

SERVICE NOTICE

Full Implementation of the Worker Wallet Card

Effective July 1, 2025, the Worker Wallet will be the **ONLY** worker qualification card accepted, for the below listed certifications, on construction sites throughout New York City.

Construction workers will be required to present a Worker Wallet Card as proof of their training certifications to perform specific tasks or operate certain types of equipment (i.e., scaffolds). Employers must accept the Worker Wallet as valid verification of a worker's qualifications. The Worker Wallet replaces the need to carry multiple certification cards by consolidating the below approved training credentials into a single, secure card. Each card is verifiable through the **Training Connect App**. Please note, **SST cards must still be presented in addition to the worker wallet card.**

The following certifications will be included in the Worker Wallet:

- Mast Climber User/Operator and Refresher
- Climber/Tower Crane Rigger
- Rigging Supervisor
- Rigging Worker
- Supported Scaffold User
- Supported Scaffold Installer & Remover
- Suspended Scaffold User
- Suspended Scaffold Supervisor
- Periodic Gas Piping Inspector

All previously issued individual worker qualification cards for the above-listed certifications must be replaced by the Worker Wallet no later than **July 1, 2025**, to perform work requiring any of these credentials. Only Registered Course Providers may issue Worker Wallet Cards.

NOTE: Course Providers may charge an administrative fee to issue the card.

The Worker Wallet Card does not replace the SST Card.
