3. Solar generation

Solar generation data in the original published report was incorrect for some facilities.⁴ See Table 3 for a comparison of the solar generation totals between the

original published and corrected updated reports. See Table 4 on the following page for the list of facilities' original published solar generation and the corrected solar generation in the updated report.

Table 3. FY18 LL45 report solar generation: totals comparison between original published and corrected updated (in kWh)

	Fiscal Year 2015 solar generation	Fiscal Year 2016 solar generation	Fiscal Year 2017 solar generation	Fiscal Year 2018 solar generation	Fiscal Year 2019 solar generation
Original published report	0	953,162	2,070,513	4,106,678	3,187,278
Corrected updated report	830,364	4,651,263	7,660,940	7,829,501	7,234,207

⁴ For systems without operational data acquisition systems the annual generation is estimated as $kW-DC \times 1100 \text{ sun-hours/year}$ for New York City based on NREL sun-hour data and an industry standard 25 percent discount factor to account for losses from imperfect azimuth angle, soiling, shading, degradation and even losses due to irradiation from pollution, inter alia. For these systems, estimated annual generation (kWh) is reported as the same in each year based on this methodology.

4. Fossil Fuel and Steam Usage

In the original FY19 LL45 report the table in Section 3 titled “Fossil Fuel and Steam Usage in MMBTUs for All Covered Facilities, Fiscal Years 2014-2018”, the

signs for the “Total Fossil Fuel + Steam Usage Percent Change from Previous Fiscal Year” values were incorrect. See the corrected signs (with corrected usage amounts) in Table 5 below.

5. Ownership Status and Fossil Fuel Usage

Due to the incorrect ownership status being attributed to certain covered facilities, fossil fuel usage amounts were incorrect due to 80 leased facilities being included in fossil fuel and steam usage totals, and 57 being excluded. Please see Table 5 below for the

comparison of the gross fossil fuel usage totals between the original published report and the corrected updated report. See Table 7, Table 8, and Table 9 for a gross comparison of fossil fuel usage by energy type.

6. Envelope Assessment

In the original FY19 LL45 report Section 4, one City-owned covered facility whose ownership status was mischaracterized as leased in the original published report but in fact was owned underwent an envelope assessment in Fiscal Year 2019. Five

leased facilities whose ownership statuses were mischaracterized as owned in the original published report underwent an envelope assessment in Fiscal Year 2019 which are now excluded from the corrected report. See Table 10 for a list of facilities under each of these two categories.
