

**A set of digital color digital photos must be submitted with each application, depicting the conditions in and around the subject site:**

- A key site plan map must be provided showing the project location and list the number and location for each photograph.
- The date the photos were taken and the photographer's name should be listed.
- Photographs must show both the direct view of the full frontage of the property, context views of the site taken along the subject street, and adjoining conditions on each side of subject property;
- If relevant to the action, provide on-site photographs, including yards, parking areas, landscaping, and building interiors;
- As applicable, provide photos of the interior of the lot and perimeter of the property, showing site conditions.
- The front of each photograph must be properly labeled to include the street, the actual site in question and compass points;
- For Special Order Calendar sites, photos must show compliance with the Board's conditions. For example, show the surfacing of the lot, screening, fences, landscape areas, sidewalks, curbs and curb cuts.
- For statutory vesting cases, the site photos provided to document construction completion shall have been taken prior to the effective date.
