Visualization: Imagining how something would look when it is moved around or when its parts are moved or rearranged. It requires the forming of mental images of how patterns or objects would look after certain changes, such as unfolding or rotation. One has to predict how an object, set of objects, or pattern will appear after changes have been carried out. Example: When an Electrician (NYC Health + Hospitals) is installing equipment, they need to determine how much space it will occupy.

Written Expression: Using English words or sentences in writing so that others will understand. Example: An Electrician (NYC Health + Hospitals) writes reports.
