END IDLING IN YOUR FLEET

ENGINES CAN'T POLLUTE AT **ZERORPM®**
IDLE MITIGATION SYSTEMS®

**YOU IDLE MORE
THAN YOU THINK
YOU DO!**

**WE HAVE A
SOLUTION!**

WHAT DOES A ZERORPM® SYSTEM DO?

1 When you put
the vehicle
in **park**...

P R N D

2 ...we will
automatically
shut off the engine...
#end_idling

3 ...**EVERYTHING**
continues to operate
as if the engine remains
on...

4 Saving you
MONEY
while
protecting the
ENVIRONMENT

HOW DOES IT WORK?

WHEN THE ENGINE IS **ON**

WHEN THE ENGINE IS **OFF**

BELT DRIVEN
ALTERNATOR

BELT DRIVEN
COOLANT PUMP

BELT DRIVEN
A/C COMPRESSOR

LITHIUM-IRON*
BATTERY

DC ELECTRIC
COOLANT PUMP

DC ELECTRIC
A/C COMPRESSOR

* "Lithium-Iron" is a marketing term for ZeroRPM's
LiFeMnPO4 packaged energy storage systems.

HOW DOES A ZERORPM® IDLE MITIGATION SYSTEM HELP YOU?

ZERORPM® SYSTEMS

WILL KEEP YOU **COMFORTABLE** AND **POWER** YOUR ELECTRONICS

LIKE THE ENGINE IS ON, BUT WITH THE ENGINE OFF

REDUCING ENGINE HOURS AND **SAVING** YOU MONEY.

END IDLING

WITH THE
RIGHT-SIZED SYSTEM

GET RETURNS DAY 1

TRACK YOUR
VEHICLES' SAVINGS
WITH INTELLIMETRICS®

SEE WHAT HAPPENS AFTER PARK WITH INTELLIMETRICS

- AS MOBILE AS YOU ARE
- WEB-BASED PORTAL
- OPTIMIZES FOR YOUR CHOSEN DEVICE
- DATA EXPORT AVAILABLE IN EXCEL FORMAT

ZERORPM® FEATURES:

Our system eliminates the need for an additional 110V air conditioning system while on shorepower.

Engine-off A/C Through

Driver.i[®] Safety Camera System

You're a great driver. We can prove it.

As a driver, you may see safety cameras as a "big-brother" scenario – a major invasion of privacy. We get it, nobody wants to be watched.

The good news is Driver.i isn't just any camera. It's the only safety camera that showcases and rewards all the GREAT driving you're doing – which is most of the time – and we can prove it!

A wingman, not a watchdog

- **Defend and protect** against accidents that aren't your fault.
- **Get recognized and rewarded** for good driving
- **Highlight** professional achievements
- **Identify** areas of improvement

”

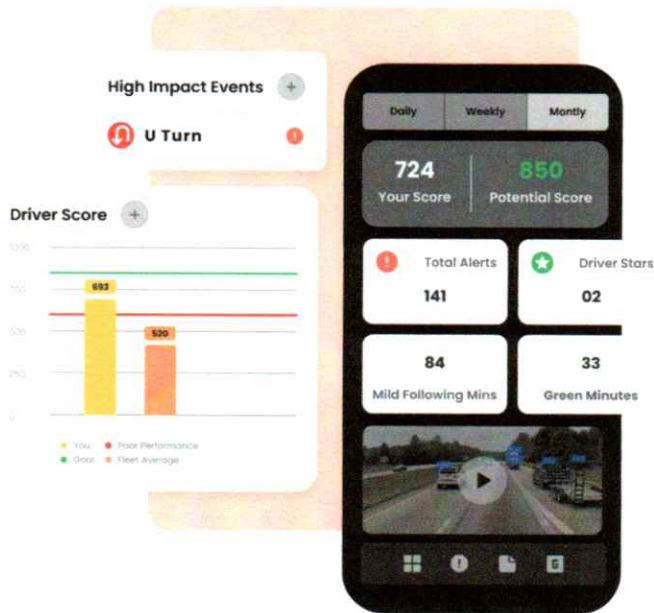

It's very clear that the target is often on the driver of the truck when there is an accident. Our amazing team of drivers are one of our greatest assets. Having the camera on board levels the playing field and provides a clearer picture of what actually happened and protects our drivers and our company.

