**Re: Supplement to the Materials in Support of Loomis' Variance Request dated October 24, 2022**

Dear Executive Director Page:

I am writing to supplement to the materials in support of our variance request.

As indicated, Loomis presently has one electric armored vehicle serving NYC locations. A second electric armored vehicle has been delivered and we are hoping to have the license tags in the next 10 business days.

Vehicle	Branch	Year	Make	Model	Lic State/Prov	Lic Plate	Fuel Type	GVWR	REGW
22493	5200	2021	XOS	SA1	NJ	TBD	Electric	23,000	

Vehicle #22493 is the 20th electric armored vehicle in the Loomis fleet. Others are located in Houston, TX, Charlotte, NC, Los Angeles and Sacramento CA.

In conclusion, nearly 10% of Loomis' armored vehicles will be servicing NYC routes will be electric by year end. And, we anticipate adding more electric armored vehicles in 2023 to our NYC route structure which will positively contribute to emission reduction.

Loomis respectfully requests that its variance request be granted and pending fees be waived.

Please add this letter to the our previously submitted packet.

Sincerely,

Craig L. Albiston  
Chief Compliance Officer  
Loomis Armored US, LLC
