ARTICLE IV MANUFACTURING DISTRICT REGULATIONS

Chapter 1 Statement of Legislative Intent

41-00 GENERAL PURPOSES OF MANUFACTURING DISTRICTS

The Manufacturing Districts established in this Resolution are designed to promote and protect public health, safety, and general welfare. These general goals include, among others, the following specific purposes:

- (a) To provide sufficient space, in appropriate locations, to meet the needs of the City's expected future economy for all types of manufacturing and related activities, with due allowance for the need for a choice of sites.
(b) To provide, as far as possible, that such space will be available for use for manufacturing and related activities, and to protect residences by separating them from manufacturing activities and by generally prohibiting the use of such space for new residential development.
(c) To encourage manufacturing development which is free from danger of fire, explosions, toxic and noxious matter, radiation, and other hazards, and from offensive noise, vibration, smoke, dust and other particulate matter, odorous matter, heat, humidity, glare, and other objectionable influences, by permitting such development in areas where this Resolution restricts the emission of such nuisances, without regard to the industrial products and processes involved.
(d) To protect adjacent residential and commercial areas, and to protect the labor force in other establishments engaged in less offensive types of manufacturing and related activities, by restricting those manufacturing activities which involve danger of fire, explosions, toxic and noxious matter, radiation and other hazards, or create offensive noise, vibration, smoke and other particulate matter, odorous matter, heat, humidity, glare, and other objectionable influences, to those limited areas which are appropriate therefor.
(e) To protect manufacturing and related development against congestion, as far as is possible and appropriate in each area, by limiting the bulk of buildings in relation to the land around them and to one another, and by providing space off public streets for parking and loading facilities associated with such activities.
(f) To protect the character of certain designated areas of historic and architectural interest, where the scale of building development is important, by limitations on the height of buildings.
(g) To protect light manufacturing and to encourage stability and growth in appropriate mixed-use areas by permitting light manufacturing and controlled residential uses to co-exist where such uses are deemed compatible.
(h) To promote the most desirable use of land and direction of building development in accord with a well-considered plan, to promote stability of manufacturing and related development, to strengthen the economic base of the City, to protect the character of the district and its peculiar suitability for particular uses, to conserve the value of land and buildings, and to protect the City's tax revenues.

41-10 PURPOSES OF SPECIFIC MANUFACTURING DISTRICTS

41-11 M1 Light Manufacturing Districts (High Performance)

These districts are designed for a wide range of manufacturing and related uses which can conform to a high level of performance

standards. Manufacturing establishments of this type, within completely enclosed buildings, provide a buffer between Residence (or Commercial) Districts and other industrial uses which involve more objectionable influences. New residences are excluded from these districts, except for:

- (a) joint living-work quarters for artists in M1-5B Districts;
- (b) dwelling units in M1-5M and M1-6M Districts;
- (c) dwelling units in M1-1D, M1-2D, M1-3D, M1-4D and M1-5D Districts, where authorized by the City Planning Commission, both to protect residences from an undesirable environment and to ensure the reservation of adequate areas for industrial development; and
- (d) dwelling units in M1-6D Districts.

**41-12
M2 Medium Manufacturing Districts (Medium Performance)**

[UPDATING TO REFLECT NEW M2A DISTRICTS AND EXISTING ALLOWANCES IN OTHER DISTRICTS]

These districts are designed for manufacturing and related activities which can meet a medium level of performance standards. Enclosure of such activities is not normally required except in areas along the boundary of a Residence District. No new residences or community facilities are permitted.

**41-13
M3 Heavy Manufacturing Districts (Low Performance)**

These districts are designed to accommodate the essential heavy industrial uses which involve more objectionable influences and hazards, and which, therefore, cannot reasonably be expected to conform to those performance standards which are appropriate for most other types of industrial development. No new residences or community facilities are permitted.

In all #Manufacturing Districts#, the obstructions set forth in Section 23-621 (General permitted obstruction allowances), as well as the following obstructions, shall be permitted to penetrate a maximum height limit or a #sky exposure plane# set forth in Sections 43-43 (Maximum Height of Front Wall and Required Front Setbacks), 43-44 (Alternate Front Setbacks), 43-46 (Height and Setback Provisions for Districts with an A suffix) or 43-49 (Limited Height Districts).

