METROPOLITAN PARK

PUBLIC DESIGN COMMISSION COMMITTEE
SUBMISSION FOR PRELIMINARY REVIEW
10/21/2025

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Submission for Preliminary Approval

- ***This <u>Preliminary Submission</u> covers items related to Metropolitan Park's:***
  - *Master plan configuration: big picture framework and vision for the site*
  - *Program distribution*
  - *Building massing, character, and configuration*
  - *Circulation, access, + connections*
  - *Public realm framework*
- ***We expect that additional detailed strategies will be addressed in subsequent submissions and/or separate packages before final approval:***
  - *Signage + Wayfinding: strategy, locations, information, details*
  - *Lighting: Public Realm + Architectural lighting strategy + details*
  - *Landscape design: program, furnishing, paving, materials, planting*

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Project Timeline

- ***Gaming funds the project to address the site's challenges and support ambitious community goals, including public spaces and job creation.***
- ***Success hinges on securing 1 of 3 highly competitive gaming licenses via a state Request for Applications ("RFA").***
- ***The gaming application was submitted on the June 27 deadline.***
- ***Applicant received unanimous approval from the Community Advisory Committee on September 30th.***
- ***Gaming Commission requires preliminary approval by November 17th.***
- ***Licenses to be awarded by December 31.***

Metropolitan Park is...

- 365-day sports and entertainment district
- $8 Billion private investment
- 23,000+ good-paying union jobs
- 25 acres of public park space with community athletic fields
- Renovated & accessible train station
- Hard Rock Hotel and casino gaming and conference space
- Live Music Venue
- Bars & Restaurants
- Taste of Queens food hall
- Local hiring and MWBE goals
- Improved road network, new bike paths and pedestrian walkways

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

What we heard:

Over the past four years, in the thousands of meetings and dozens of workshops, the engagement process revealed clear and specific needs from stakeholders, highlighting key priorities and actionable requests for future planning and development:

- ***EXPAND OPEN SPACE***
- ***CLIMATE READY***
- ***365 DAY USE***
- ***ATHLETIC FIELDS***
  BIKE PATHS
- ***HOTEL WITH CASINO***
  AND LIVE MUSIC VENUE
- ***CREATE JOBS***
- ***SUPPORT LOCAL AND MWBE BUSINESSES***
- ***COMMUNITY INPUT***
- ***ACCESS TO WATERFRONT***
- ***BARS AND RESTAURANTS***

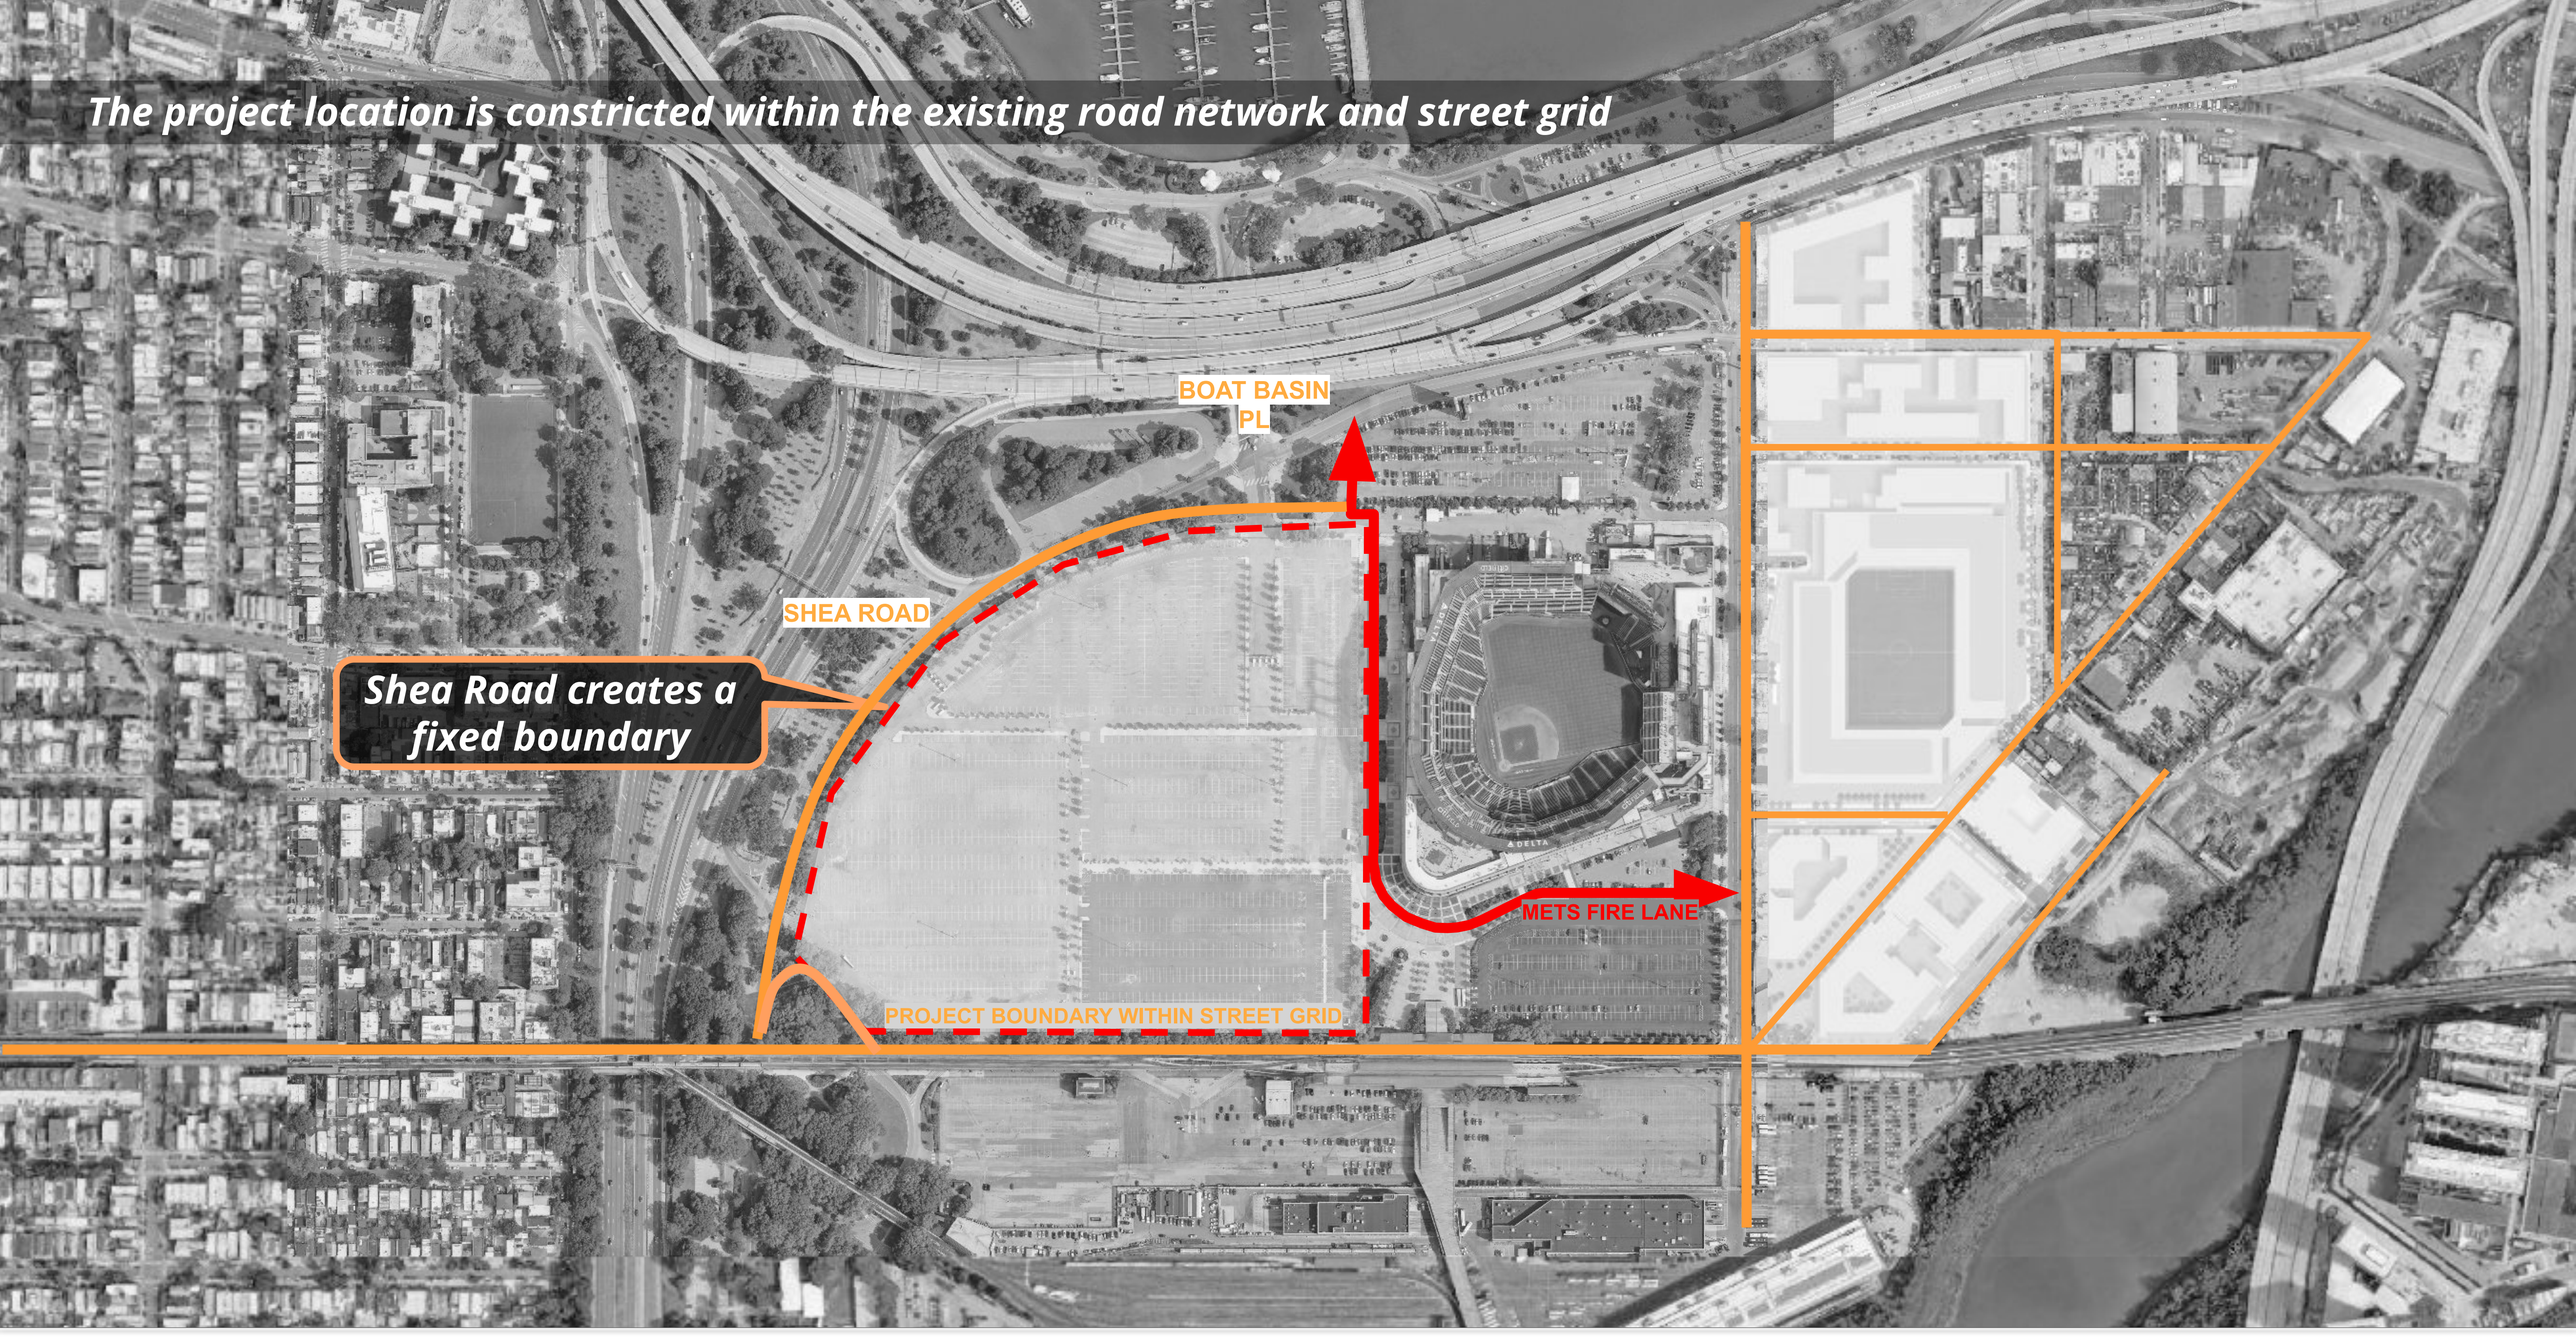
The existing conditions

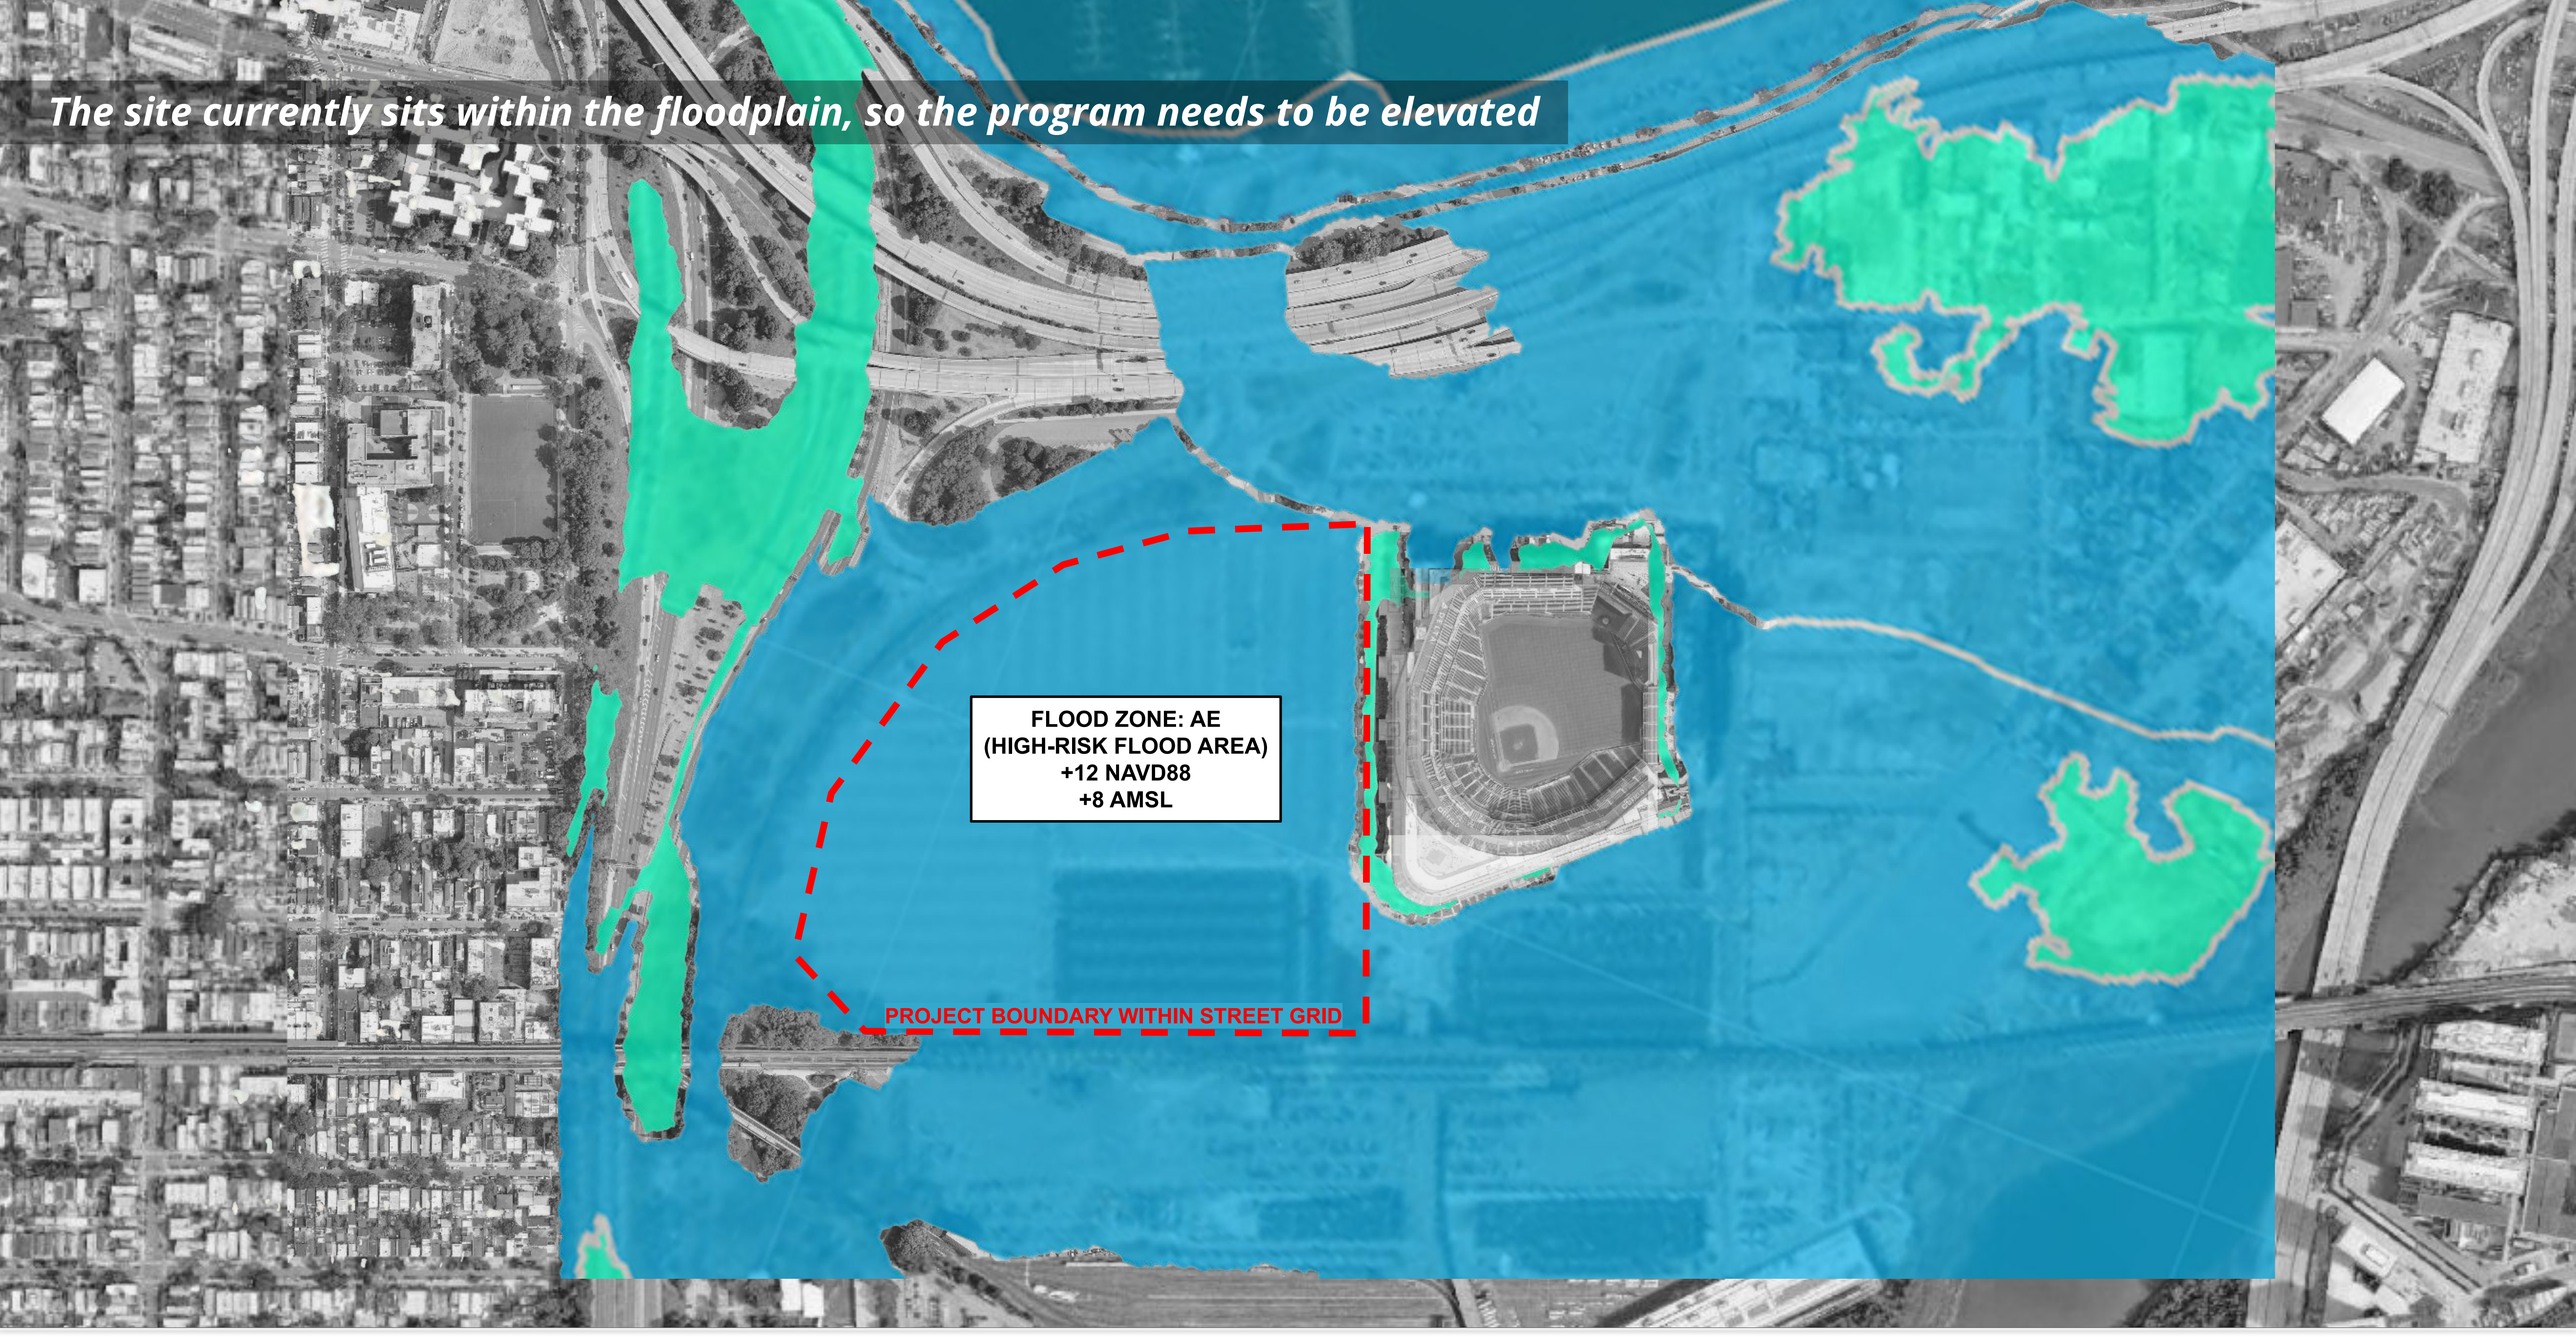
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The project location is constricted within the existing road network and street grid



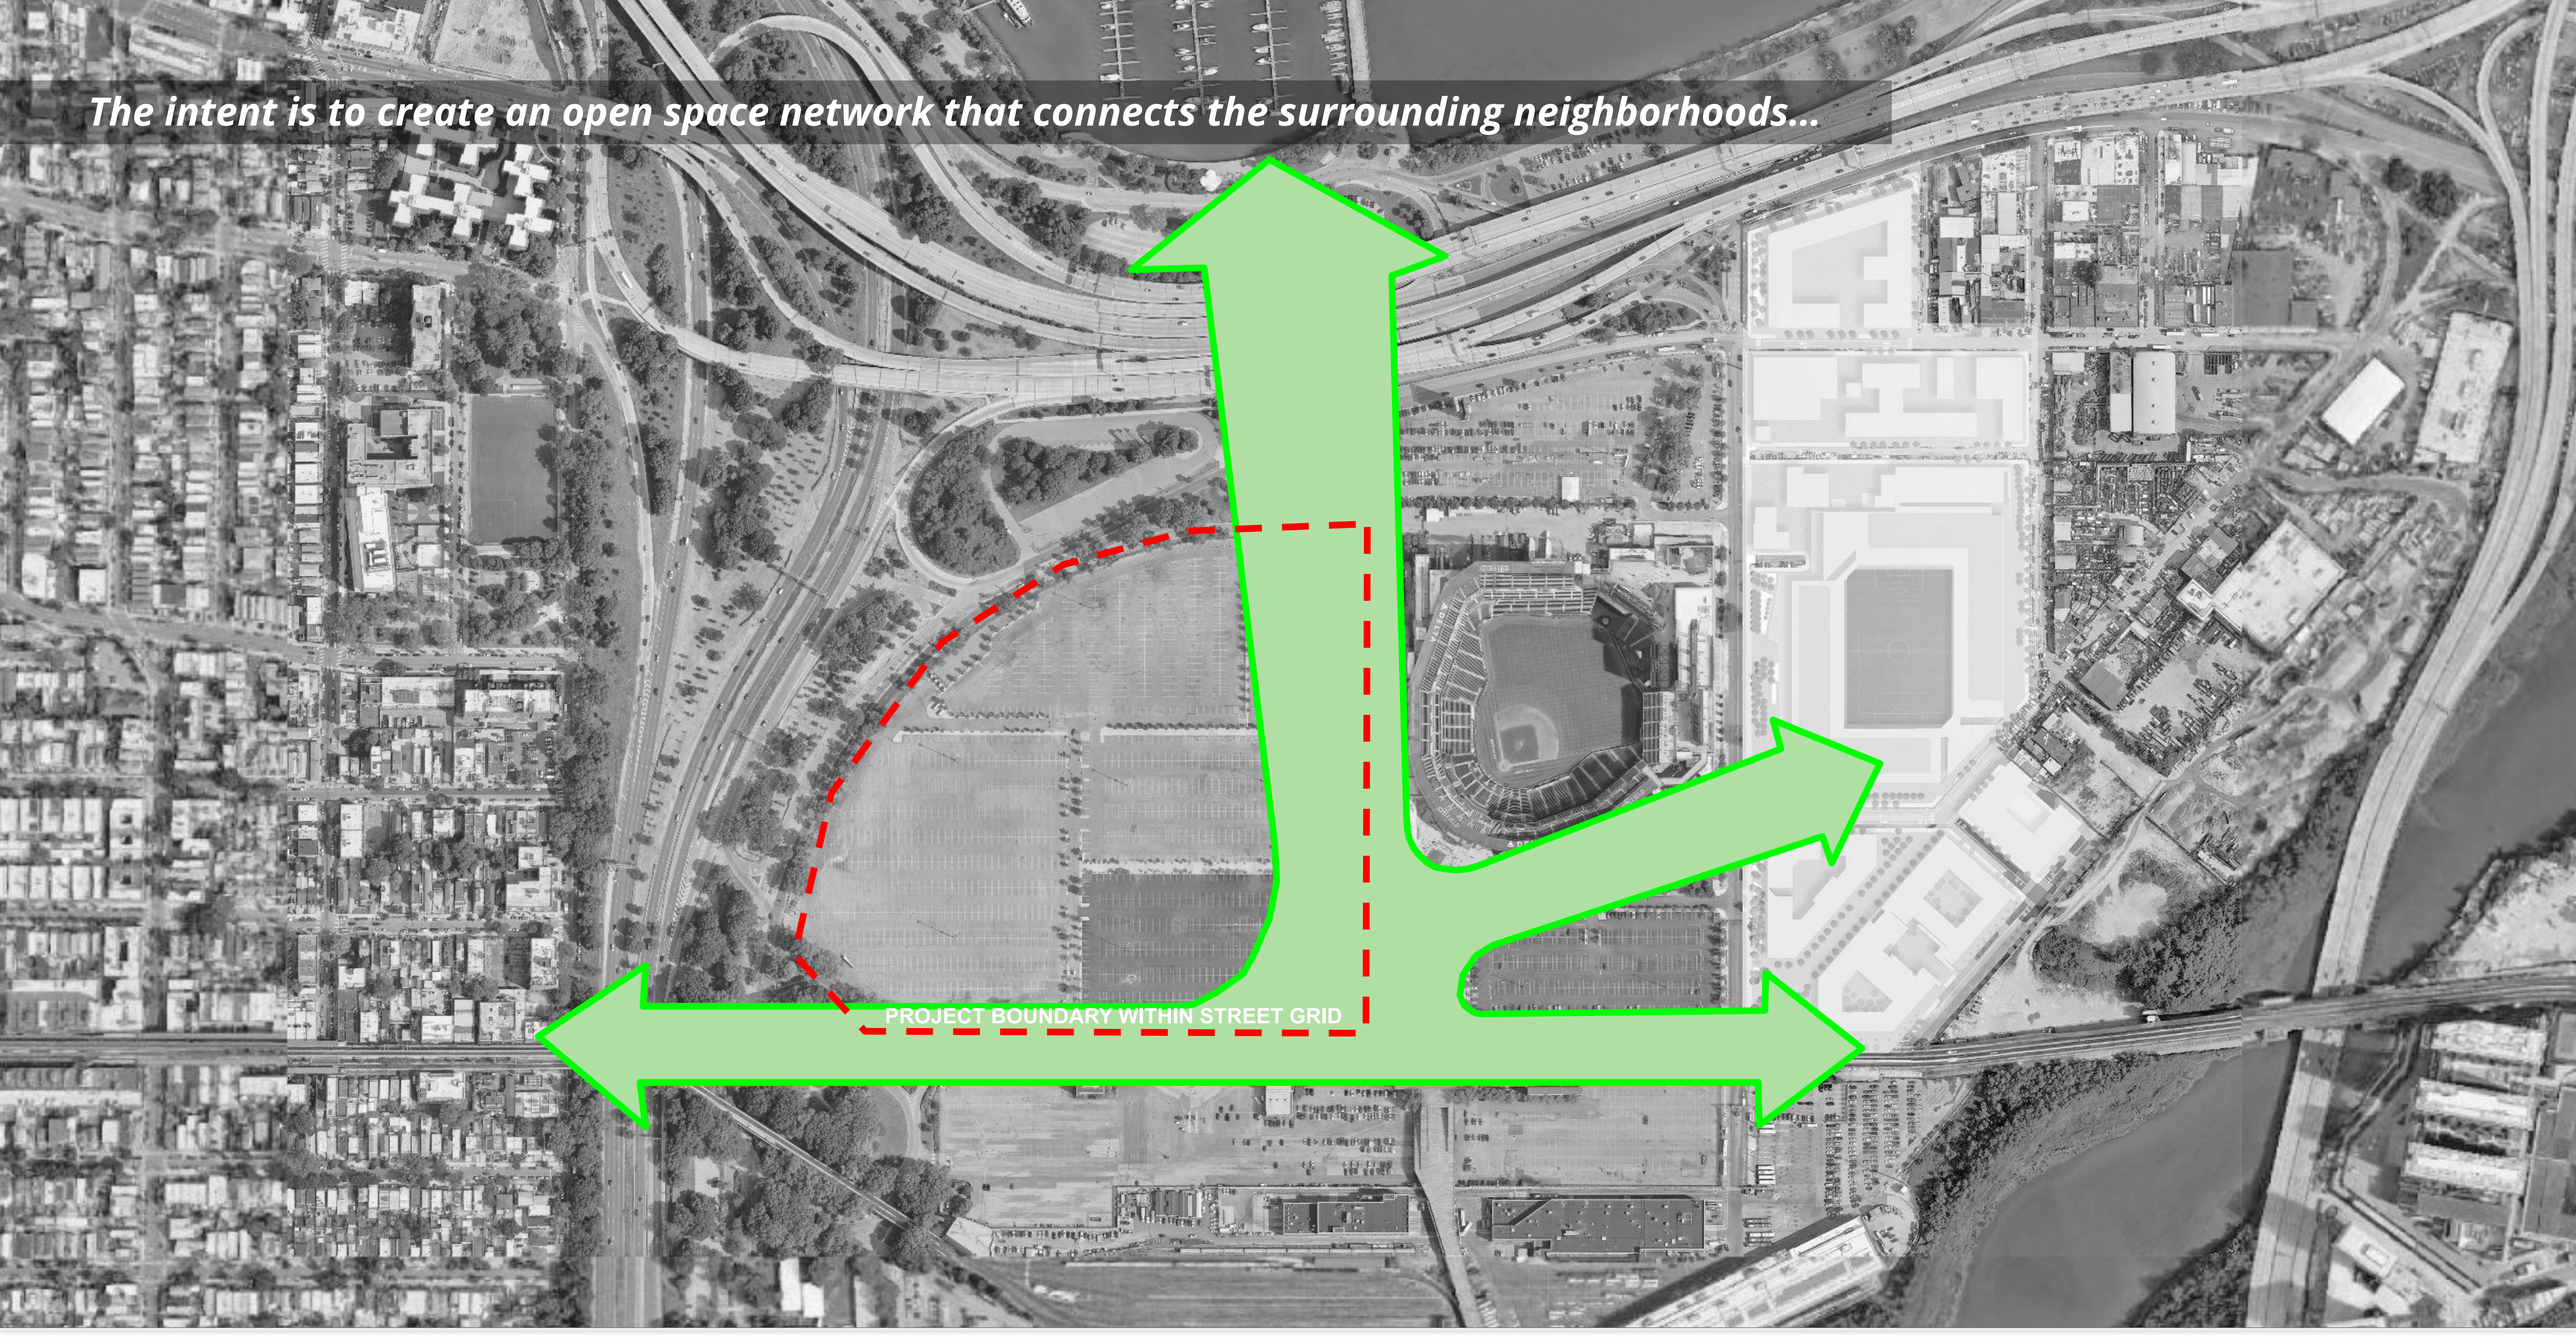
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The site currently sits within the floodplain, so the program needs to be elevated