– ROD COOPER, CEO, CLASSIC TRANSPORTATION

Welcome to the GreenZone

Driver*i* captures and highlights proactive driving events, such as creating space for vehicles in front, merging, or on the shoulder. These events, called **DriverStars**, add points to your score.

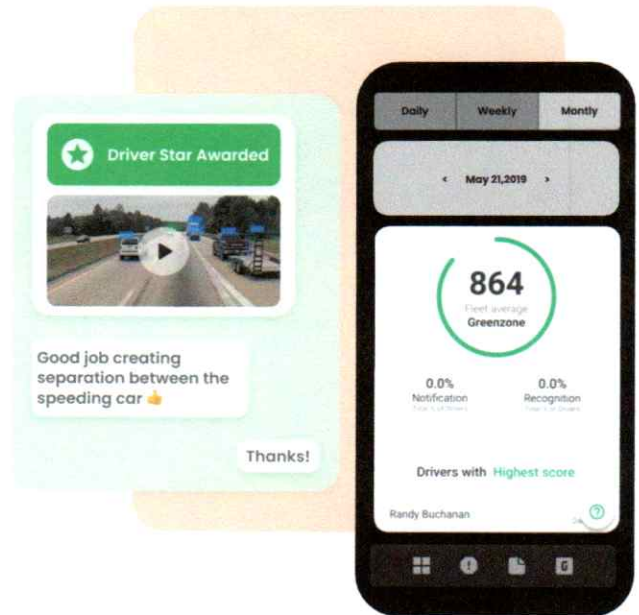

The Driver*i* App calculates your GreenZone score and compares it to other drivers' scores. The scores encourage friendly competition between colleagues, while providing a clear structure for rewards and incentives.

”

*The Driver*i* cameras have definitely saved us and our owner-operators many times from accidents, lawsuits, claims and deductibles. We had a recent one, and before the police report was done, we'd already been served papers by 2 of the 5 other vehicles involved. Luckily, we had the camera which showed clearly that we were not at fault. After another accident, the safety manager sent the video clip to the driver immediately. He showed it to the police officer at the scene, who let our driver go and wrote the other driver up.*

- HOLLY AMBOYER, HSE COORDINATOR, BARNHART TRANSPORTATION

”

This isn't a gotcha device like other solutions. It's a scorecard that tells you how good of a job you're doing

- RON BOURQUE, VP SAFETY, AIM TRANSPORTATION

Full transparency

You chose to be a driver for the freedom it provides, not to have someone look over your shoulder. So, we built the **Driver*i* App** so you can see your complete driving performance. You can check your score every day, access event videos, and self-coach to increase your overall score.

”

*[Driver*i*] makes drivers more aware of opportunities to make themselves better drivers. Once I see it, I can go in and fix whatever I need on my own. At first everyone was 50/50, but it's improved our driving skills so much. We're on a higher scale as a team.*

- RASHAD, DRIVER, STS RECYCLING

GPS Fleet Tracking

Get the insights you need to fully optimize your fleet with IntelliShift's GPS Fleet Tracking.

SEE IT LIVE

[< https://intellishift.com/request-demo/>](https://intellishift.com/request-demo/)

Better fleet outcomes start with the right vehicle data

You don't need more IoT data; you need the ability to do more with your data.

IntelliShift's Vehicle Telematics collects data from more than 50 sensor points and is configured to deliver the insights that are most critical for optimizing your daily operations. You can easily adapt GPS tracking and performance data to get the visibility you desire.

Make the most of your data for a streamlined big-picture view, fewer headaches, and better ROI.

