

Public Realm

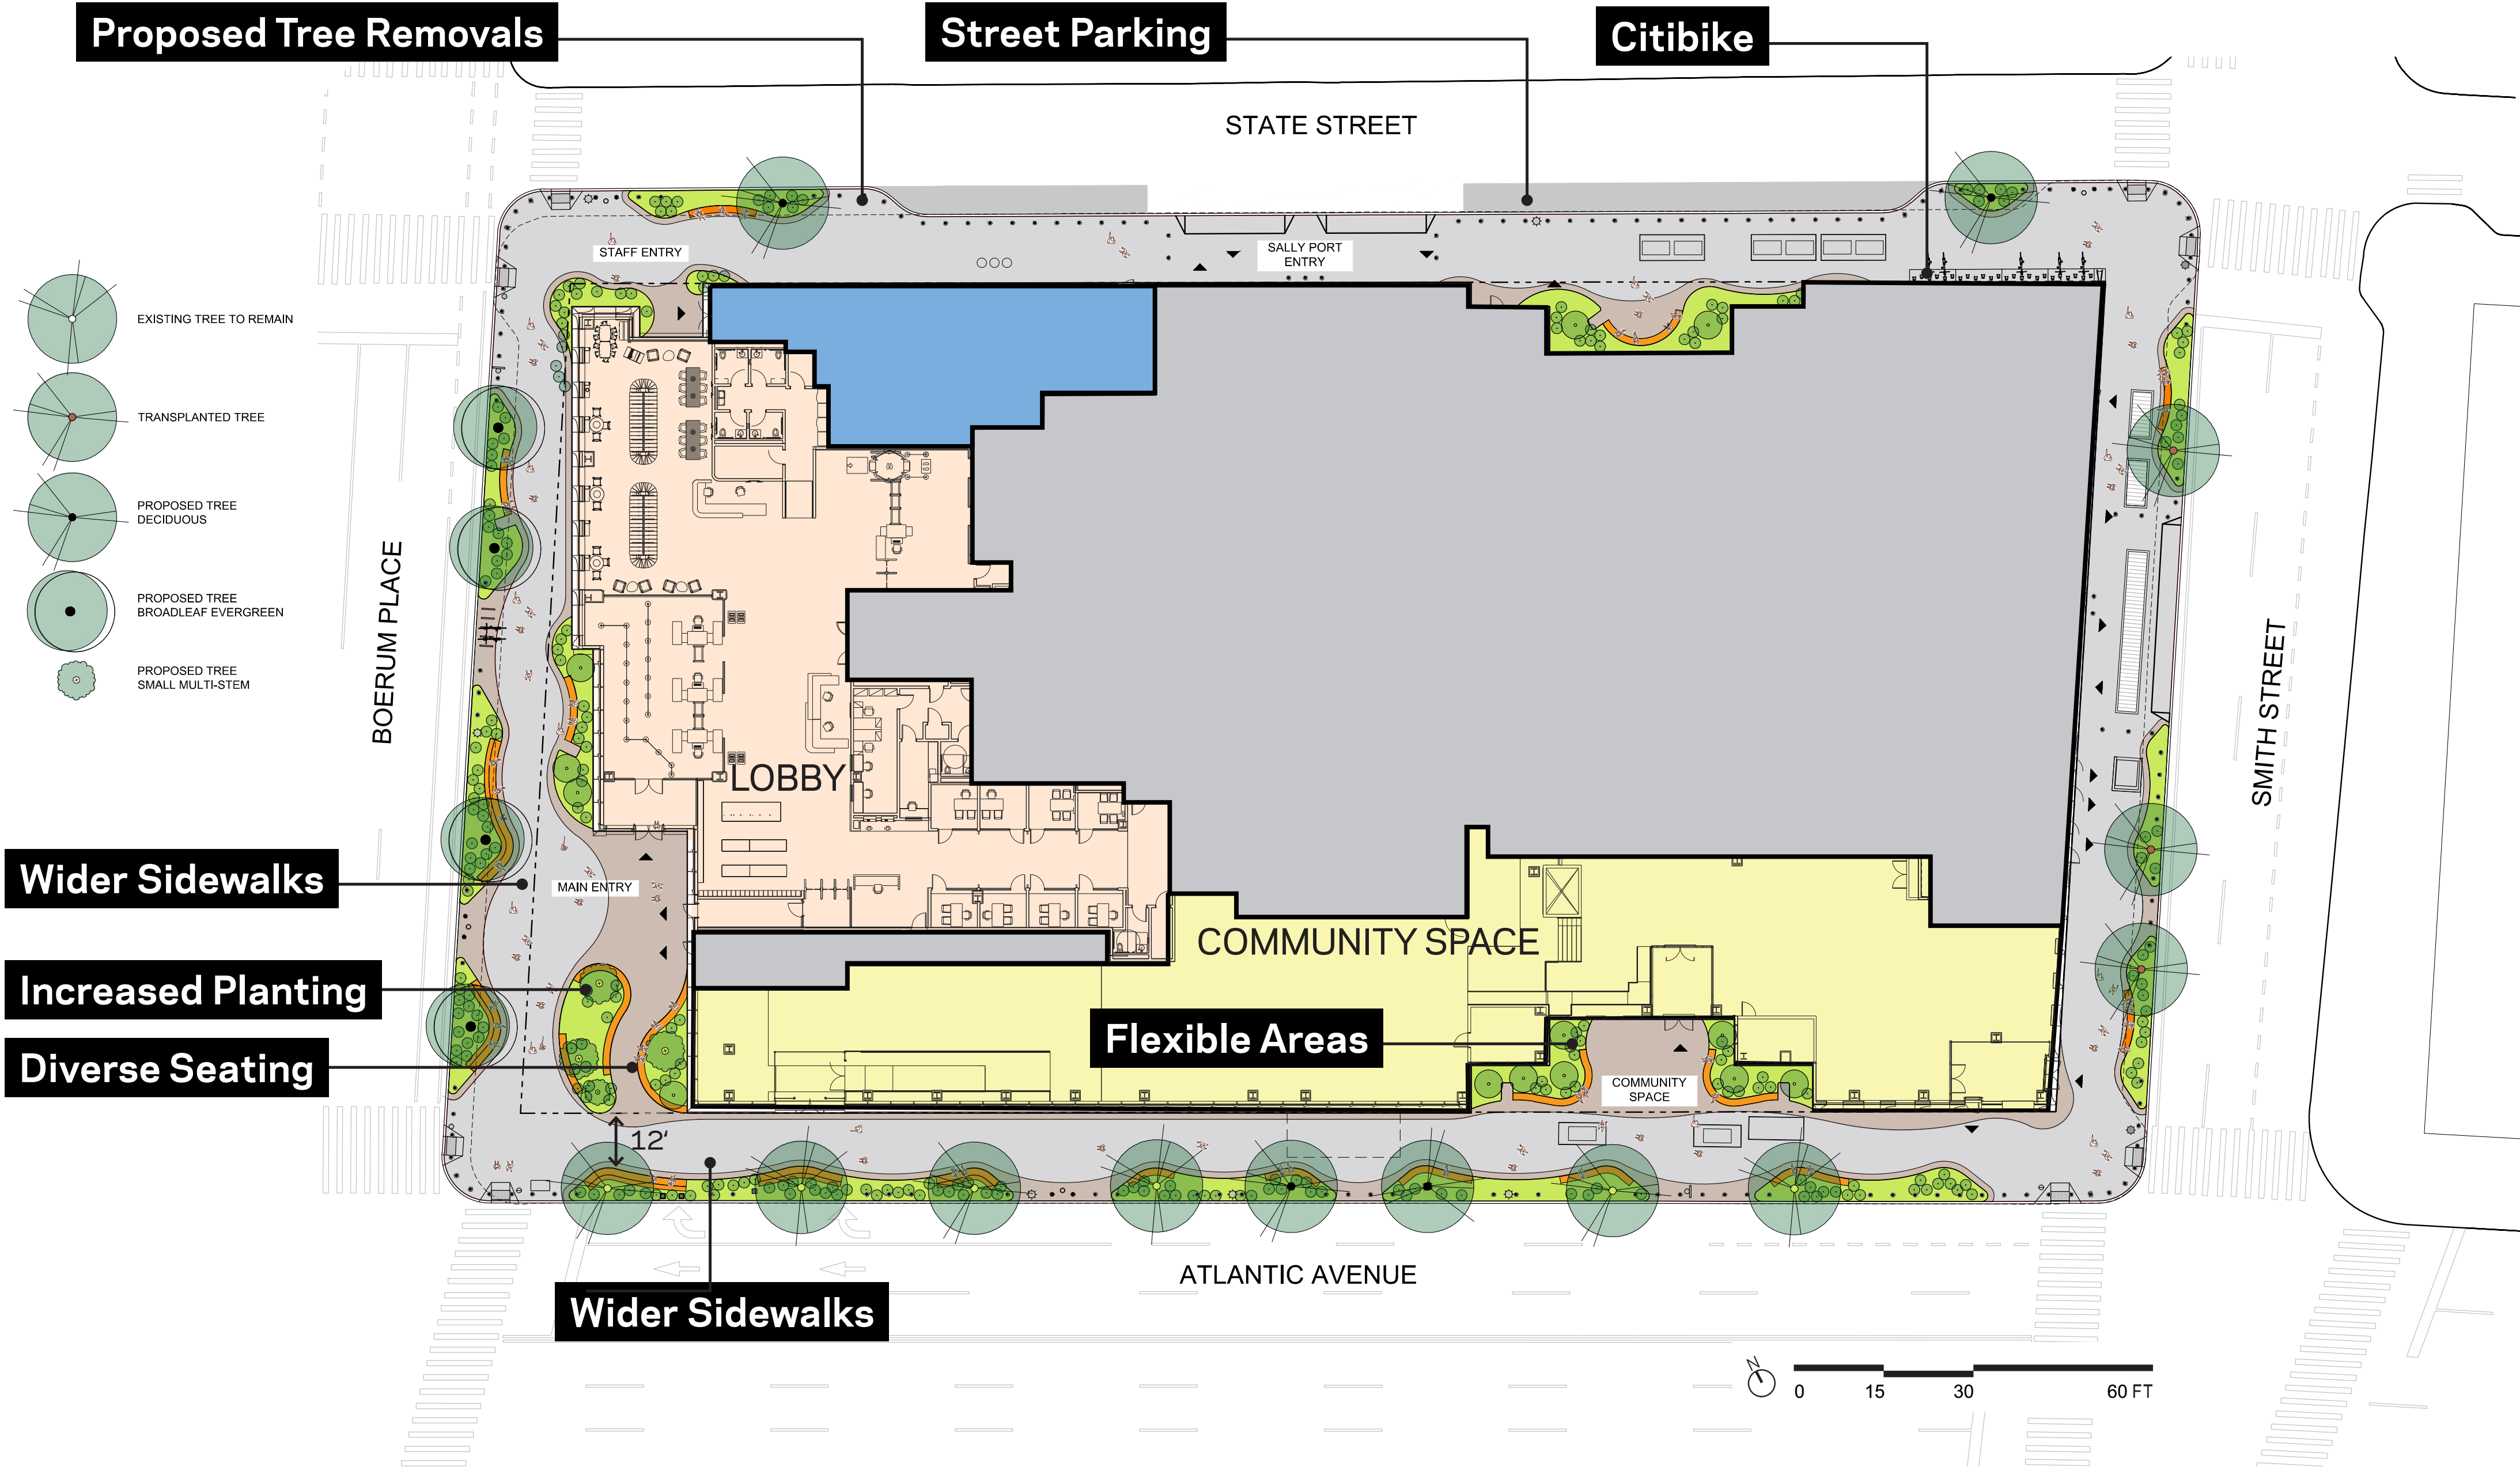

Creating a New Vision for the Public Realm Together

Workshop #2 site plan

Workshop #1+2 findings

Site plan

*Preliminary illustrations for discussion purposes only. Materials, color and furniture will continue to be explored.

- 1 Improving the pedestrian environment, particularly at the intersection of Atlantic Avenue and Boerum Place. Wider sidewalks have been provided to the streetscape. Landscape security barriers are softer and integrated into the planters while reducing the visual weight of these elements.
- 2 Increased planting zones have been provided throughout the streetscape.
- 3 Outdoor spaces also serve as therapeutic landscapes that can help calm visitors, staff, and the people in custody. Landscape design should feel safe, native, and well-maintained along the public edges in downtown Brooklyn.
- 4 A variety of seating supports neurodiverse (people experience and interact with the world in different ways) and multi-generational social interactions.

