

Concrete Batch Date Cannot Exceed 24 Months

Effective immediately, all jobs that require a concrete mix design, per Building Code Table 1705.3 Item #5, are required to submit the completed [Technical Report Concrete Design Mix \(TR3\) Form](#) prior to the concrete batch date having exceeded 24 months, as per BC §1905.3.3.

DOB will only accept a TR3 form with a concrete batch date older than 24 months if the applicant submits a Determination granting a variance of the Building Code (BC). Determination requests are submitted in DOB NOW. For instructions on how to submit a Determination request, visit the [Determinations page](#).