43-43

Maximum Height of Front Wall and Required Front Setbacks

M1 M2 M3

In all districts, other than districts with an A suffix, as indicated; if the front wall or any other portion of a #building or other structure# is located at the #street line# or within the #initial setback distance# as set forth in the table in this Section, the height of such front wall or other portion of a #building or other structure#, except as otherwise set forth in this Section, shall not exceed the maximum height above #curb level# set forth in the table. Above such maximum height and beyond the #initial setback distance#, the #building or other structure# shall not penetrate the #sky exposure plane# set forth in the table.

Alternate Front Setbacks

M1 M2 M3

In all districts, other than districts with an A suffix, as indicated, if an open area is provided along the full length of the #front lot line# with the minimum depth set forth in the following table, the provisions of Section 43-43 (Maximum Height of Front Wall and Required Front Setbacks) shall not apply. The minimum depth of such open area shall be measured perpendicular to the #front lot line#. However, in such instances, except as otherwise provided in this Section or in Sections 43-42 (Permitted Obstructions) or 43-45 (Tower Regulations), no #building or other structure# shall penetrate the alternate #sky exposure plane# set forth in the table in this Section. The #sky exposure plane# shall be measured from a point above the #street line#.

In an M1-6 District, if the open area provided under the terms of this Section is a #public plaza#, such open area may be counted toward the bonus provided for a #public plaza#, pursuant to Section 43-13 (Floor Area Bonus for Public Plazas) 43-14 (Floor Area Bonus for Public Plazas and Arcades).

Height and Setback Provisions for Districts with an A suffix

M1 M2 M3

[RELOCATING TO SECTION 43-47]

In all districts, as indicated, a #public park# with an area of between one and 15 acres shall be considered a #wide street# for the purpose of applying the height and setback regulations as set forth in Section 43-43 (Maximum Height of Front Wall and Required Front Setbacks) to any #building or other structure# on a #zoning lot# adjoining such #public park#. However, the provisions of this Section shall not apply to a #public park# more than 75 percent of which is paved.

For M Districts with an A suffix, the height of a #building or other structure# shall not exceed the maximum base heights or maximum #building# height set forth in paragraph (a) of this Section. A setback is required for all portions or #buildings or other structures# that exceed the maximum base height specified in paragraph (a) and shall be provided in accordance with paragraph (b). In districts without a maximum height limit, the tower provisions set forth in paragraph (c) shall apply.

(a) Maximum base heights and maximum #building# heights

The table below sets forth the maximum base heights and maximum #building or other structure# heights.

MAXIMUM BASE HEIGHT AND MAXIMUM BUILDING HEIGHT

District	Maximum Base Height (in feet)	Maximum Height of #Buildings or other Structures# (in feet)
M1-1A M2-1A M3-1A	45	65

M1-2A M2-2A M3-2A	65	95
M1-3A M2-3A	95	125
M1-4A M2-4A	125	155
M1-5A	155	205
M1-6A	155	245
M1-7A	155	325
M1-8A M1-9A	155	N/A

In addition, for #zoning lots# with a #lot area# greater than or equal to 20,000 square feet, a #building# may exceed the maximum building heights established in such table by 25 percent.

(b) Any portion of a #building# above the maximum base height shall provide a setback with a depth of at least 10 feet from any #street wall# fronting on a #wide street# and a depth of at least 15 feet from any #street wall# fronting on a #narrow street#. However, such setback requirement may be modified as follows:

- (1) the depth of such required setback may be reduced by one foot for every foot that the #street wall# is located beyond the #street line#, but in no event shall a setback of less than seven feet in depth be provided, except as otherwise set forth in this Section. To allow #street wall# articulation, where a #street wall# is divided into different segments and located at varying depths from the #street line#, such permitted setback reduction may be applied to each #street wall# portion separately;
- (2) the depth of such required setbacks may include the depth of recesses in the #street wall# of the #building# base, provided that the aggregate width of any such recessed portion of a #street wall# with a setback less than seven feet, does not exceed 30 percent of the #aggregate width of #street wall# at any level; and
- (3) these setback provisions are optional for any #building# that either is located beyond 50 feet of a #street line# or oriented so that lines drawn perpendicular to it, in plan, would intersect a #street line# at an angle of 65 degrees or less. In the case of an irregular #street line#, the line connecting the most extreme points of intersection shall be deemed to be the #street line#;
- (4) dormers may penetrate a required setback area, provided that the aggregate width of all dormers at the maximum base height does not exceed 40 percent of the width of the #street wall# of the highest #story# entirely below the maximum base height#. Such dormers need not decrease in width as the height above the maximum base height increases.

