

Industry Notice # 06-14
For Immediate Release

(originally published) August 2, 2006

UPDATED – JANUARY 17, 2007

**NEW -- 2007 TOYOTA SIENNA CE
APPROVED FOR USE AS
A NEW YORK CITY TAXICAB**

**2007 STRETCH CROWN VICTORIA; FORD ESCAPE HYBRID
MODELS APPROVED FOR USE AS
NEW YORK CITY TAXICABS**

The New York City Taxi and Limousine Commission (TLC) today announced that, following a review of the specifications of the 2007 Toyota Sienna CE, 2007 Ford (Stretch) Crown Victoria Taxi Package, and the 2007 Ford Escape Hybrid-Electric, both of these vehicles have been found to meet the requirements for Safety and Emissions approval to become an authorized taxicab in the City of New York.

As with Toyota Highlander, Prius and Camry models, the 2007 Toyota Sienna CE will require the installation of a Modified Side Curtain Airbag Partition. With the prevalence of side curtain airbags, many new model vehicles will require the Modified Side Curtain Airbag Partition in the future. *If you have any questions about partition specifications, please call the Hack Site at 718-267-4501.*
