NEW YORK, NY 10007
212 669-7900 (Office)

Record of Variance Action for January 13, 2026 Public Meeting

This variance allows the Correctional Health Services to use either interferon gamma release assays (IGRA) or tuberculin skin test (TST) for tuberculosis screening, and to exempt from repeat screening those prisoners who have a documented negative test in the six months prior to their admission.

Type of Variance: Limited

Date on which variance will commence: January 13, 2026

Time period, if any: 12 months, ending January 13, 2027

Minimum Standard for which Variance is Granted: 3-04(b)(2)(v)(A)

Date on which Board of Correction first approved variance (for renewals only): July 22, 2013

Requirements imposed as conditions on variance: None