(c) Towers

For #buildings# in M1-8A and M1-9A Districts, no maximum height limit shall apply. However, any portion of a #building# above a height of 350 feet shall have a maximum #lot coverage# of 50 percent of the #lot area# of the #zoning lot#.

(a) For #zoning lots# adjoining #public parks#

M1 M2 M3

In all districts, as indicated, a #public park# with an area of between one and 15 acres shall be considered a #wide street# for the purpose of applying the height and setback regulations as set forth in Section 43-43 (Maximum Height of Front Wall and Required Front Setbacks) to any #building or other structure# on a #zoning lot# adjoining such #public park#. However, the provisions of this Section shall not apply to a #public park# more than 75 percent of which is paved.

(b) For #zoning lots# containing certain #community facility uses#
M1

M1 M2 M3

In all districts, as indicated, #accessory# off-street parking spaces, open or enclosed, shall be provided in conformity with the requirements set forth in the table in this Section for all #development# after December 15, 1961, for the #manufacturing#, #commercial# or #community facility# #uses# listed in the table. In addition, all other applicable requirements of this Chapter shall apply as a condition precedent to the #use# of such #development#.

After December 15, 1961, if an #enlargement# results in a net increase in the #floor area# or other applicable unit of measurement specified in the table in this Section, the same requirements set forth in the table shall apply to such net increase in the #floor area# or other specified unit of measurement.

A parking space is required for a portion of a unit of measurement one-half or more of the amount set forth in the table.

For the purposes of this Section, a tract of land on which a group of such #uses# is #developed# under single ownership or control shall be considered a single #zoning lot#.

For those #uses# for which rated capacity is specified as the unit of measurement, the Commissioner of Buildings shall determine the rated capacity as the number of persons which may be accommodated by such #uses#.

The requirements of this Section shall be waived in the following situations:

- (a) when, as the result of the application of such requirements, a smaller number of spaces would be required than is specified by the provisions of Section 44-23 (Waiver of Requirements for Spaces Below Minimum Number);
- (b) when the Commissioner of Buildings has certified, in accordance with the provisions of Section 44-24 (Waiver of Requirements for All Zoning Lots Where Access Would Be Forbidden), that there is no way to arrange the spaces with access to the #street# to conform to the provisions of Section 44-43 (Location of Access to the Street);
- (c) for houses of worship, in accordance with the provisions of Section 44-25 (Waiver for Locally Oriented Houses of Worship).

For the purposes of applying the loading requirements of this Chapter, #uses# are grouped into the following Parking Requirement Categories (PRC) based on how requirements are measured. The specific designations for #uses# are set forth in the Use Group tables.

21-10 PURPOSES OF SPECIFIC RESIDENCE DISTRICTS

* * *

21-15 R3-2, R4, R4B, R5, R6, R7, R8, R9 and R10 - General Residence Districts

These districts are designed to provide for all types of residential buildings, in order to permit a broad range of housing types, with appropriate standards for each district on density, open space, and spacing of buildings. However, R4B Districts are limited to single- or two-family dwellings, and zero lot line buildings are not permitted in R3-2, R4 (except R4-1 and R4B), and R5 (except R5B) Districts. The various districts are mapped in relation to a desirable future

residential density pattern, with emphasis on accessibility to transportation facilities and to various community facilities, and upon the character of existing development. These districts also include community facilities and open uses which serve the residents of these districts or benefit from a residential environment.

R7-3 and R9-1 Districts may be mapped only as specified in this paragraph. Such districts may be mapped within the waterfront area and in the Special Mixed Use Districts and Mandatory Inclusionary Housing areas. In addition, R7-3 Districts may be mapped in the Special Long Island City Mixed Use District and Special St. George District, and R9-1 Districts may be mapped in Mandatory Inclusionary Housing areas.

