**New York City Department of Health and Mental Hygiene**  
**Bureau of Vital Statistics**  
**Local Law 63 of 2005**  
**April 1, 2010 – June 30, 2010**

**Introduction.** This report has been prepared and submitted pursuant to Local Law 63 of 2005 (LL63) amending the Administrative Code of the City of New York to track and report deaths of homeless persons in the City of New York. Data contained in this report are for the quarter period of April 1, 2010 – June 30, 2010 and were provided by the NYC Office of Chief Medical Examiner (OCME), the NYC Department of Homeless Services (DHS), the NYC Department of Housing Preservation and Development (HPD), and the NYC Human Resources Administration (HRA) to the NYC Department of Health and Mental Hygiene (DOHMH).

DHS, HPD, and HRA maintain records on the homeless individuals for whom they provide temporary housing in New York City. OCME, through its responsibilities investigating New York City deaths, investigates the deaths of some homeless individuals. Data from these agencies were compiled, matched against NYC death certificates and analyzed by the DOHMH Office of Vital Statistics and are presented herein.

**Definitions.** As defined in LL63, a “homeless person” is a person who at the time of death did not have a known street address of a residence at which he or she was known or reasonably believed to have resided. A “homeless shelter resident” is “a person who at the time of death lived in a homeless shelter. A “homeless shelter” is “(i) a residence operated by or on behalf of the Department of Homeless Services; (ii) an emergency residence operated by or on behalf of the Department of Social Services/Human Resources administration which is available primarily for homeless persons with HIV or AIDS related illness; or (iii) a residence operated by or on behalf of the Department of Housing Preservation and Development to the extent that such residence houses clients of the Department of Homeless Services; provided, however that such term shall not include any residence that is available primarily for battered women.”

**Methods.** Based on definitions above, incident reports were provided by DHS, HPD, and OCME. Information from corresponding NYC death certificates were used to validate agency reports and remove any duplicates among them (i.e. when DHS cases are also OCME cases). HRA did not disclose any identifiable information on HRA homeless residents, per Article 27-F of the New York State Public Health Law, which prohibits disclosure of information that could reasonably identify someone as having an HIV-related illness or AIDS. As a result, HRA homeless deaths cannot be combined with DHS, HPD, and OCME deaths and total NYC homeless deaths cannot be ascertained.

## DEATHS OF HOMELESS PERSONS

\* All HRA deaths occurred to homeless placed in Single Room Occupancy (SRO). SROs are not considered homeless shelters by HRA, but they are included in this report because they are homeless shelter residents according to Local Law No. 63 of 2005 (codified at New York City Administrative Code Section 17-190) definitions #2 Homeless shelter resident and #3 Homeless shelter were classified as homeless sheltered residents. See: <http://webdocs.nyccouncil.info/attachments/66681.htm>. HRA homeless sheltered deaths are reported separately and should not be added to other homeless sheltered deaths as there may be duplication. To comply with Article 27-F of the New York state Public Health Law which prohibits disclosure of any information that could reasonably identify someone having an HIV related illness or AIDS, personal identifiers on HRA homeless deaths were not provided; hence corresponding death certificates could not be reviewed to determine whether deaths were also reported by OCME.