HOW IT WORKS

Advanced Vehicle Telematics capabilities

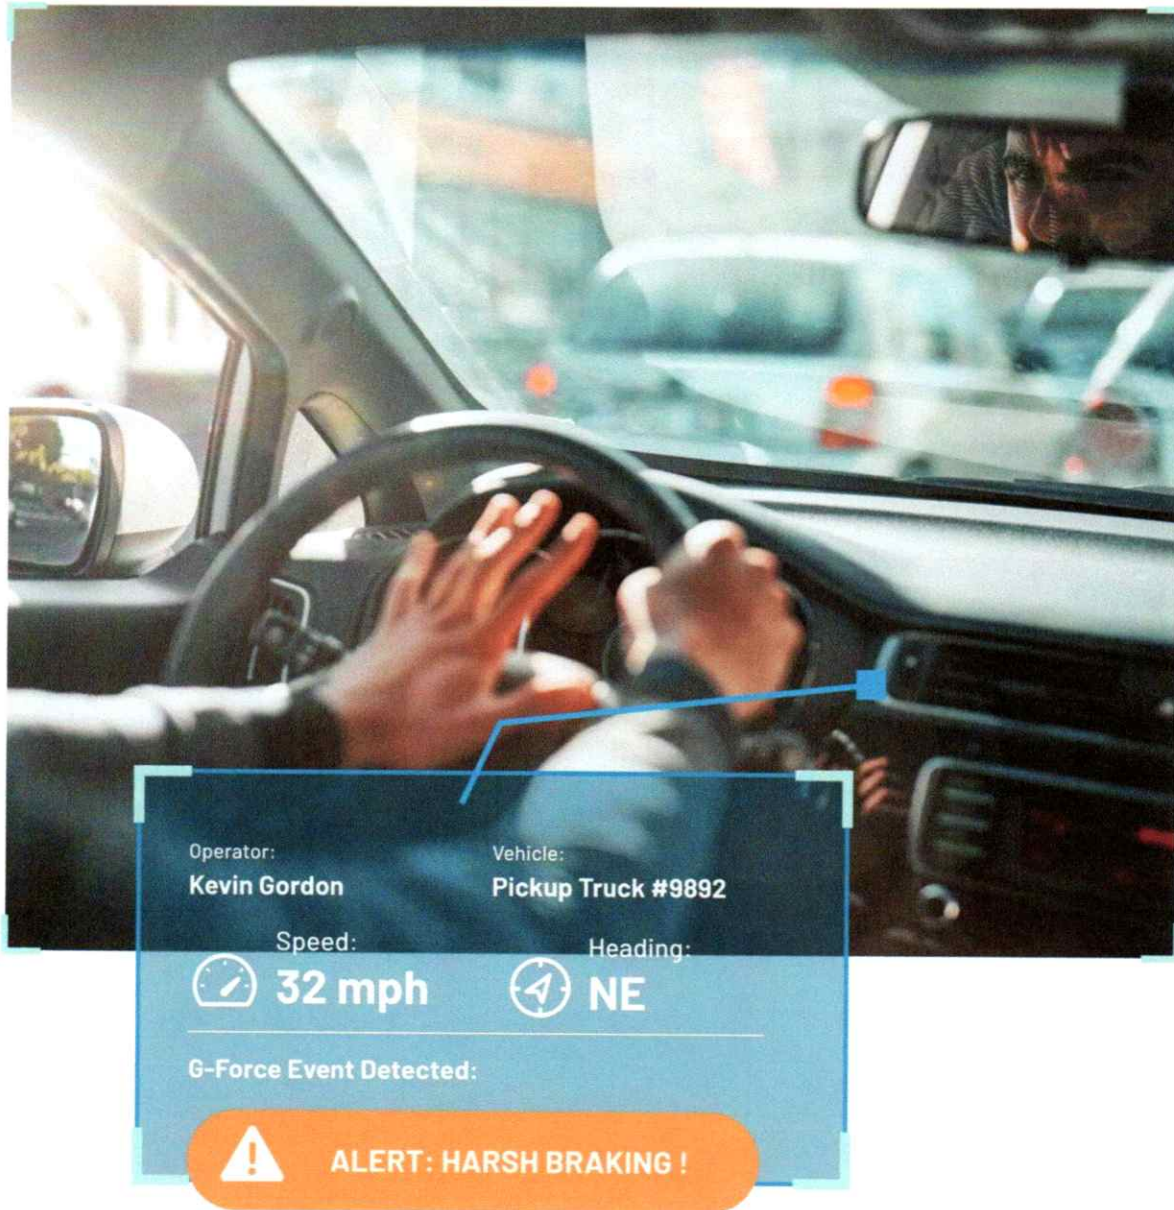

Real-time location

Receive an accurate and reliable read on the location and motion of all the vehicles and assets in your fleet, leading to better visibility, insights, and security.

Fuel utilization

Understand your vehicles' fuel consumption patterns, and match fuel card purchases to real-time vehicle and operator location to stay on top of fraud and your bottom line.