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

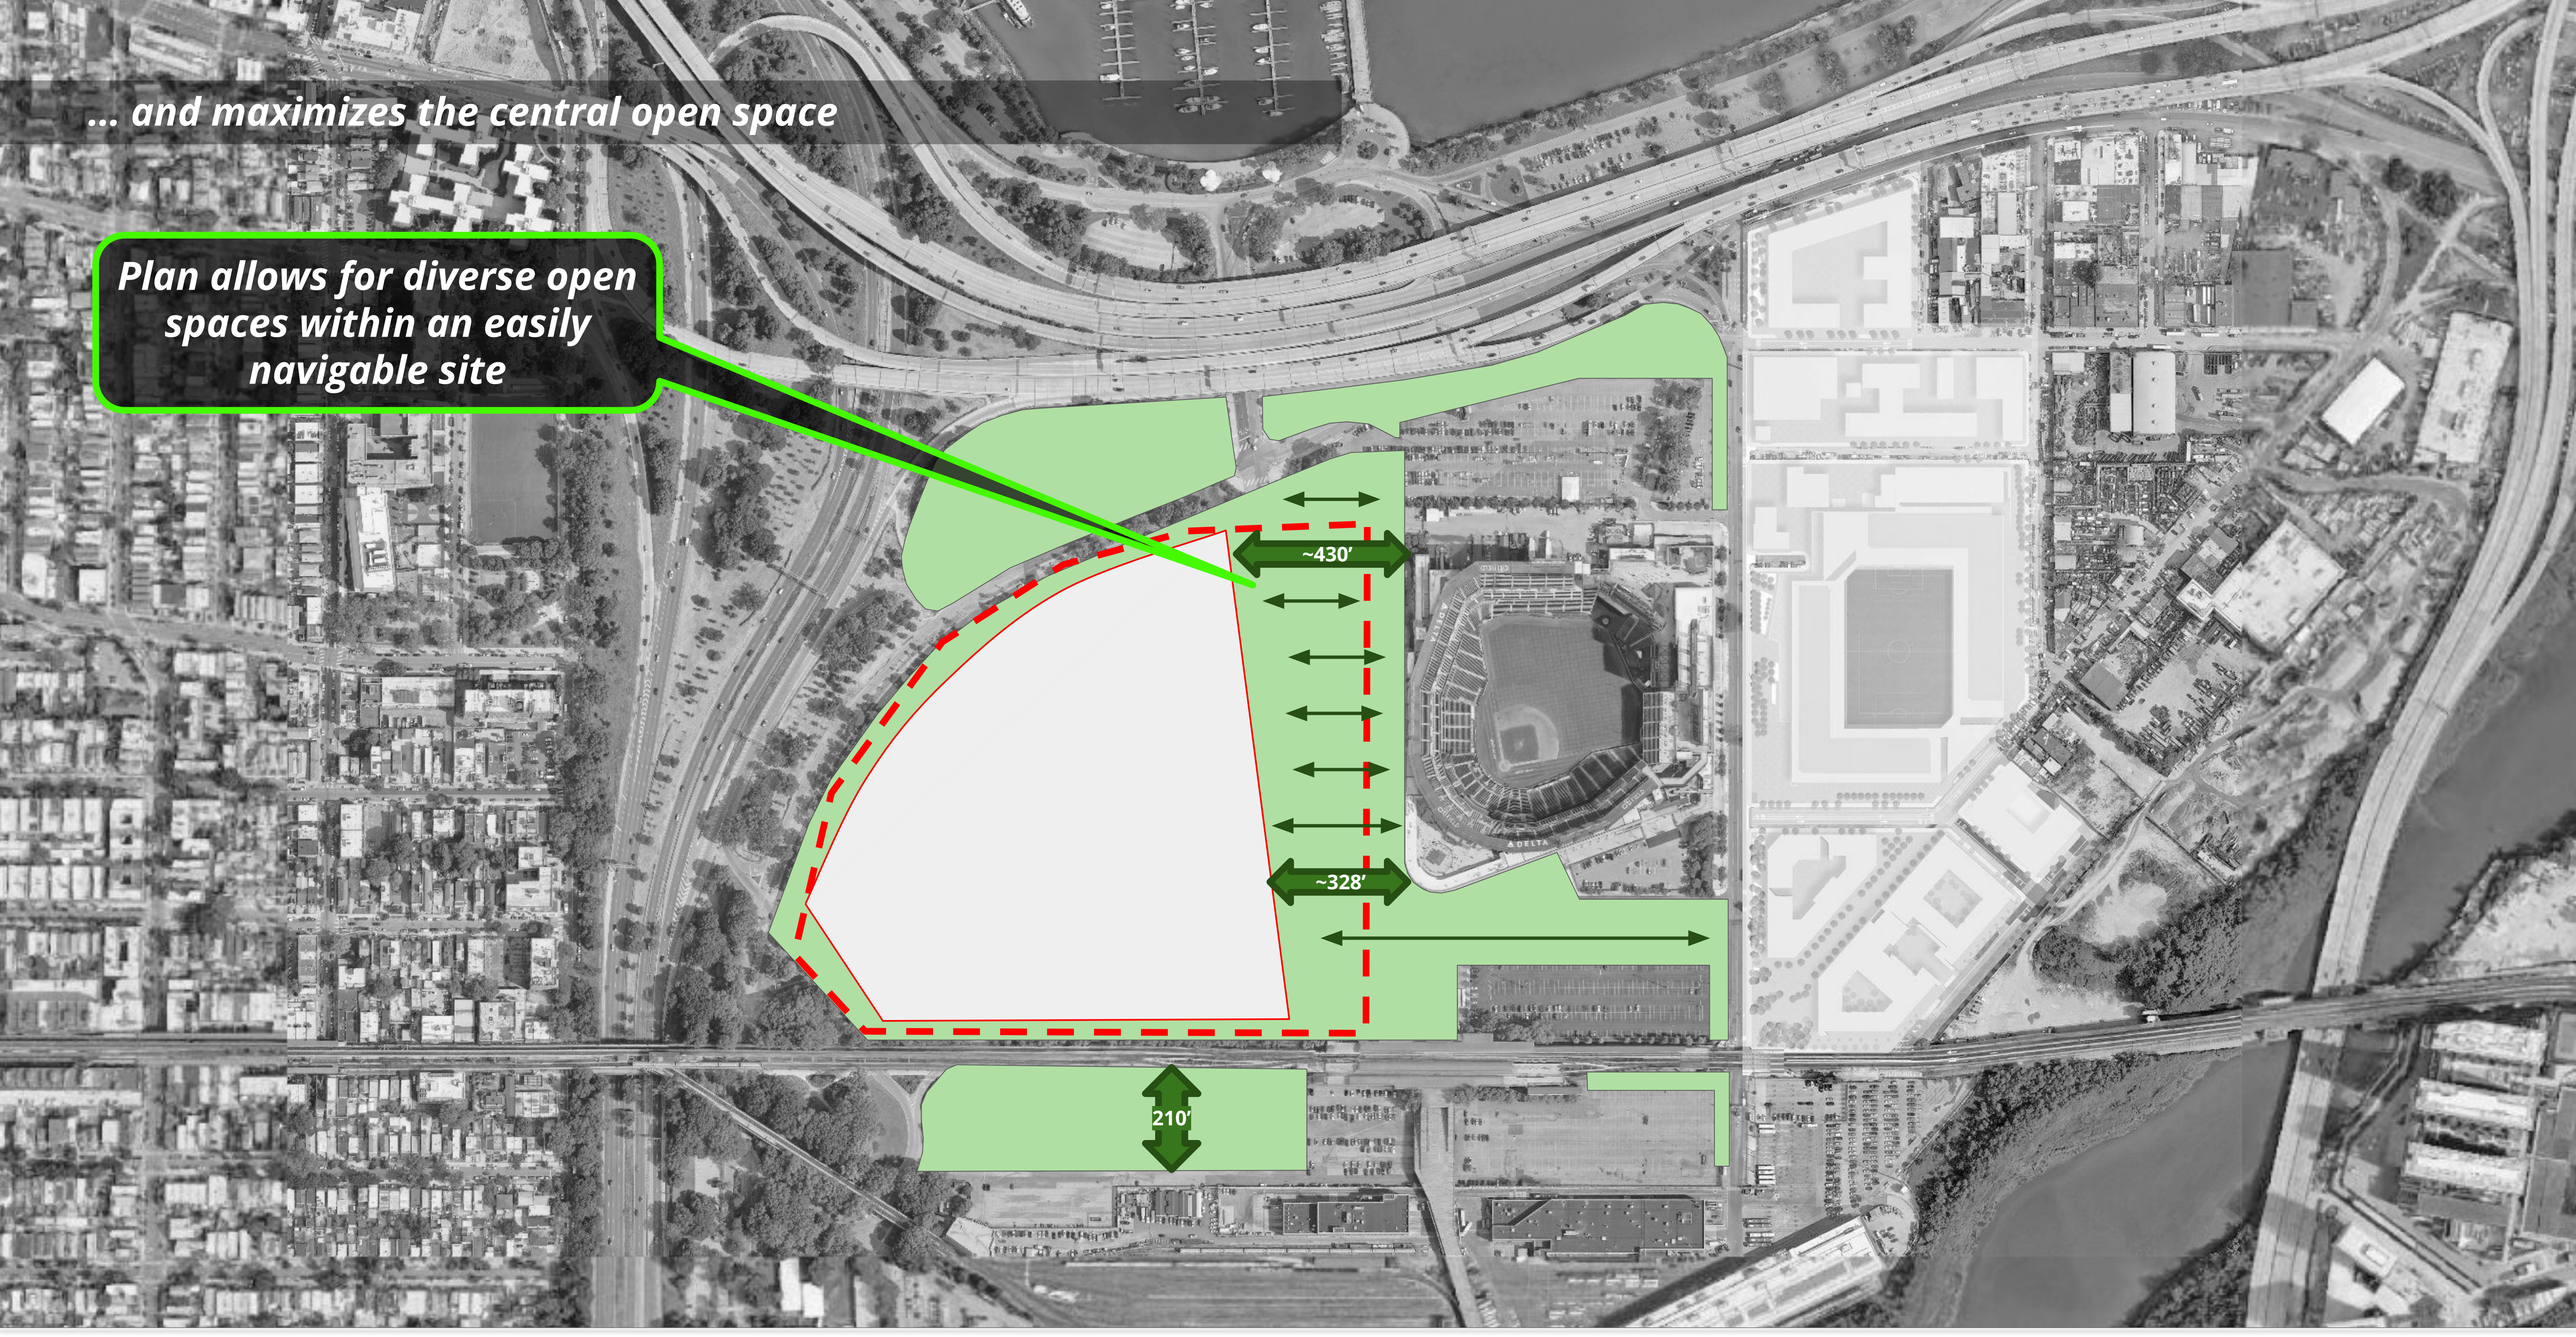
The intent is to create an open space network that connects the surrounding neighborhoods...



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

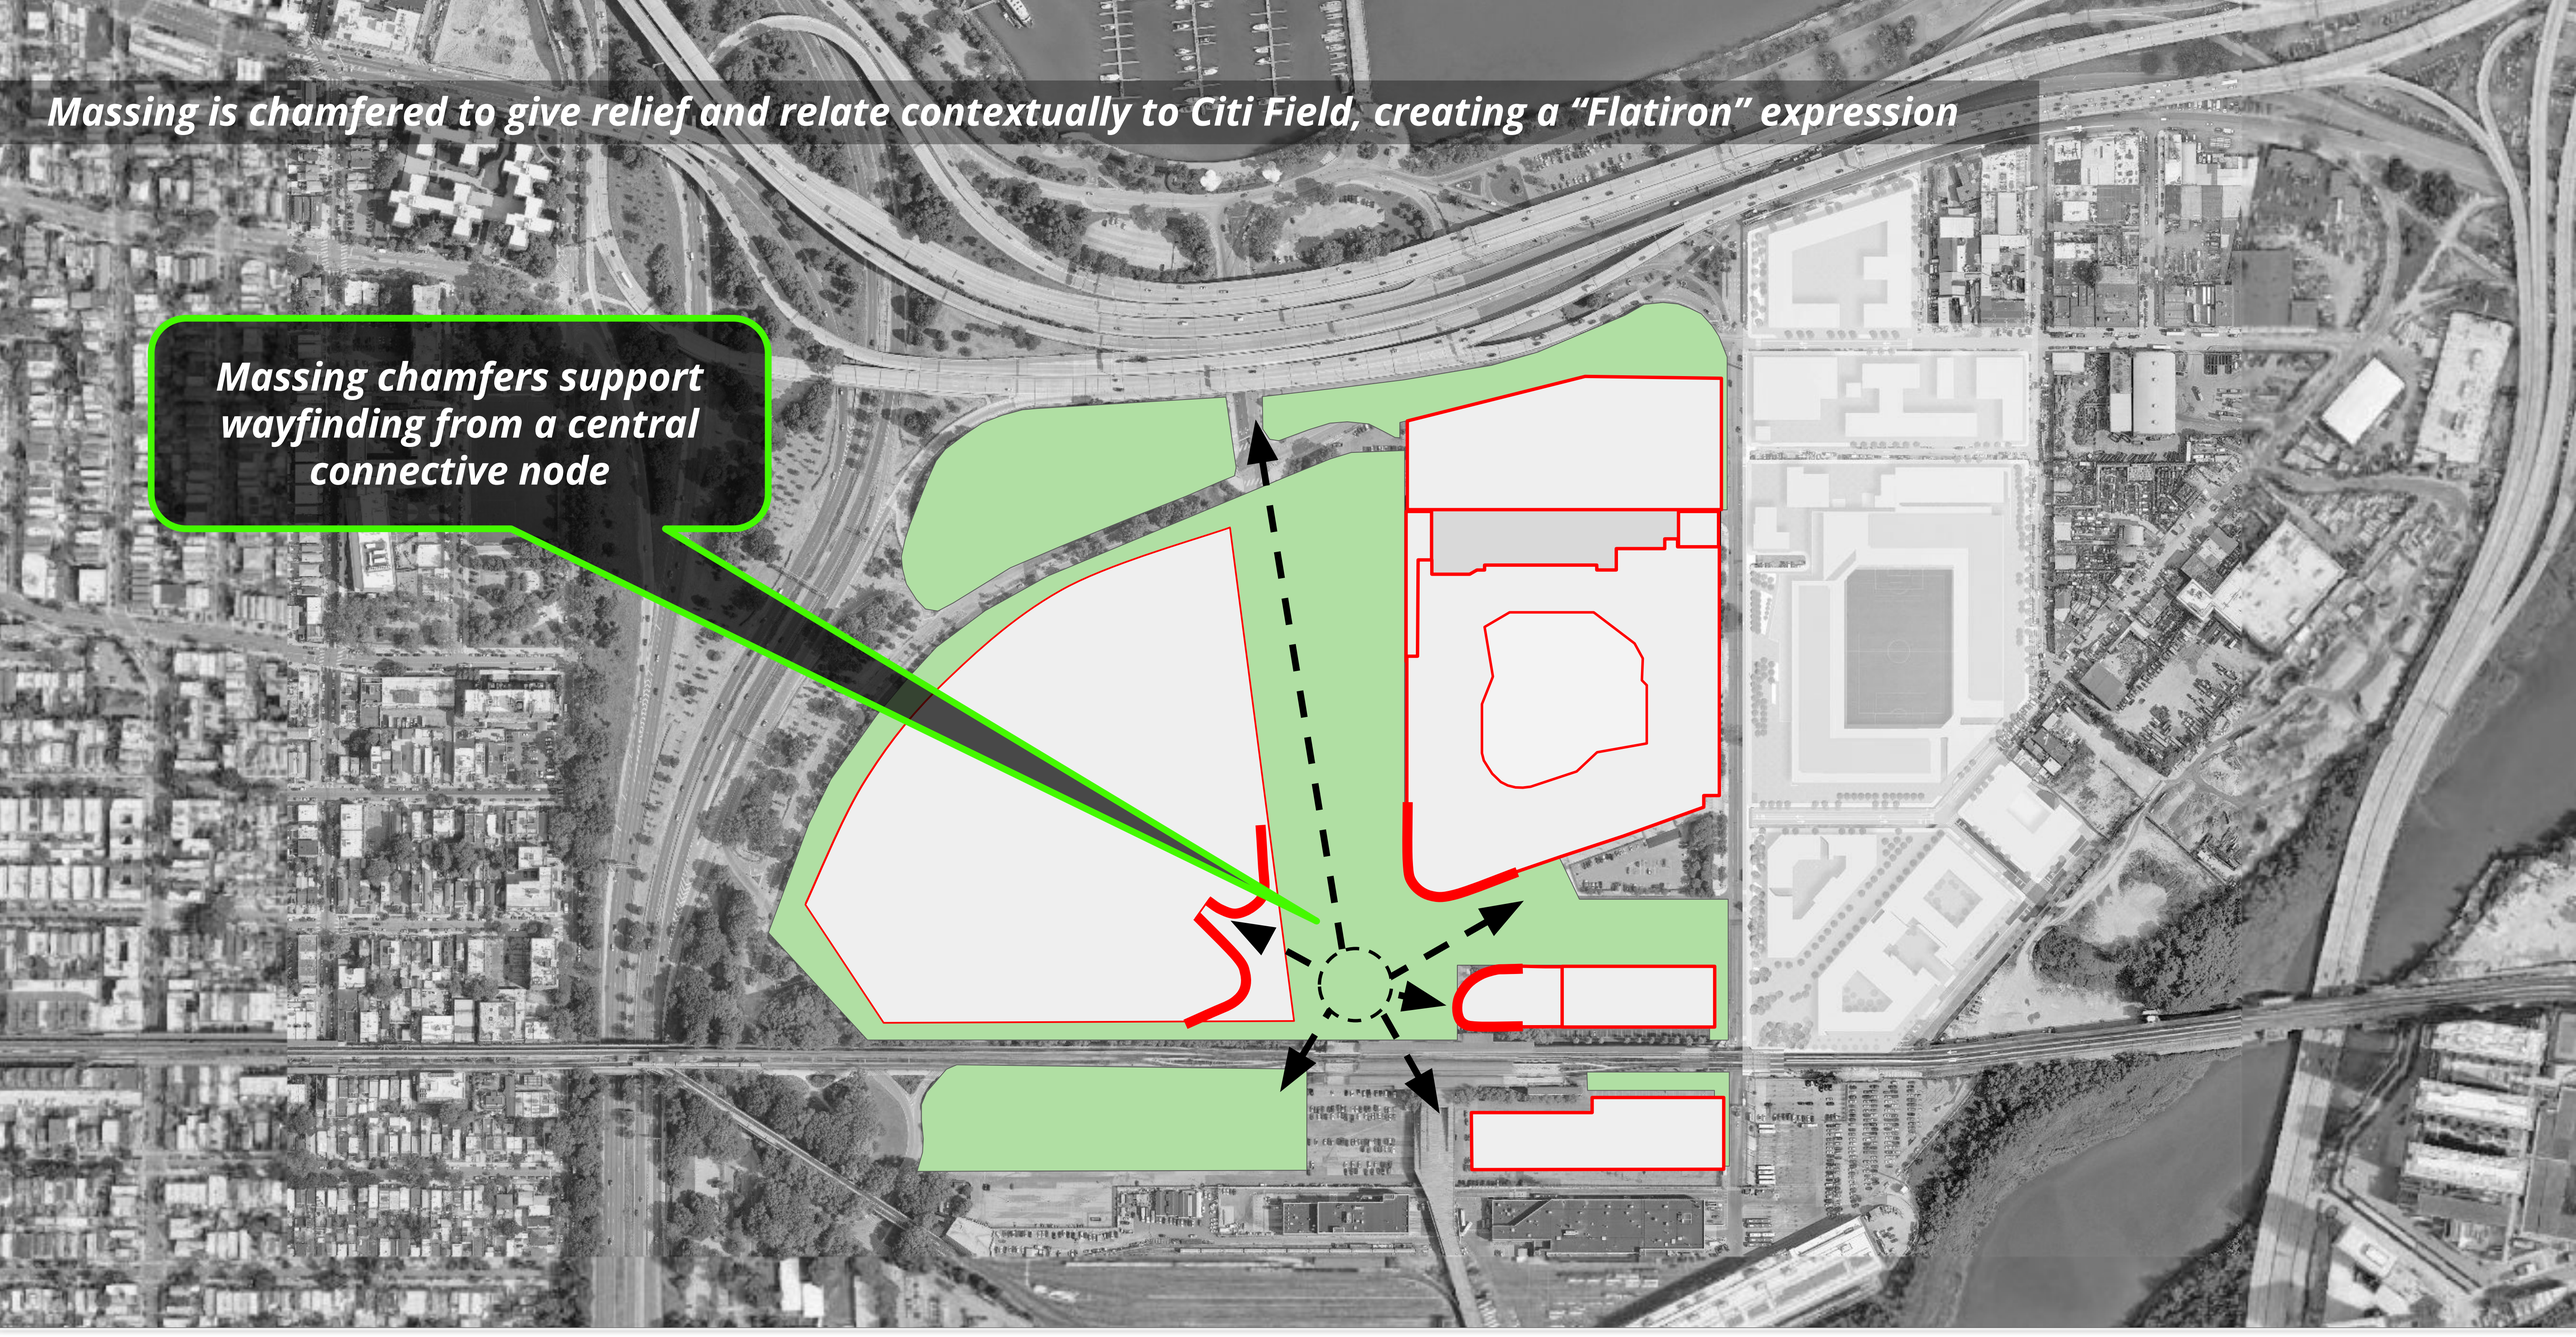
... and maximizes the central open space

Plan allows for diverse open spaces within an easily navigable site

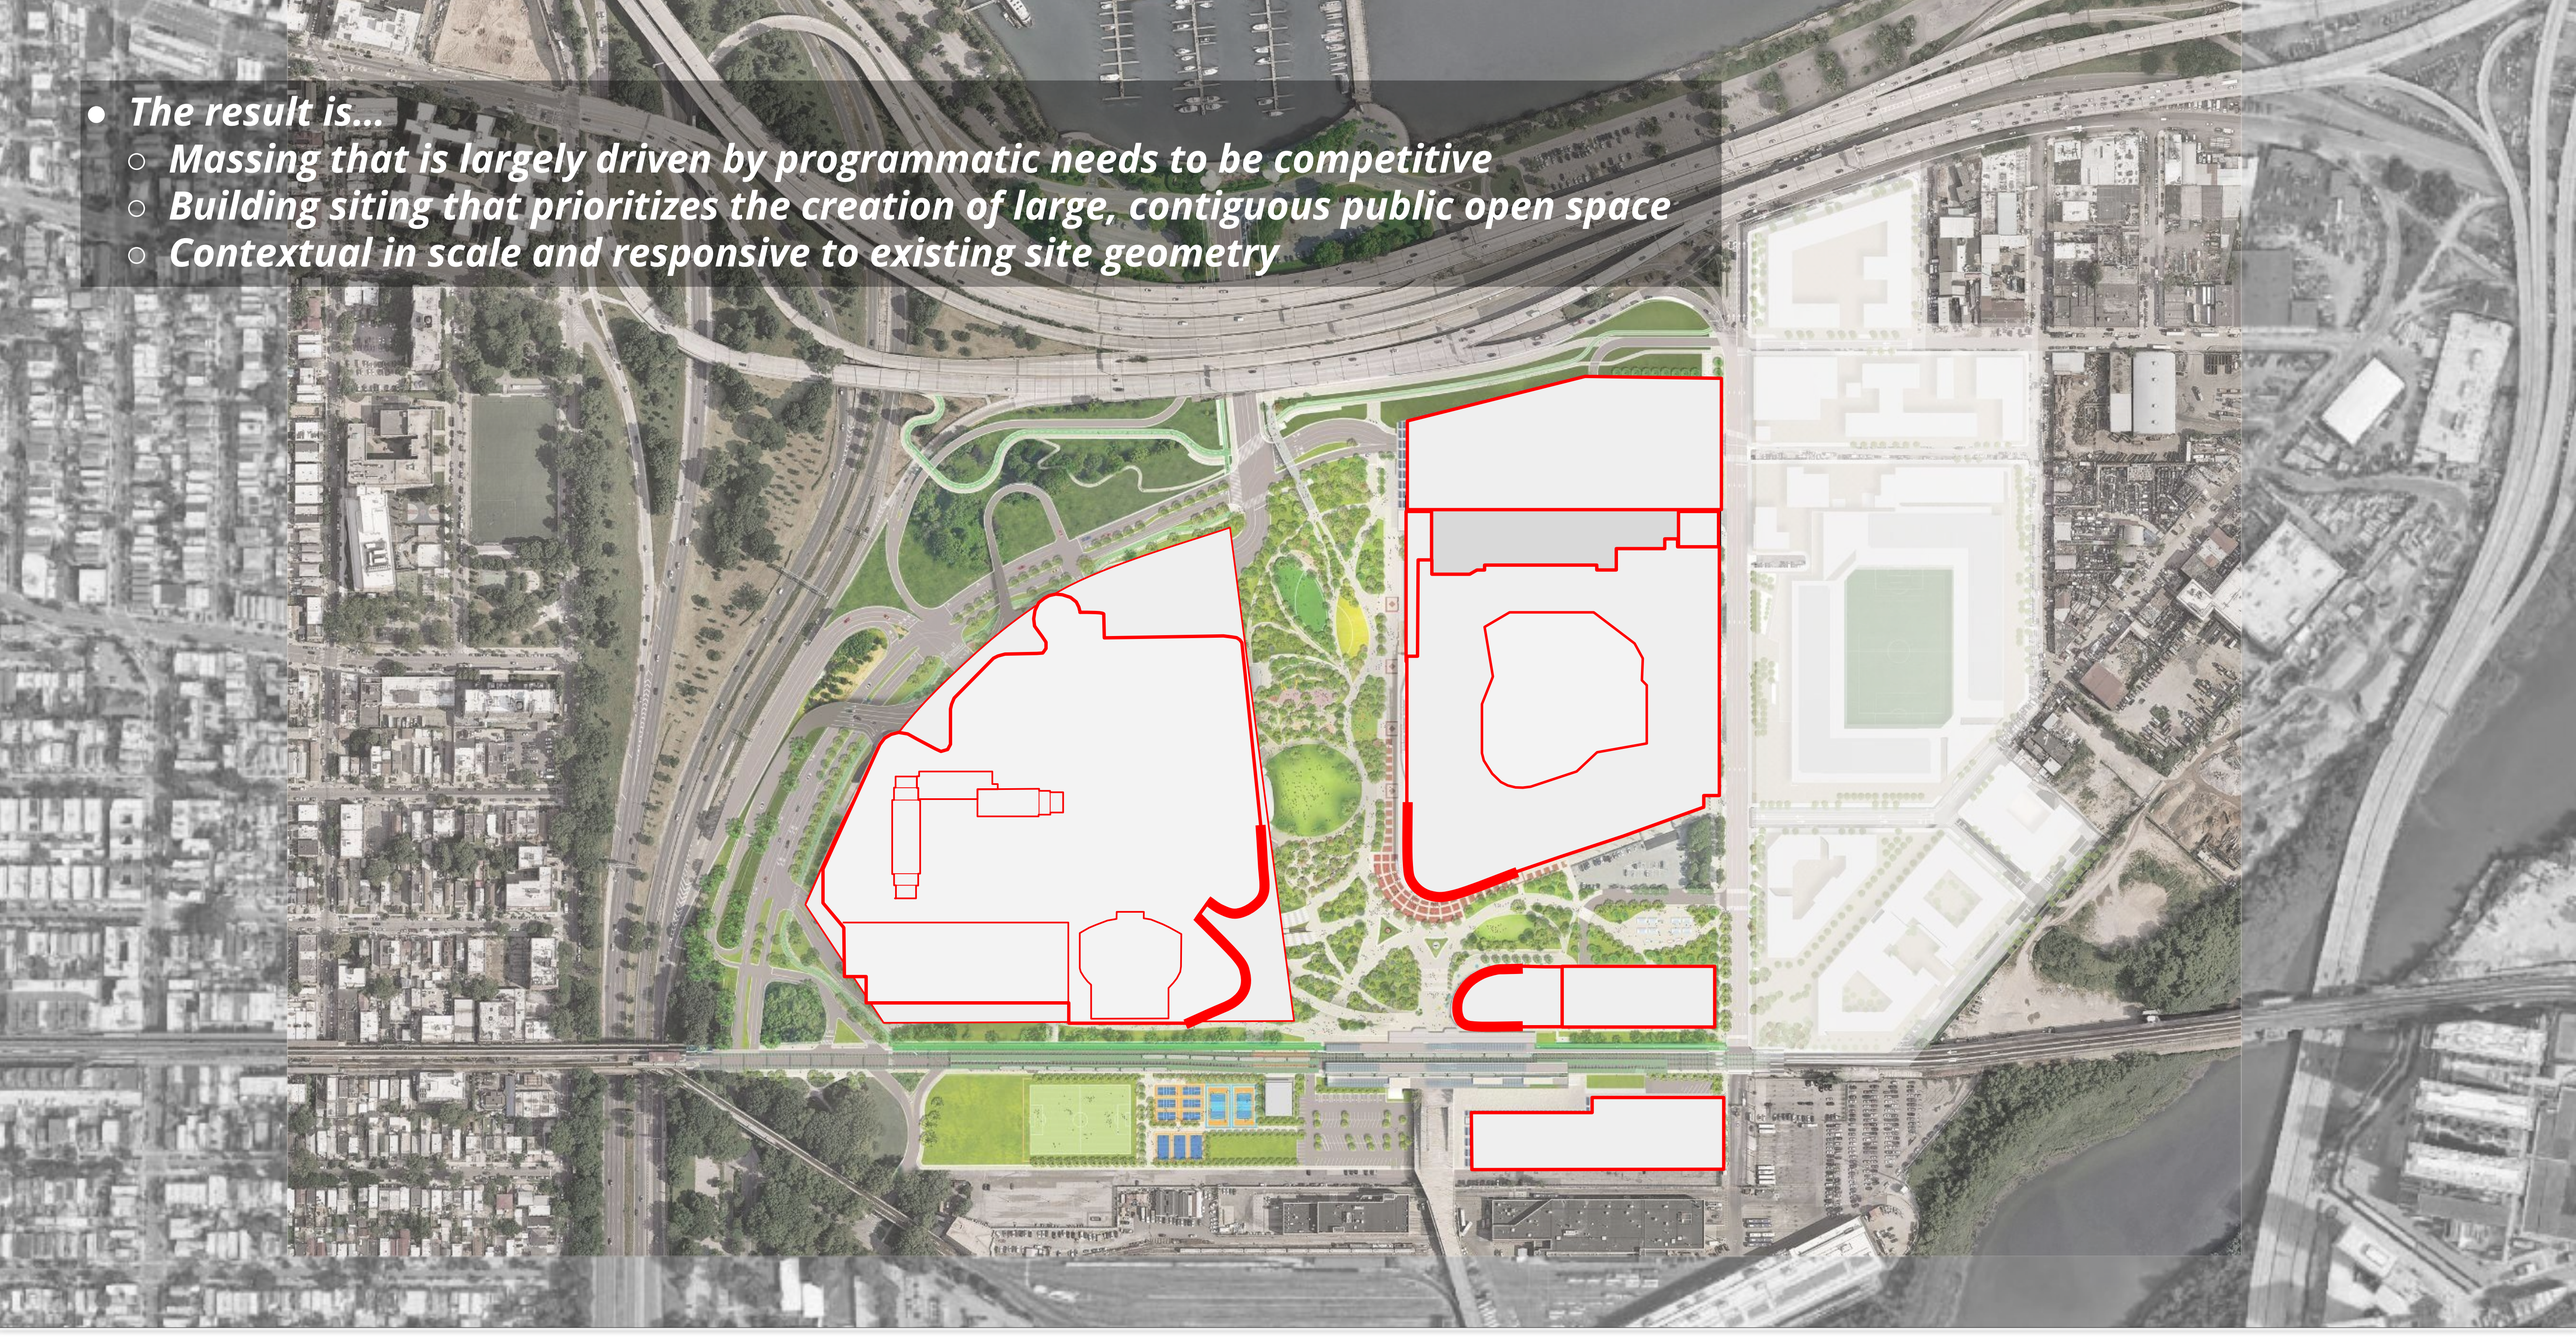


© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Massing is chamfered to give relief and relate contextually to Citi Field, creating a “Flatiron” expression



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.



- *The result is…*
  - *Massing that is largely driven by programmatic needs to be competitive*
  - *Building siting that prioritizes the creation of large, contiguous public open space*
  - *Contextual in scale and responsive to existing site geometry*

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The project creates multiple accessible connections for transit, bicycles, pedestrians, and separates vehicle from pedestrian traffic

OPEN SPACE

Please refer to the ARCHITECTURE section of this document for most up-to-date plans and depictions of architectural elements.

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

SITEWIDE STRATEGIES

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The design of park elements is inspired by both the 1939 and 1964 NYC World's Fairs It also reflects the style and language of contemporary NYC public parks to create a space that feels public, grounded, and familiar, yet refreshingly new

1939 + 1964 WORLD'S FAIR

+

NYC PARKS

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

By incorporating familiar materials, plantings, and furnishings commonly found in NYC parks, the design can subtly communicate the park's public nature

Hardscape inspired by many NYC public spaces.

+

Planting is native + adaptive, chosen for year-round seasonal interest.

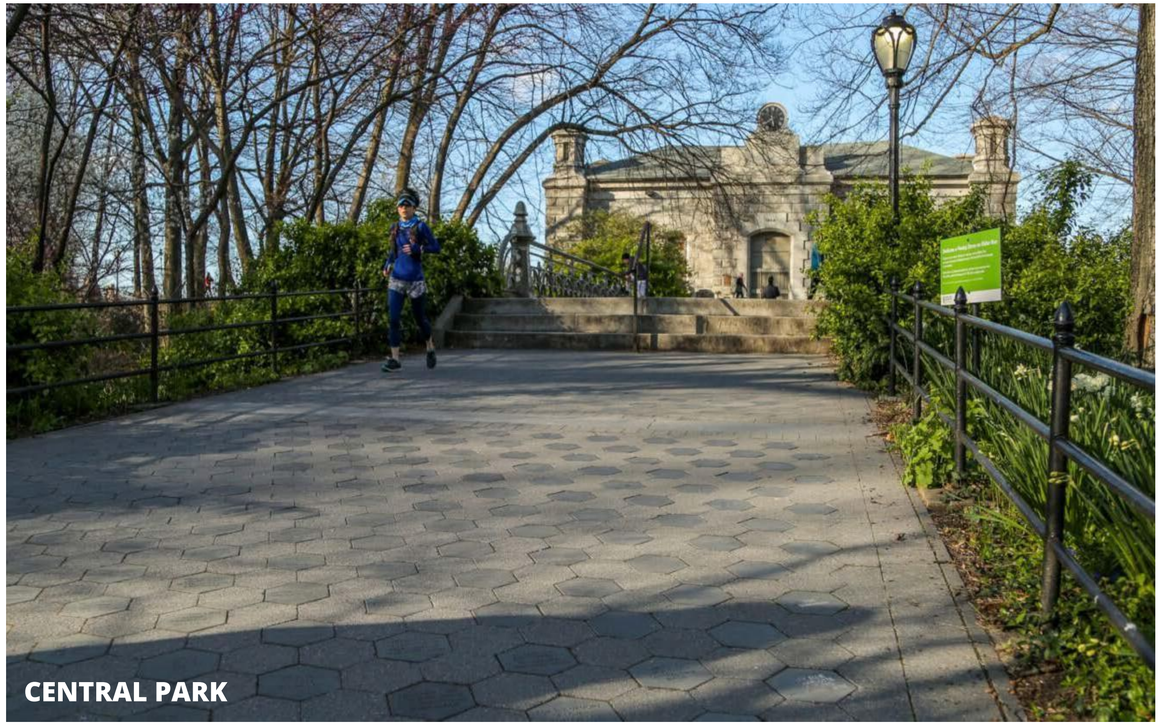
+

Furnishings echo the World's Fair and classic NYC parks.

