Re: DOT Flo Curbside Chargers

Date: September 12, 2022

---

To support the Department of Citywide Administrative Services (DCAS) effort to transition the City fleet to zero emission vehicles, the New York City Department of Transportation (NYCDOT) and Con Edison are implementing a three-year demonstration program to provide curbside electric vehicle (EV) chargers at four key locations. A total of 20 spaces will be equipped with level 2 EV chargers at the following locations:

- 30th Place between Thomson Ave and 47th Ave, 6 spaces  
**(Available Now)**
- Red Cross Place between Cadman Plaza East and Bk Bridge Blvd/Adams St, 6 spaces  
**(Available Now)**
- Leonard St between Lafayette and Centre Streets, 4 spaces  
(Target Availability, Nov/Dec 2022)
- Reade St between Elk and Lafayette Streets, 4 spaces  
(Target Availability, Nov/Dec 2022)

Please work with your fleet vehicle users to take advantage of these new chargers. Please reach out to DCAS Fleet to coordinate access.

#### How City Fleet Curbside Chargers Work

The level 2 EV chargers are operated by FLO, Con Ed's charging network partner, and provide a charge of 6 kWh/hour. Fleet vehicle users can use their Charge Point card to initiate a charging session at a cost of \$1.85/hour. In miles, for a Bolt, this would be approximately 20 miles worth of charge an hour. No fee will be imposed once the vehicle is 100% charged. As with gas-power vehicles, charging fees will be paid for through your agency WEX account. Each charger zone is signed as *Authorized Vehicles Only (AVO)/NYC Owned Electric Vehicles Charging Only* and the chargers are

available to all City agencies. Instructions on how to operate the charger can be found in the [FLO video](#).

To maximize the availability of these chargers, please direct your agency's EV users to be considerate of other EV drivers. Once a vehicle is fully charged, it should be moved out of the charger spot as soon as is feasible. Internal combustion engine vehicles are not allowed to park in the EV charging zone at any time. As part of the pilot, DOT and DCAS will monitor charger usage and vehicle turnover via Geotab and the charger system and work with relevant fleet managers to address any issues. Lessons learned from the pilot will inform future curbside EV charger installations for City fleet vehicles.

These EV charging zones are a shared resource that will benefit all City agencies, especially those with facilities immediately adjacent to the chargers. The pilot program is not considered a reduction in agency AVO spaces and no new AVO spaces will be allocated to agencies by DOT.

#### Additional Curbside Chargers

At the discretion of agency fleet managers, City fleet vehicles are also allowed to use a network of 100 public curbside EV chargers now installed across the city. A list of those locations can be found at the [PlugNYC website](#). The cost to use these chargers is \$2.50/hr with an overnight dwell fee of \$1/hr regardless of the vehicle's state of charge.

**If you plan to use these chargers, please contact the DCAS Fleet fuels unit so we can set up your charging card.**

If you have any questions, please reach out to Julia Marchetti at [jmarchetti@dcas.nyc.gov](mailto:jmarchetti@dcas.nyc.gov).

We thank you for your cooperation and commitment to supporting the City's EV future.