PRE-QUALIFIED LIST (PQL) PROGRAM FOR VARIOUS TRADES

NYCHA is currently accepting applications for Pre-Qualified List (PQL) program for various trades.

A PQL is a tool that NYCHA will use to qualify vendors and contract goods or services for its developments, streamlining the process for both vendors and NYCHA.

Currently NYCHA has established six (6) PQL lists for the Closed-Circuit Television (CCTV), Carpentry, Painting, Lead Based Paint (Assessment and Abatement, Inspection and Assessment & Lab Analysis), Plumbing and Electrical.

All vendors interested in NYCHA's PQLs must follow two (2) important steps:

First, vendors must prepare and submit applications to the PQL: To pre-qualify, vendors must meet the minimum requirements listed on the Request for Qualification of the select PQL.

Second, vendors who are admitted to the PQL can then bid on solicitations for services on the PQL: Vendors must bid on each contract award, as these are not guaranteed.

For more information regarding PQLs and to obtain applications, please visit NYCHA's website at: https://www.nyc.gov/site/nycha/business/nycha-pql.page

VETERANS' SERVICES

■ INTENT TO AWARD

Goods and Services

VETCONNECT - Negotiated Acquisition - Other - PIN# 06323N0002

Develop and maintain a website that allows veterans and their families to request services online. The contractor will provide a system that enables Providers to accept, decline, reroute, and manage requests for services and resources received from the Website, manage cases, and generate reports about cases ("Case Management System") (together with the "Website and Case Management System"). The contractor will engage a minimum of 2 Providers in 6 specific service categories listed below, that provides services within those category

and that are located and/or offered within the greater NYC area. Services categories include: Benefits Navigation, Economic Growth Services, Financial Services, Health Services, Housing Services, and Legal Services. The contractor will be encouraged to engage beyond the minimum 2 providers, with a focus on the areas of the greatest need.

DVS will be negotiating with the following vendors:

- JobPath • Unite Us • Qualtrics • Combined Arms • Tyler Technologies

While DVS is not accepting expressions of interest for this procurement, DVS will consider expressions of interest in future solicitations.

There are several justifications I would like to add. 1. The agency's market research determined that there were very few select vendors that could provide what the agency is seeking in this NA. 2. There is a time sensitive situation where a supplier must be retained quickly, because Agency has decided not to renew or extend an existing contract in best interest of City, and Agency requires substitute/successor as soon as possible. 3. Neither competitive sealed bidding nor competitive sealed proposals are practicable or advantageous. Due to there being a limited number of vendors that can perform the work, and the highly technical nature of this procurement, It was determined that a Non-Competitive NA would be the best method and most advantageous for the City.

Use the following address unless otherwise specified in notice, to secure, examine or submit bid/proposal documents, vendor pre-qualification and other forms; specifications/blueprints; other information; and for opening and reading of bids at date and time specified above. LANDMARKS PRESERVATION COMMISSION

■ NOTICE

ADVISORY REPORT

ISSUE DATE: 12/28/2023	EXPIRATION DATE: 7/11/2029	DOCKET #: LPC-23-09608	CRA CRA-23-09608
ADDRESS: GOVERNORS ISLAND		BOROUGH: MANHATTAN	BLOCK/ LOT: 1 / 111
Building 555 Governors Island Historic District			

To the Mayor, the Council, and the Trust for Governors Island

This report is issued pursuant to Section 25-318 of the Administrative Code of the City of New York, which requires a report from the Landmarks Preservation Commission for plans for the construction, reconstruction, alteration, or demolition of any improvement or proposed improvement which is owned by the City or is to be constructed upon property owned by the City and is or is to be located on a landmark site or in a historic district or which contains an interior landmark.

At the Public Meeting of July 11, 2023, following the Public Hearing of the same date, the Landmarks Preservation Commission voted to issue a favorable report for the proposed work, as put forward in your application completed on June 13, 2023.

