

Overview and Definitions

#### Overview

The Foster Care Scorecard is an annual summary of the performance of foster care programs serving New York City's youth and families. In New York City, the Administration for Children's Services manages the foster care system, under State oversight, and contracts with nonprofit organizations who provide services to children and families.

The Foster Care Scorecard is one of many tools that ACS uses to monitor foster care agencies closely, identify areas for improvement, and track ongoing compliance with required changes to practice. The scores alone do not tell the full story of provider performance; they must be combined with other sources of information to fully assess performance, such as the varying complexity of the children and families served by each agency.

During the last two years, under the leadership of Commissioner David A. Hansell, ACS has increased accountability and practice improvement mechanisms for foster care agencies, including by introducing a new mandated safety improvement planning process for any agency with a critical incident, a safety practice concern, or a low safety score on Scorecard. In addition to the Foster Care Scorecard, ACS' monitoring and accountability mechanisms include:

- Monthly safety checks of each provider agency (conducted by ACS)
- Monthly performance data reports on key indicators for each provider agency
- Child-specific safety and risk alerts by ACS monitors that must be addressed immediately by provider agencies
- Twice-yearly audit of a statistically valid sample of cases for each provider agency

A Scorecard is issued for each foster care program. There are four types of foster care programs in New York City:

- Family Foster Care, which is the most common type of foster care and involves youth who are living in homes with foster parents
- Treatment Family Foster Care, which involves youth who are living in homes with foster parents and receiving additional supportive services, most often behavioral health services
- Specialized Family Foster Care, which involves youth who are living in homes with foster parents and receiving support for medical issues or developmental disabilities
- Residential Services, which are facilities where groups of foster children live together and receive support from on-site staff

It is not unusual for one nonprofit organization to operate multiple types of foster care programs. The Foster Care Scorecard assesses contracted nonprofit providers' performance across all four types of foster care, in both process and outcome measures. The Scorecard measures and reflects both systemwide performance and individual provider performance.

For FY2018, under the leadership of Commissioner David Hansell, ACS made adjustments to how scores are measured and reported. These adjustments were made in order to give agencies a more accurate view of their performance and strengthen ACS' ability to use the Scorecard to help agencies improve. The adjustments also make it difficult to compare this year's Scorecard to last year's.

ACS uses the Foster Care Scorecard to identify issues to address both systemwide and with specific foster care agencies. For example, ACS recently instituted systemwide training on conducting and documenting safety and risk assessments. When foster care agencies have substandard performance on the Scorecard, they are placed on heightened monitoring or corrective action status, which requires them to have improvement plans in place that are monitored closely. ACS reviews the outcome data and case audit findings with provider agencies every quarter, to identify issues and address them directly.

Overall, the FY2018 Foster Care Scorecard shows strong system-wide performance in key areas. Most notably:

- Whenever ACS identifies possible neglect or abuse in a foster home, Child Protective Specialists complete a full investigation. In such cases, if concerns are identified, they are addressed and the children are confirmed to be safe. Sometimes, this requires moving a child to a new home or excluding a specific adult from a home. Systemwide, across all types of foster care, foster care placements are safe and healthy for nearly 100% of children.
- In nearly all cases across all types of foster care, nonprofit agencies' caseworkers have frequent face-to-face contact with children. This is critical for ensuring that children are safe and fully supported in foster care.
- During ACS audits and safety checks, if a reviewer finds case contacts are not fully documented, the reviewer issues an alert and the provider must immediately respond to confirm the child has been seen and is safe. In most cases, these concerns turn out to be problems with documentation, which will reduce a provider agency's score on Scorecard.
- Across all types of foster care, virtually all children are being assessed appropriately for physical and emotional wellbeing, and their needs were being met.
- Permanency planning practice is also ranked very high, with most children in all types of foster care having permanency plans in place that are appropriate for their needs (permanency plans may include reunification, adoption, kinship guardianship, etc). All permanency plans are also reviewed by the Family Court at regular permanency hearings.

#### FY2018 Foster Care Scorecard Definitions

The Foster Care Scorecard is an annual summary of the performance foster care programs serving New York City's children and families. The Foster Care Scorecard distinguishes four types of foster care programs. These include Family Foster Care (FFC), Treatment Family Foster Care (TFFC), Specialized Family Foster Care (Special Medical and Developmentally Disabled Foster Care, or SFFC), and Residential Services (RES). The Scorecard evaluates outcome measures and case practice in the domains of safety, permanency and well-being of some of the city's most vulnerable young people. Below are brief definitions of the Foster Care Scorecard measures. For each of the measures below, a higher rate indicates better performance. Please note that not all measures are applicable to all programs. FFC programs are ranked according to their practice area performance (Safety, Permanency, and Well-being).<sup>1</sup>

#### SAFETY - Practice Measures<sup>2</sup>

- Safety of Current Placement This measure evaluates whether the current foster care placement is a safe and healthy setting for each child.<sup>3</sup>
- **Risk Assessment** This measure evaluates if the Risk Assessment Profile and the Family Strength, Need and Risk assessments are consistent with the case circumstances.<sup>3</sup>
- **Frequency of Casework Contacts with Child** This measures the frequency of face-to-face contacts between the caseworker and the child.<sup>3</sup>
- Frequency of Casework Contacts with Caretaker This measures the frequency of face-to-face contacts between the caseworker and the person/people responsible for the child's day-to-day care (e.g., foster parent or child care worker).<sup>3</sup>
- **Foster Parent Training & Certification** This measures the degree that foster homes have the appropriate documentations of training and home finding processes that are required for certification.