*Preliminary illustrations for discussion purposes only. Materials, color and furniture will continue to be explored.

Architecture

Creating a Human-Centric Architecture

- 1 Designing for the human scale is a favored universal design strategy. Designing appropriate eye-level details and warm materiality has been incorporated into most elements of the Facility.
- 2 Recreation yards at the center of the building were appreciated to respect the privacy of neighboring residents. To further increase privacy, recreation yards on the east have also been configured towards the center of the building with tall screening to minimize cross-viewing.
- 3 Through the Percent for Art program, the Facility will incorporate art. City agencies will also seek community engagement through the process.
- 4 LEED Gold Certification is seen as a positive credential from the community. Many sustainability topics are addressed such as bird mitigation, overshadowing, photovoltaics, and light pollution.
- 5 Design is based on principles of dignity, respect, and rehabilitation. The Facility will include programming for education, counseling, and horticulture.

Residential Buildings Around The Site View From South West

Public Realm & Architecture

Q: How can we further refine seating types, and locations, around the site?

Q: Do the eye level details along the building provide a human centric experience? Does the materiality of the canopy contribute to a warm and welcoming environment in the public space?

Other

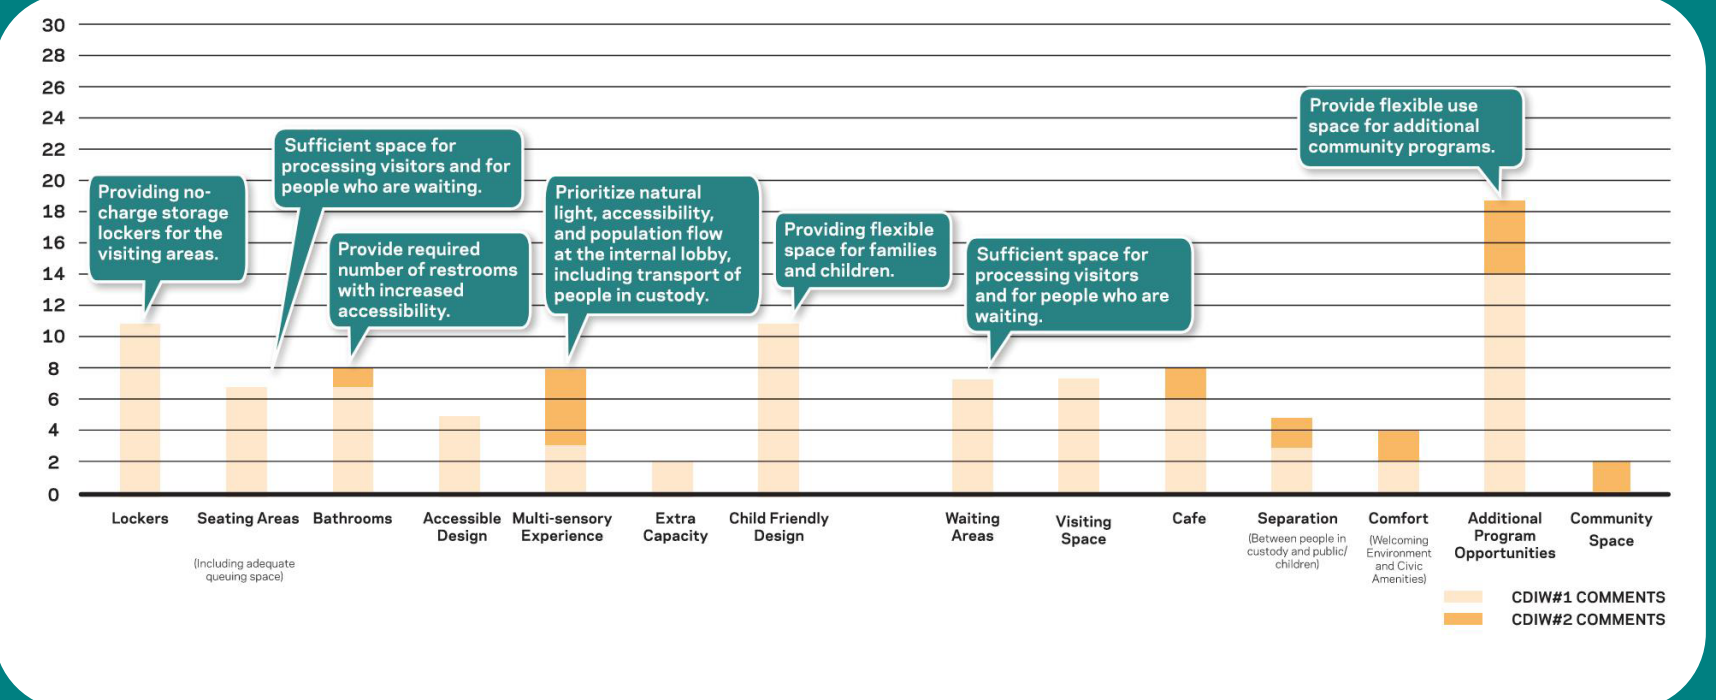

Interior Public Spaces

Lobby Experience