The proposed work consists of, at the southeast façade, removing four (4) windows at the basement and 1st floor at the central wing, removing brick, and cast stone and stucco cladding to combine and enlarge the openings, and installing a new entry door assembly within the modified opening at the 1st floor, featuring two (2) entry doors and a cast stone surround; constructing new stairs at the courtyard to provide access to the new entry doors, featuring black metal handrails, and brick and cast stone screen walls; at the southwest return at the central wing, removing a portion of the brick, cast stone, and stucco façade to create a new opening at the ground level, and installing one (1) barrier-free access door with a cast stone surround; installing a metal flood barrier set in new concrete paving fronting the new barrier-free access door, and constructing a brick and cast stone screen wall; at all facades, removing seventeen (17) windows at the basement through 4th floor, and installing seventeen (17) HVAC louver assemblies within the existing openings, featuring aluminum false muntin assemblies; removing fourteen (14) windows at the basement, and installing fourteen (14) casement window and flood vent assemblies within the existing openings; and at the north yard, installing HVAC equipment on steel dunnage, featuring mechanical screen fencing. The proposal was shown in a digital slide presentation, titled "New York Harbor School Annex," undated, and consisting of 26 slides of drawings and photos, prepared by Ciardullo Architecture + Engineering, all presented at the Public Hearing and Public Meeting.

In reviewing this proposal, the Commission noted that the Governors Island Historic District Designation Report describes building 555 as a neo-Georgian-style officers' quarters building built in 1938-40.

With regards to this proposal, a quorum of Commissioners voted to approve the overall concept of the proposal as presented, but recommended that the New York School Construction Authority ask the applicants to explore and restudy aspects of the design.

All of the Commissioners supported the proposed installation of a new entrance and stair, and a new barrier-free access entrance, finding that the work will not damage or eliminate any significant architectural features; that the work will facilitate circulation across Short Avenue from Building 550 and support the reactivation of this long-vacant building; that the large scale of the building can support the presence of new entrances along Short Avenue, which currently lacks a primary entrance, and the proposed new entrance doors, stairs, and railings will be centrally located and well-scaled to the building; that the cast stone, red brick, concrete and black ironwork at the proposed new entrances and stairs will be in keeping with the materials found at the building and throughout the historic district; that the proposed at-grade entrance will provide barrier-free access at a return façade close to the new primary entrance, and the proposed wall adjacent to this entry,

needed to support a deployable barrier related to flood-mitigation, will align with the base of the building to help it recede from view.

However, a plurality of Commissioners expressed concerns about specific aspects of the proposed design and details of the new entrances, screen walls and stair.

These Commissioners expressed concerns about the materiality and details of the brick and cast stone screen walls, noting that they will call undue attention to themselves. Most of these Commissioners recommended revising the screen wall at the barrier-free access entrance to be constructed entirely in cast stone, and some Commissioners suggested that the screen wall at the base of the stair could be changed to an open railing. One Commissioner felt that the screen walls are appropriate as designed.

Additionally, these Commissioners expressed concerns about the proposed entry door surround details, noting that they would have a too subtle presence at this designed façade, with a few Commissioners recommending specific modifications to these details in order to establish more prominence at this new entry and its relationship to the façade, including: raising the height of the door headers to align with the adjacent window headers; cladding the center mullion of the new door assembly in a material other than cast stone; and revising the entry door surround details to harmonize more closely with existing door surrounds at the west façade. However, one Commissioner noted the New York State Historic Preservation Office's and U.S. Department of the Interior's requirements that the design and details of new ornamental features be differentiated from original historic details, and that the details and materiality at the entry door surrounds are appropriate as designed, while another Commissioner recommended omitting the surround entirely at the new barrier-free access door.

All of the Commissioners supported the installation of through-window flood vents, and HVAC louver and muntin assemblies, finding that the installation of flood vents is warranted by current flood zone requirements, and will aid in long term preservation of the building; and that the proposed louvers with external grilles at various windows will be configured to match the existing fenestration pattern, helping them recede from view.

However, these Commissioners also expressed concerns about the details and finish of the HVAC louver assemblies and grilles, noting that the proposed details and finish color combinations of the louver, grille, and frame, will draw undue attention to these features and not harmonize with the existing frames. Some of these Commissioners recommended specific modifications to the details, including integrating the louvers into the windows frames; reducing the height of the louver blades; increasing the thickness of the outer louver frame; finishing the muntins and louvers in the same color; and preparing color combination mock-ups in consultation with LPC staff. One Commissioner recommended finishing the louvers in gray in lieu of the proposed black finish.