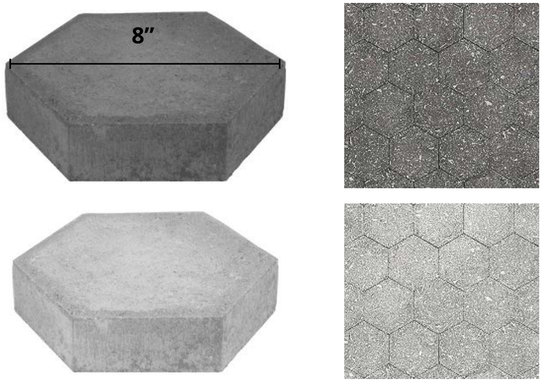
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

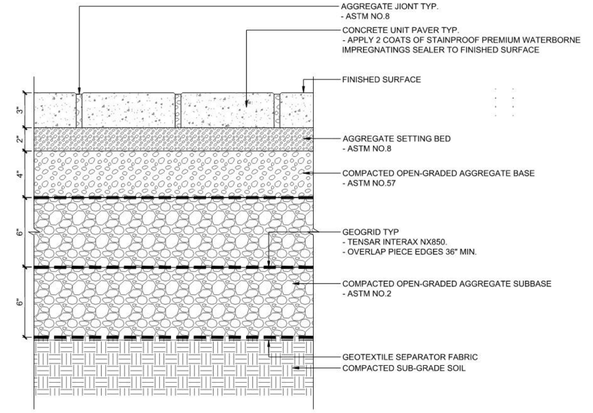
Hardscape: Park material selection is inspired by NYC DPR hex paving shaping, but using precast concrete permeable paving

NYC PARKS - ASPHALT HEX PAVING



PROPOSED - PRECAST CONCRETE PERMEABLE PAVING





1 PERMEABLE CONCRETE UNIT PAVING - ON GRADE - VEHICULAR
TYPICAL SECTION 3" = 1'-0"_1

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Proposed park view with precast concrete permeable paving + furnishing

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The paving design has the potential to incorporate elements inspired by Mets heritage, baseball uniform pinstripes, and sheet music

CELEBRATING METS HERITAGE AND SPORT

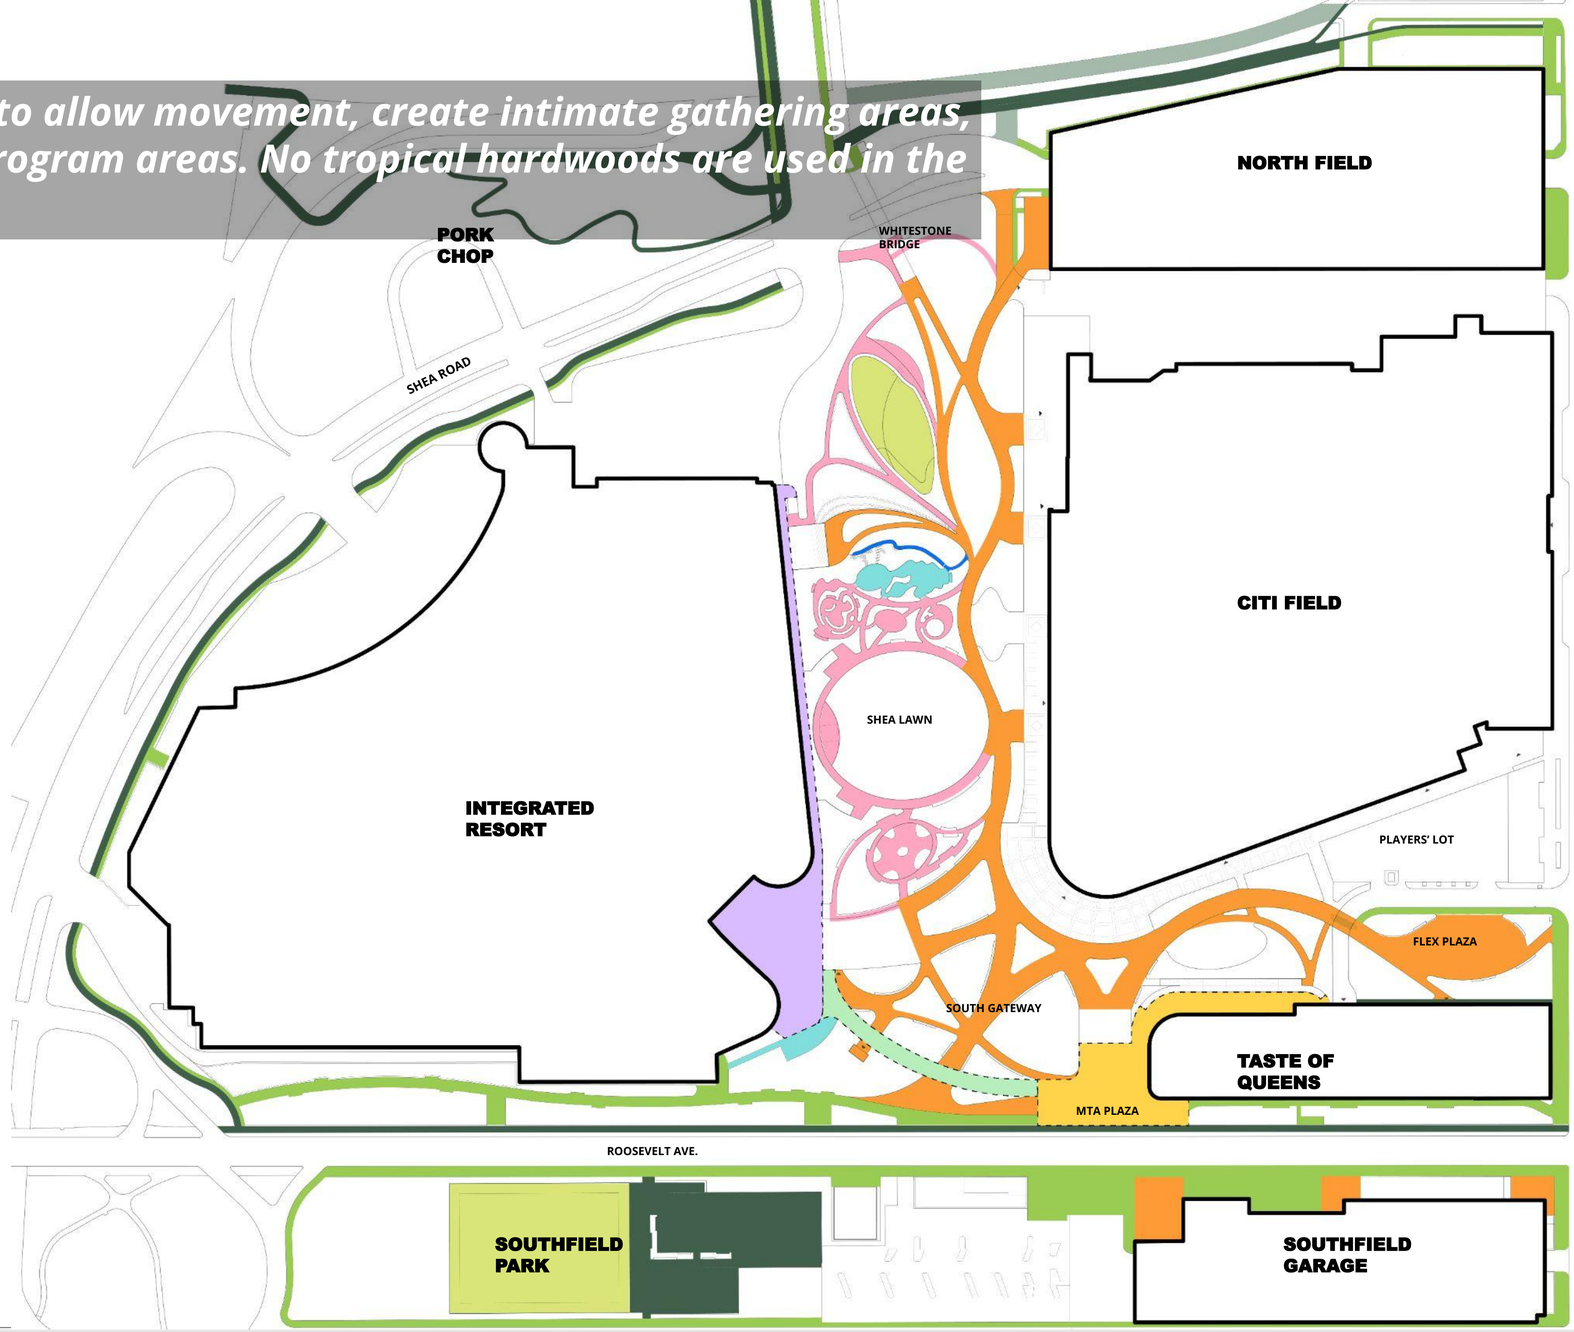
CELEBRATING LIVE MUSIC: a key program of the Integrated Resort and Hard Rock

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The pinstripe paving welcomes and guides visitors into the park

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Hardscape is chosen to allow movement, create intimate gathering areas, and create distinct program areas. No tropical hardwoods are used in the public realm



AT GRADE

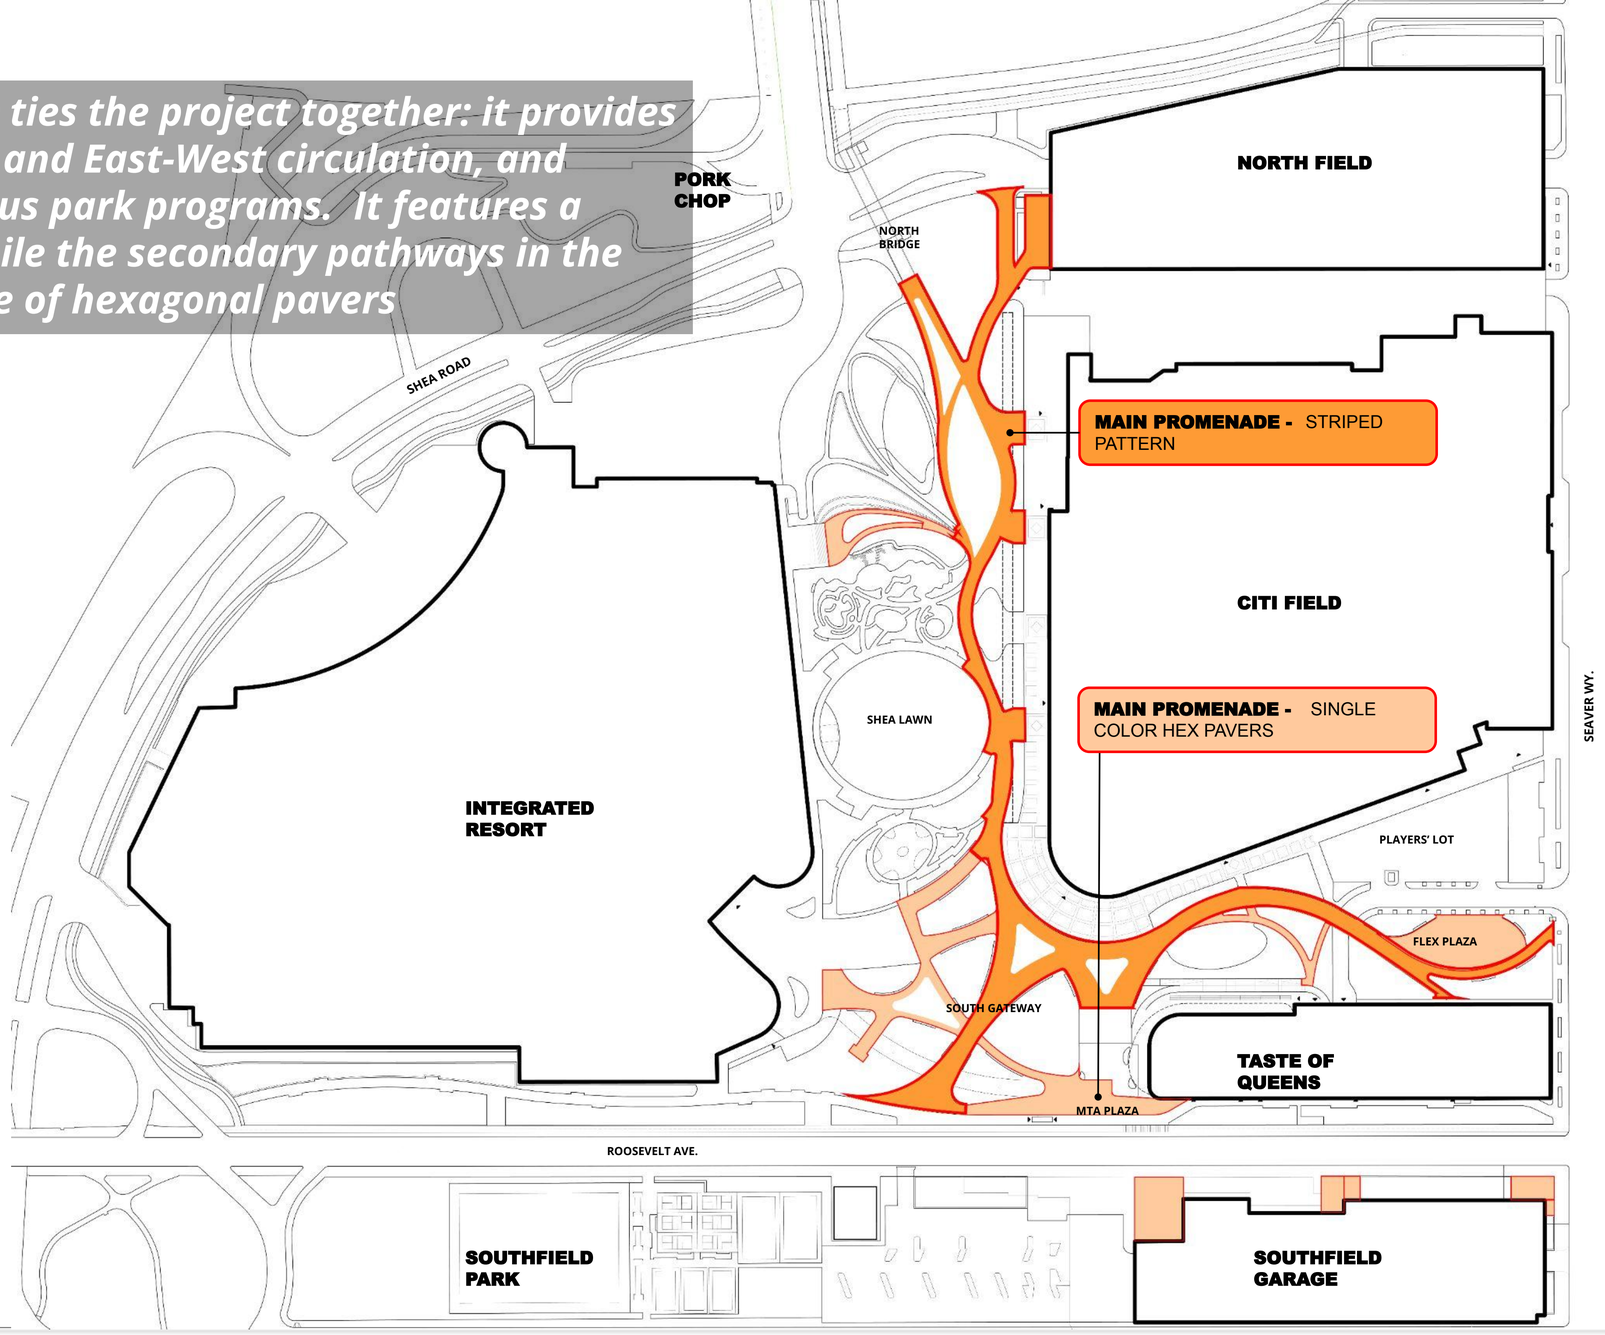
- PERMEABLE CONCRETE UNIT PAVING
- STABILIZED DECOMPOSED GRANITE
- SAFETY SURFACE
- SYNTHETIC TURF
- CIP CONCRETE
- ASPHALT PAVING - PEDESTRIAN
- ASPHALT PAVING - VEHICULAR
- CIP CONCRETE - DOT

ON STRUCTURE

- PERMEABLE CONCRETE UNIT PAVING
- CIP CONCRETE

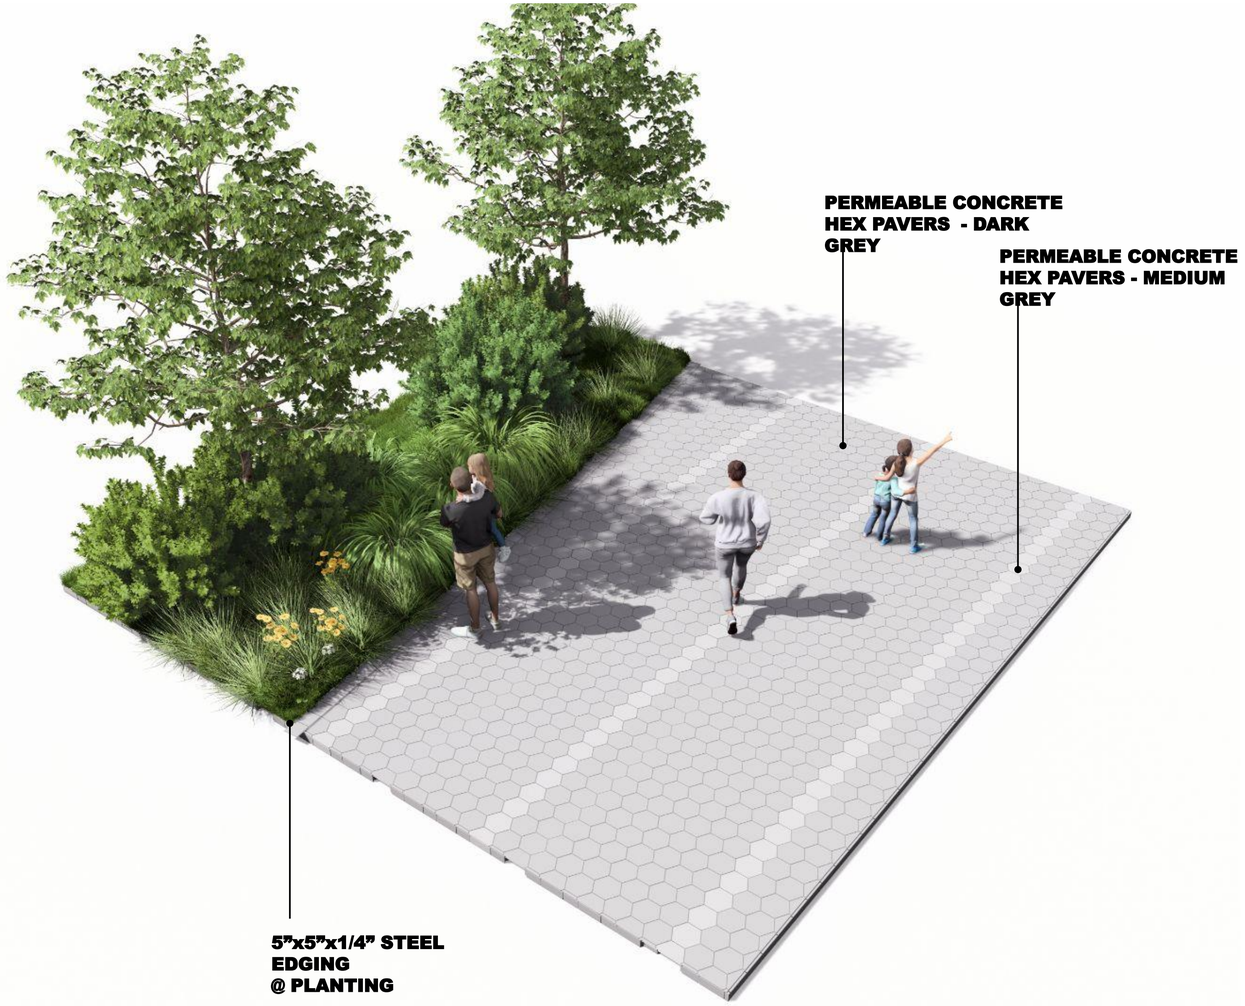
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

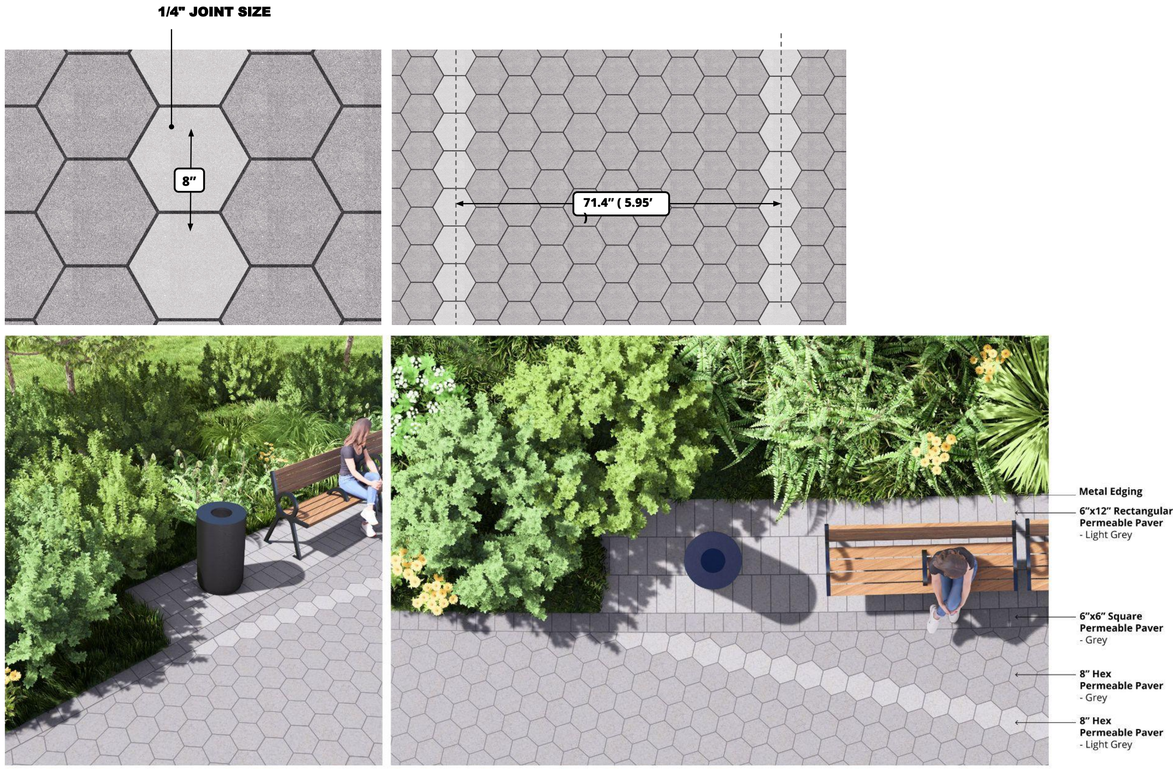
The Main Promenade ties the project together: it provides primary North-South and East-West circulation, and connects to the various park programs. It features a pinstripe pattern, while the secondary pathways in the park use a single tone of hexagonal pavers



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Pinstriped-themed paving pattern with two tones of hexagonal pavers





© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

- ***Project is designed to meet or exceed NYC DPR standards.***
- ***This includes meeting NYC DPR standards for various programs: Playgrounds, sport facilities, dog runs.***
- ***This also includes tree canopy design, planting design + specifications, and material choices.***
- ***The project will be maintained and secured by the applicant.***

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Key programs include playground, dog run, passive recreation, gardens, and active recreation. NYC DPR has provided initial response to some of these areas; the design team is working to integrate requirements including shade, water, and correct material selections. Project team will continue to share, collaborate with and respond to DPR direction

The planting design is proposing a rich variety of planting typologies across the park, with a focus on seasonal interest, specimen plantings, and colorful perennial gardens. The density of the planting, therefore, varies depending on the type of garden. Where sightlines are critical, trees will be planted accordingly and the shrub layouts will be carefully shaped to accommodate them

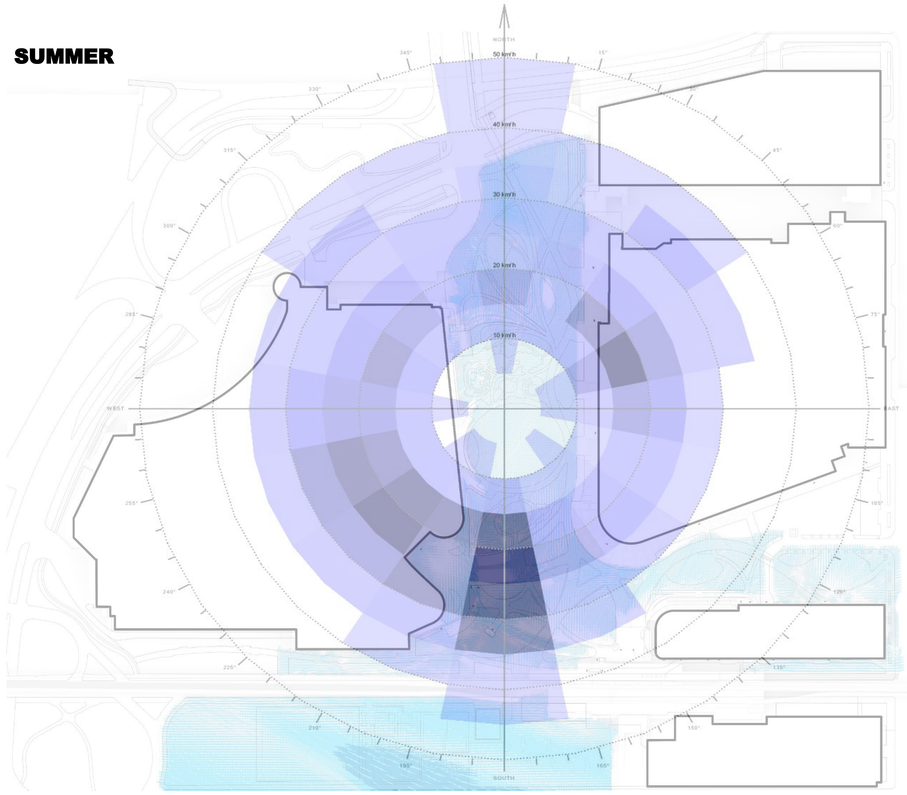
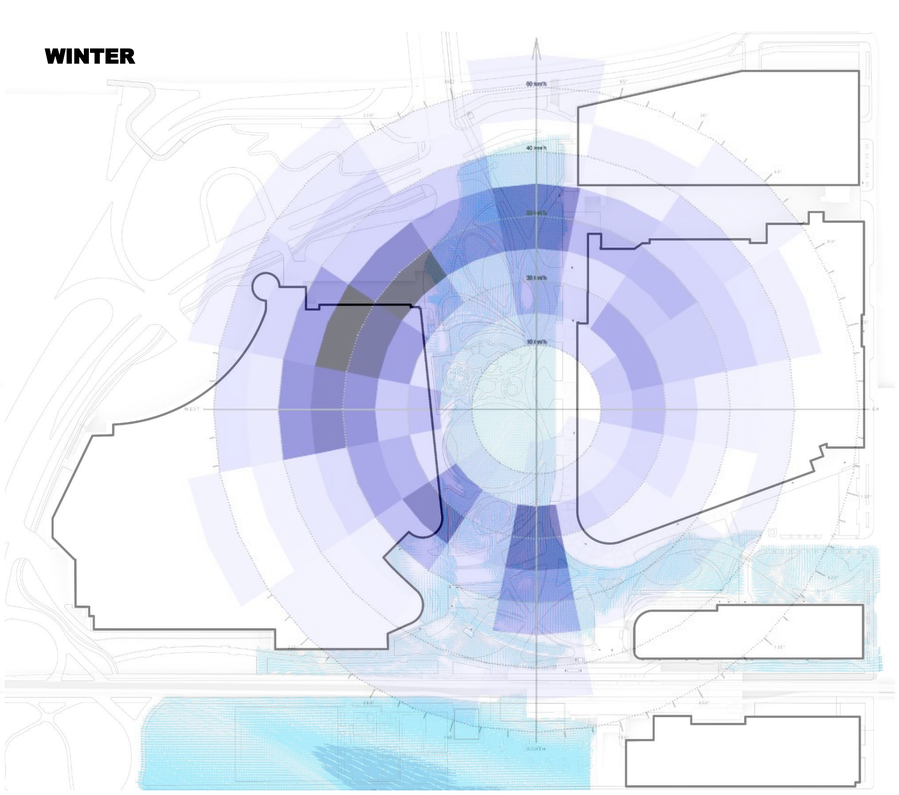
Building configurations encourage summertime breezes and mitigate wintertime predominant winds

SUMMER



Wind comes from the south in the summer: building configurations encourage these cooling winds.

WINTER



Wintertime breezes come from the north west; the building locations will help mitigate these winds.

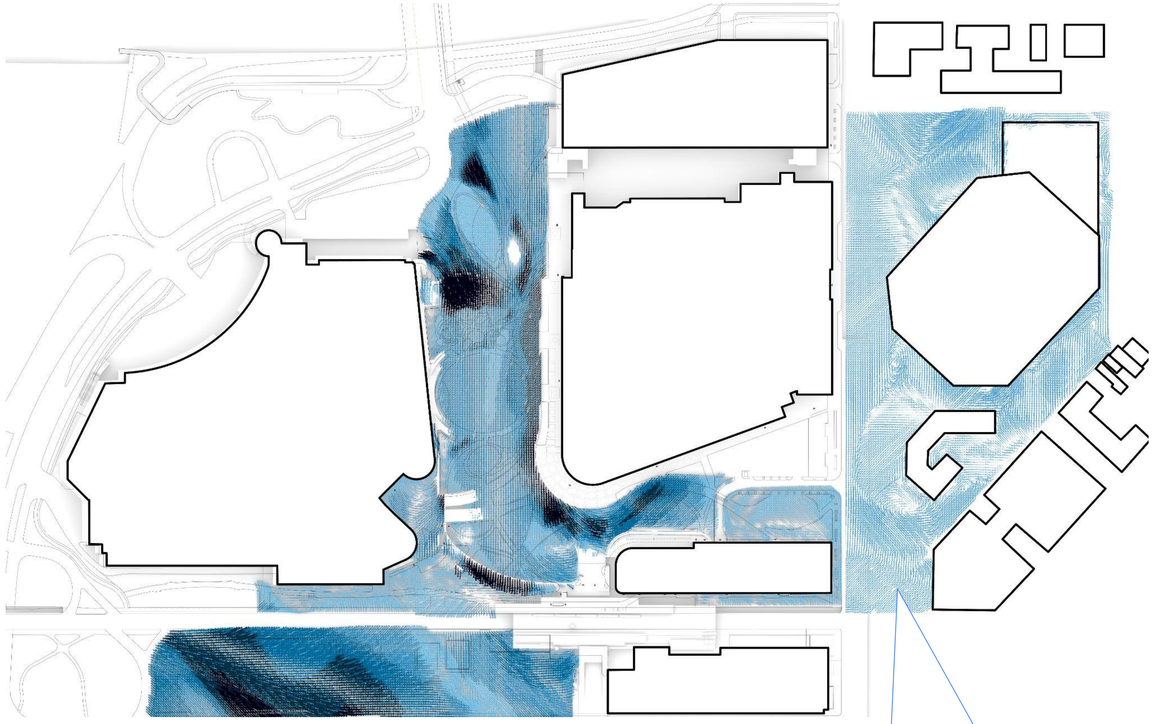
WIND

<10h
40h
70h
110h
>140h

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Wind studies show that the Site is adequately shielded from wind to achieve "comfortable" conditions year round. These conditions are improved upon with the introduction of landscape elements and trees

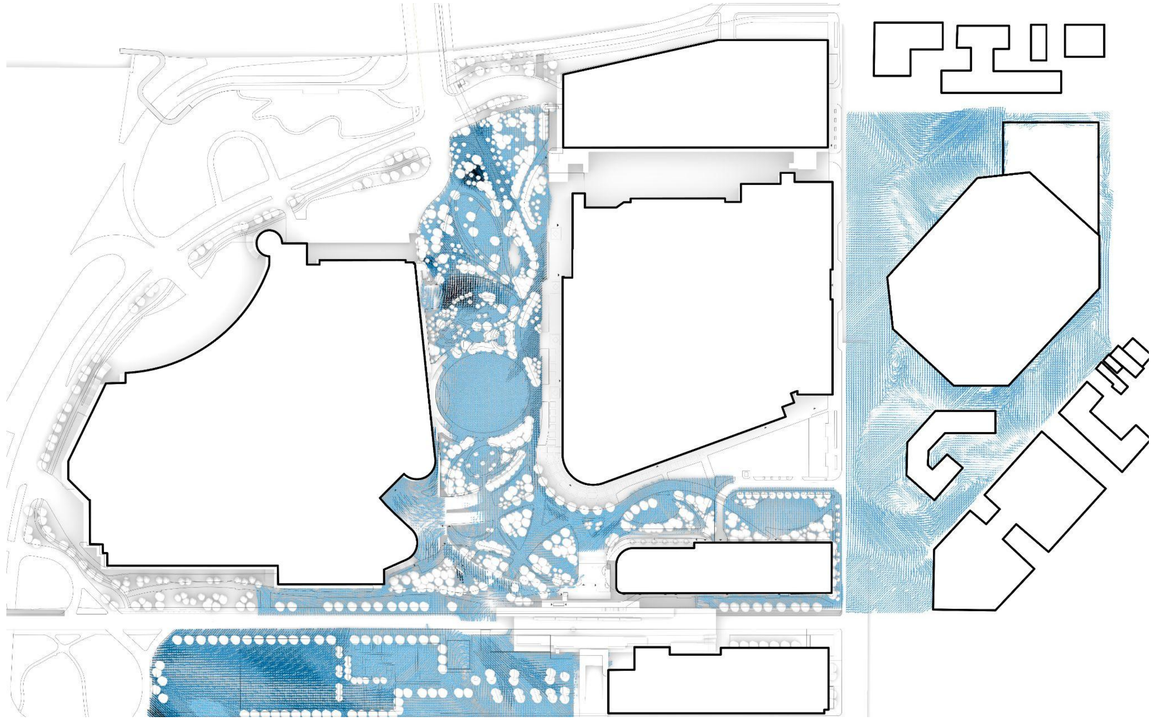
SITE (SUMMER)



Site wind analysis indicates winds are generally comfortable in all open spaces

No impact to Willets Point open space.

WITH PROPOSED LANDSCAPE ELEMENTS & TREES (SUMMER)



The proposed landscaping and tree placement are designed to continue to maintain comfortable wind conditions across the site.

