# Learning Objectives

- Participants will examine local law amendments to chapter one of Title 28 the New York City Construction Codes and understand how they regulate the design of new buildings and alterations to existing buildings thereby ensuring safe construction.
- Participants will review recent local law amendments to the New York City Building Code as they pertain to new safety enhancements in the use, occupancy, egress and accessibility design requirements.
- Participants will analyze recent local law amendments to the New York City Building Code as it pertains to enhanced fire-safety design requirements for high-rise buildings, and updated structural design requirements for wind and seismic design of buildings.
- Participants will analyze recent local law amendments to the New York City Building Code Appendix G as it pertains to the most recent flood-resistant design requirements for safe construction in flood zones, including newly-designated flood hazard areas.