Finally, most Commissioners did not comment on the proposed HVAC equipment and screening. However, one Commissioner supported these installations, noting that, although the current standard for HVAC equipment and screening throughout the historic district should be revisited, the proposed equipment and screening design was consistent with this standard.

Subsequently, on November 13, 2023, the Commission received a revised proposal, including drawings labeled 01 through 07, dated (as received) November 13, 2023, prepared by Ciardullo Architecture + Engineering; a letter dated November 13, 2023, prepared by the NYC School Construction Authority; and a letter dated October 11, 2023, prepared by New York State Parks, Recreation and Historic Preservation. Accordingly, the Commission staff reviewed these materials, noting that black ironwork is proposed in front of the new entrance stairs, in lieu of the previously proposed brick and cast stone screen walls; that the materiality of the screen wall adjacent to the barrier-free access entrance and the sides of the new entrance stairs has been revised to be fully cast stone, instead of the previously proposed brick and cast stone materiality; that the height of the proposed main entrance doors and cast stone surround has been raised; that minor modifications have been made to the proposed details and finish of the HVAC louvers and muntin assemblies; and that the revised proposal is in keeping with the intent of the Commissioners' support.

Ocean Parkway, Scenic Landmark			

To the Mayor, the Council, and the Associate Commissioner, NYC Department of Design + Construction,

This report is issued pursuant to Section 25-318 of the Administrative Code of the City of New York, which requires a report from the Landmarks Preservation Commission for plans for the construction, reconstruction, alteration, or demolition of any improvement or proposed improvement which is owned by the City or is to be constructed upon property owned by the City and is or is to be located on a landmark site or in a historic district or which contains an interior landmark.

The Landmarks Preservation Commission has reviewed a proposal for replacing asphalt paving with light gray tinted precast concrete panels and curbing at select locations in the street bed along the western auxiliary road of Ocean Parkway between Parkwood and Foster Avenues and Elmwood Avenue and Avenue I; and replacing the adjoining concrete sidewalk curbing, in-kind, as described in a letter, dated December 4, 2023, prepared by Lauren Tucker; written specifications, dated (received) December 4, 2023, prepared by the NYC Department of Design and Construction; as shown on existing condition photographs; and drawings T-1, I-1, L-1, K-1, K-2, LPC-1, LPC-2, LPC-3, and GI-400 through GI-409, dated September 29, 2023, and prepared by the NYC Department of Design + Construction, Division of Infrastructure, Bureau of Design, all submitted as components of the application.

In reviewing this proposal, the Commission notes that the Ocean Parkway Designation Report describes Ocean Parkway as a parkway, designed by Frederick Law Olmsted and Calvert Vaux and built in 1874-76; and that the parkway was substantially reconstructed circa 1980, with new paving and furnishings.

With regards to the proposal, the Commission finds that the work will not alter, eliminate or conceal any of the significant historic or scenic characteristics of the parkway; that the proposed work will help address climate resiliency goals and be minor variations from the existing conditions; that the paving and curbing will be in keeping with the paving and curbing along this scenic landmark in terms of basic design; and that this work will not diminish the significant scenic and historic character of this scenic landmark.

This report is issued on the basis of the building and site conditions described in the application and disclosed during the review process. By accepting this permit, the applicant agrees to notify the Commission if the actual building or site conditions vary or if original or historic building fabric is discovered. The Commission reserves the right to amend or revoke this permit, upon written notice to the applicant, in the event that the actual building or site conditions are materially different from those described in the application or disclosed during the review process.

To the Mayor, the Council, and the City of New York Department of Design + Construction,

This report is issued pursuant to Sections 3020 and 854 (h) of the New York City Charter and Section 25- 318 of the Administrative Code of the City of New York, which require a report from the Landmarks Preservation Commission for certain plans for the construction, reconstruction, alteration, or demolition of any improvement or proposed improvement which is owned by the City or is to be constructed upon property owned by the City and is or is to be located on a landmark site or in a historic district or which contains an interior landmark.

