Job Description

DoITT is responsible for modernizing, unlocking, and innovating to improve IT infrastructure and service delivery in New York City government. Modernizing by implementing state-of-the-art information technology to improve services to New Yorkers. Unlocking by making government more transparent and accountable to New Yorkers. Innovating by employing cutting-edge tools, methods, and relationships to empower New Yorkers.

The successful candidate will serve as a Senior .NET Development Manager reporting to the Enterprise Application Services division.
Responsibilities will include: Manage the development of server-side and client-side components for internal and external applications using .Net framework; write .Net applications using ASP.Net and C# based on established designed patterns and industry standards; develop new systems; work with Project Managers to determine timelines and project tasks; design new data models for new applications; deliver time lines based on function points; oversee requirements gathering process; set guidelines and standards for the .Net environment; assist QA to write test scripts for new systems; ensure that production support staff have proper information for deployment; oversee the creation and documentation of systems designs and architectures; communicate project status to Project Management staff, executive management, and other stakeholders; provide a leadership role within the team; prepare senior level technical reports for executive management; and manage special technology projects and initiatives as assigned. The position's responsibilities include commitment to and compliance with the City's EEO policy.

Qualification Requirements

1. A master's degree in computer science from an accredited college and three years of progressively more responsible, full-time, satisfactory experience using information technology in computer applications programming, systems programming, computer systems development, data telecommunications, database administration, planning of data/information processing, user services, or area networks at least 18 months of this experience must have been in an administrative, managerial or executive capacity in the areas of computer applications programming, systems programming, computer systems development, data telecommunications, data base administration, or planning of data processing or in the supervision of staff performing these duties; or
2. A baccalaureate degree from an accredited college and four years of experience as described in "1" above; or
3. A four-year high school diploma or its educational equivalent approved by a State's department of education or recognized accrediting organization and six years of experience as described in "1" above; or
4. A satisfactory combination of education and experience equivalent to "1", "2" or "3" above. However, all candidates must have at least a four-year high school diploma or its educational equivalent approved by a State's department of education or recognized accrediting organization and must possess at least three years of experience as described in "1" above, including the 18 months of administrative, managerial, executive or supervisory experience as described in "1" above.

NOTE: The following types of experience are not acceptable: superficial use of preprogrammed software without complex programming, design, implementation or management of the product; use of word processing packages; use of a hand held calculator; primarily the entering or updating of data in a system; the operation of data processing hardware or consoles.

Preferred Skills

The preferred candidate should possess the following: A Bachelor's degree in a related IT field; 6-8 years of web application development experience with at least 3 years of hands-on .NET; strong hands-on experience in ASP.Net and C# skills; experience in database design and creating stored procedure; experience in AJAX, JavaScript, HTML and CSS; strong leadership skills and experience managing a small team of developers; strong database experience in Microsoft SQL Server 2005/2008 or any other relational databases; experience architecting and designing large scale systems; experience with IIS server; hands-on experience in Microsoft Visio; knowledge of web services and SOA architectures; strong knowledge of XML, XSL and other internet technologies is a must; experience using Visual Studio 2005/2008 and CVS/VSS for development; must be able to work in cross functional teams to provide the best solution; proven background in the development and deployment of complex operational systems; knowledge of Java/J2EE is a plus; knowledge of Crystal Reports is a plus; strong communication and problem-solving skills; demonstrated experience working with technical and non-technical staff; exceptional knowledge of Microsoft Office programs; outstanding collaboration and team building skills; strong written and verbal communication skills; excellent analytic, organization, presentation and facilitation skills; ability to manage multiple tasks under tight deadlines; and ability to interface with executive level management and give senior level presentations.