#### **SAFETY – Process Measures**

- **Timeliness of Foster Home Certification** This measure evaluates the timeliness of initial certifications for kinship emergency homes and the re-certification of foster homes with a child placed.
- Frequency of AWOL This measure reports the rate at which youth in care did <u>not</u> experience any AWOL episode during the year.<sup>4</sup>
- **Responsiveness to OSI Corrective Action Plan** This measure evaluates the timeliness and completeness of provider responses to OSI corrective action plans involving indicated SCR cases.

#### **SAFETY – Outcome Measures**

- **Maltreatment in Care** This measure represents the percent of foster homes that did <u>not</u> have an indicated SCR investigation involving a foster parent. The cohort for this measure includes foster homes in active status for at least 30 days during the fiscal year.
- **Subsequent Maltreatment** This measures the rate at which children did <u>not</u> experience an indicated maltreatment investigation within one year of a permanency discharge.

#### **PERMANENCY - Practice Measures**

- Parent Child Visitation This measures the appropriate progression of the parent-child visiting plan.<sup>3</sup>
- **Family Team Conferencing** This measure evaluates the appropriateness of the permanency plan discussed at family team conferences and the degree to which the agency took concrete steps toward implementation.<sup>3</sup>
- Service Planning This measure evaluates the degree to which Family Assessment and Service Plans (FASP) accurately capture the improvements and changes that need to be made to achieve permanency, improve child wellbeing and address the identified service needs.<sup>3</sup>
- **Permanency Planning** This measure evaluates the degree to which the child's Permanency Planning Goal is consistent with case circumstances.<sup>3</sup>
- **Frequency of Casework Contacts with Parent/Discharge Resource** This measure evaluates the frequency of faceto-face contacts between the caseworker and the child's discharge resource (e.g., parent or relative).<sup>3</sup>

<sup>&</sup>lt;sup>1</sup> Small programs (census of less than 100 children) are excluded from ranking. Scores marked as "N/A" indicate that the sample was too small to be evaluated.

<sup>&</sup>lt;sup>2</sup> Practice measure are derived from a review of case records.

<sup>&</sup>lt;sup>3</sup> This measure is based on a statistically significant sample of cases reviewed.

<sup>&</sup>lt;sup>4</sup> For residential programs this measure is included in the Safety Outcome domain.

- Frequency of Parent and Child Visits- This measure evaluates the frequency of face-to-face visits between child and his/her discharge resource (e.g., parent or relative).<sup>3</sup>
- **Timeliness of FASP Approval** This measures the rate of timely approval of the Family Assessment and Service Plans (FASP).

#### **PERMANENCY – Process Measures**

- Length of Trial Discharge This measures the percent of children on trial discharge who are final discharged within 6 months.
- Freeing for Adoption This measure represents the rate at which children who were in foster care on the first day of FY18, and who had either a TPR or a KinGap agreement filed (prior to FY 18), were freed for adoption, had a KinGap agreement finalized, or were discharged to permanency by the end of the year.

#### **PERMANENCY – Outcome Measures**

- Achievement of Adoption Target- This measures the achievement of adoption targets set by ACS.
- Achievement of KinGap Target- This measures the achievement of KinGap targets set by ACS.
- **Permanency for children in care for less than 12 months-** This measure represents the achievement of permanency within one year for children who entered foster care during FY 17. The percent reported is out of a permanency discharge target of 36%. (Target set by OCFS for NYC to avoid Performance Improvement Plan).
- **Permanency for children in care 12 to 24 months** This measure represents the achievement of permanency within one year for children who were in foster care for 12 to 24 months on the first day of FY 18. The percent reported is out of a permanency discharge target of 42%. (Target set by OCFS for NYC to avoid Performance Improvement Plan).
- **Permanency for children in pare for over 24 months** This measure represents the achievement of permanency within one year for children who were in foster care for more than 24 months on the first day of FY 18. The percent reported is out of a permanency discharge target of 36%. (Target set by OCFS for NYC to avoid Performance Improvement Plan).
- **Re-entry** This measure represents the rate at which children who were discharged to reunification or KinGap did <u>not</u> re-enter foster care within one year of their discharge.

#### Wellbeing -- Practice Measures<sup>2</sup>

- **Physical and Emotional Well-being** This measure evaluates the degree to which the child's physical health, emotional/ psychological well-being, developmental functioning and social/behavioral well-being were assessed.<sup>3</sup>
- Educational Well-being- This measures enrollment in a school or educational/vocational program/day treatment program; ongoing communication between the child's teacher and the caseworker; receipt of remedial assistance as needed; and parental involvement in educational decision-making.<sup>3</sup>
- Recreational Well-being- This measures the child's participation in recreational and leisure activities.<sup>3</sup>
- **Frequency of Sibling Visits** This measures the rate of face-to-face visits between the child and siblings, when applicable, who are in foster care but who have been placed in separate foster care settings.<sup>3</sup>

#### Wellbeing – Process Measures

- Medical Review This measure evaluates documentation of medical and mental health services provided during the year.
- **Preparing Youth for Adulthood** (PYA) **Checklist** This measures the timely submission of PYA Checklists. This measure is FYI only and is not included in the aggregation of scores.
- **Transition to Kinship Placement** This measure represents the achievement of a 12% target set by ACS regarding the transition of children placed in non-kinship foster homes to kinship foster homes within 45 days.
- **Sibling Placements** This measures the rate at which sibling groups who enter foster care together are placed in the same foster home.

#### Wellbeing – Outcome Measures

- **Placement Stability** This measures the rate at which children did not experience a placement transfer during the fiscal year.
- **Step-Ups** This measures the rate at which children in family-based foster care remained in a family-based setting and did not move into a higher level of care.