The Landmarks Preservation Commission has reviewed a proposal for restorative work, including resealing existing expansion joints matching adjacent the material finishes, and replacing a metal door in-kind at the rooftop bulkhead; installing wall mounted conduits at a north facing bulkhead facade; and installing an HVAC unit at the main roof, and HVAC units at the lower roof at the 6th floor; as described and shown in a report consisting of drawings marked up color photos, visibility studies and existing conditions photographs; and a specification report prepared by Joseph LePique of NYC Department of Design + Construction, all submitted as components of the application.

In reviewing this proposal, the Commission notes that the Grand Concourse Historic District Designation Report describes 1118 Grand Concourse (aka 1118-1120 Grand Concourse; 1109 Carroll Place) as a contemporary style courthouse, designed by Rafael Viñoly, and built in 1990-99.

With regard to this proposal, the Commission finds that the work is in accordance with the provisions set forth in Title 63 of the Rules of the City of New York, Section 2-11 for Repair, Restoration, Replacement, and Re-creation of Building Facades and Related Exterior Elements, including Section 2-11(d)(1)(i) for in-kind material replacement; Section 2-21 for Installation of Heating, Ventilation, Air Conditioning and other Mechanical Equipment, including Section 2-21(d)(3) for installation of through-wall HVAC equipment on nonvisible secondary facades; and Section 2-21 for Installation of Heating, Ventilation, Air Conditioning and other Mechanical Equipment, including Section 2-21(g)(2) for installation of HVAC and other mechanical equipment on rooftops and terraces. Based on these findings, the Commission determined that the work is appropriate to the building. The work, therefore, is approved.

The Landmarks Preservation Commission has reviewed a proposal for installing a telecommunications poletop antenna and shroud, and associated transmitter box mounted on an existing light pole, the design and attachment of which are in accordance with the guidelines established by the Public Design Commission. The work will occur at a light pole located within the Ladies' Mile Historic District. The work consists of installing one (1) telecommunications poletop antenna and shroud, and transmitter box at an existing light pole, all finished grey to match the existing light pole; installing a grey-finished handhole at the sidewalk, adjacent to the pole; and excavating concrete pavers where the concrete will be replaced to match the pre-existing tint and scoring, as described and shown in existing conditions photographs, locator map, poletop manager print out, manhole cover diagram, and a letter, dated December 7, 2023, prepared by Judith Garcia of NYC OTI, and submitted as components of the application.

In reviewing this proposal, the Commission notes that multiple telecommunications poletop antenna and transmitter box are proposed to be mounted on light poles throughout New York City's historic districts; that the Office of Technology and Innovation applications for such work have been divided into multiple phases, of which the current proposal consists of one (1) of such installations. The Commission also notes that the current application excludes any proposal for work with the African Burial Ground and The Commons Historic District, which must be reviewed and approved separately by the Landmarks Preservation Commission's Director of Archaeology. The Commission further notes that the Art Commission issued Certificate of Final Approval 22232 on September 14, 2005, approving the design of telecommunications poletop antennas and transmitter boxes, with associated conditions; and that the Public Design Commission issued Certificate 27570 on August 10, 2020, approving the design of shrouds for 4G and 5G mobile telecommunications equipment on light poles, with associated conditions. The Approved poletop identification number within the Ladies' Mile Historic District is: 24401.

With regard to this proposal, the Commission finds that the small size, neutral finish, simple design, and mounting height of the shroud and transmitter box will help them to be discreet installations at the upper portions of the light pole; that the installations will not call attention to themselves and will not detract from the streetscape; that the handhole will be small in size, simple in design, and finished to match the adjacent concrete pavers; and that any concrete sidewalks to be excavated will be replaced with new concrete to match the tint and scoring of the adjacent concrete paving. Based on these findings, the proposed work is determined to be appropriate to this historic district. Therefore, the work is approved.

Pedestrian Ramps Brooklyn Heights Historic District			

To the Mayor, the Council, and the Associate Commissioner/NYC Department of Design and Construction

This report is issued pursuant to Sections 3020 and 854 (h) of the New York City Charter and Section 25- 318 of the Administrative Code of the City of New York, which require a report from the Landmarks Preservation Commission for certain plans for the construction, reconstruction, alteration, or demolition of any improvement or proposed improvement which is owned by the City or is to be constructed upon property owned by the City and is or is to be located on a landmark site or in a historic district or which contains an interior landmark.