- 1 Multi-sensory experience with access to natural light and warm materials is an essential feature for the proposed Facility. Universal design has been implemented through the Facility.
- 2 Welcoming entrances and clear visitor flow have been provided.
- 3 Adequate space for visitors has been provided both for queuing and seating in waiting areas. This was to ensure that visitors would not need to wait outside.
- 4 Lockers and restrooms with accessible design have been provided.
- 5 Flexible community space is provided in the building. Additionally, the lobby includes space for social services.

Non-Contact Visiting

Contact Visiting

Interior Public Spaces

Q: Do the public spaces make the visitor feel welcome? Do the spaces provide a calm, safe, stress reducing and normalized environment?

Q: Is circulation clear to the public? (Visitor Waiting, Information Desk, People in Custody Release, Support Spaces)

Other

Interior Spaces

Typical Cell Space & Horticulture Program

- 1 Human-centric design is focused on dignity and respect for people in custody. All housing units will have increased access to medical/mental health treatment areas in the cluster.
- 2 Direct access to outdoor space is provided in every living unit. A horticulture program is provided in the Facility.
- 3 All living areas have clear sightlines providing a safe environment for people in custody. Additionally, there are no vertical bars at the windows.
- 4 All housing cells have windows and access to direct daylight. All living spaces have access to daylight.
- 5 Program spaces are provided with all living spaces. Additionally, the Facility hosts a wide variety of programs including horticulture, culinary arts, library, chapel, gymnasium, medical facilities, etc.