G-force and vehicle performance sensors

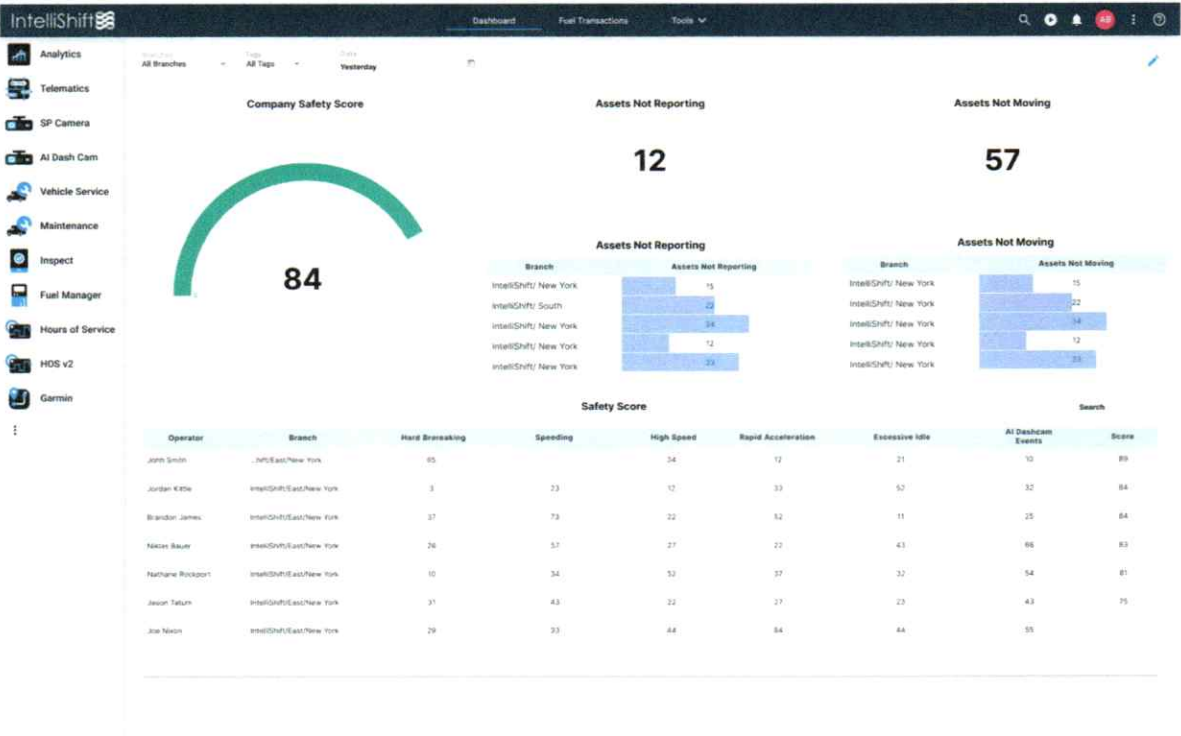

Get every detail when your vehicles are on the road, from harsh braking and rapid acceleration to whether a trailer, boom, or plow is engaged. Vehicle Telematics are configured to your asset types and use cases, so you're capturing the data that will help you make quick decisions for your team.

Map Layout

Flexible, multi-view map layouts

Create a configurable view of your fleet that features multiple maps on one screen. Organize depending on how you want to operate your business, or who in your organization is viewing, with views as broad as your global fleet, and as granular as a specific asset. IntelliShift maps are designed to show you the asset details you care about at a glance — you don't even need to click.

All-in-one fleet management dashboard

Track all your fleet vehicle performance KPIs in a single, simple dashboard. View everything from location, utilization, and fuel to diagnostics and trends – all available out of the box.

Client Since: 2017

Industry: General contracting, design build and construction management

Assets with IntelliShift: 32

Service Area: South Dakota

Case Study

Jans Corporation Lowers Fuel Cost, Increases Routing Efficiency, and Recovers Stolen Equipment with IntelliShift

Sioux Falls, South Dakota's Jans Corporation, has managed design-build, construction management, and general contracting projects for over 40 years. The family-owned business has an average of 25 projects underway at any given time and is among the largest commercial construction companies in the state.