WIND

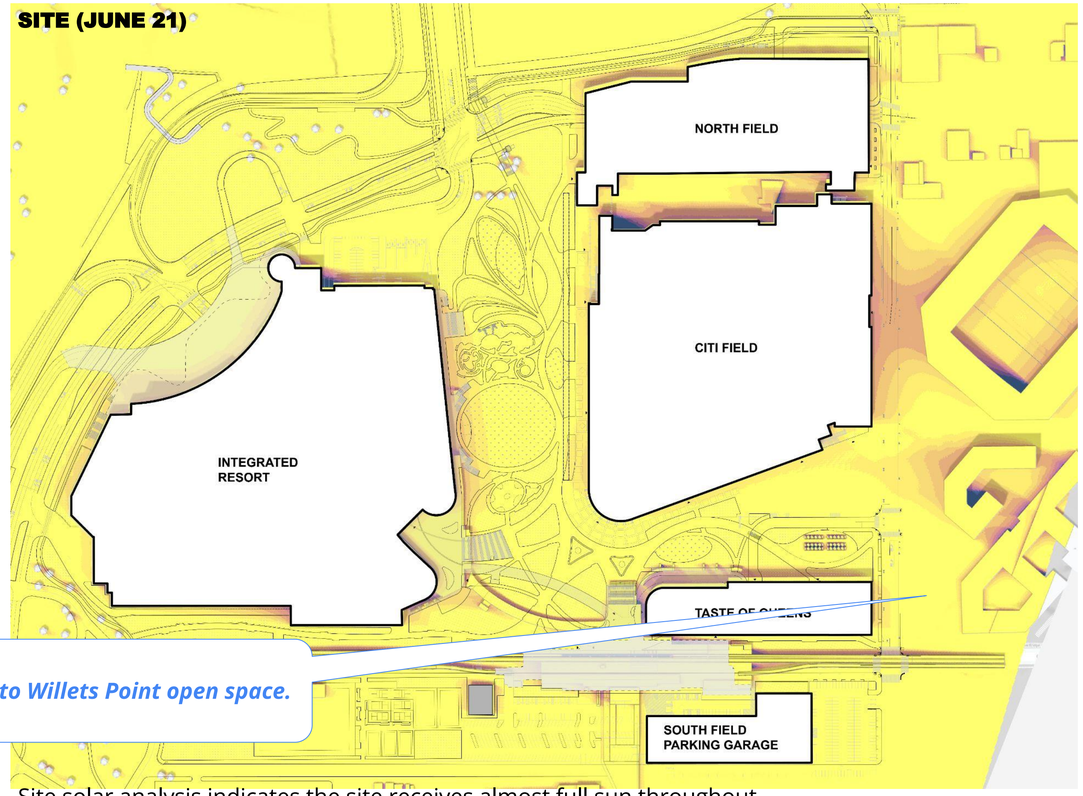
- 0 - 5 mph
- 5 - 9 mph
- 9 - 13 mph
- 13 - 18 mph
- > 18 mph

Pedestrian comfort in wind analysis is determined by wind speed, frequency, and duration at ground level, with comfort achieved when conditions do not cause discomfort, difficulty walking, or safety concerns for people in outdoor spaces.

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

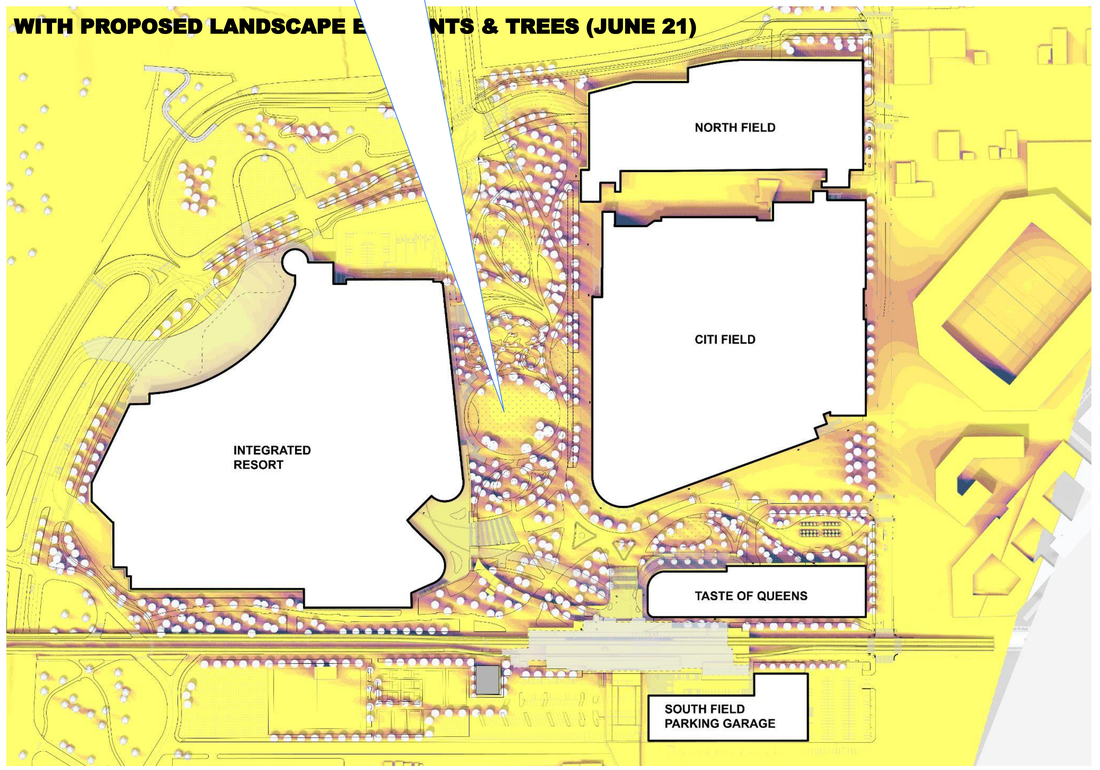
Solar assessment confirms that the site receives sufficient sunlight to support the selected plant communities according to their light requirements. Shade for comfort is achieved through canopy design and strategic tree selection/placement

See later pages for Shea Lawn Update.



No impact to Willets Point open space.

Site solar analysis indicates the site receives almost full sun throughout the year, which benefits the planting selections.



The proposed trees and landscape elements contribute significant shade coverage for the entire site.

Full Sun (6-9 hrs) Partial Sun (3-6 hrs) Partial Shade (3-4 hrs) Shade (< 3hrs)

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

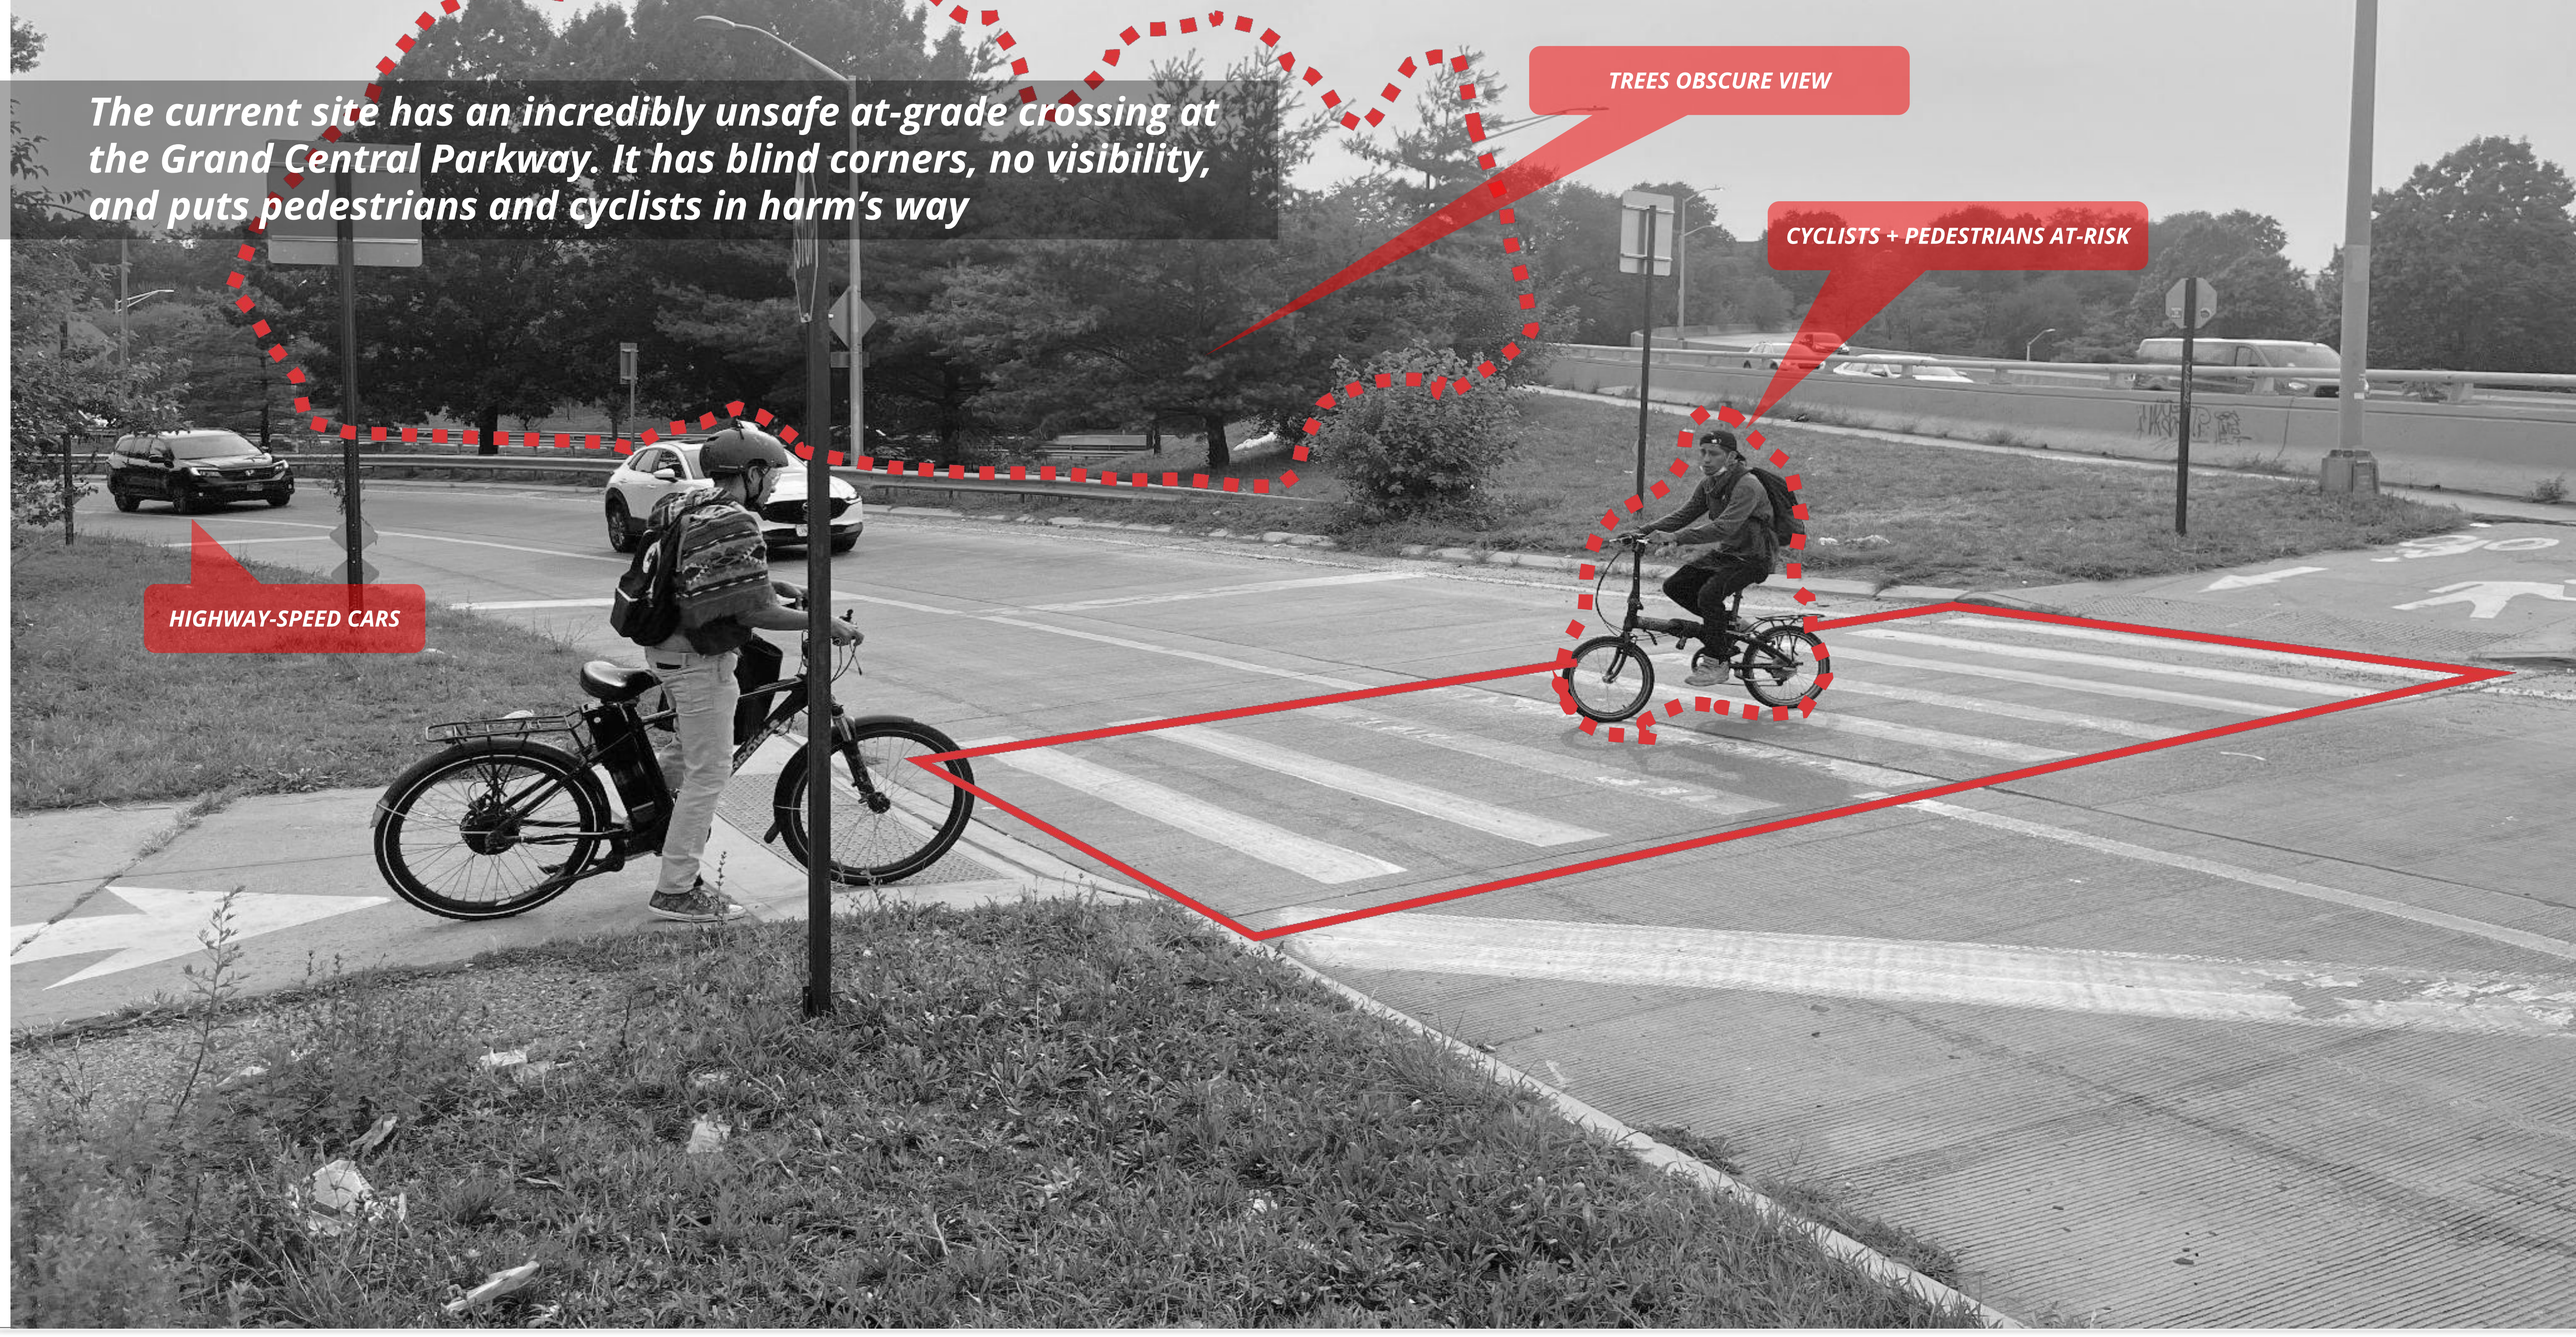
NORTH GATEWAY:
BIKE/PEDESTRIAN BRIDGE OVER GCP

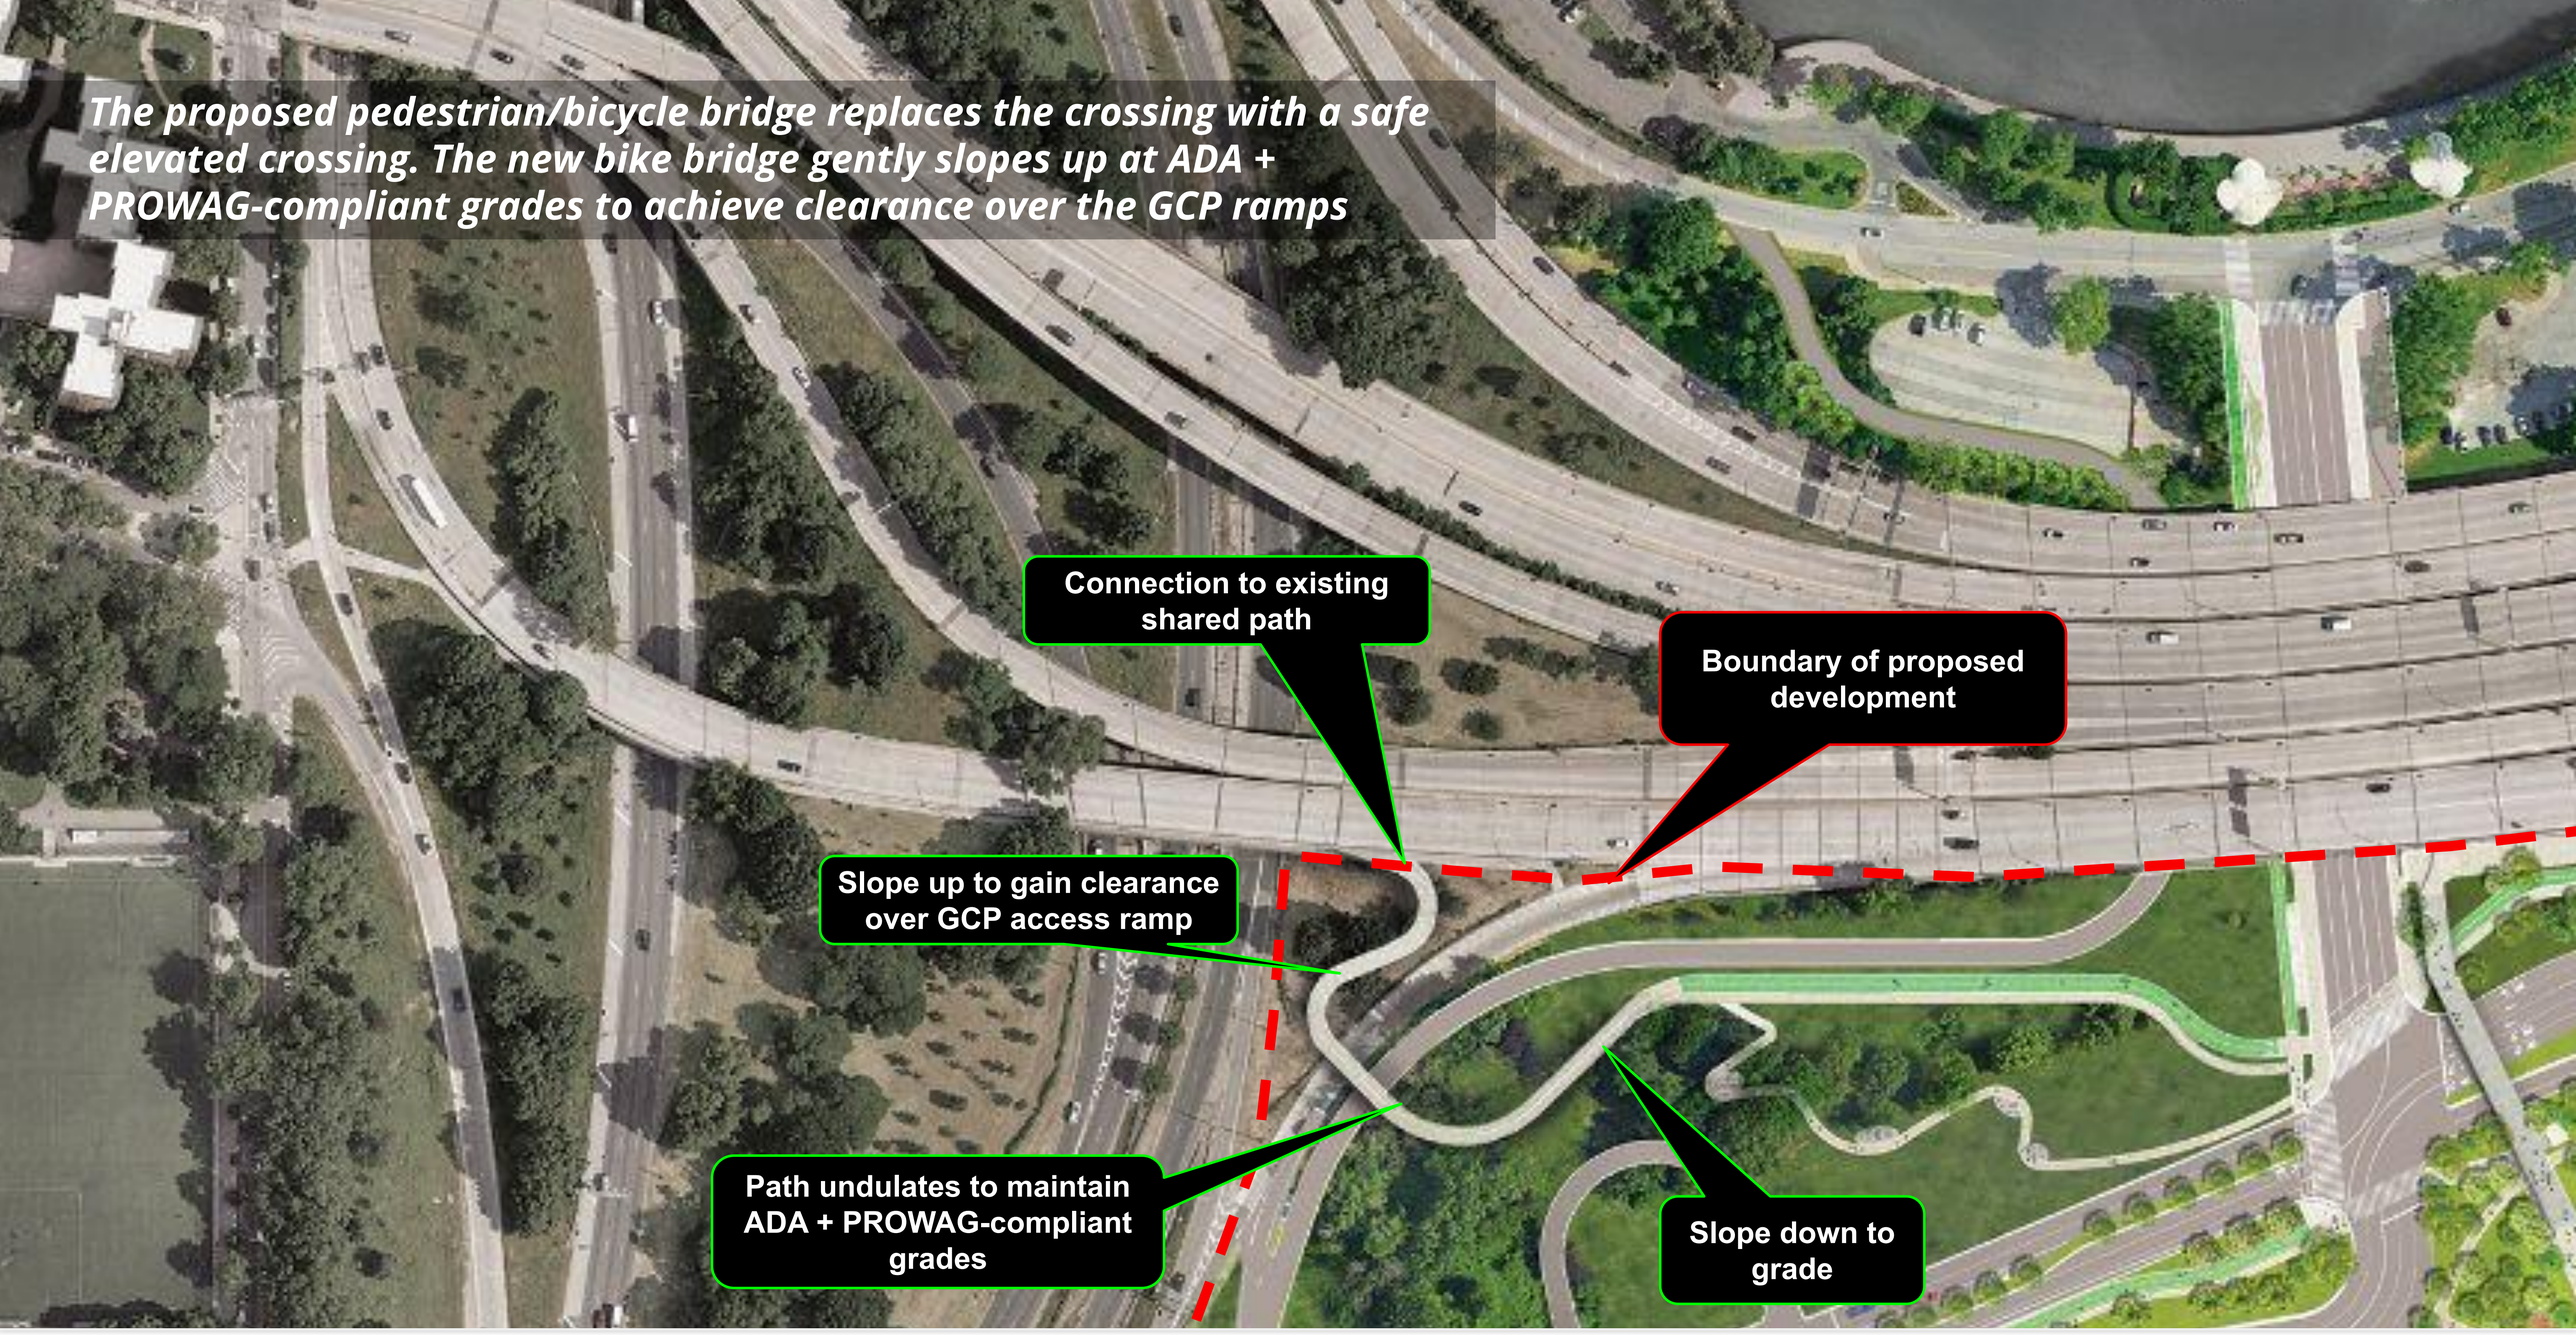
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

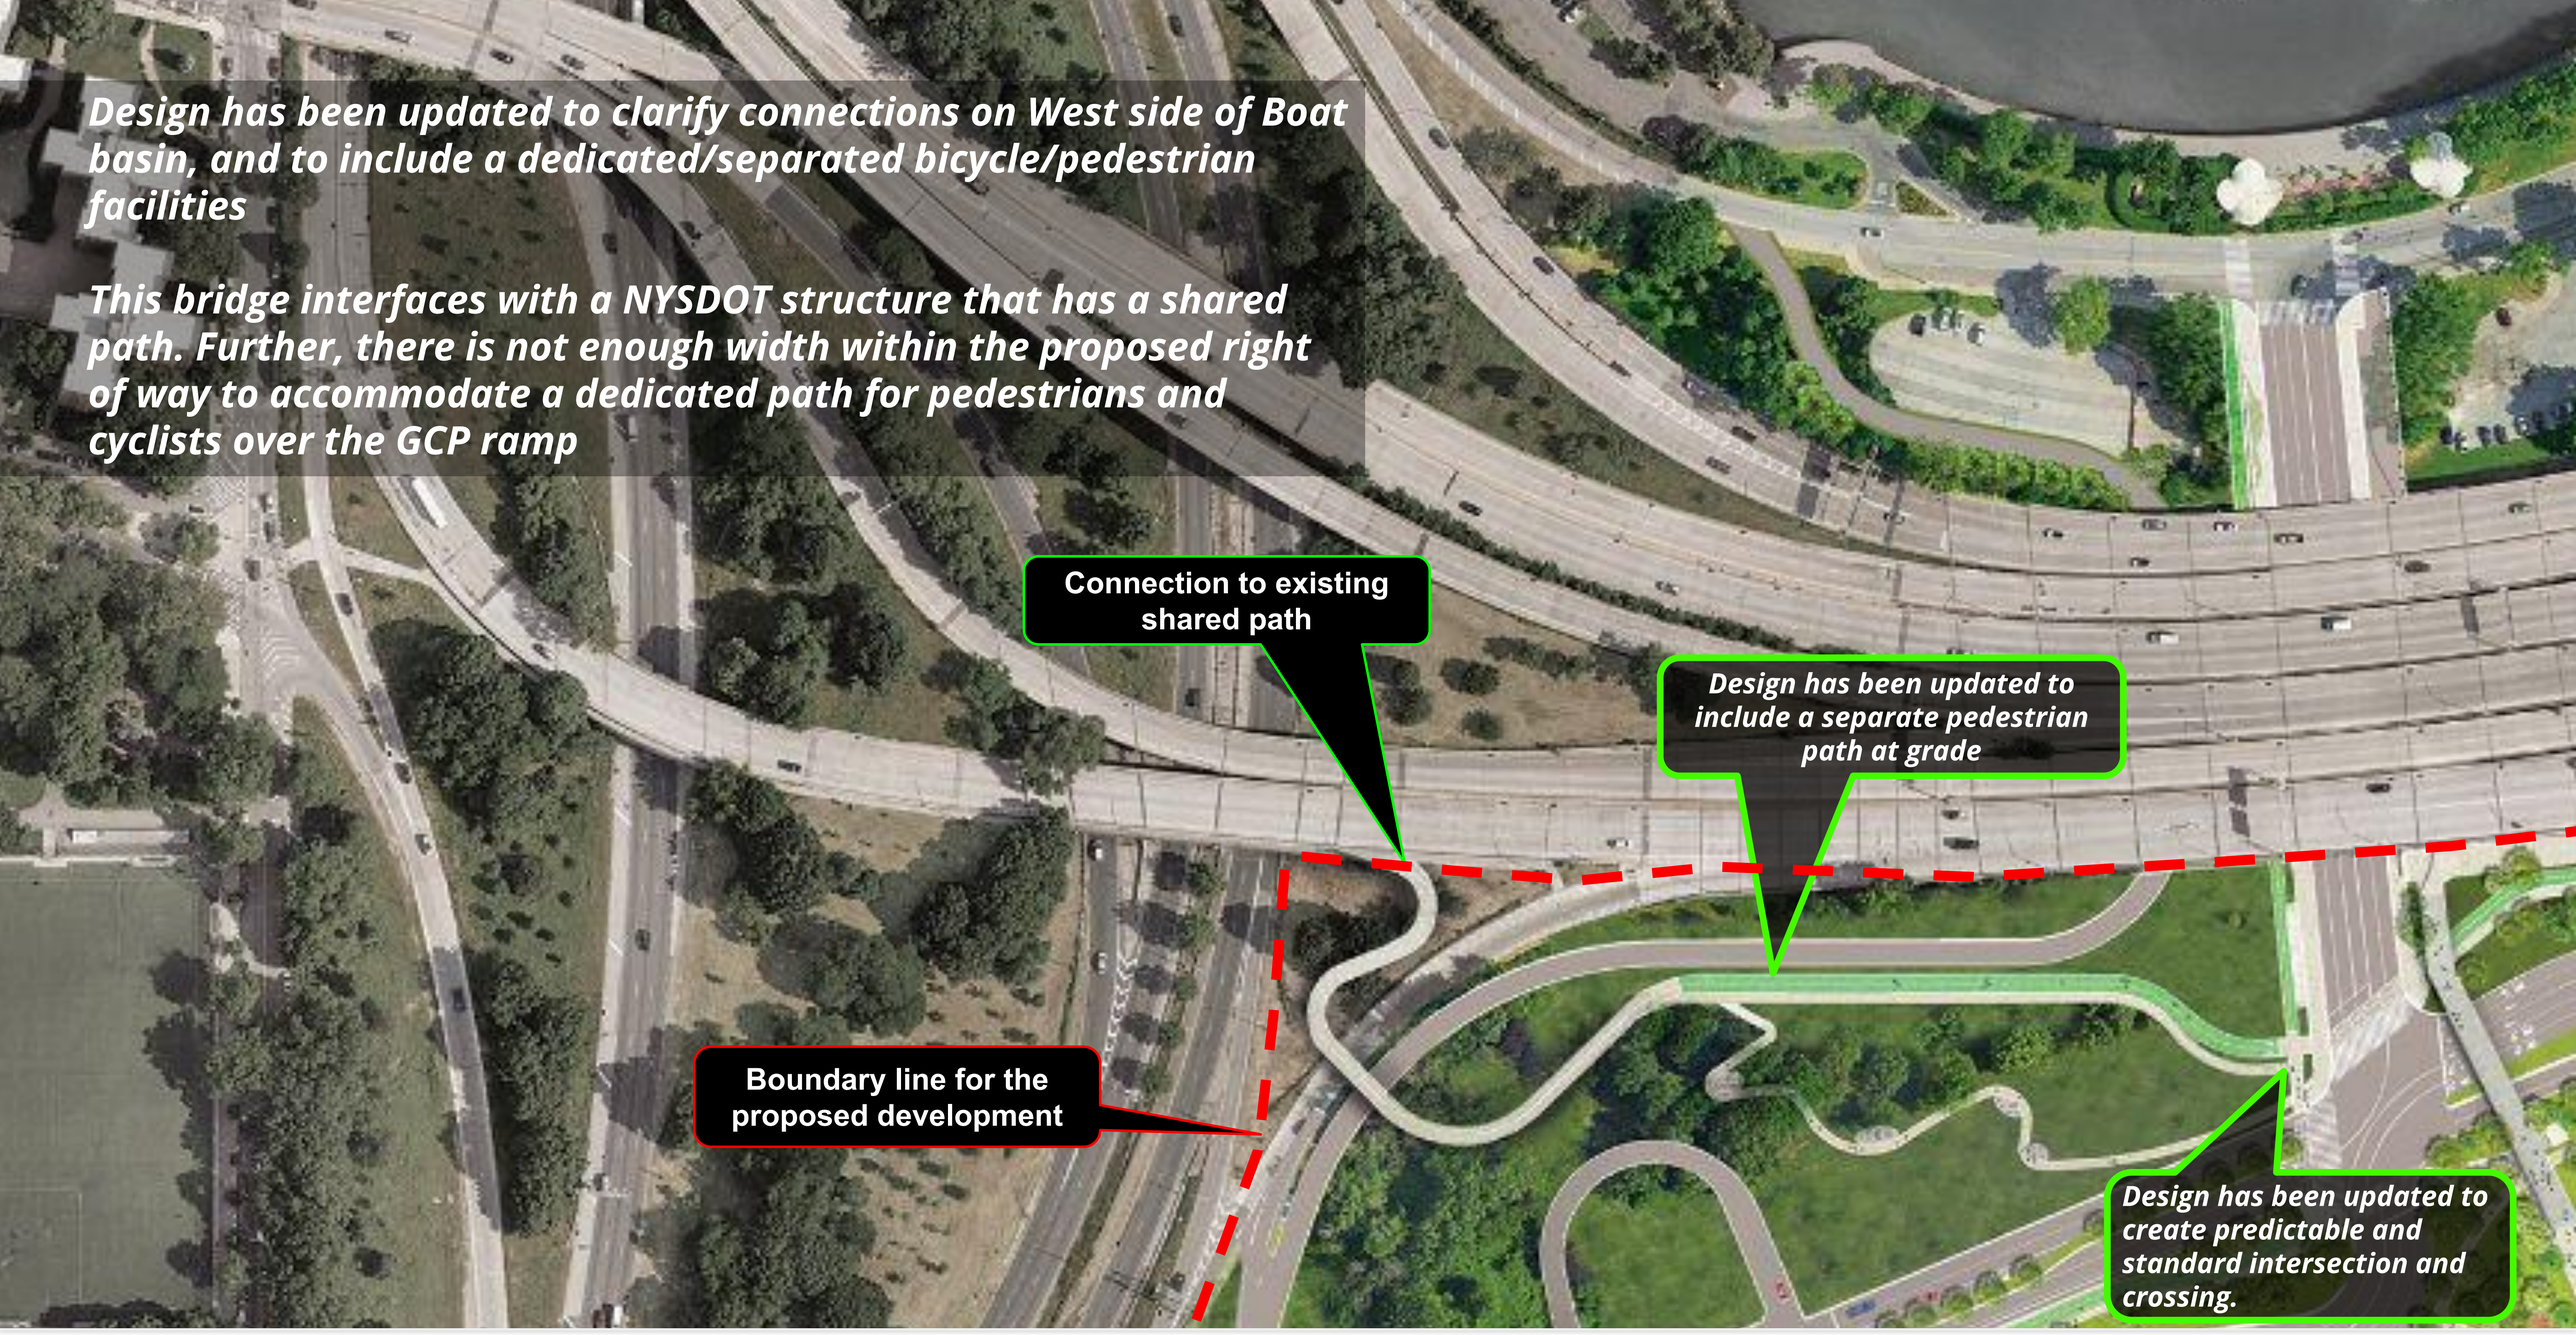


© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The proposed pedestrian/bicycle bridge replaces the crossing with a safe elevated crossing. The new bike bridge gently slopes up at ADA + PROWAG-compliant grades to achieve clearance over the GCP ramps

