Patricia Lancaster, FAIA, Commissioner
(212) 566-5000, TTY: (212) 566-4769

Pursuant to Administrative Code Section 27-131, the following equipment or material has been found acceptable for use subject to the terms and conditions contained herein.

MEA 542-06-E

Manufacturer: Rinnai New Zealand Ltd., 691 Mt. Albert Road, Royal Oak, Auckland, New Zealand for Rinnai Corp., 103 International Drive, Peachtree City, GA 30269

Trade Name(s): Rinnai PV2910

Product: Power direct-vent, fan-type fireplace

Pertinent Code Section(s): 27-800, 27-825, 27-826

Prescribed Test(s): RS 14-6 (ANSI Z21.88)

Laboratory: CSA International

Test Report(s): CSA Report No. 189893-177040497, dated August 8, 2006

Description: Power direct-vent, fan-type fireplace designed for indoor in-built installation. Unit is comprised of a power-vent system, sealed combustion chamber and heat exchanger assembly, main burner assembly, direct ignition system consisting of igniter, a flame sensor, ignition module, combination gas-pressure regulator and controls. Unit is provided with an overheat switch, fan switch and pressure switch. The model number and input heating rating are listed below

Model No.	Input Heating Rating Range (BTUH)
RHFE-750ETR-N, P	11,000 – 29,000

Minimum clearances in Inches are as follows:

- Top – 36"
- Front – 36"
- Mantle – 12"
- Left and Right – 12"
- Vent – 24"
- Floor – 0"

Terms and Conditions: The above-described power direct-vent fireplace is accepted for operation under the following conditions:

1. Units are for through-the-wall installation only.
2. Units shall use natural gas only.
3. Units shall be installed by a licensed plumber only, who shall insure that installation is provided with required unobstructed vent-opening and that all Gas Company requirements for this type of installation are strictly enforced.
4. If steel flue tube passes through a combustible wall, it must pass through a double metal thimble that is two inches larger than the flue.
5. Units shall not be installed behind doors, in an alcove or at locations where curtains or drapes can come into contact with them.
6. Gas pressure regulator shall be installed and gas inlet pressure shall be adjusted by the installer to give inlet pressure at the burner orifice recommended by the manufacturer.
7. A tag must be permanently affixed to the equipment stating that if installed in New York City within 100 feet of any dwelling unit window, there shall be compliance with all provisions of Section 27-770, as to maximum sound levels permitted for exterior mechanical equipment.
8. Approval of all electrical equipment, apparatus, materials and devices shall be obtained from the Department's Electrical Advisory Board before installation.
9. Units shall be used in compliance with the Energy Conservation Construction Code of New York State.
10. All shipments and deliveries of such equipment shall be provided with a metal tag, suitably placed, certifying that the equipment shipped or delivered is equivalent to that tested and acceptable for use, as provided in Section 27-131 of the New York City Building Code.

Final Acceptance 1/16/07