Before adopting IntelliShift, Jans Corporation President Brian Jans faced a variety of challenges, including a lack of visibility into unauthorized vehicle use, inability to optimize routing and driver behavior to reduce fuel consumption, and vulnerability of its remote job sites to equipment theft.

While Jans Corporation had implemented a hard-wired legacy GPS system a decade earlier, they had removed it because it was unresponsive and ineffective when it came to providing the insight needed to drive efficiency. "We have projects in the downtown historical district to new developments on the edge of town to projects in the middle of nowhere," said Jans. "South Dakota is pretty big geographically, so our people can be as far as seven hours away."

Jans Corporation partnered with IntelliShift to implement telematics on its vehicles and non-powered asset tracking to deter theft and enable asset recovery.

Challenges	Goals
Limited visibility and control over unauthorized company vehicle use and improving route efficiency in travel to job sites.	Implement real-time GPS to better manage vehicle use and optimize routing to improve productivity and reduce fuel spend.
Equipment on job sites was vulnerable to theft when work crews weren't present.	Install non-powered asset tracking devices to deter theft and support law enforcement recovery efforts with exact location information.
Lack of accountability made it difficult to identify and correct driving behaviors like excessive idling.	Reduce costs by configuring automated alerts to proactively identify and coach workers when policies are not followed.

Life with IntelliShift

Before IntelliShift, Jans Corporation had no way to be sure that vehicles were being used efficiently, assets were safe at job sites or that fuel and equipment maintenance costs were under control.

Those problems were resolved with IntelliShift. "With IntelliShift, we can look live and see where our vehicles are at, where they're going and who's driving them," said Jans. "So that's also been very beneficial to efficiency."

Lower Fuel Consumption and Increase Driver Accountability

After partnering with IntelliShift, Jans Corp. cut fuel consumption in half from the prior quarter, for a savings of \$4,500. This was a direct result of gaining the visibility needed to prevent unauthorized vehicle use, ensure the right workers with the right skills have the shortest routes to the job site and by correcting costly behaviors like excessive idle time. "We have an alert set that when a vehicle idles for over ten minutes, we can start making phone calls or sending emails out to say, 'Hey, why is your vehicle running this long,'" said Jans.

Improve Vehicle and Project Routing Efficiency

Jans explained how improved visibility with IntelliShift increased routing efficiency for field supervisors via real-time vehicle location accuracy and visibility – and provided much-needed accountability.

"We told people our expectations, such as wanting them to conserve fuel, be smarter with their vehicle, don't idle, and let them know we have GPS for accountability to verify you're doing what we're asking you to do," said Jans. "That's a big issue because we can tell them and teach them, but if we can't track them and say, 'Hey, did you do this or not?' we can't change behaviors."

Deter Theft from Job sites and Enable Asset Recovery

With equipment and assets stored at remote job sites, theft was a growing problem – including one incident that resulted in a loss of more than \$10,000 in tools and equipment.

Brian Jans decided it was time to take action. He installed one of IntelliShift's tracking devices for non-powered assets and installed in on a generator at one of the company's job sites. Within two weeks, the generator went missing, but thanks to IntelliShift tracking, Jans was able to provide its exact location to law enforcement and the generator was immediately recovered.

"Cameras are good to prove some things, but it's not good in finding evidence of who did it and where they are," said Jans. "IntelliShift asset tracking did exactly what we wanted it to do."

In addition to recovering the equipment, media coverage of the generator theft and recovery put thieves on notice, letting them know the equipment is fully monitored even when crews aren't on site.

"Our maintenance projects bill by the hour, so IntelliShift works as a verification piece if somebody calls about hours worked versus hours billed. We can prove that we're doing what we say we're doing."

-Brian Jans – President, Jans Corporation

5. Conclusion: EPA saving on CO2 emission, installer

5.1 – General evaluation of the project considers its feasibility, the investment and the cash effort in charge of the Company. On the other side, the project sustains a saving on Carbon Dioxide (CO₂) emission amounted to around 141 tons per year that it is equivalent to

141 Tons of Carbon Dioxide (CO₂) equivalent

This is equivalent to greenhouse gas emissions from:

27.5 gasoline-powered passenger vehicles driven for one year ?

316,637 miles driven by an average gasoline-powered passenger vehicle ?

This is equivalent to CO₂ emissions from:

14,354 gallons of gasoline consumed ?

12,531 gallons of diesel consumed ?