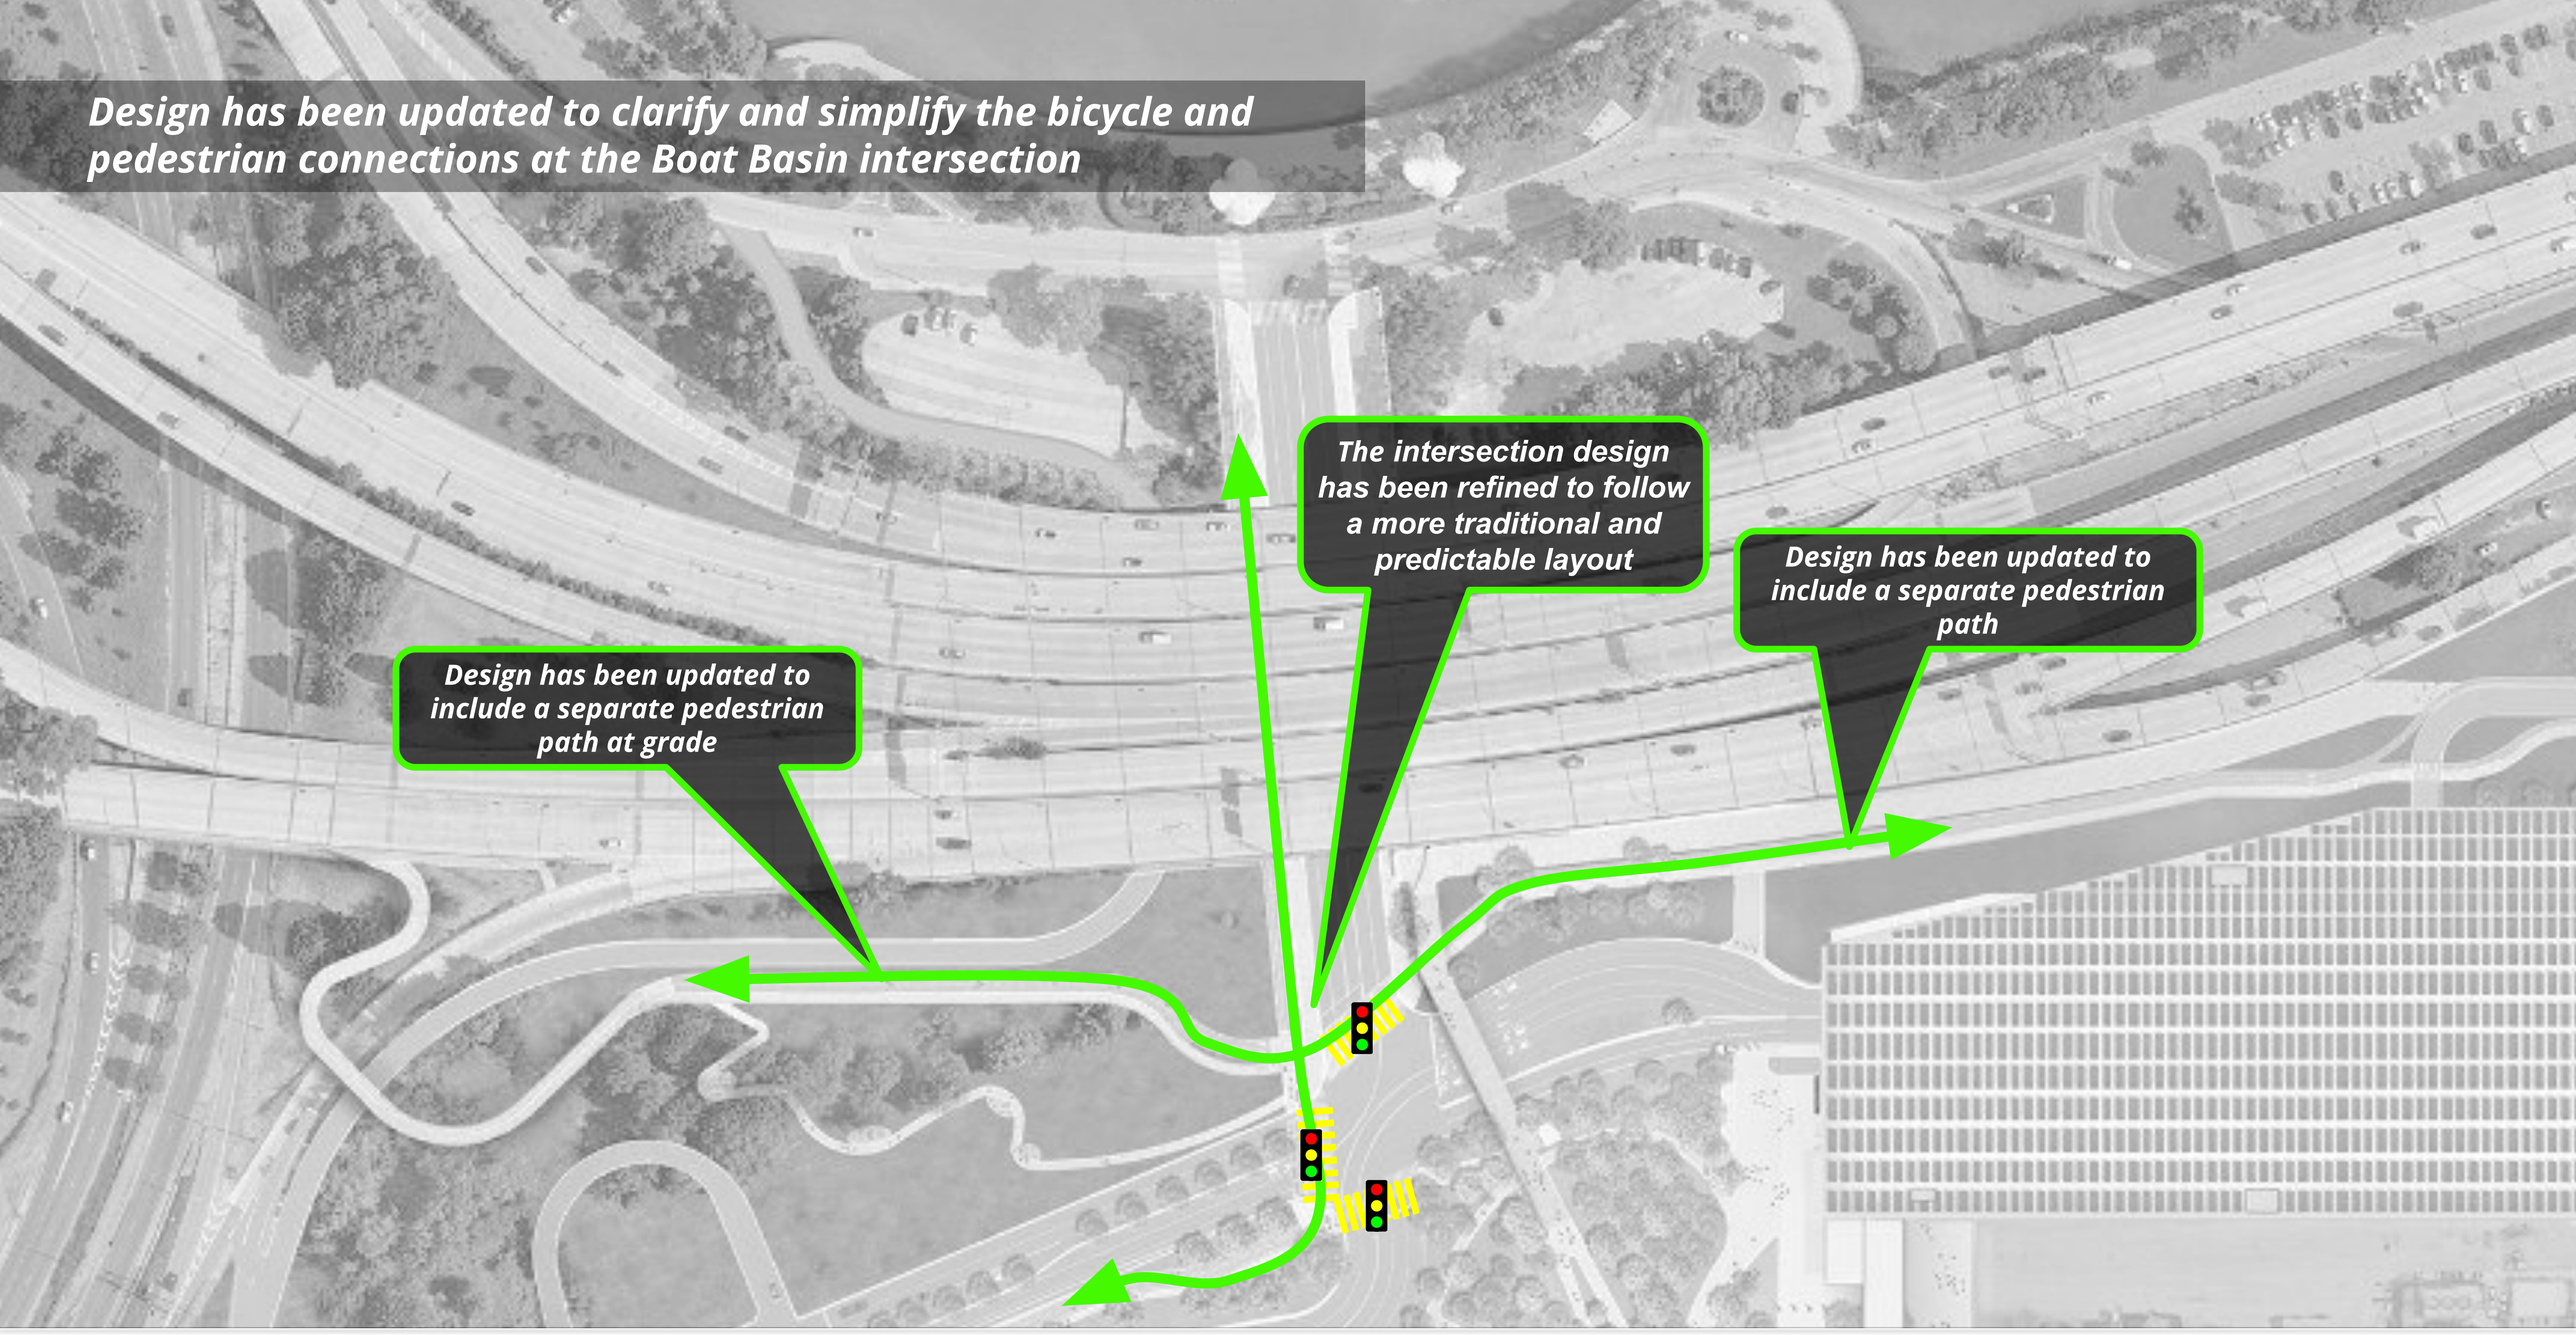


© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.



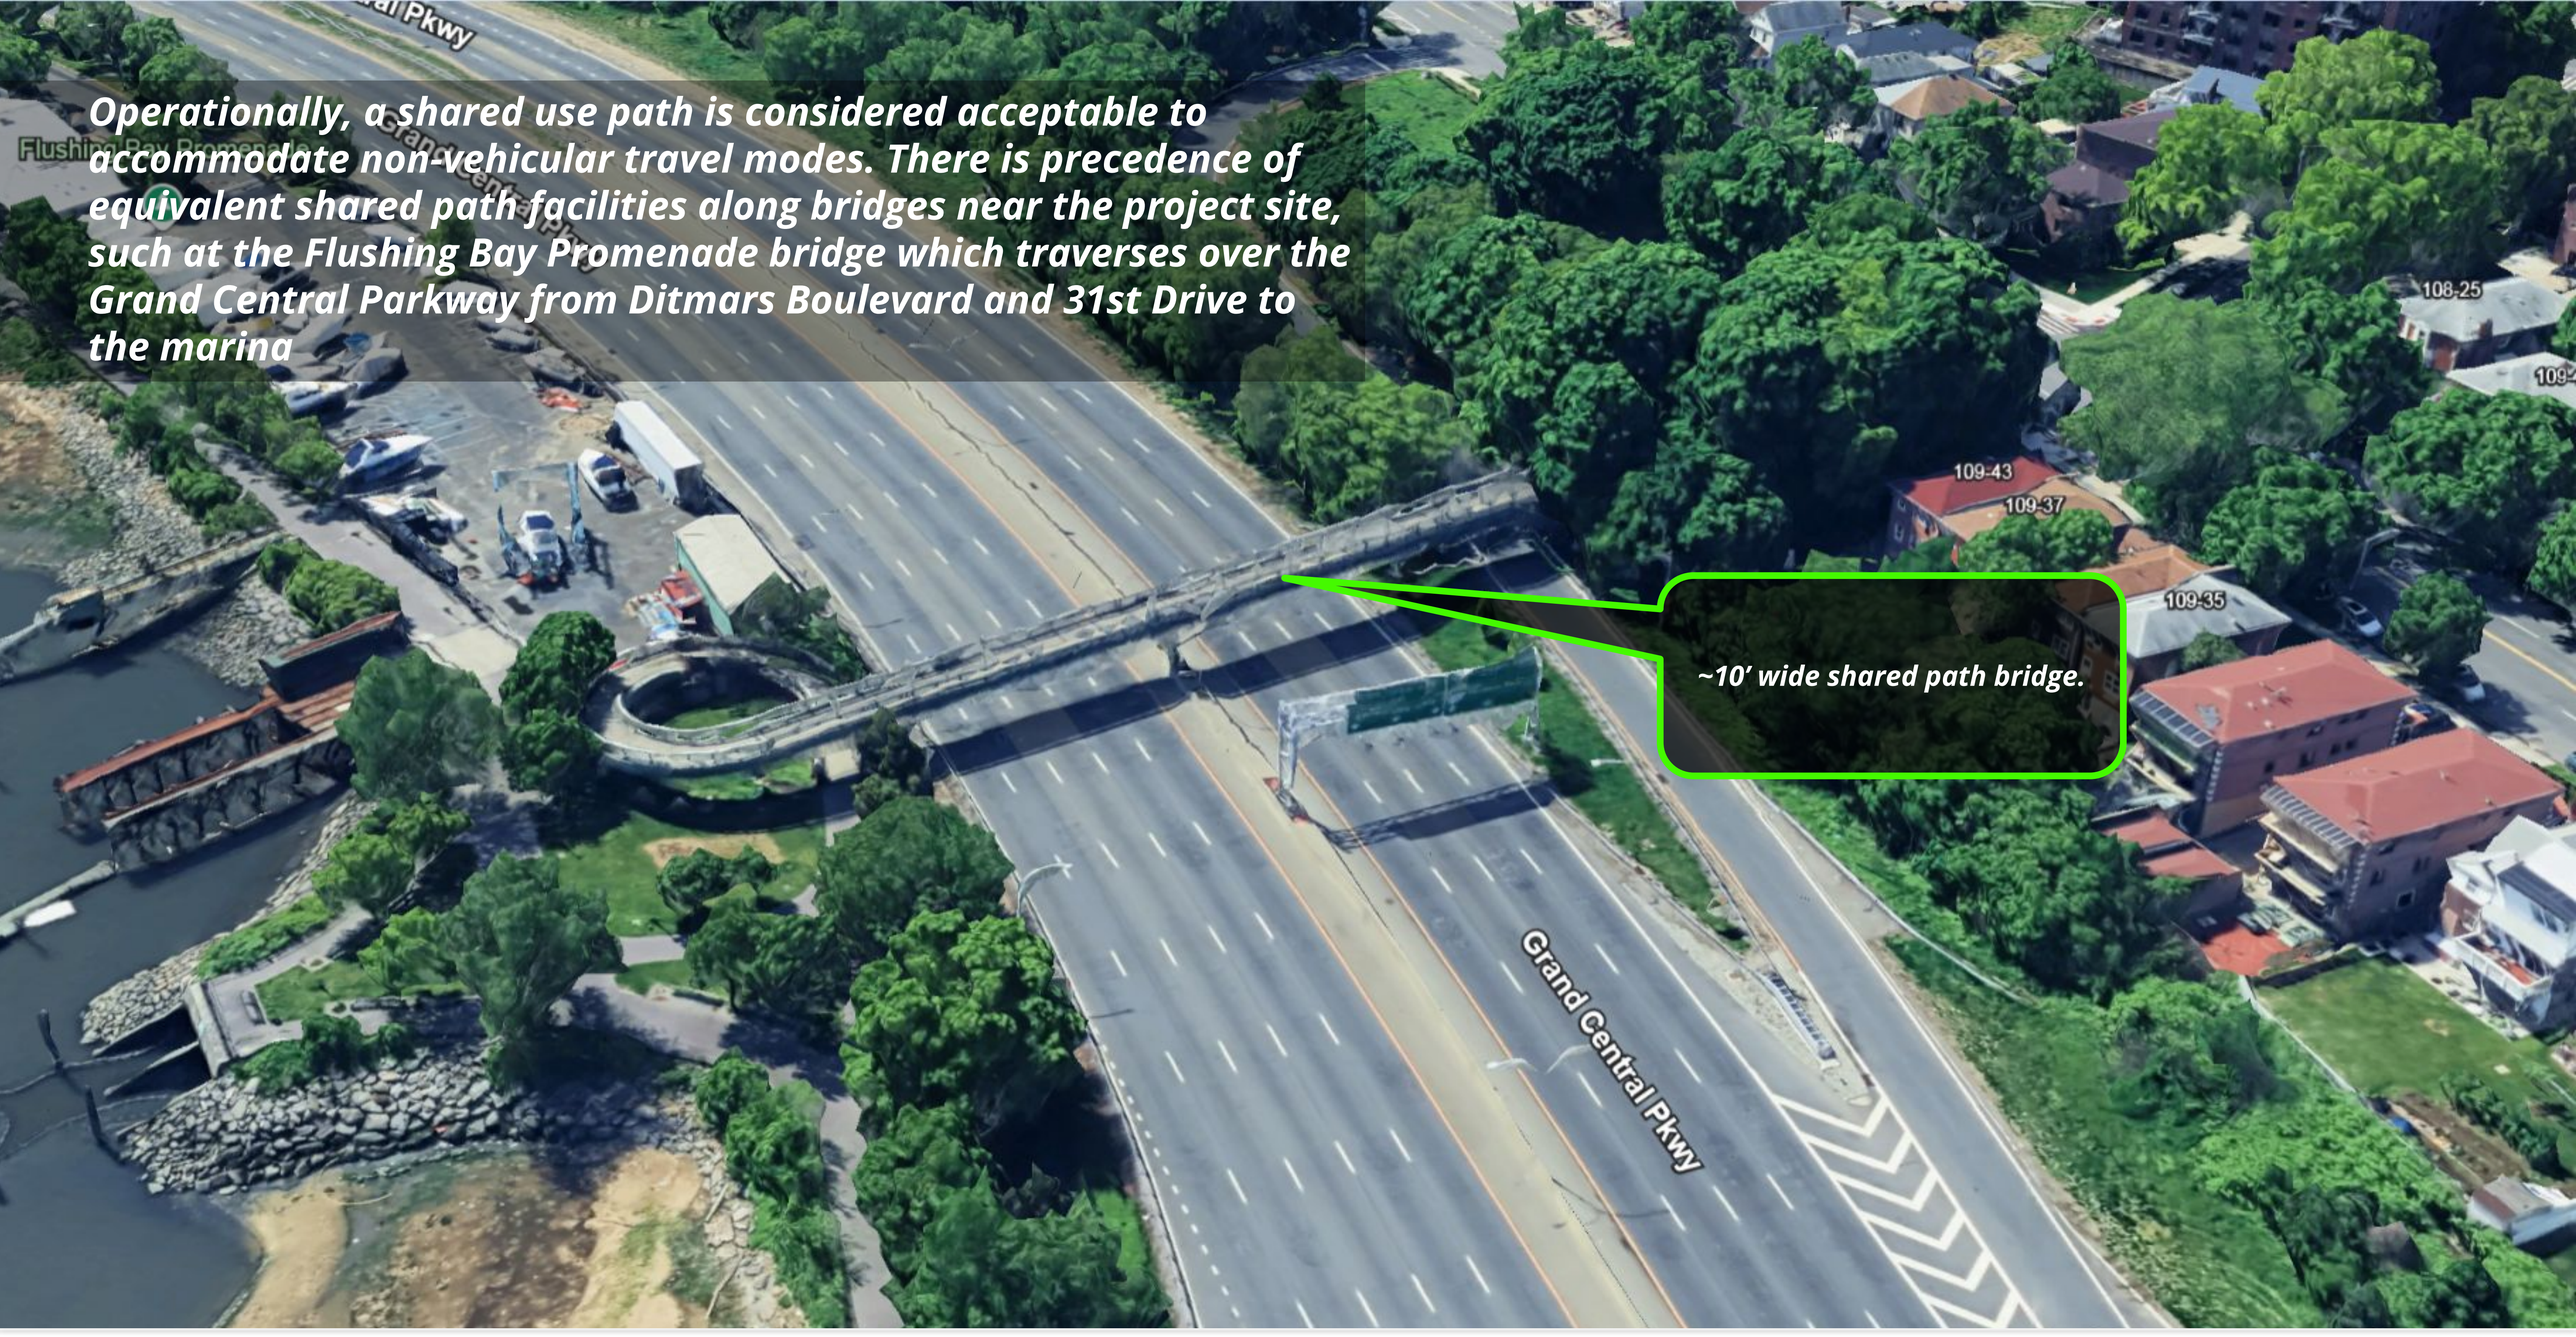
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Design has been updated to clarify and simplify the bicycle and pedestrian connections at the Boat Basin intersection



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

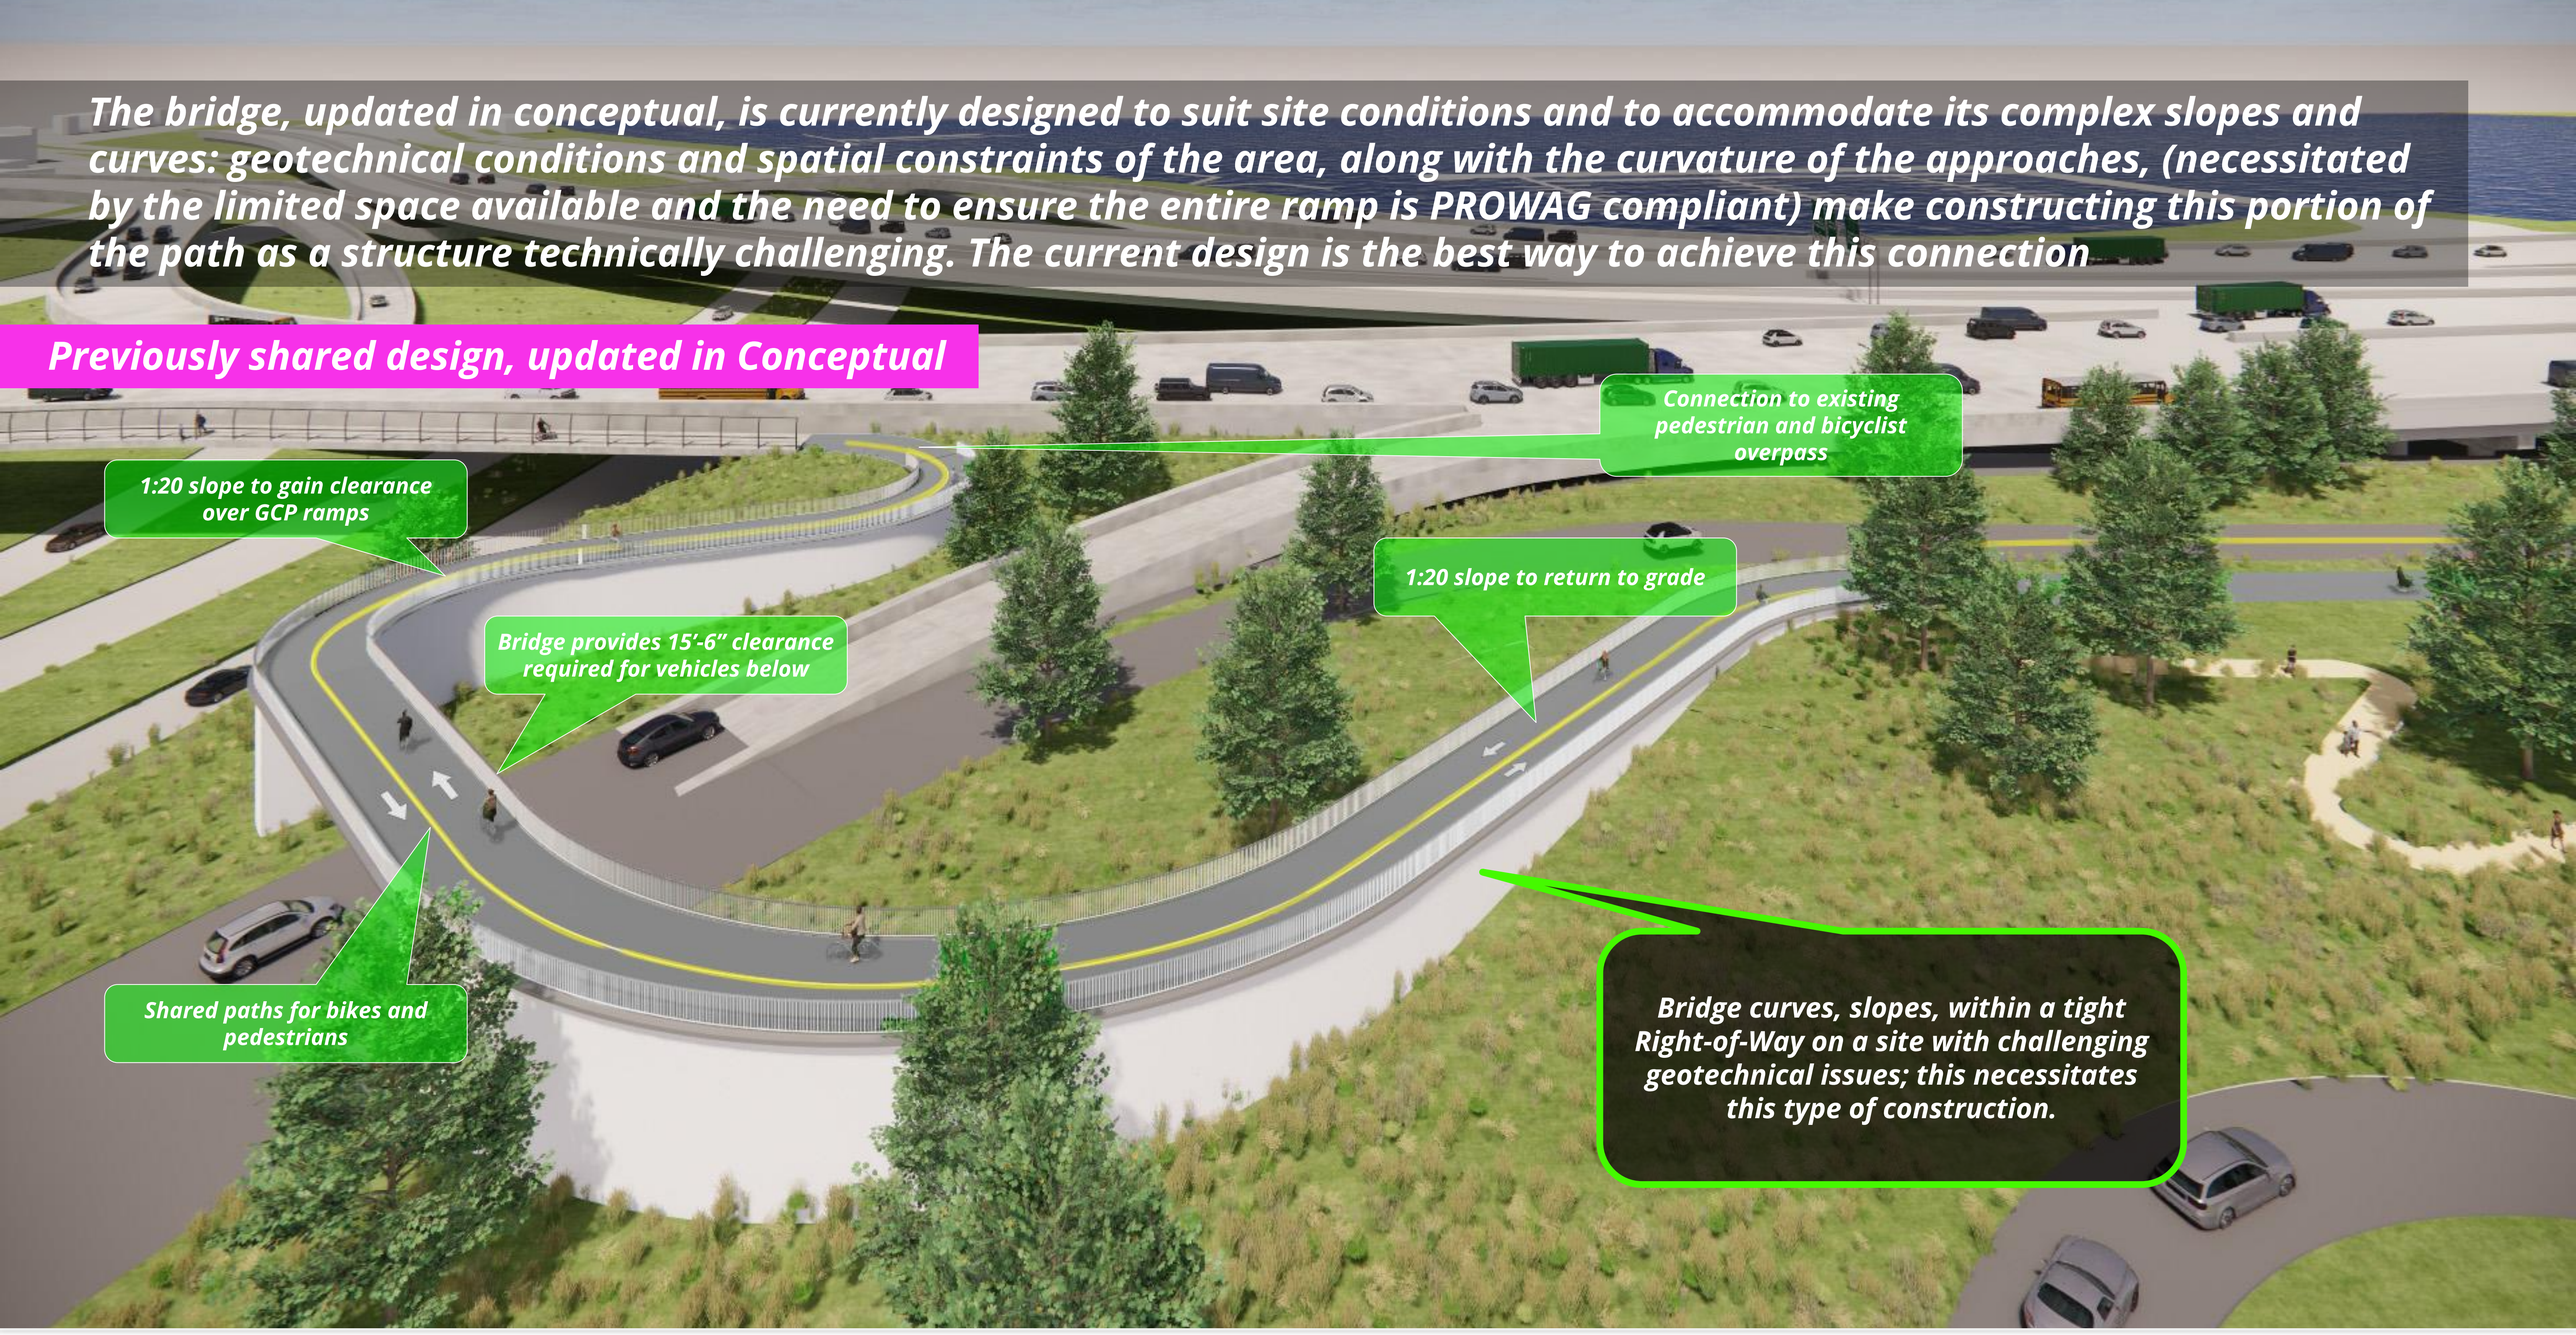
Operationally, a shared use path is considered acceptable to accommodate non-vehicular travel modes. There is precedence of equivalent shared path facilities along bridges near the project site, such at the Flushing Bay Promenade bridge which traverses over the Grand Central Parkway from Ditmars Boulevard and 31st Drive to the marina