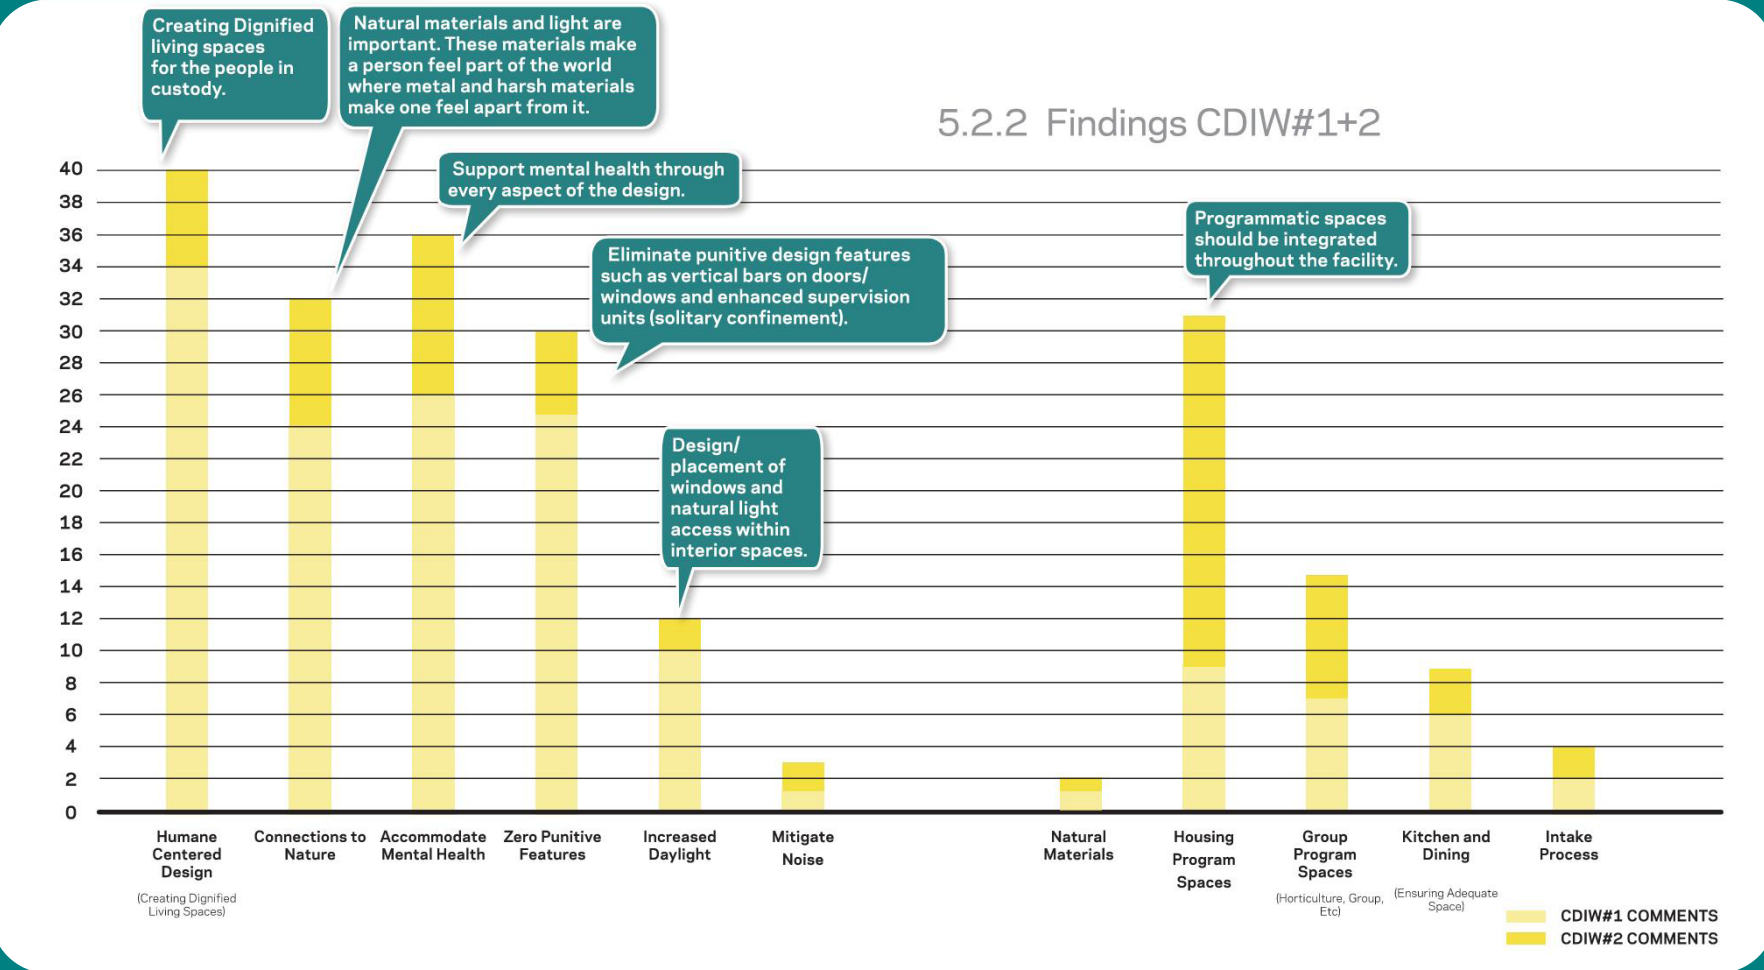

*Preliminary illustrations for discussion purposes only. Materials, color and furniture will continue to be explored.
