

**Saving a life is easy.
Turn slowly.**

VISION ZERO

Slow down.

Speeding can kill.
Remember, a safe turn is 5 MPH.
Pause and look before turning
and expect people in the
crosswalk every time.

Bike smart.

Most crashes happen at
intersections. Make sure drivers
see you and don't pass vehicles
when they are turning. Helmets
help. Give pedestrians priority.

Heads up.

Watch for turning cars,
especially trucks and buses.
Don't assume drivers see you.
Do what you can to be seen.