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

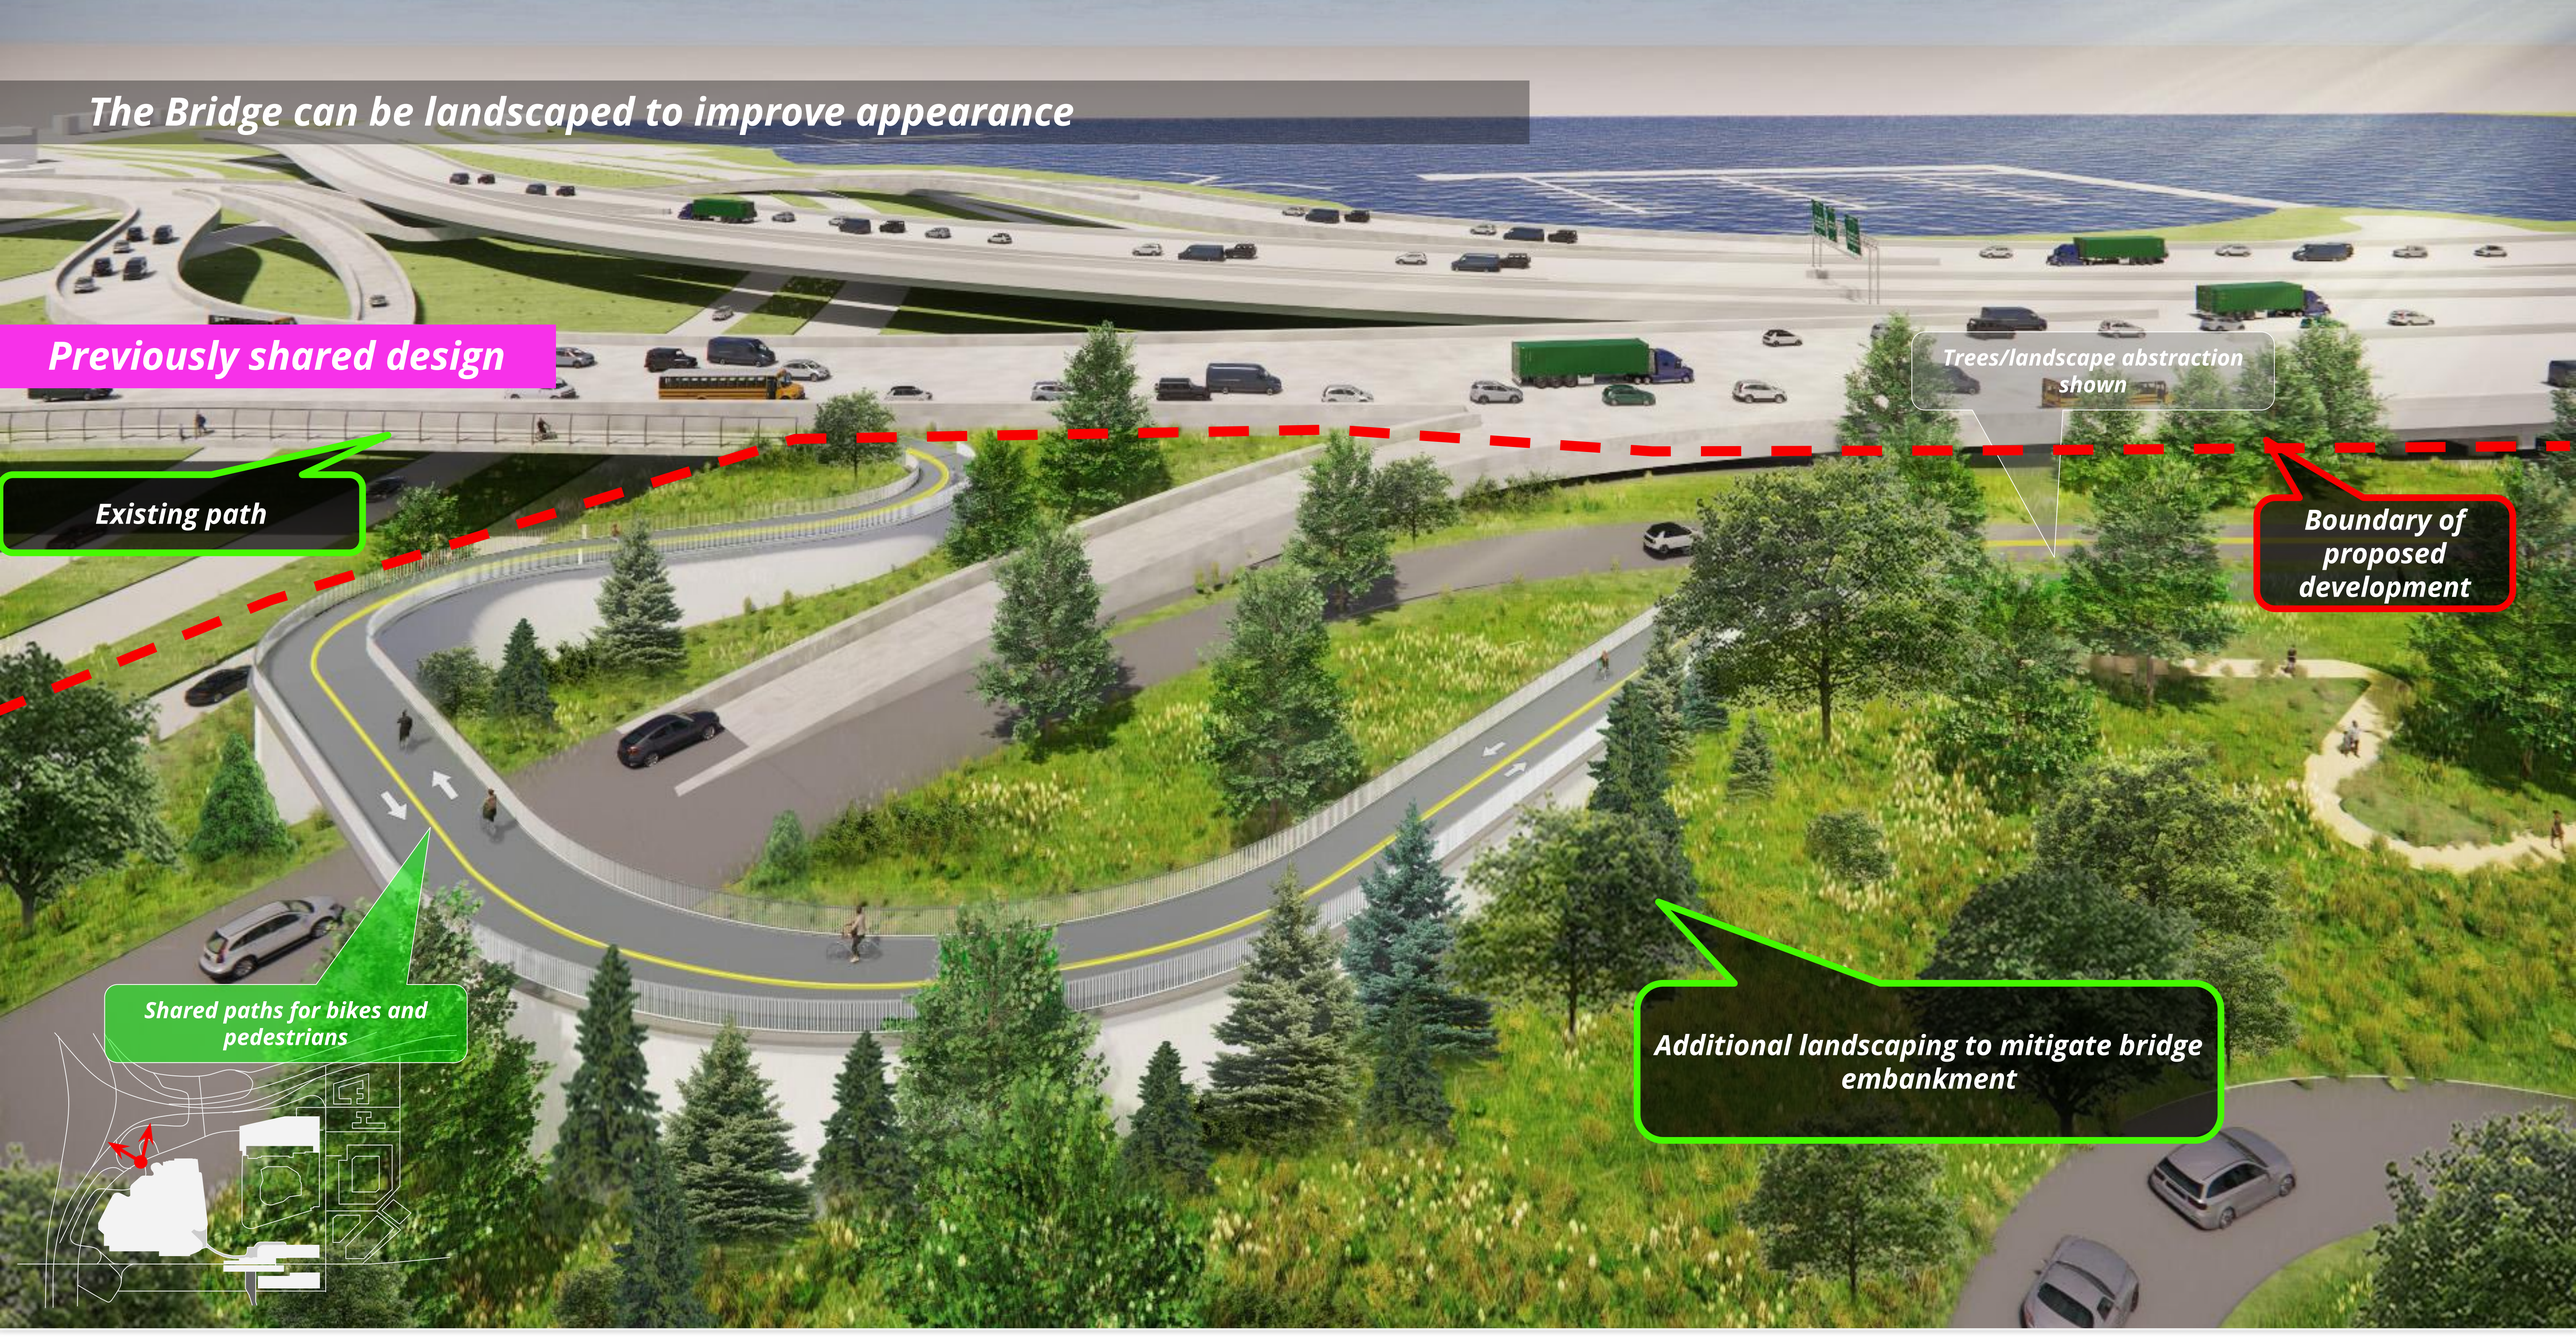
The bridge, updated in conceptual, is currently designed to suit site conditions and to accommodate its complex slopes and curves: geotechnical conditions and spatial constraints of the area, along with the curvature of the approaches, (necessitated by the limited space available and the need to ensure the entire ramp is PROWAG compliant) make constructing this portion of the path as a structure technically challenging. The current design is the best way to achieve this connection

Previously shared design, updated in Conceptual



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The Bridge can be landscaped to improve appearance



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

At PDC's request, Queens Future has conducted a highly preliminary study to accommodate separated travel, which would require almost doubling its width

The planting design is proposing a rich variety of planting typologies across the park, with a focus on seasonal interest, specimen plantings, and colorful perennial gardens. The density of the planting, therefore, varies depending on the type of garden. Where sightlines are critical, trees will be planted accordingly and the shrub layouts will be carefully shaped to accommodate them

Planting species are identified in current design documentation; and can be shared in subsequent reviews

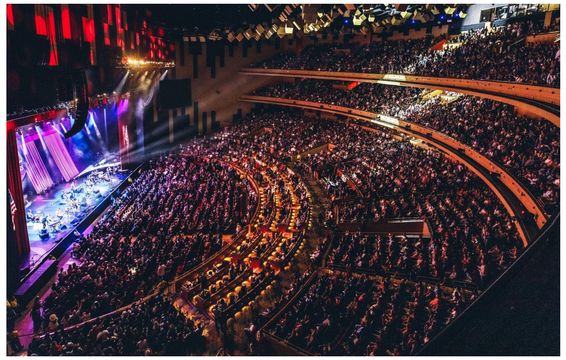
HR LIVE MASSING

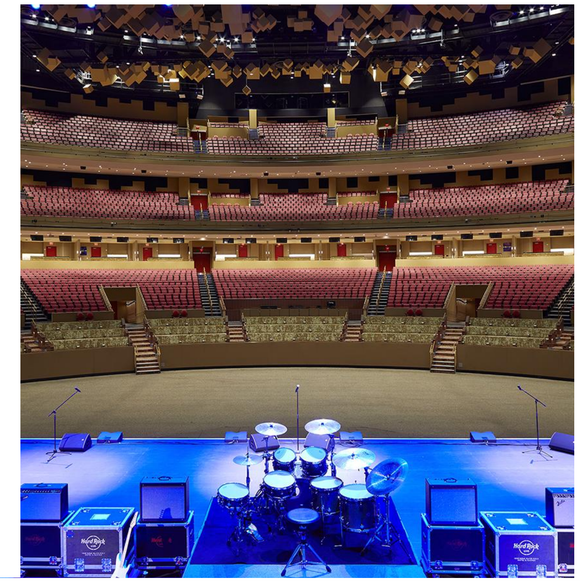
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Hard Rock is a leading and music entertainment brand. Live music and entertainment – and access to a world-class venue in our borough – were identified by the community as key priorities for this site. As a brand, Hard Rock has historically facilitated more than 35,000 live events each year across their different Hard Rock Live venues

HARD ROCK LIVE NEW YORK
Seated Capacity: 4,548
Footprint: 75,682 SF

HARD ROCK LIVE HOLLYWOOD
Seated Capacity: 6,674
Footprint: 77,900 SF





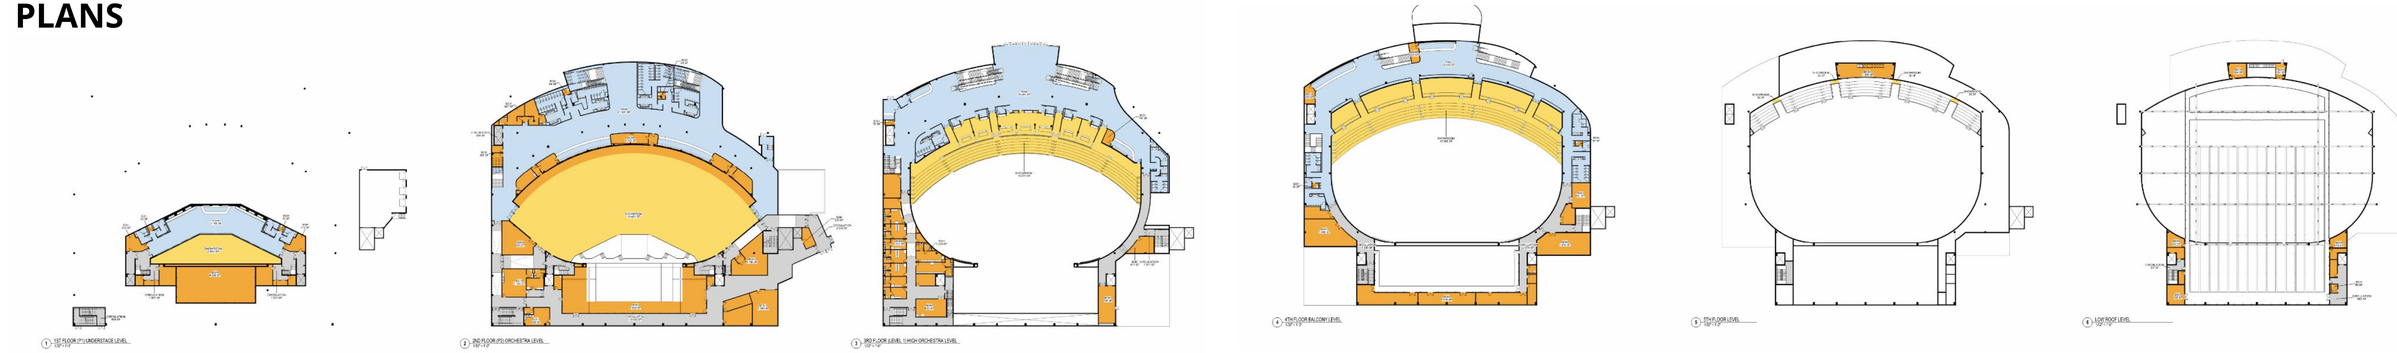
HARD ROCK LIVE ATLANTIC CITY
Seated Capacity: 5,820
Footprint: 67,300 SF

HARD ROCK LIVE LAS VEGAS
Seated Capacity: 4,545
Footprint: 60,773 SF

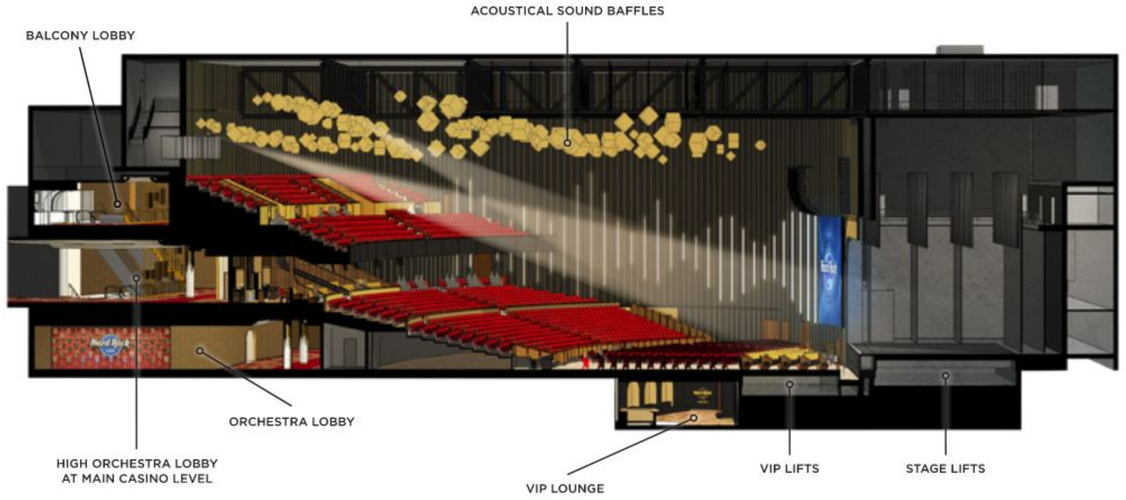
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

The Hard Rock Live footprint reflects the optimal arrangement for a world-class venue capable of hosting multiple types of events