The Landmarks Preservation Commission has reviewed a proposal for the installation of pedestrian ramps at multiple locations in the Borough of Brooklyn, located within the Brooklyn Heights Historic District.

The proposed work consists of installing tinted concrete sidewalks, ramps and flares, at the intersection of State Street and Henry Street; and resetting historic bluestone pavers; and installing a new bluestone sidewalk, all featuring detectable warning pads and new granite curbs, as described in written specifications; and as shown on existing condition photographs; and drawings labeled Sheets 25 of 27 and 27 of 27 all dated February 2022, prepared by Department of Design and Construction and submitted as components of the application.

With regard to this proposal, the Commission finds that the work is in accordance with the provisions set forth in Title 63 of the Rules of the City of New York, Section 2-19 for Sidewalks, including Section 2- 19(b) (1) for repairing and resetting existing bluestone sidewalks; Section 2-19(b)(2) for new bluestone sidewalks; Section 2-19(c) for replacement of existing non-bluestone sidewalk; and Section 2-19(g)(1) for pedestrian ramps at sidewalk intersections. Based on these findings, the work is approved.

NYC Streetlight Poles Historic Street Lampposts, Individual Landmark Central Park, Scenic Landmark			

To the Mayor, the Council, and the Office of Technology and Innovation,

This report is issued pursuant to Sections 3020 and 854 (h) of the New York City Charter and Section 25- 318 of the Administrative Code of the City of New York, which require a report from the Landmarks Preservation Commission for certain plans for the construction, reconstruction, alteration, or demolition of any improvement or proposed improvement which is owned by the City or is to be constructed upon property owned by the City and is or is to be located on a landmark site or in a historic district or which contains an interior landmark.

The Landmarks Preservation Commission has reviewed a proposal for installing telecommunications poletop antennas and shroud, and associated transmitter boxes mounted on existing light poles, the design and attachment of which are in accordance with the guidelines established by the Public Design Commission. The work will occur at a light pole located within the Central Park Scenic Landmark. The work consists of installing one (1) dark green finished telecommunications poletop equipment shroud and transmitter box, in conjunction with replacing the pole shaft and base, in-kind; temporarily removing and reinstalling any existing attachments at the new shaft, as needed; installing a grey-finished handhole at the sidewalk, adjacent to the pole; and excavating and resetting sections of the existing Belgian block paving, as described and shown in existing conditions photographs, locator map, poletop manager print out, manhole cover diagram, and a letter, dated December 13, 2023, prepared by Judith Garcia of NYC OTI, and submitted as components of the application.

In reviewing this proposal, the Commission notes that multiple telecommunications poletop antenna and transmitter box are proposed to be mounted on light poles throughout New York City's historic districts; that the Office of Technology and Innovation applications for such work have been divided into multiple

phases, of which the current proposal consists of one (1) of such installations. The Commission also notes that the current application excludes any proposal for work with the African Burial Ground and The Commons Historic District, which must be reviewed and approved separately by the Landmarks Preservation Commission's Director of Archaeology. The Approved poletop identification number within the Central Park Scenic Landmark is: 25033.

With regard to this proposal, the Commission finds that the neutral finish, simple design, and mounting height of the proposed poletop antenna and transmitter box will help them to be discreet installations at the upper portions of the light poles; that the installations will not call attention to themselves and will not detract from the streetscape; that the replacement shaft and base will match the existing in terms of placement, material, design, and finish; that the temporary removal and reinstallation of attachments will facilitate the installation of the telecommunications equipment; that the handhole will be small in size, simple in design, and finished to match the adjacent Belgian block pavers; and that the removed Belgian blocks will be re-used to repave the excavated areas in the street, and will be laid out in a similar

pattern as the existing paving. Based on these findings, the proposed work is determined to be appropriate to this historic district. Therefore, the work is approved.

Please provide one or more 8 by 10 inch black and white photographs of the completed work to the Public Design Commission of the City of New York, for its records.
