

Alteration Checklist: Place of Assembly Certificate of Operation (PACO) Project Completion & Close-out

Project Checklists contain project-specific details as they apply to the scope of work of the project to provide compliance with the NYC Construction Codes and other regulations.

- ☑ Construction permits are not issued for Place of Assembly applications, as there is no construction work involved, but such applications are examined by DOB and given a status of **Completed**, if approved. However, a Place of Assembly requires that any existing or proposed construction comply with the [Zoning Resolution](#) and other regulations as applicable, and include such details in their Alteration or New Building submission.