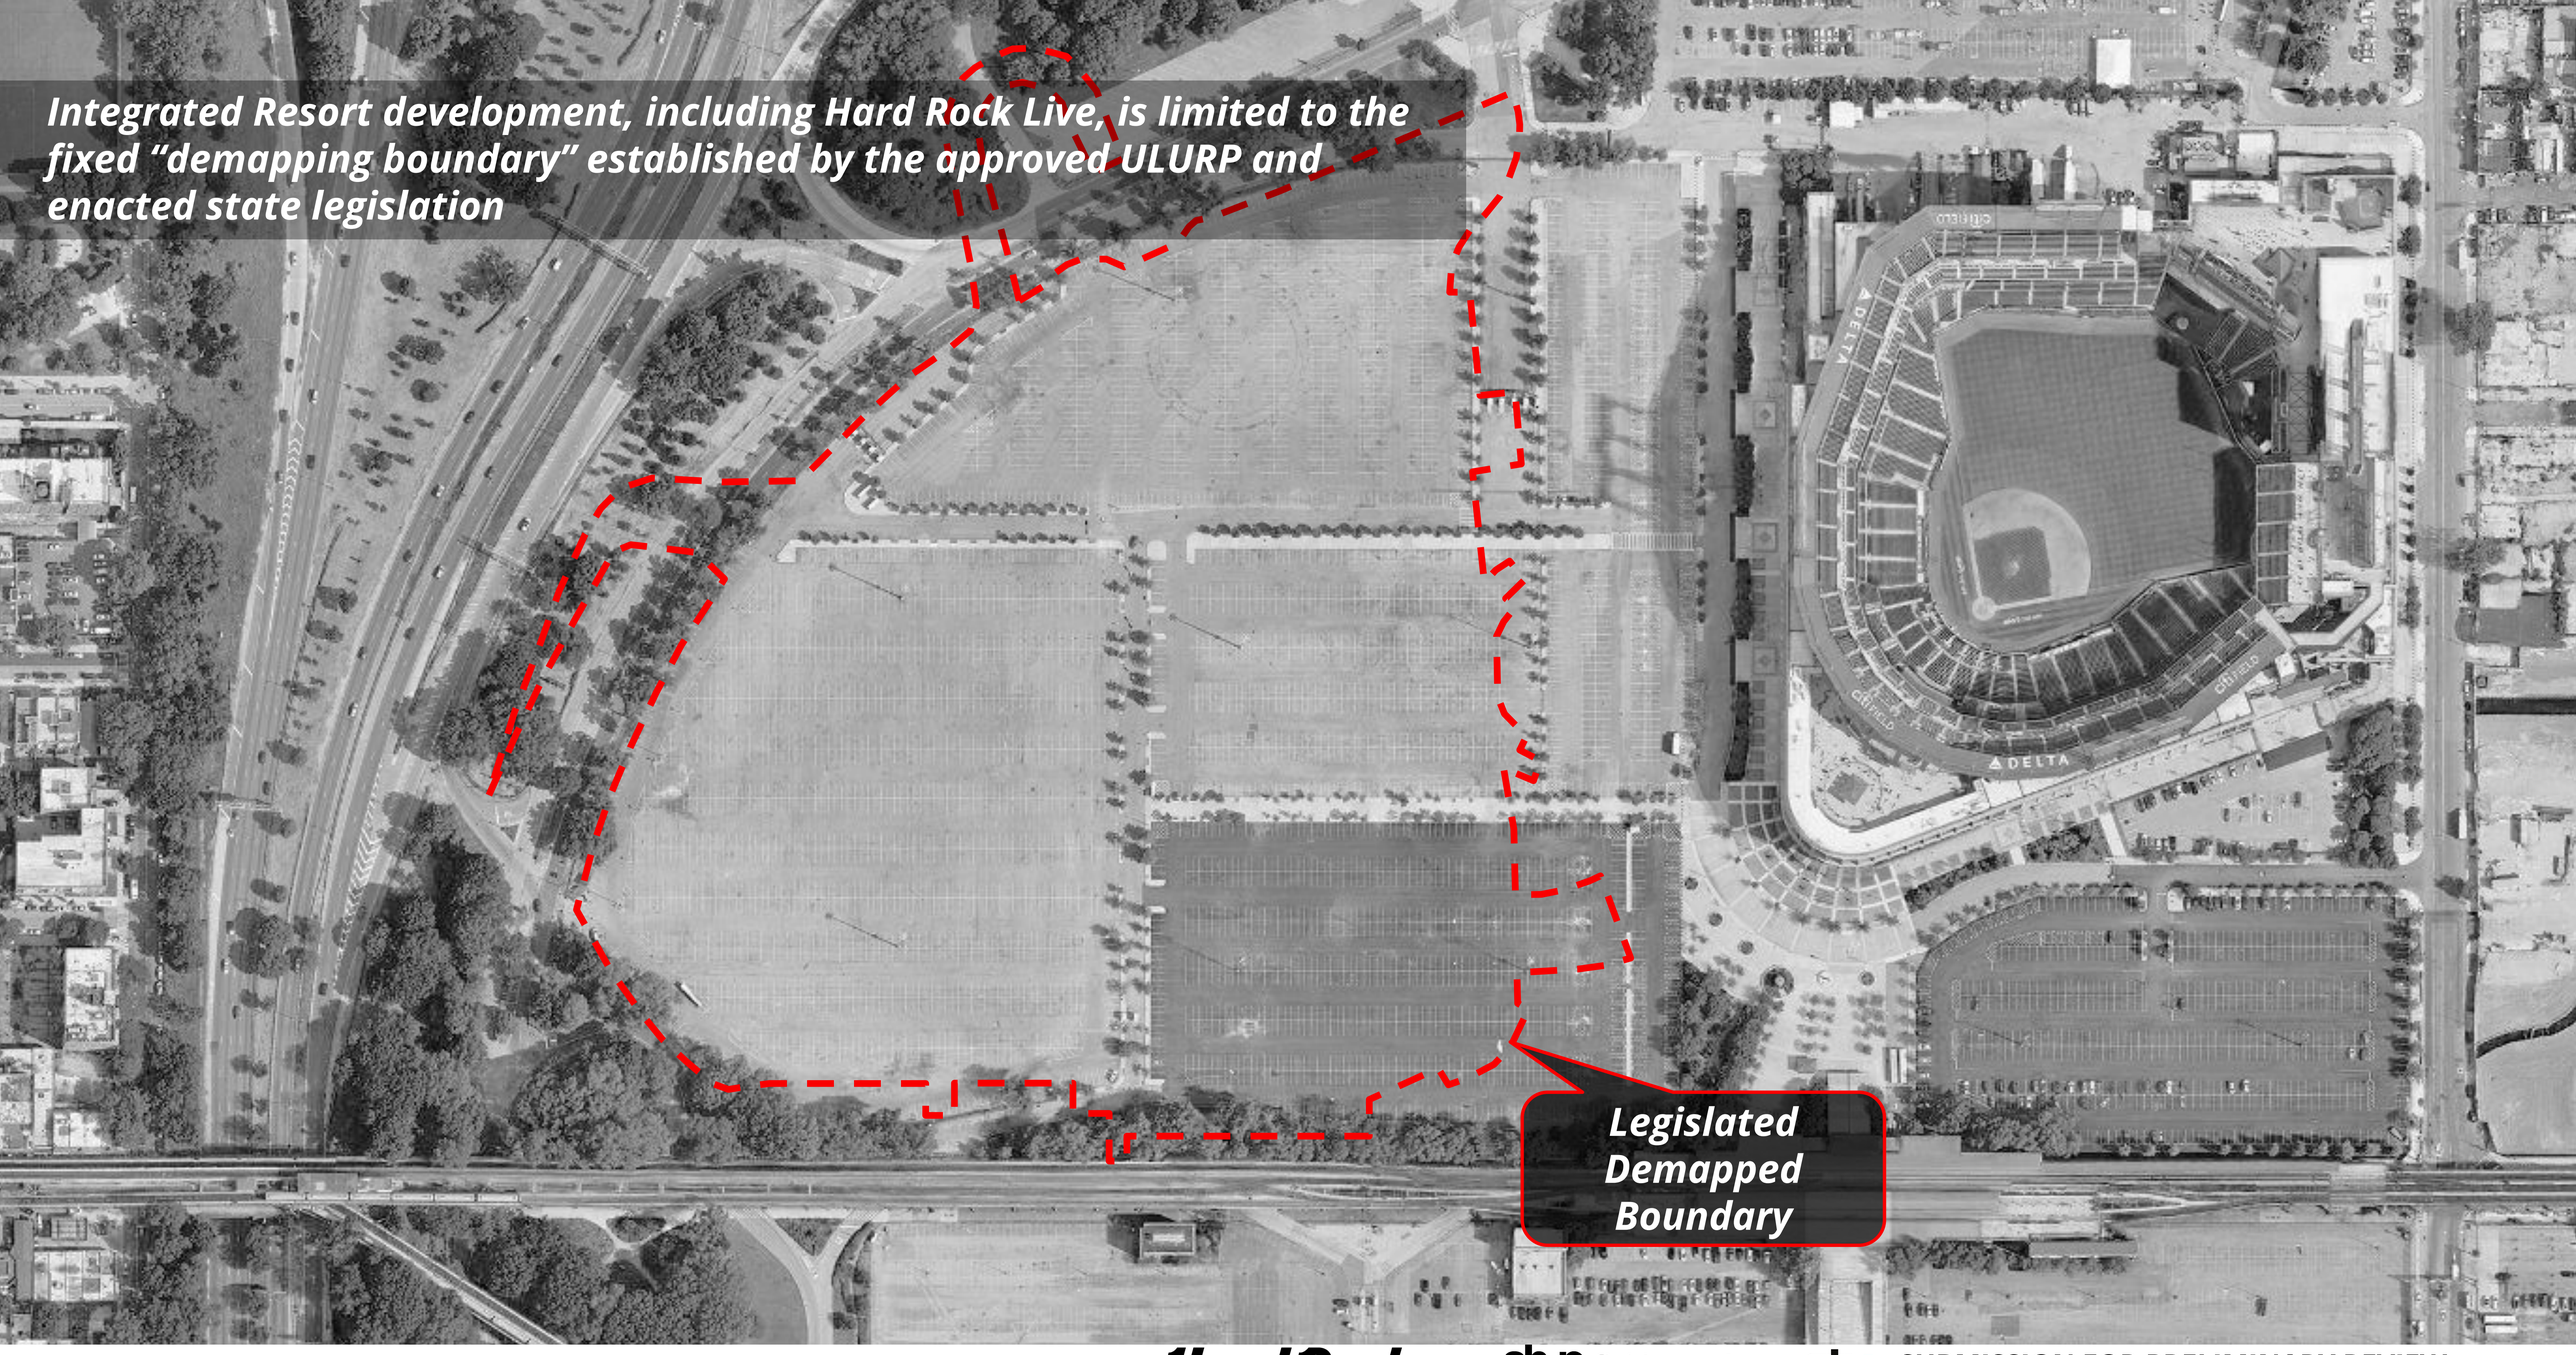
PLANS



LONGITUDINAL SECTION VIEW

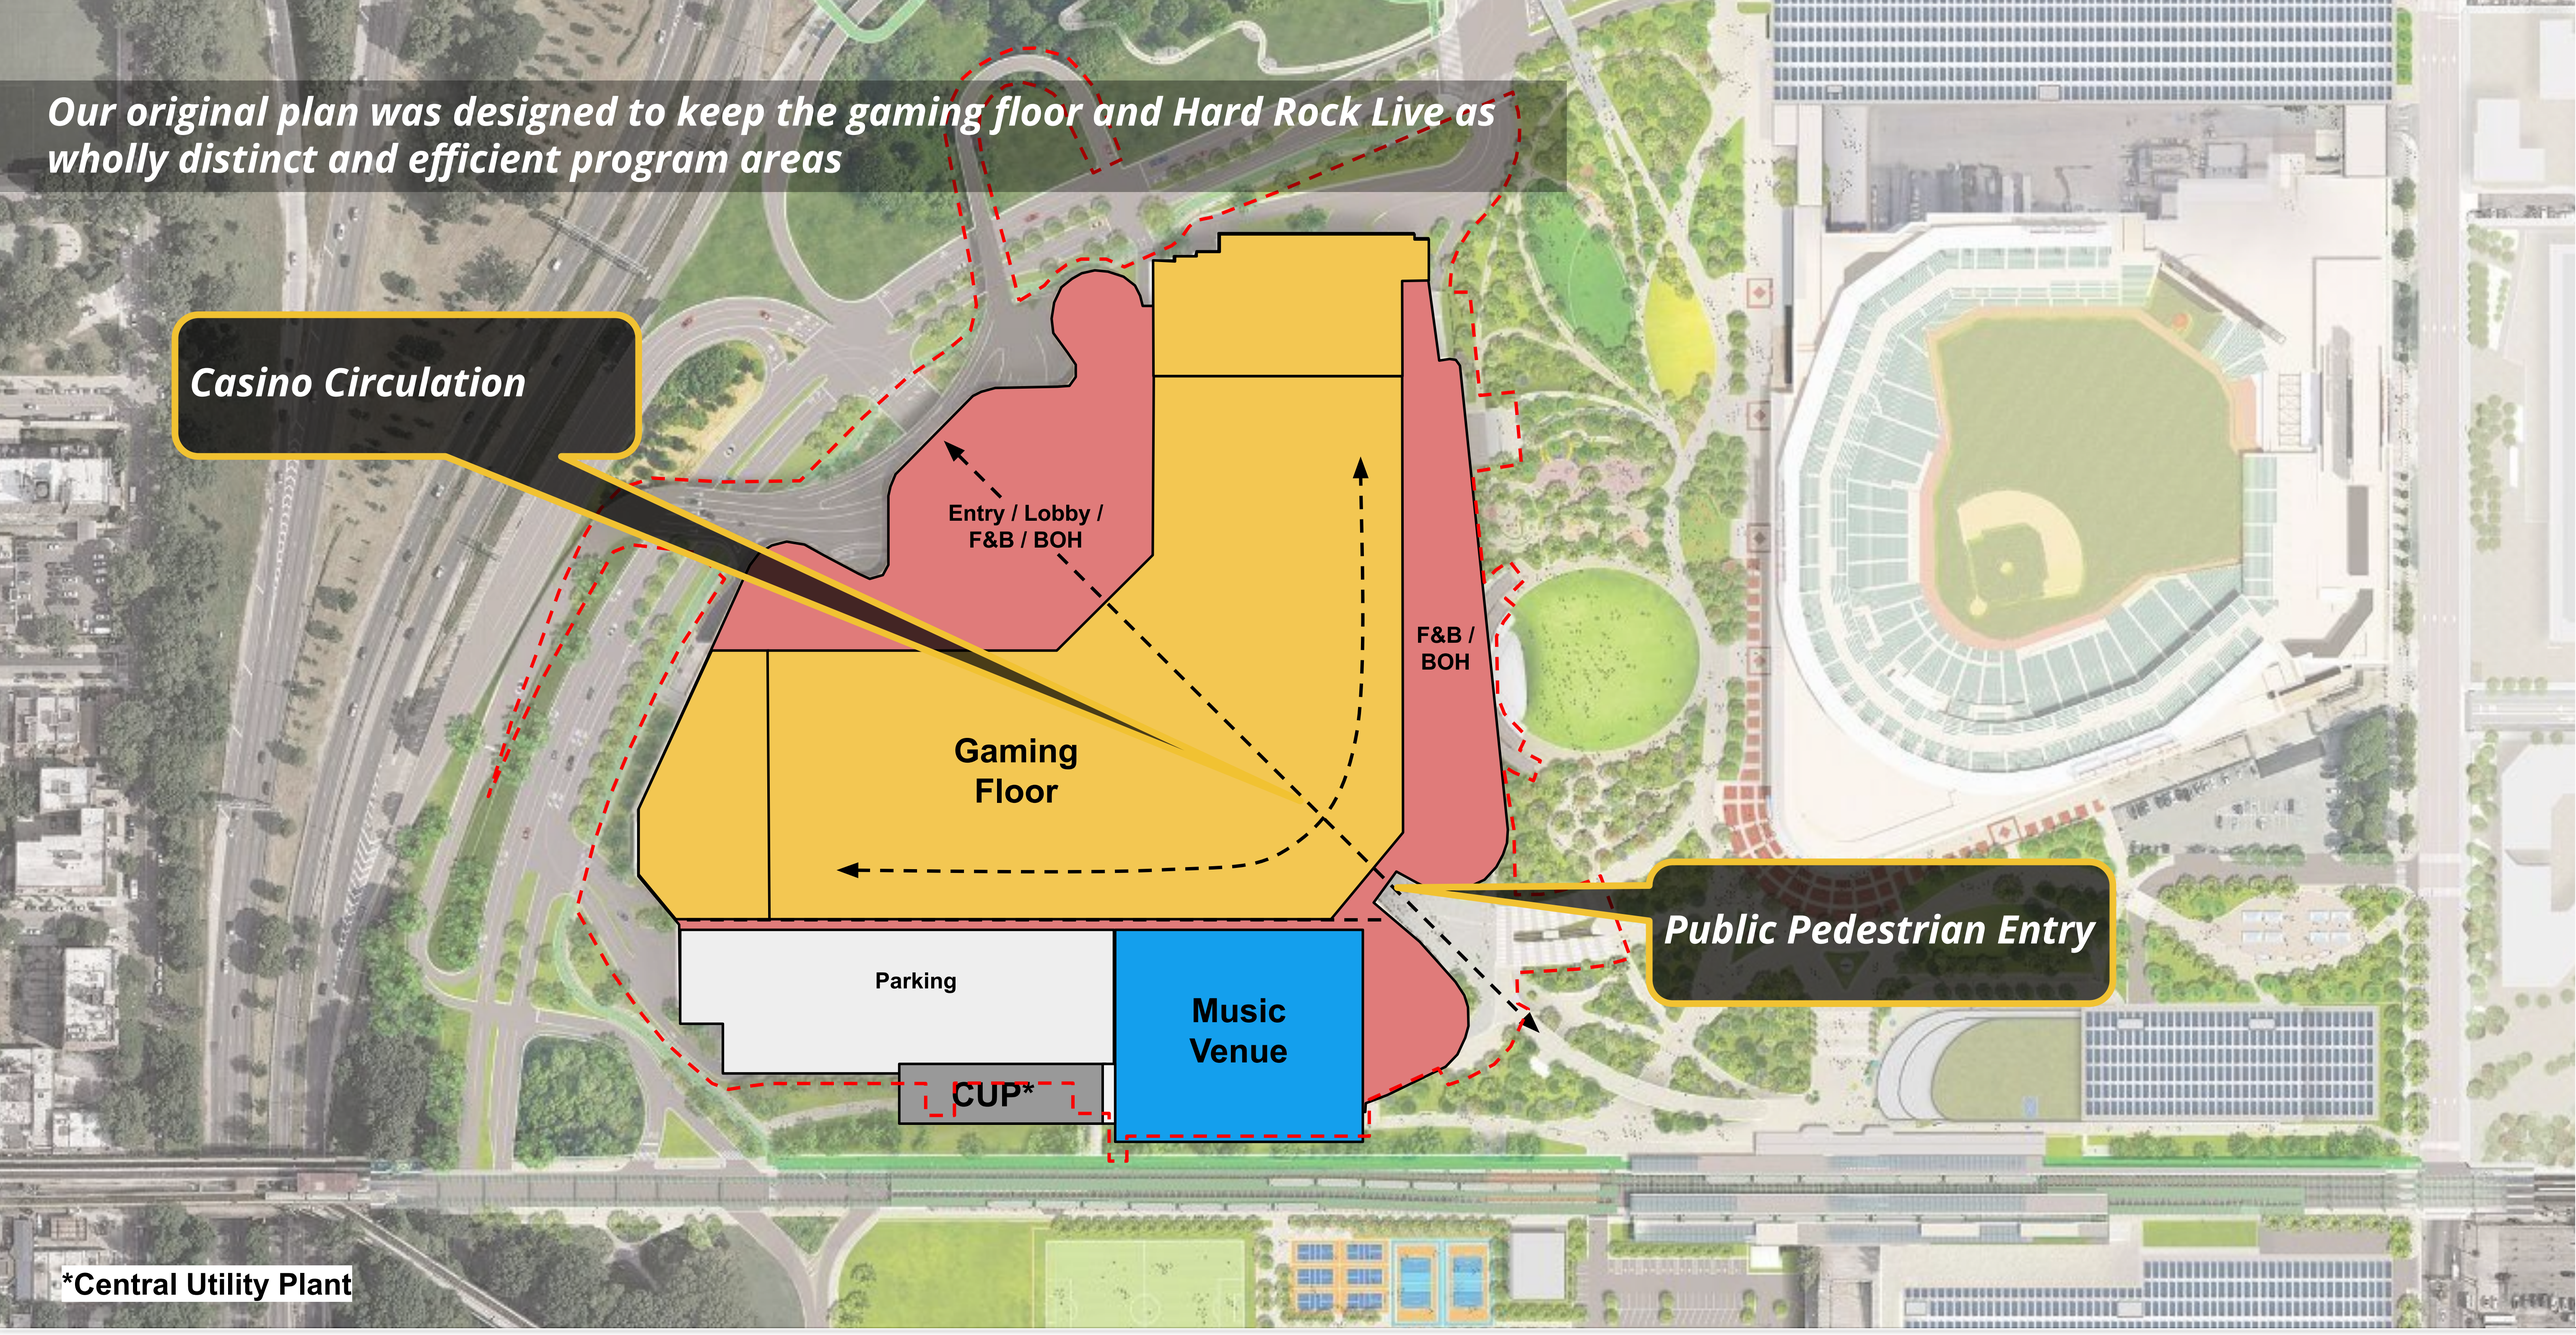


© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

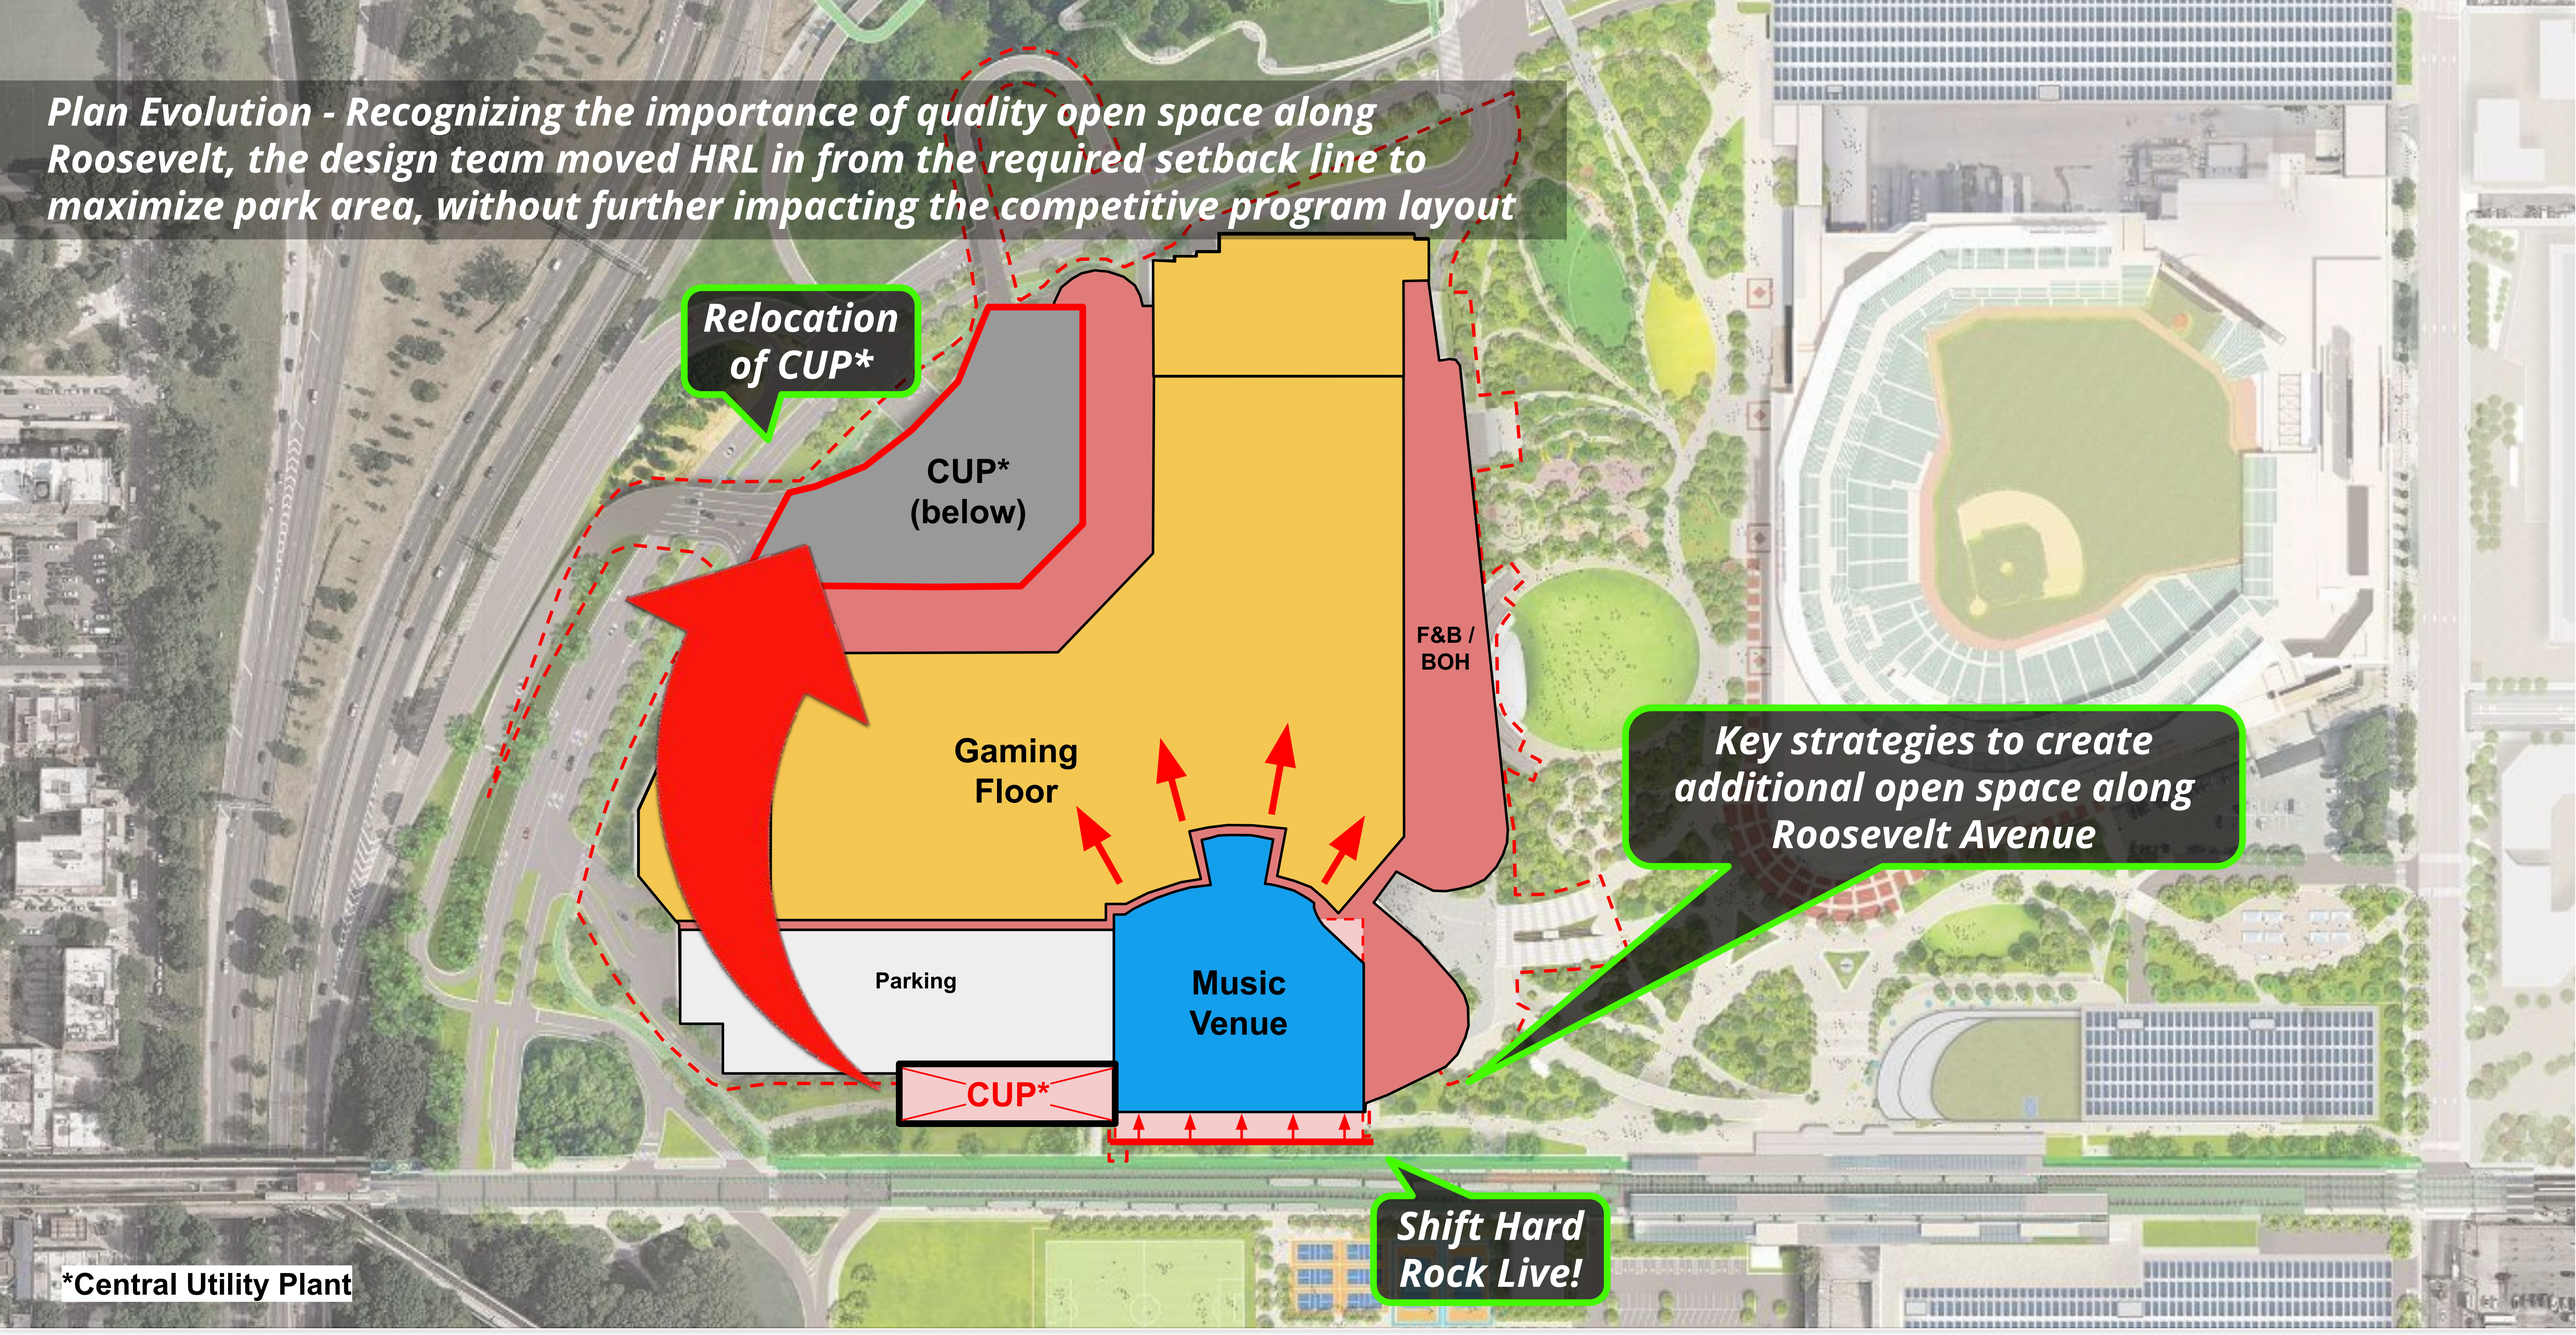


© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Our original plan was designed to keep the gaming floor and Hard Rock Live as wholly distinct and efficient program areas

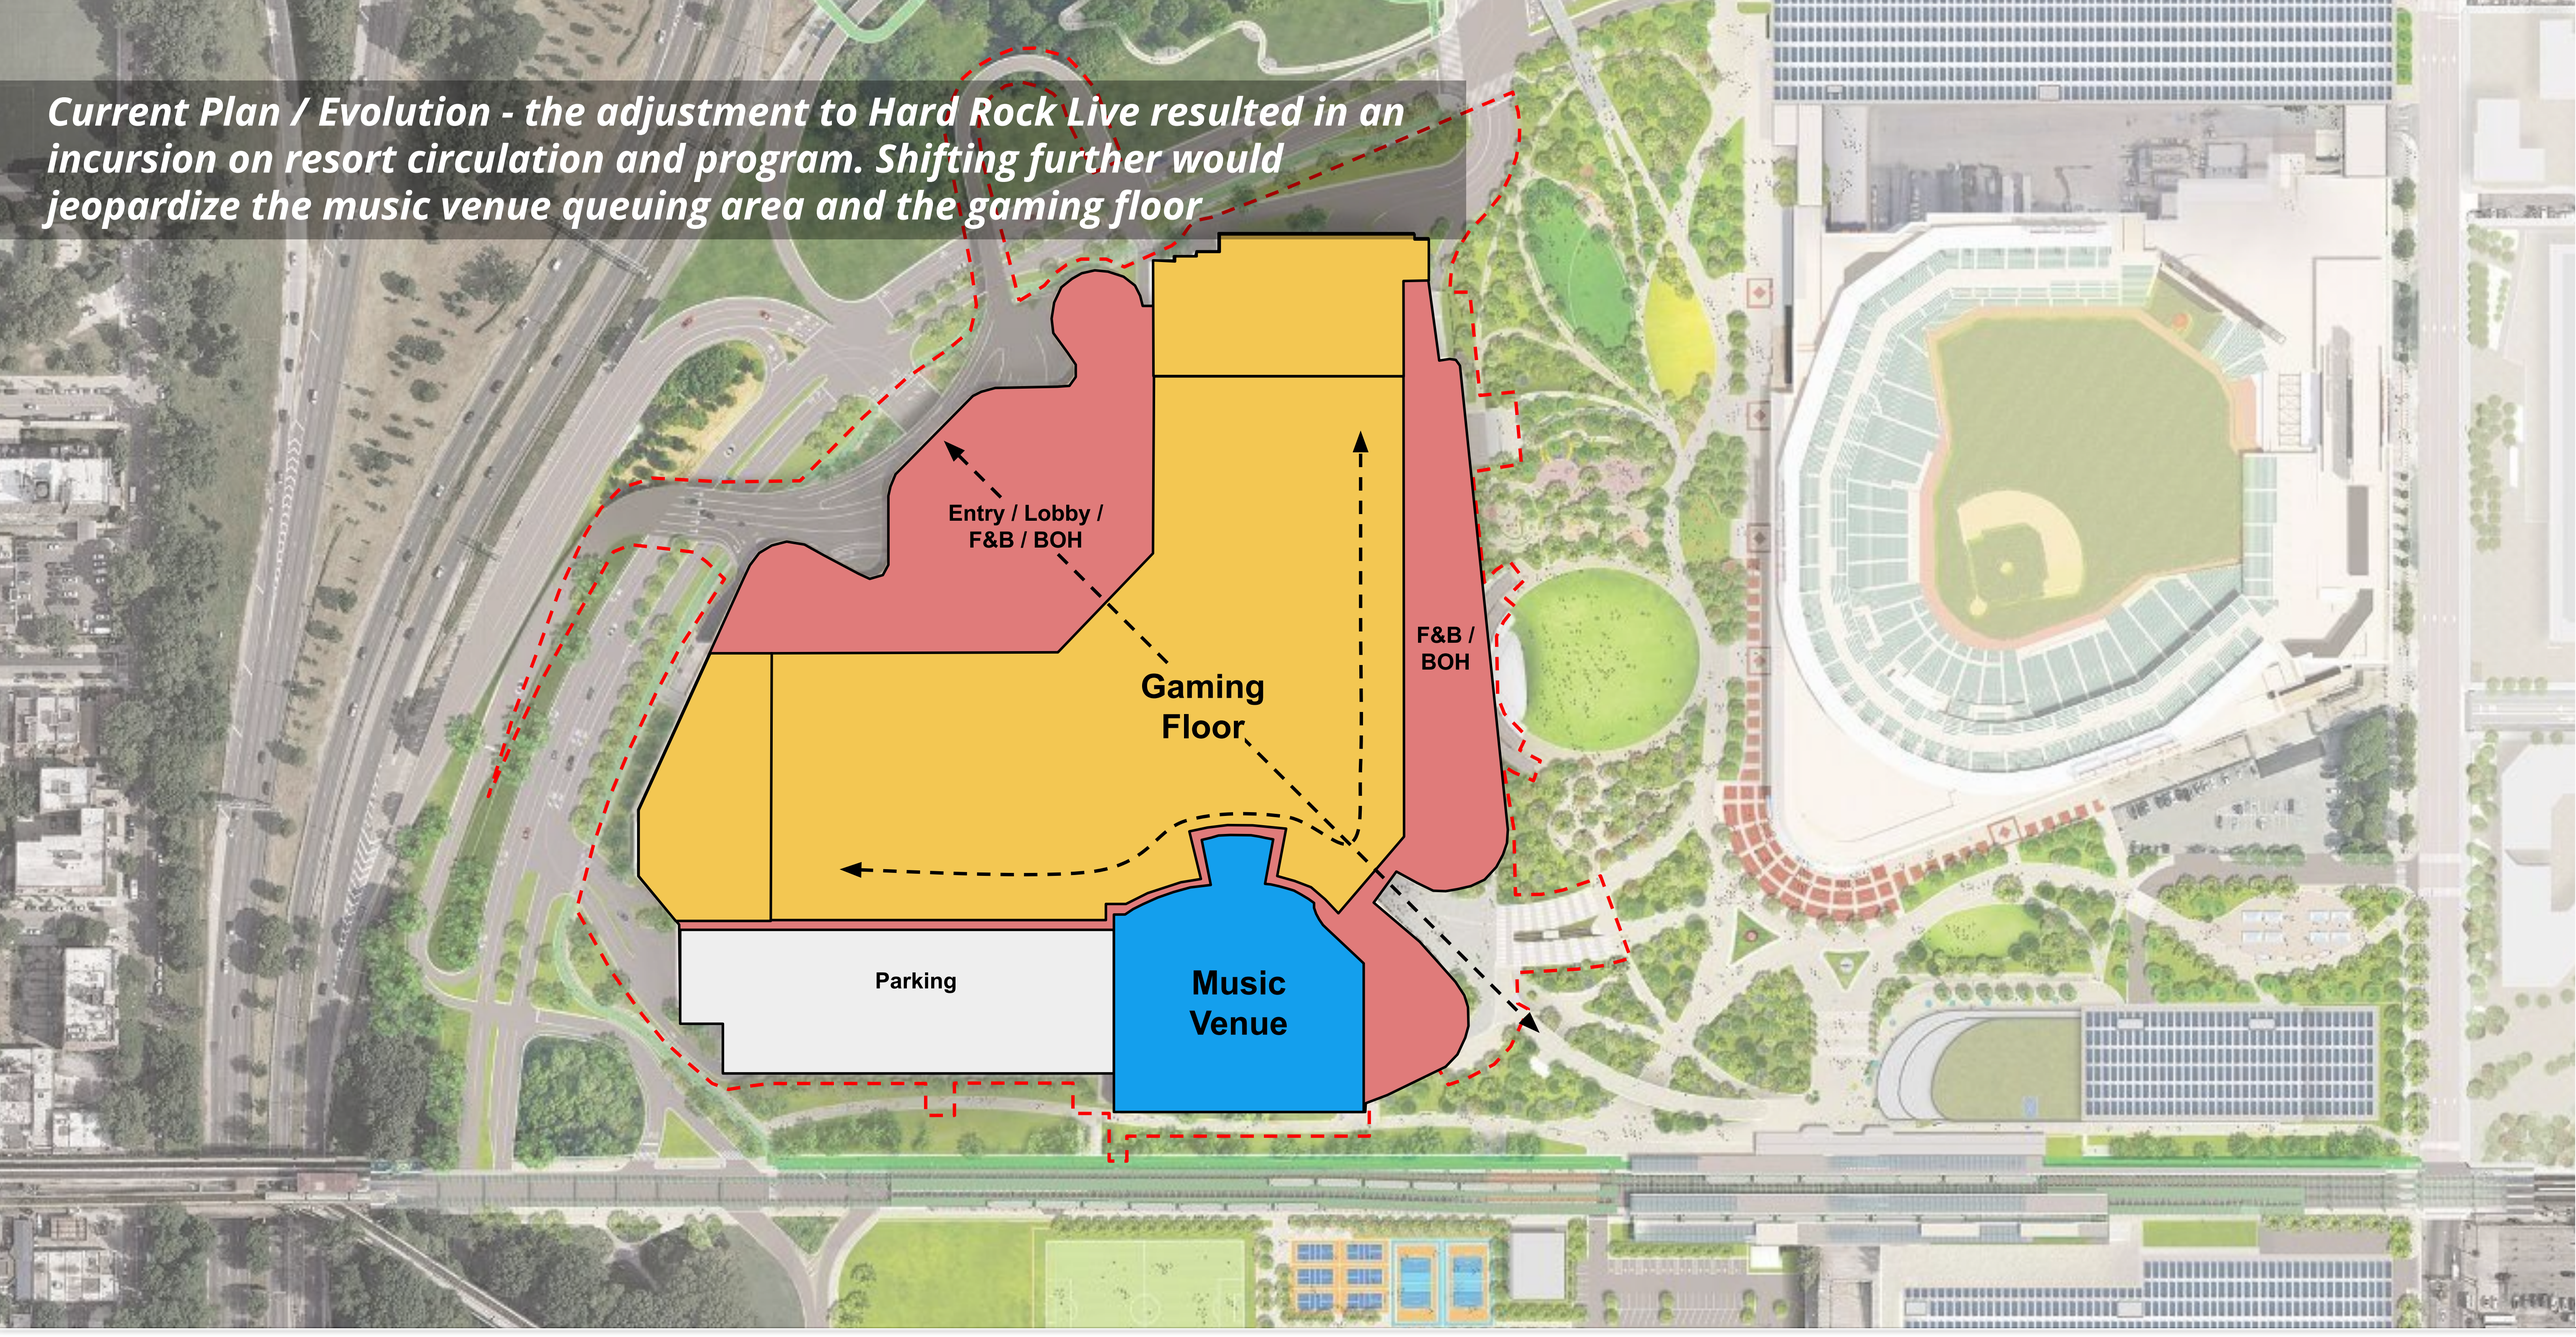


© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.



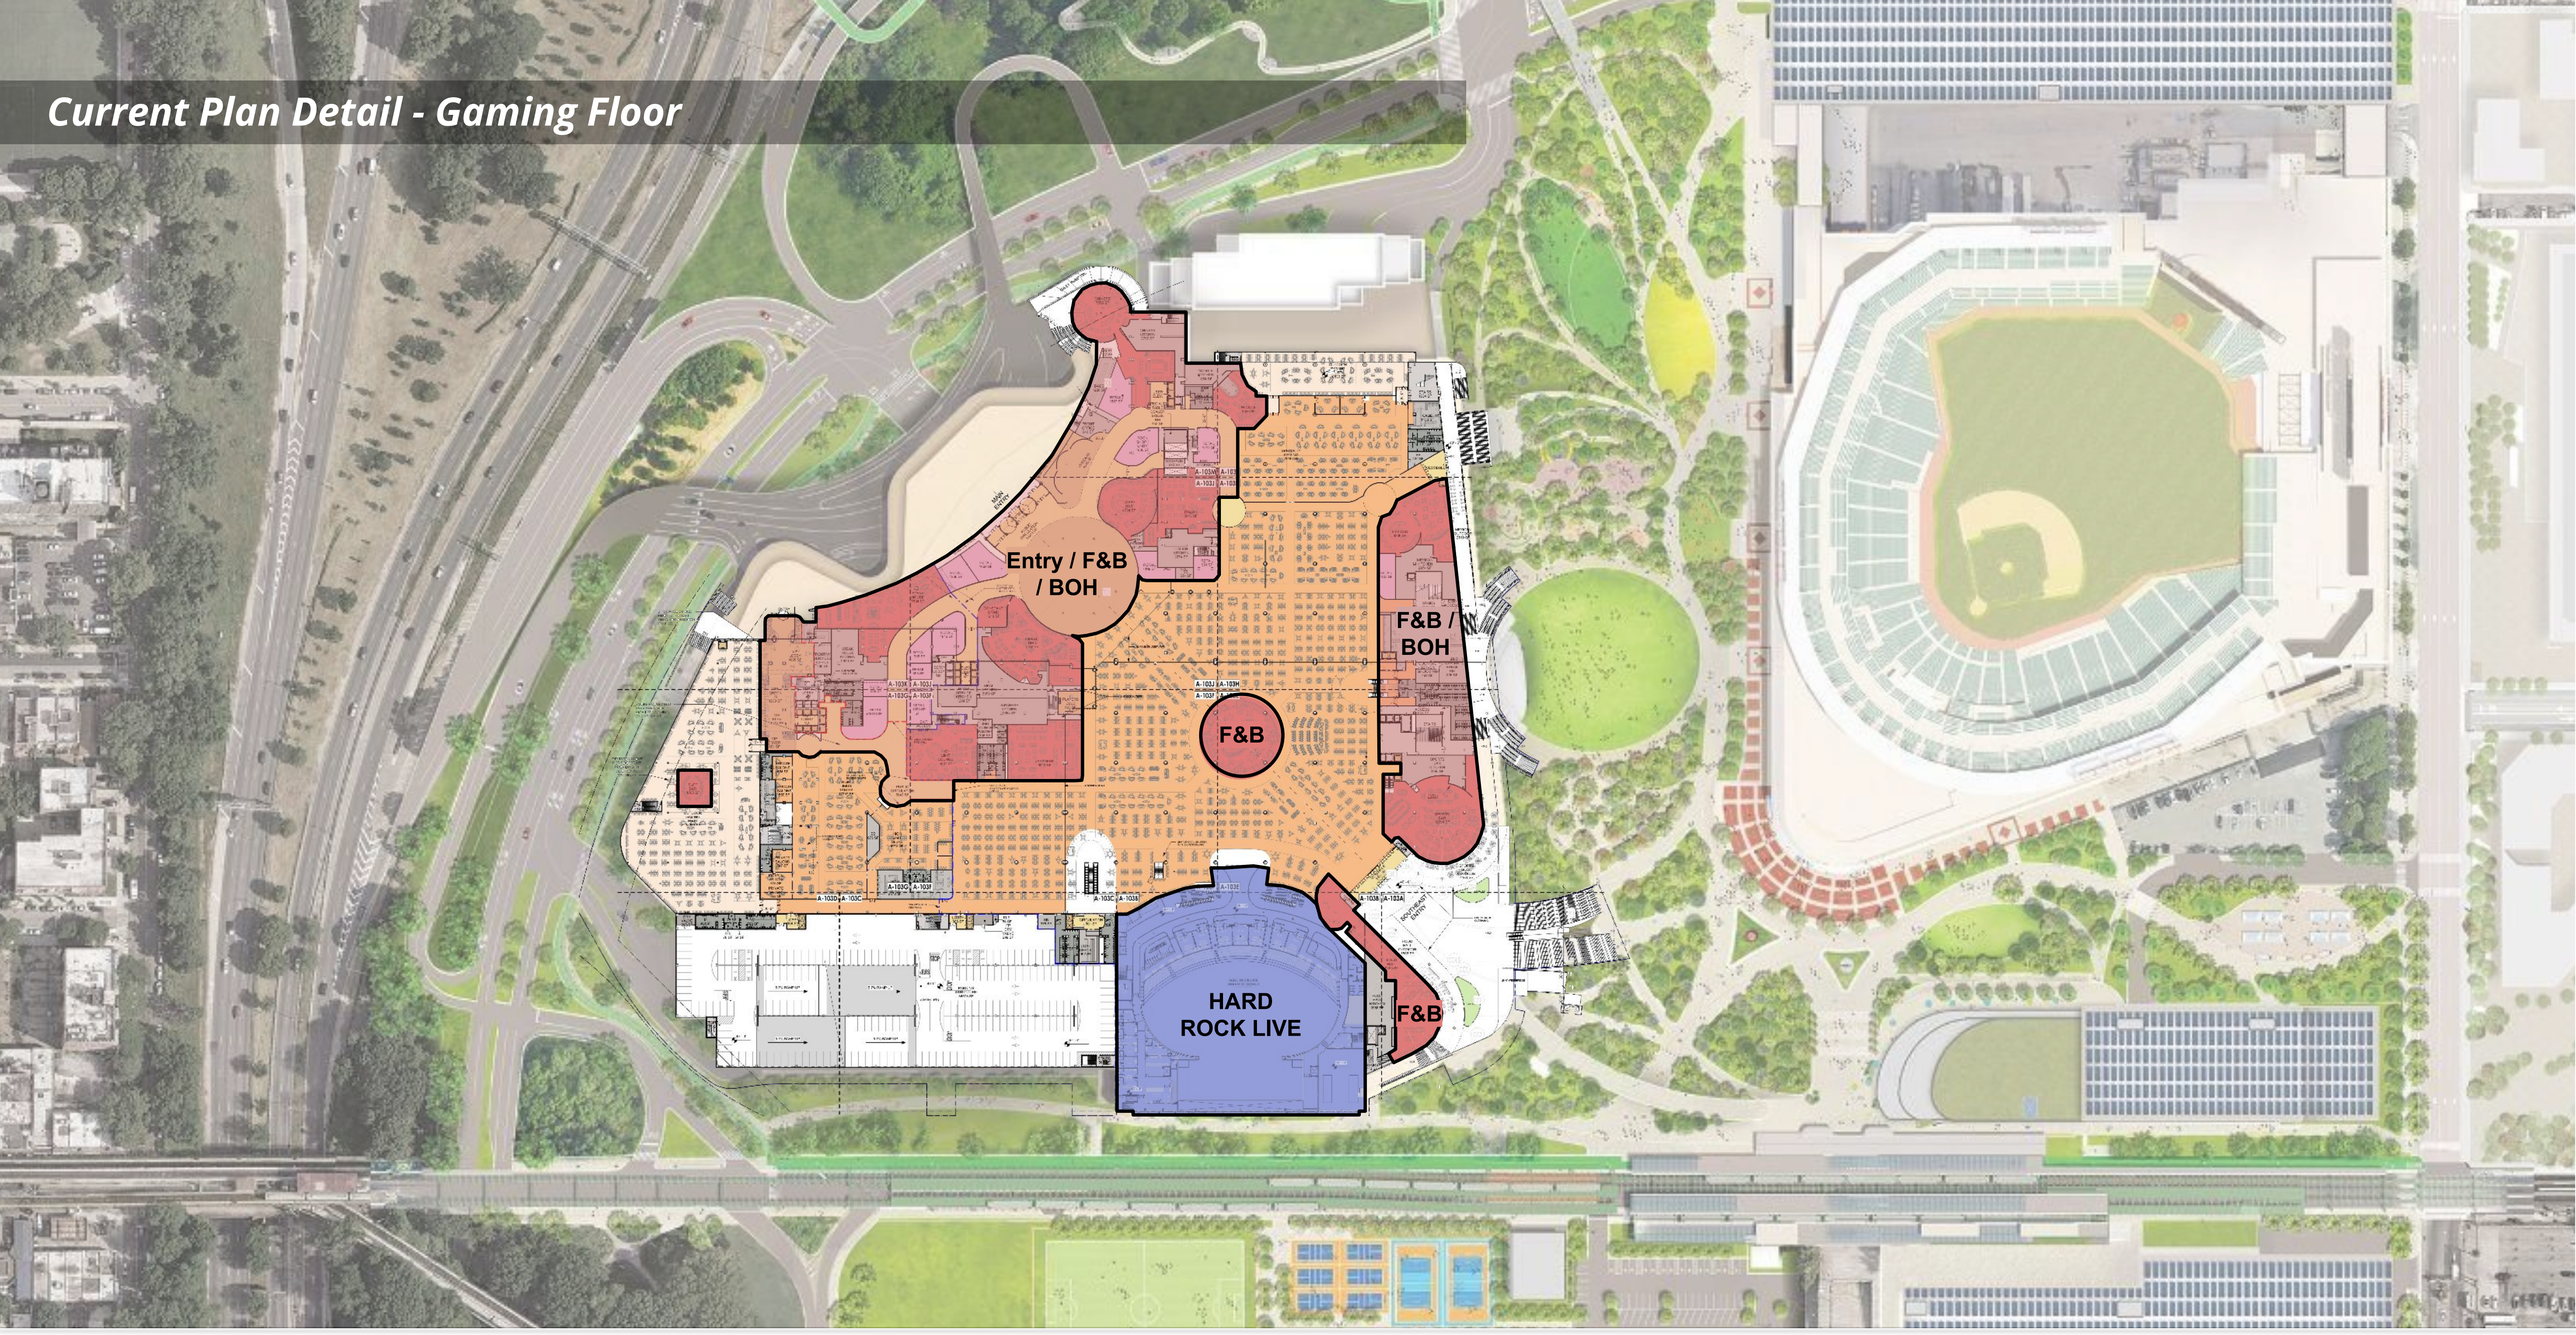
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Current Plan / Evolution - the adjustment to Hard Rock Live resulted in an incursion on resort circulation and program. Shifting further would jeopardize the music venue queuing area and the gaming floor



