 in Brooklyn, 3 in Queens and none were in Staten Island. (Table 2).

Please note that HRA reports “homeless” residents as living in Single Room Occupancies (SROs). SROs are not homeless shelters. These decedents had been provided with temporary emergency housing and according to LL63 definitions, are classified as homeless sheltered residents.

Homeless Decedents Investigated by OCME

Among the 42 homeless deaths reported by OCME, DHS and HPD, 38 (90%) were investigated by OCME; 4 (10%) were not. Among the 20 sheltered, 16 (80%) were investigated by OCME, 4 (20%) were not; among the 22 non-sheltered and sheltered status-unknown, all were investigated by OCME (Table 1).

Homeless Decedent Location of Death by Borough and Community District

The locations of death (i.e., in shelter, in a hospital, outdoors or other), disaggregated by borough, community district and shelter residency status are shown in Table 3. HRA’s homeless deaths by location of death are presented separately in Table 4 by borough only, as required by LL63. Please note that deaths of persons in nursing homes are currently not included in the tables as we have not had any reports of death in nursing homes through June 2006. Nursing Homes are generally considered permanent placements. When considered a permanent placement for a formerly homeless client, nursing homes are responsible for placing clients in permanent housing upon discharge. As a result, we do not anticipate homeless death reports that have occurred in Nursing Homes from any of our reporting agencies. If and when we do receive such a report, the category will be added to the tables.

Among the 42 OCME, DHS and HPD deaths, 6 (14%) occurred at a shelter, 20 (48%) in a hospital, 11 (26%) outdoors and 5 (12%) in an “other” location. Among the 11 outdoor deaths, 7 were in Manhattan, 2 were in the Bronx, 2 were in Brooklyn and none were in Queens or Staten Island; 7 were found on the sidewalk or street, 1 at a subway station, 2 in a park area and 1 was found in a car. Among the 5 “other” deaths, 4 were in Manhattan and 1 was in Queens; all 5 were found in either a hotel room, apartment, or building.

More non-sheltered and shelter status-unknown residents died outdoors than sheltered residents. The distribution of location of death among the 20 sheltered homeless decedents is as follows: 11 died in the hospital, 6 died at the homeless shelter, 1 died “outdoors” - found in a park - and 2 died in “other” circumstances – a hotel room and an apartment.

The distribution of location of death among the 22 non-sheltered and sheltered status-unknown decedents is as follows: 9 died in the hospital, 10 died “outdoors” – 7 found on the sidewalk or street, 1 in the subway, 1 in a car and 1 in a park area – and 3 died in “other” circumstances – 1 in an apartment and 2 in buildings (Table 3).

All 8 of the HRA-reported homeless persons’ deaths were residents of SRO housing and as such defined as sheltered, when they died. Four were reported as dying in the hospital and 4 in an HRA emergency housing facility (shelter).

Deaths reported by OCME, DHS and HPD cannot be added to deaths reported by HRA. As stated above, death certificates for HRA-reported homeless persons’ deaths may not be identified by law and may duplicate reports from OCME.

Homeless Decedents’ Age and Gender by Borough and Community District

Of the 42 OCME, DHS and HPD deaths, 33 (79%) were males and 9 (21%) were females (Table 5). All 6 less than 24 years of age were infants ranging in age from 2 days to 4 months of age. Five were male and one female. Five of the 6 infants were sheltered residents and are under investigation by OCME. The other was an offspring of a sheltered resident, but died prior to discharge from the birthing facility.

Sixteen (38%) of the remaining homeless decedents were between 25 and 44 years of age, 17 (41%) were between 45 and 64 years of age and 3 (7%) were older than 65 years of age.

Among the 33 male homeless decedents, 5 were less than 25 years of age (5 of the 6 infants mentioned above), 12 were between 25 and 44 years of age, 13 were between 45 and 64 years of age and 3 were older than 65 years of age. Among the 9 female homeless decedents, 1 was less than 25 years of age (an infant), 4 were between 25 and 44 years of age, 4 were between 45 and 64 years of age and none were older than 65 years of age. The age and gender distribution disaggregated by borough and community district are found in Table 5.

Among the 8 HRA homeless persons’ deaths, 7 (88%) were male and 1 (12%) was female. One was between 25 and 44 years of age and 7 were between 45 and 64 years of age. The age and gender distribution by borough can be found in Table 6.

NEXT STEPS

Manual matching to New York City death certificates has resolved duplicates and confirmed OCME investigation – in those situations when death was reported by DHS or HPD but not by OCME. A data user agreement between agencies is still pending. We are currently working on developing new tables that will provide some cumulative data on homeless deaths for future reporting.

Table 1: Deaths of Homeless Persons By Shelter Residency Status and Borough of Death, Apr. 1 - Jun. 30, 2006	Deaths Reported By OCME, DHS, and HPD									Deaths Reported By *HRA		
	Total			Shelter Residency Status						**Total	Shelter Residency Status	
				Sheltered			Non-Sheltered /Unknown				Sheltered	Non-Sheltered /Unknown
	All	OCME	Non-OCME	All	OCME	Non-OCME	All	OCME				
New York City	42	38	4	20	16	4	22	22	8	8	0	
Manhattan	24	23	1	7	6	1	17	17	6	6	0	
Bronx	6	5	1	4	3	1	2	2	2	2	0	
Brooklyn	7	6	1	4	3	1	3	3	0	0	0	
Queens	5	4	1	5	4	1	0	0	0	0	0	

* All HRA deaths occurred to homeless placed in Single Room Occupancy (SRO). While SROs are not homeless shelters, these decedents had been provided with temporary emergency housing and as such and according to Local Law No. 63 of 2005 (codified at New York City Administrative Code Section 17-190) definitions #2 Homeless shelter resident and #3 Homeless shelter were classified as homeless sheltered residents. See: <http://webdocs.nycouncil.info/attachments/66681.htm>

**HRA homeless sheltered deaths are reported separately and should not be added to other homeless sheltered deaths as there may be duplication. To comply with Article 27-F of the New York state Public Health Law which prohibits disclosure of any information that could reasonably identify someone having an HIV related illness or AIDS, personal identifiers on HRA homeless deaths were not provided; hence corresponding death certificates could not be reviewed to determine whether deaths were also reported by OCME
