

The quality of life for our children, families, senior citizens, and the environment is declining, and it's getting worse.

The issues we face must be dealt with in a whole new and different perspective, and that I will do. That alone will bring about the positive changes we need to take us forward into the direction we need to go toward healing and improving the quality of life for all who live in our District.

Priorities must change. The focus must be on protecting our future by protecting our environment, our children, and the families they rely on.

Just as stable and intact families are vital to raising happy, healthy, successful children, furthering the conservancy of our environment, coupled with cultivating true and wholesome family values, will create

future generations of happy, healthy citizens, hence, thriving communities that are conducive to life.

Many of you whom I have met have lost faith in those elements that make up what democracy should truly be, and I understand; and that is why I am running for office to effect the changes necessary, to bring back Democracy, a true commitment to public service, a genuine partnership between you and your elected official. Power back to the people where it belongs.

For many of you, it will take an act of faith so that we can begin to affect change. Vote; it is the only part of the political process that we have as citizens. You have the power to put someone you can trust into office, and it is up to that person you put into office to remain connected with you and to make certain that it is your voice that is heard.

As your servant, I promise to work hard so that we strengthen and serve one another as we strive to build our community into its truest form.

Please, vote for Juan Pagan.

Thank you.
