

Geotab NFC Tags User Guide

You have a created booking in fleetster and want to start your journey. The following guide will explain every step in detail.

1. Create a booking in the mobile or web app

2. Short Tap Reader

short tap is about 1 second

3. Wait for reader to respond

Card reader blinks green, vehicle unlocks and booking starts.

4. Short Tap on reader

If tapping short again during an ongoing booking, the vehicle locks. The card reader blinks green.

5. Short Tap on reader

If tapping short again, the vehicle unlocks, the card reader blinks green.

6. Long Tap on reader

If you want to finish the booking, make a long tap on the card reader, which is about 7 seconds. If the vehicle is not locked, it gets locked automatically and the booking is finished.

NFC tags typically operate at relatively low input powers/low voltage and this NFC product is not designed to be able to operate when exposed to a wireless charging electromagnetic field. Affix the NFC Tag/Sticker on a wallet or employee identification card, or other ID you have with your person.

WARNING! Do NOT place the NFC sticker/tag near wireless charging (e.g., the back of a cell phone) to prevent thermal damage or serious injury.
