Non-uniform DOC staff with confirmed COVID-19 (cumulative)	110	110	110	110	110	110	110

* The number of patients under observation referred to the number of confirmed and symptomatic COVID-19 patients in DOC facilities, excluding hospitalizations. CHS stopped reporting the number of patients under observation on August 3rd, 2020. When the metric was developed, it was based on the number of people in housing areas with a COVID-19 designation. Because the spread of coronavirus in the jails has slowed, contagious disease units are no longer guaranteed to solely contain patients who have been diagnosed with, symptomatic, or exposed to the virus. As such, this metric is no longer an appropriate proxy for the number of infectious cases. As of August 21st CHS started publicly reporting the "Total number of current patients ever confirmed positive while in custody with active infection," on its website every Monday, Wednesday, and Friday on the CHS homepage under "CHS COVID-19 Data Snapshot."

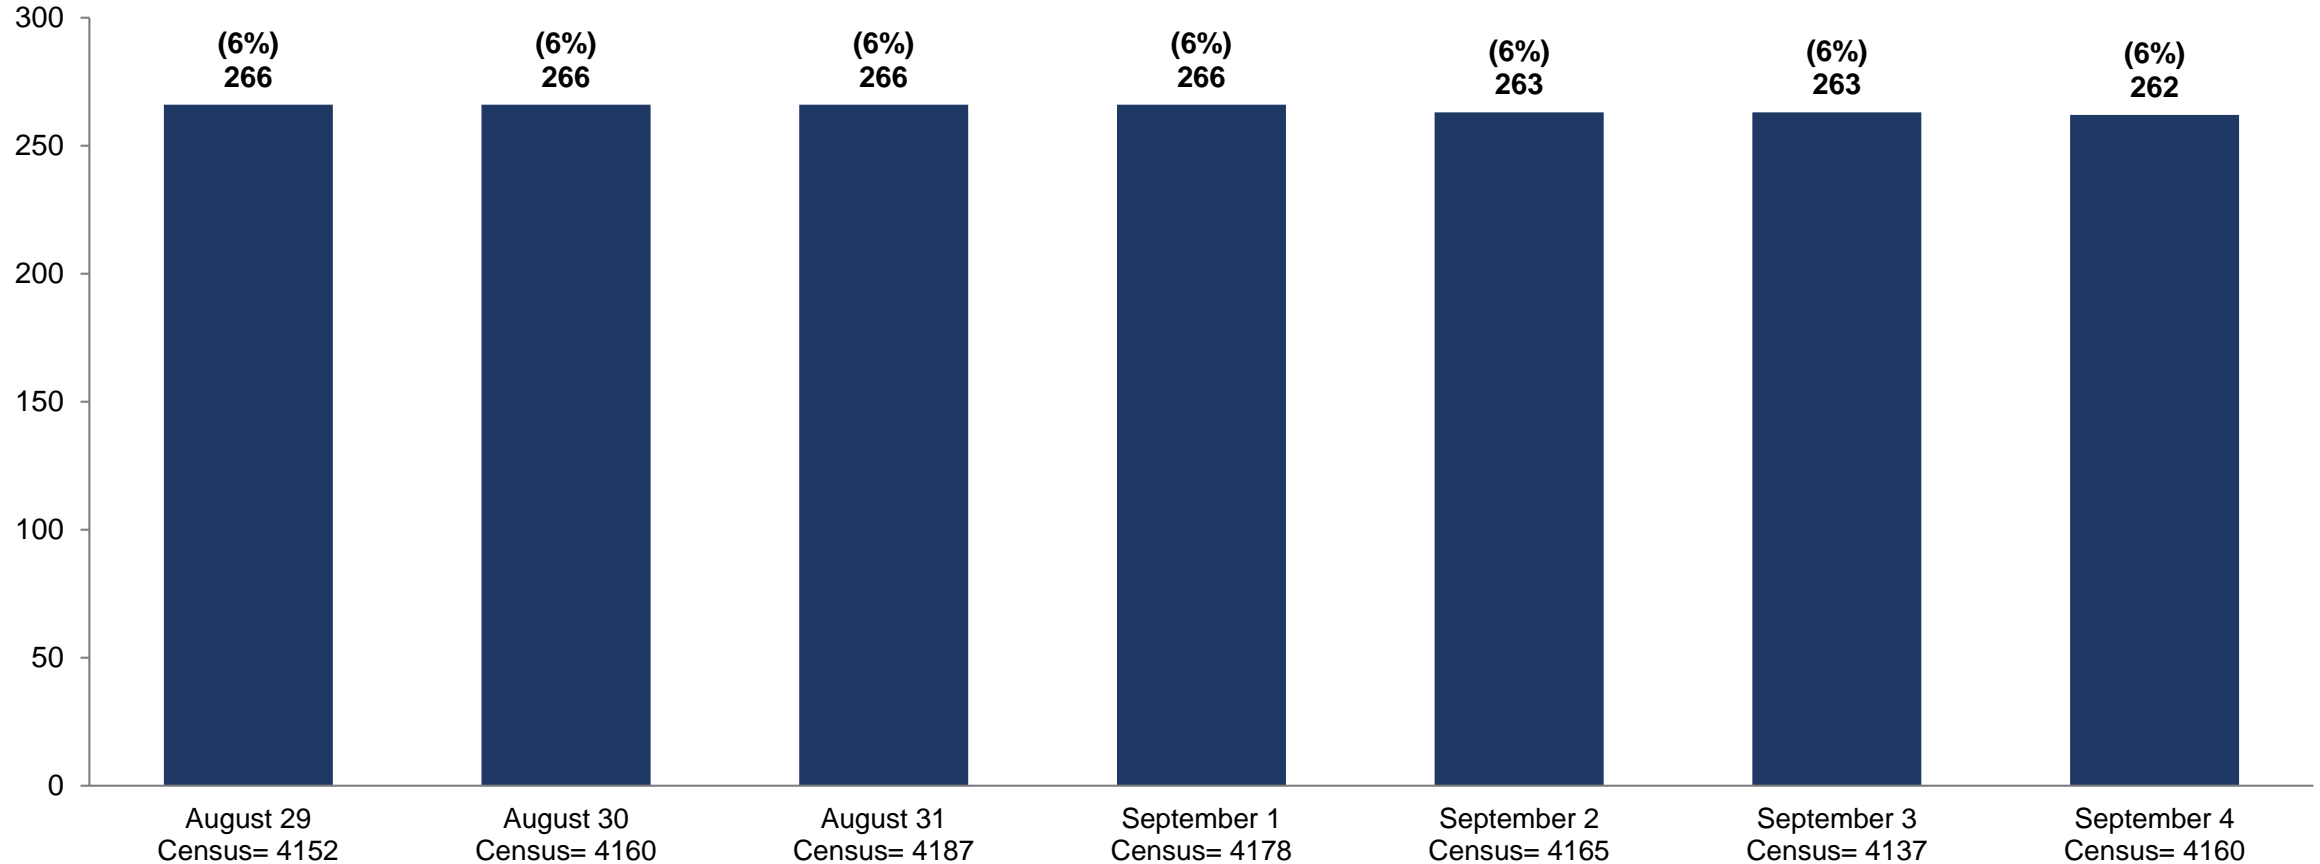

** This metric includes hospitalized as well as recovered patients.

*** The number of CHS patient deaths does not include patients who may have been diagnosed and treated while in custody and died post-release.

* The figures above reflect the number of confirmed COVID-19 patients who were currently incarcerated as of each date.

II. CHS and DOC Updates to BOC: Staff with Confirmed COVID-19 (cumulative)

* CHS and DOC report the cumulative total of staff members who have tested positive for COVID-19. CHS does not report the cumulative total of incarcerated people who have tested positive for COVID-19; therefore, it would be inappropriate to compare staff totals to the number of currently incarcerated patients with COVID-19 in slide 15.

Percentage of People in Custody in Housing Areas with a COVID-19 Designation
March 16 – September 4, 2020

¹ DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

III. Housing: Housing Density

Number and Percent of Open Cell and Dorm Units Above and Below 50% Capacity
September 3, 2020

NOTES:

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
- 2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

SOURCE: BOC analysis of DOC 5am census reports and DOC designed capacity data.

III. Housing: Housing Density

Number and Percent of Open Units Above and Below 50% Capacity by Housing Category
September 3, 2020

NOTES:

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
- 2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).
