OLR desires to select a vendor to perform healthcare actuarial analysis for cost containment purposes, which will provide critical information to OLR to define and evaluate the programs associated with proposed changes to the City's current health benefits delivery system and financing model. The decisions involve proposed new financing and delivery arrangements, such as self-insurance, on-going dependent eligibility verification audits, capping of healthcare carrier rates, marketing plans, and innovative and more effective delivery and financing of healthcare to City employees. The actuary may be asked to collect and accumulate data from the various health benefits providers so that comprehensive analysis can be developed by line of coverage (e.g., PMPM data by medical, Rx, etc.) and comparative analysis and benchmarking can be done to determine the most significant areas to be addressed and establish priorities for cost containment initiatives.

The complexities surrounding the rules and regulations which govern employee health benefits programs and the uniqueness, size and security requirements of the City's Health Benefits Program, there are a limited number of vendors available that have the above capabilities and capacity to perform the above healthcare actuarial consulting work for the best value to the City.