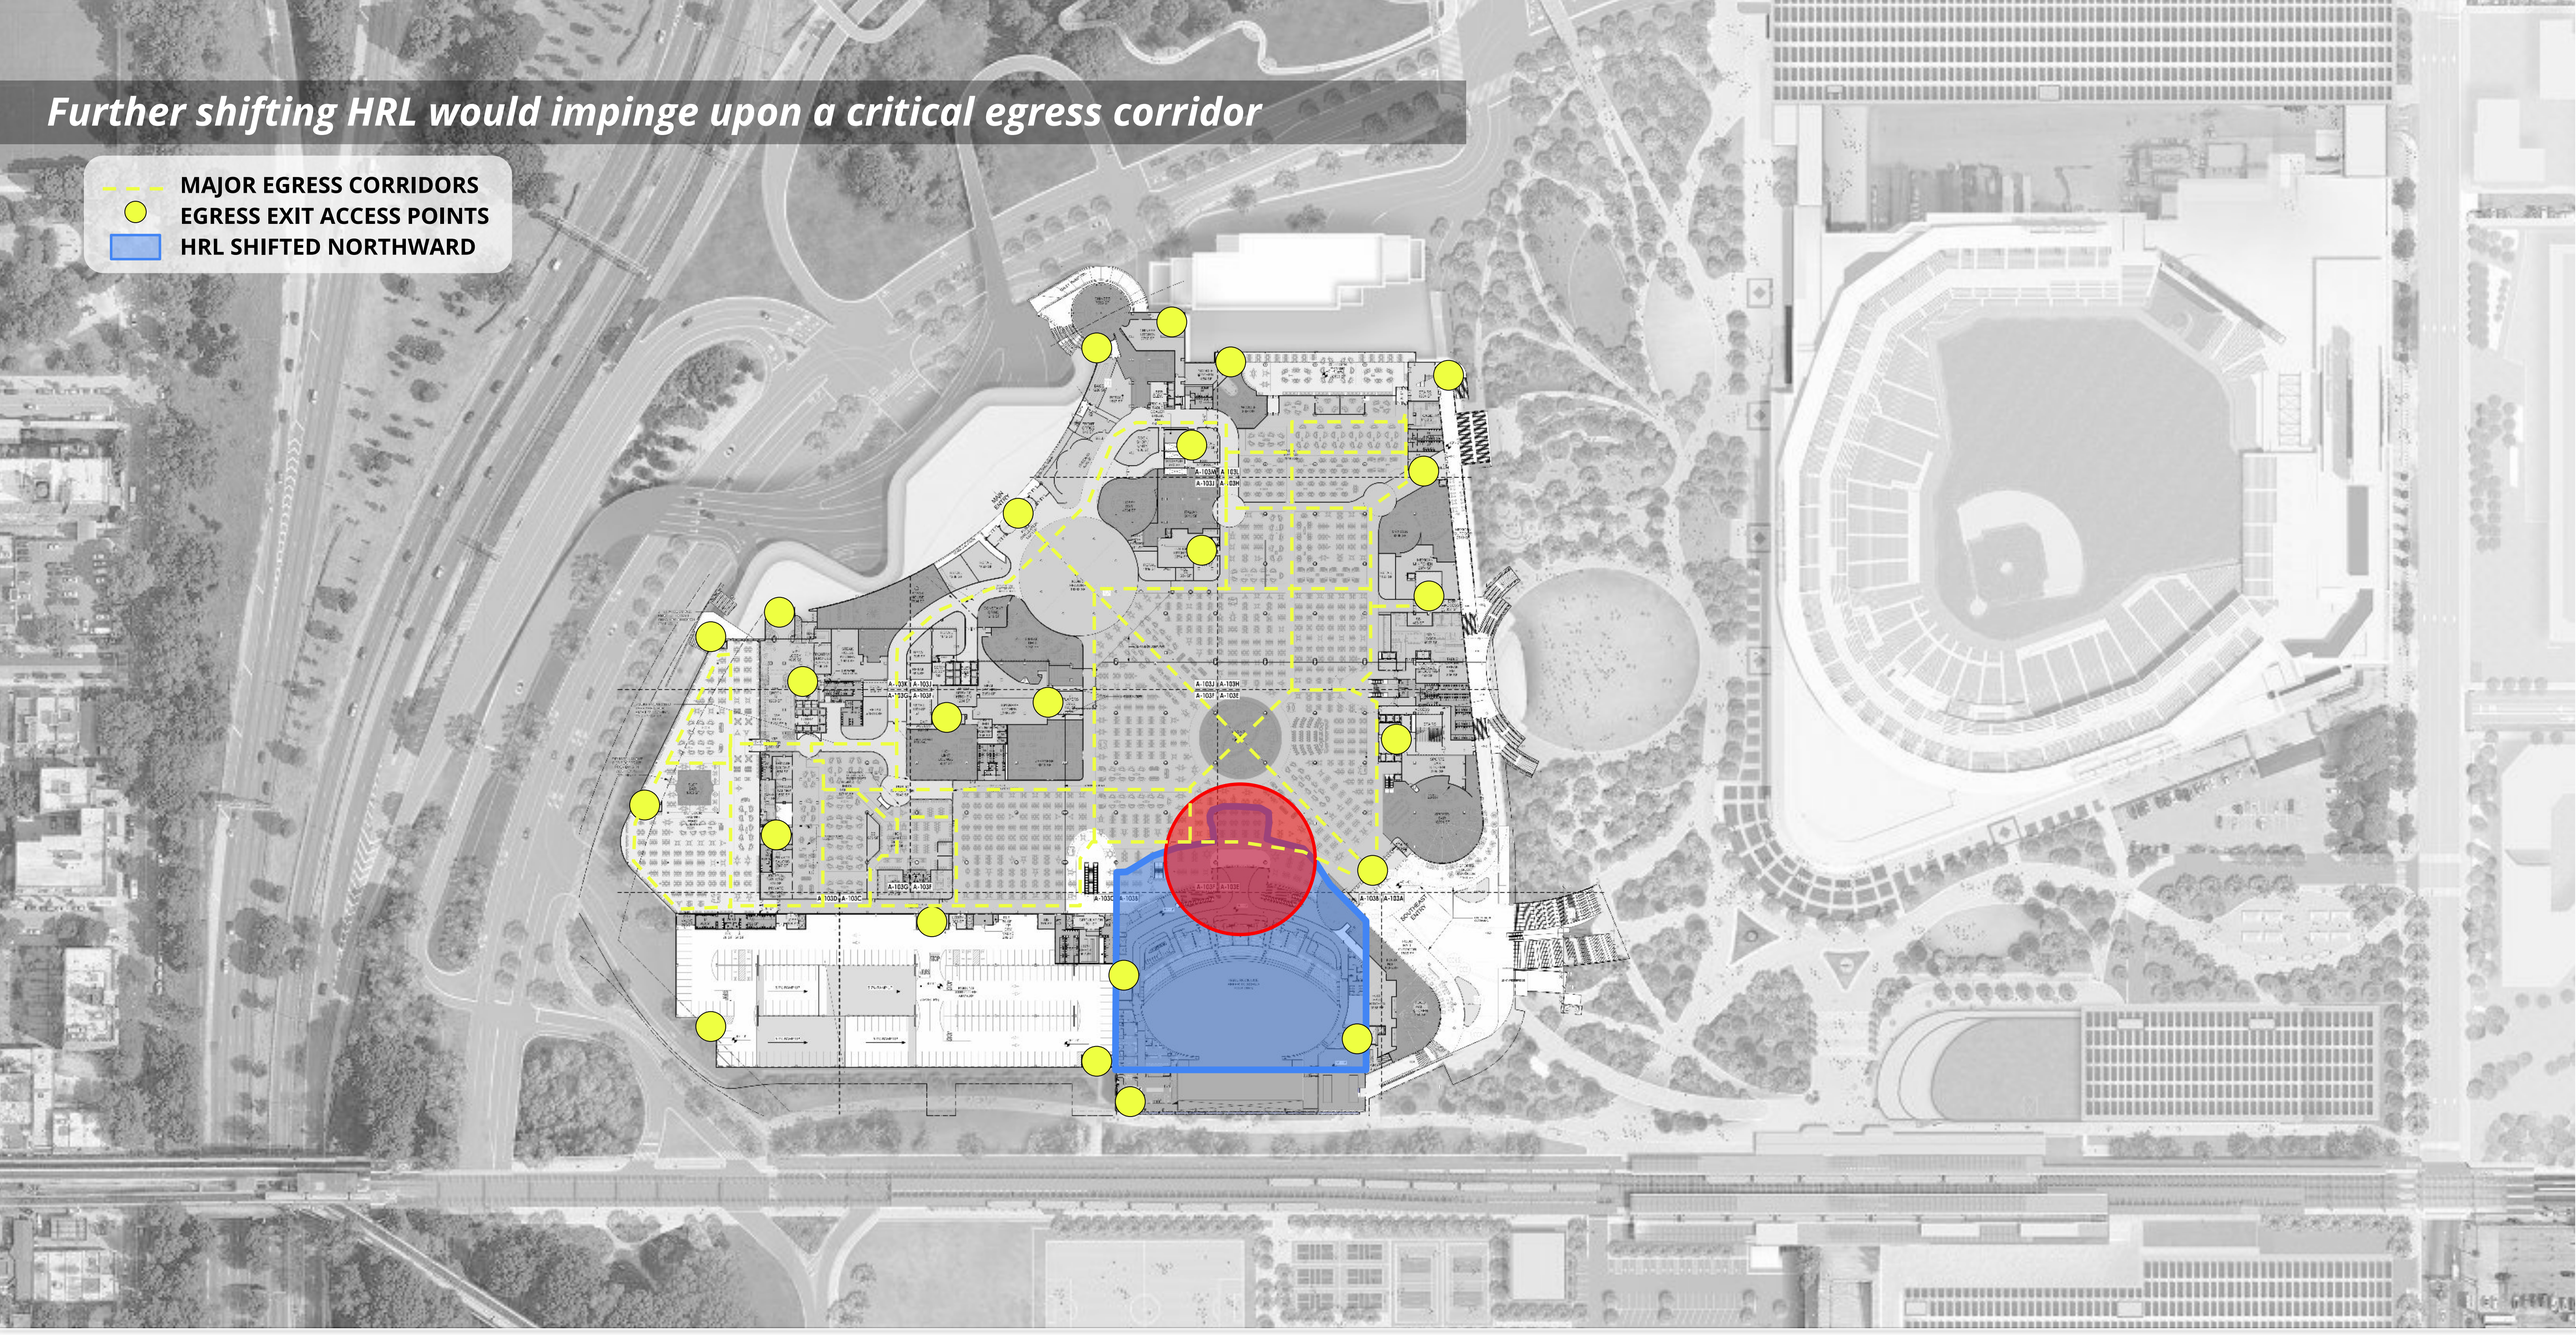
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Current Plan Detail - Gaming Floor



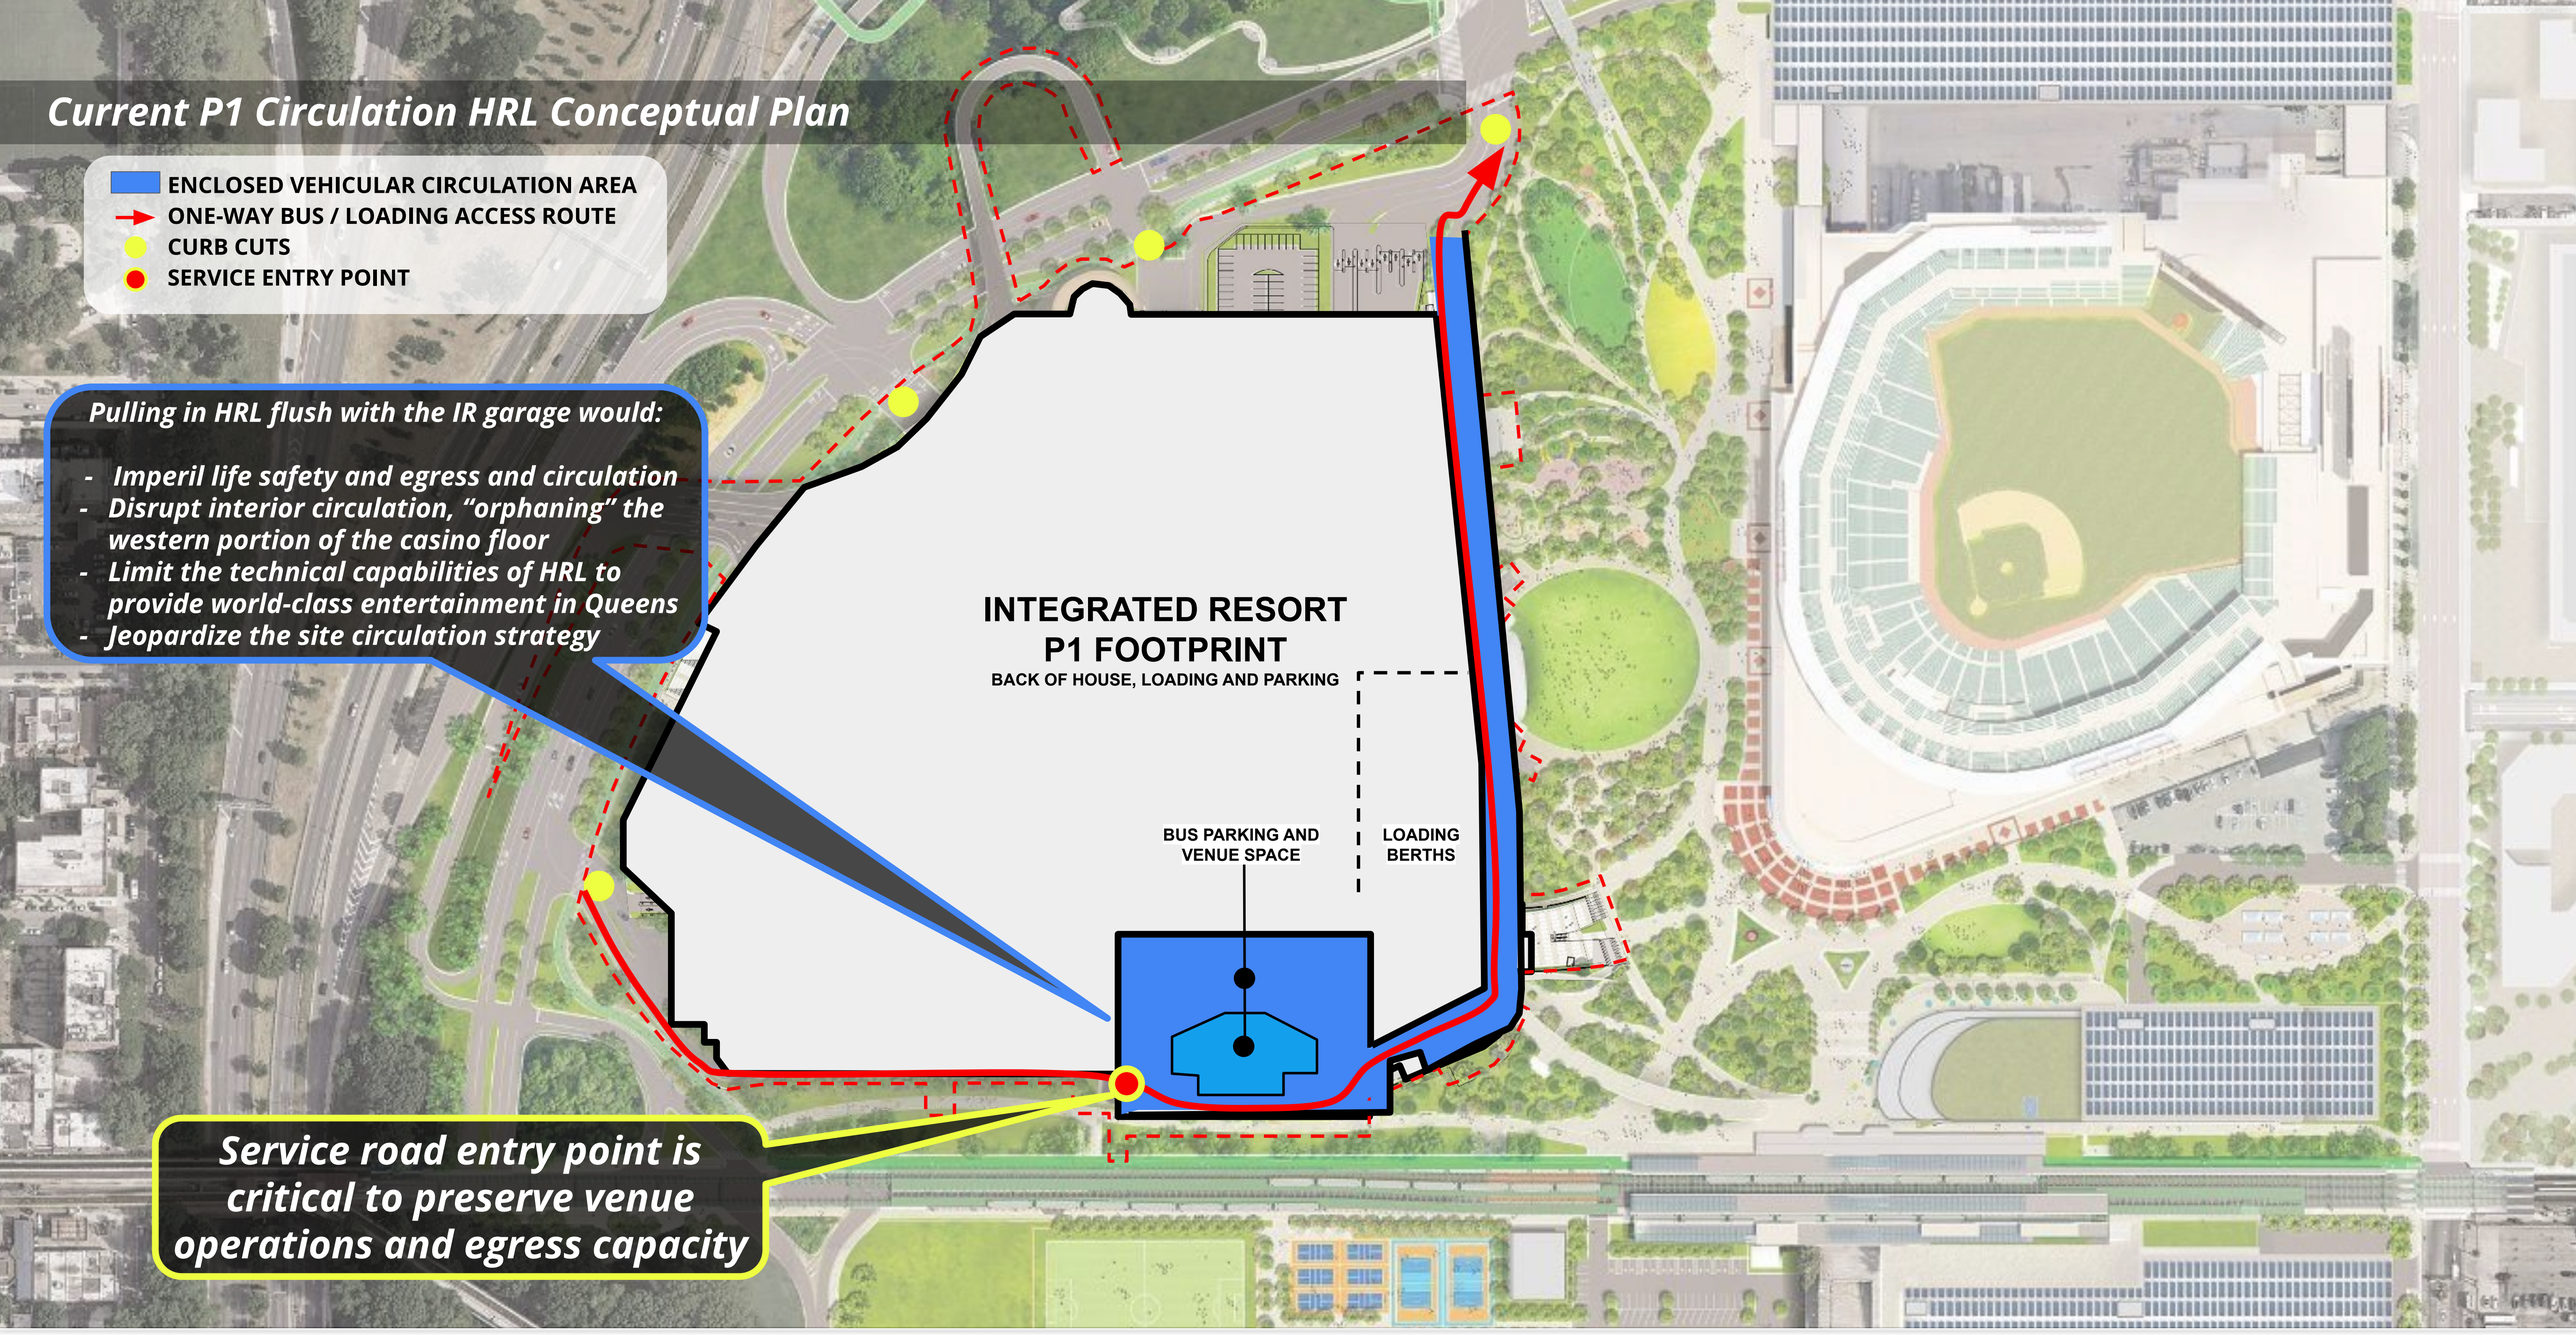
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Further shifting HRL would impinge upon a critical egress corridor



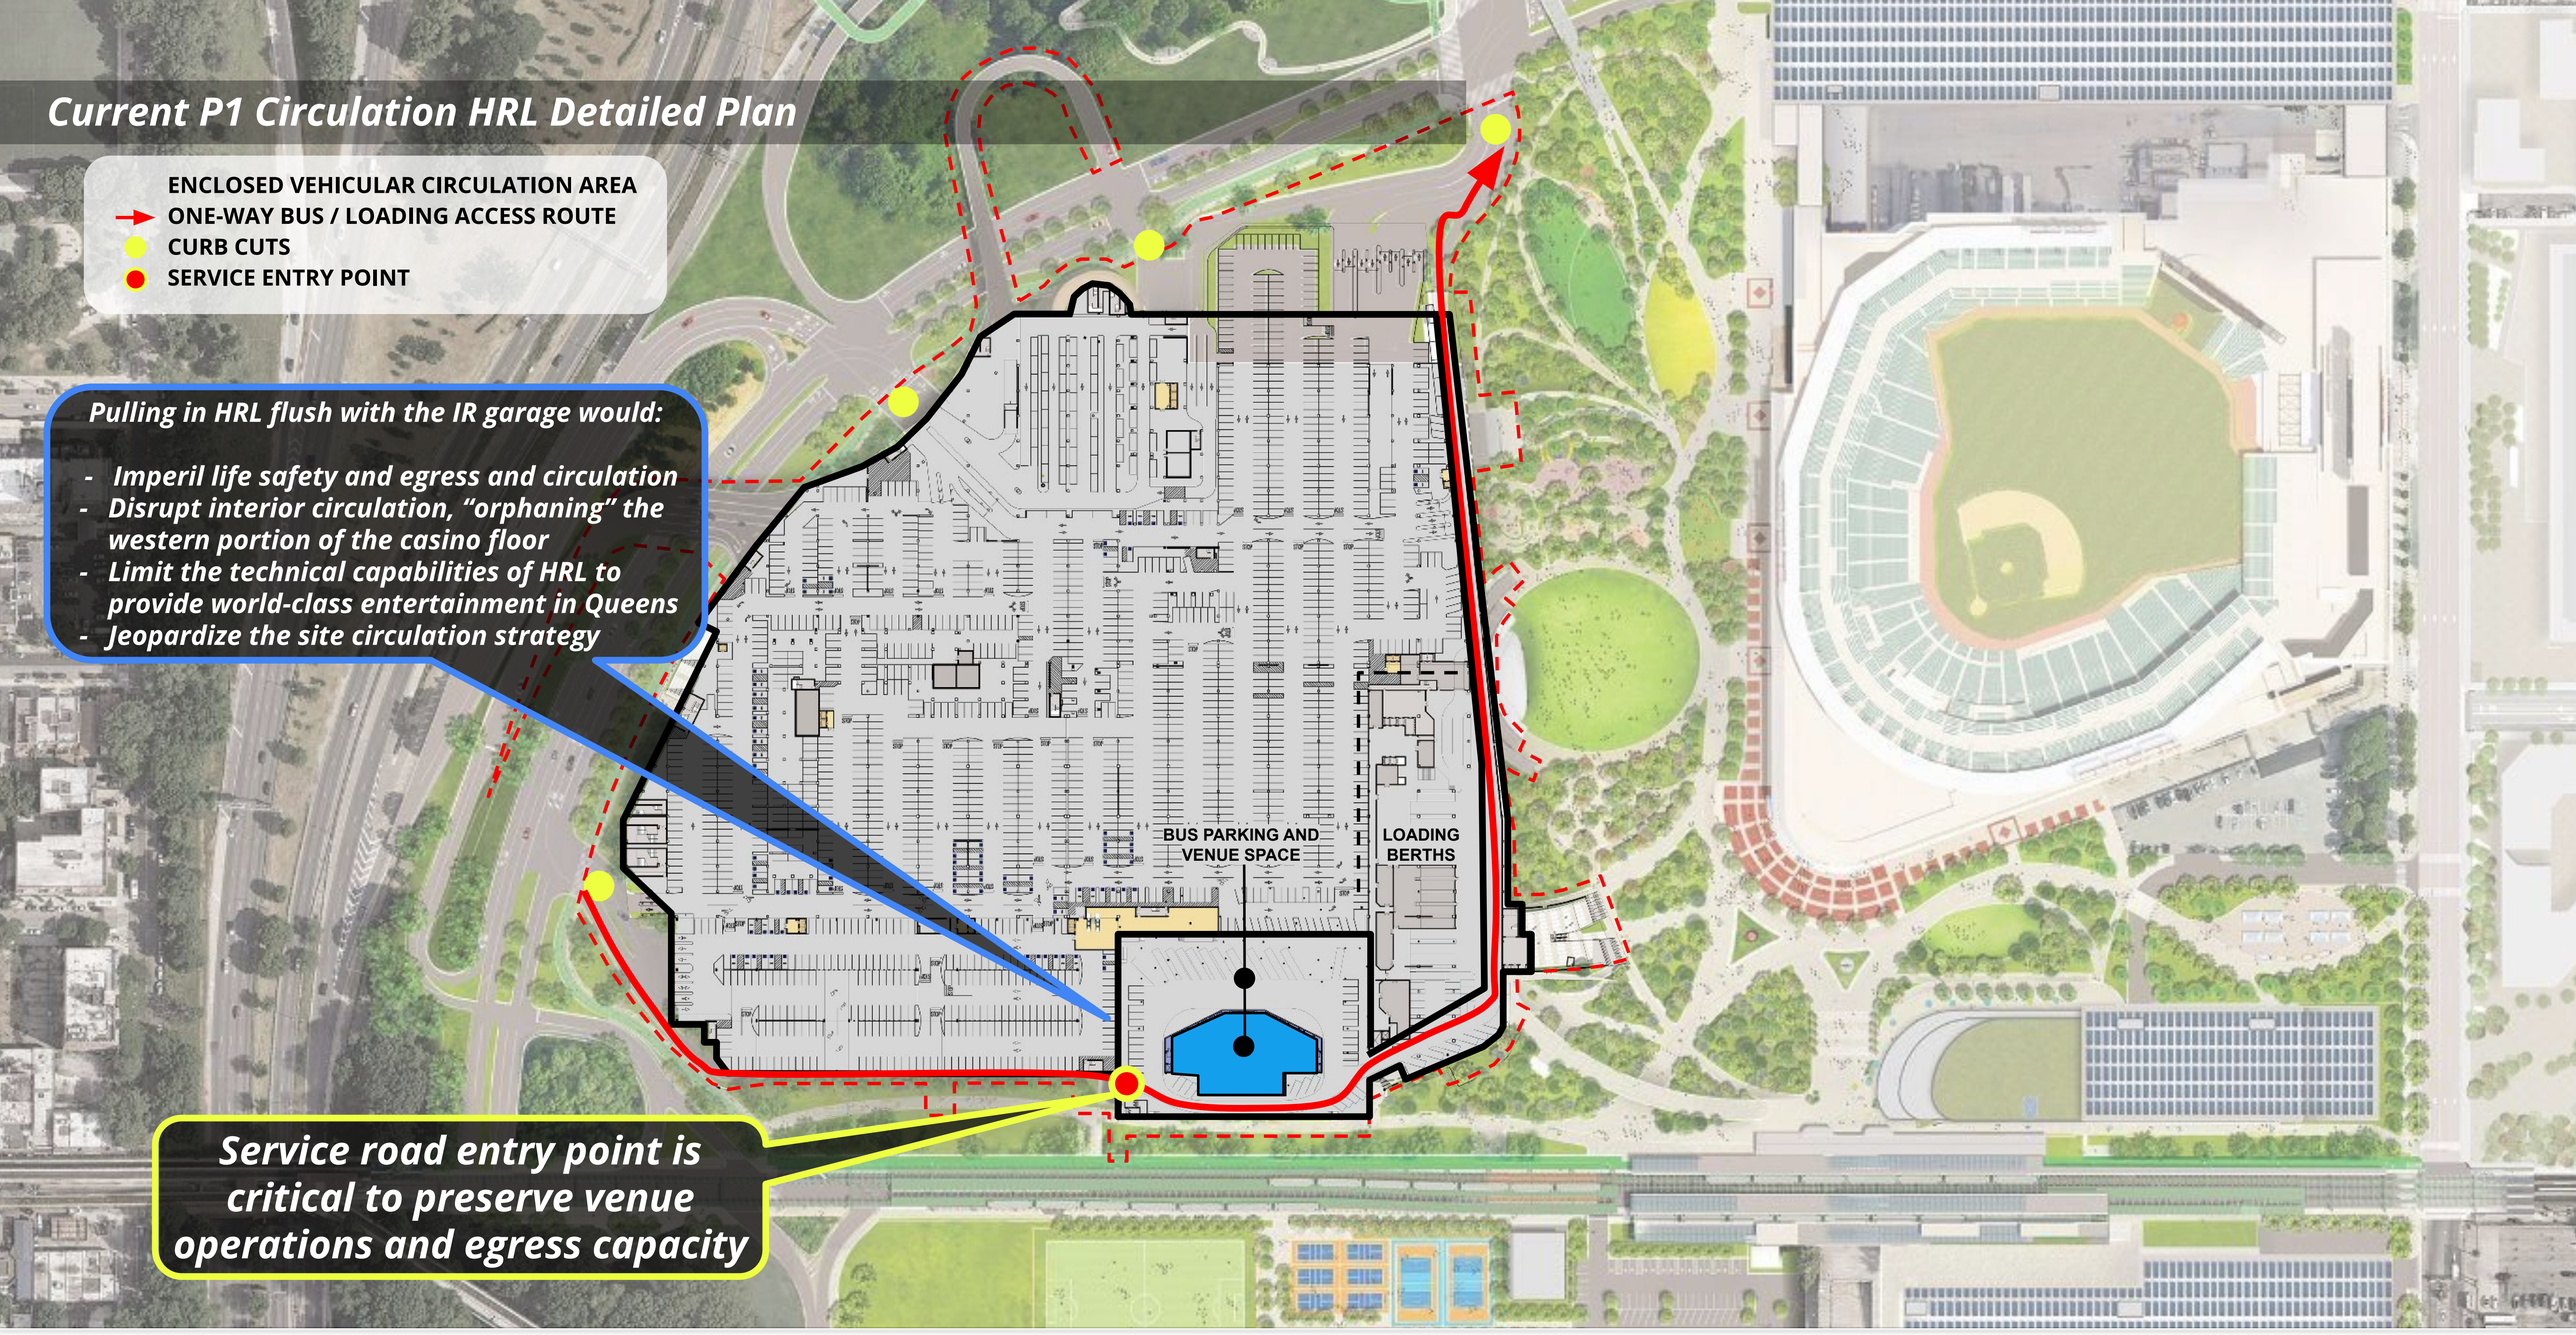
© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Current P1 Circulation HRL Conceptual Plan



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Current P1 Circulation HRL Detailed Plan



Pulling in HRL flush with the IR garage would:

- ***Imperil life safety and egress and circulation***
- ***Disrupt interior circulation, "orphaning" the western portion of the casino floor***
- ***Limit the technical capabilities of HRL to provide world-class entertainment in Queens***
- ***Jeopardize the site circulation strategy***

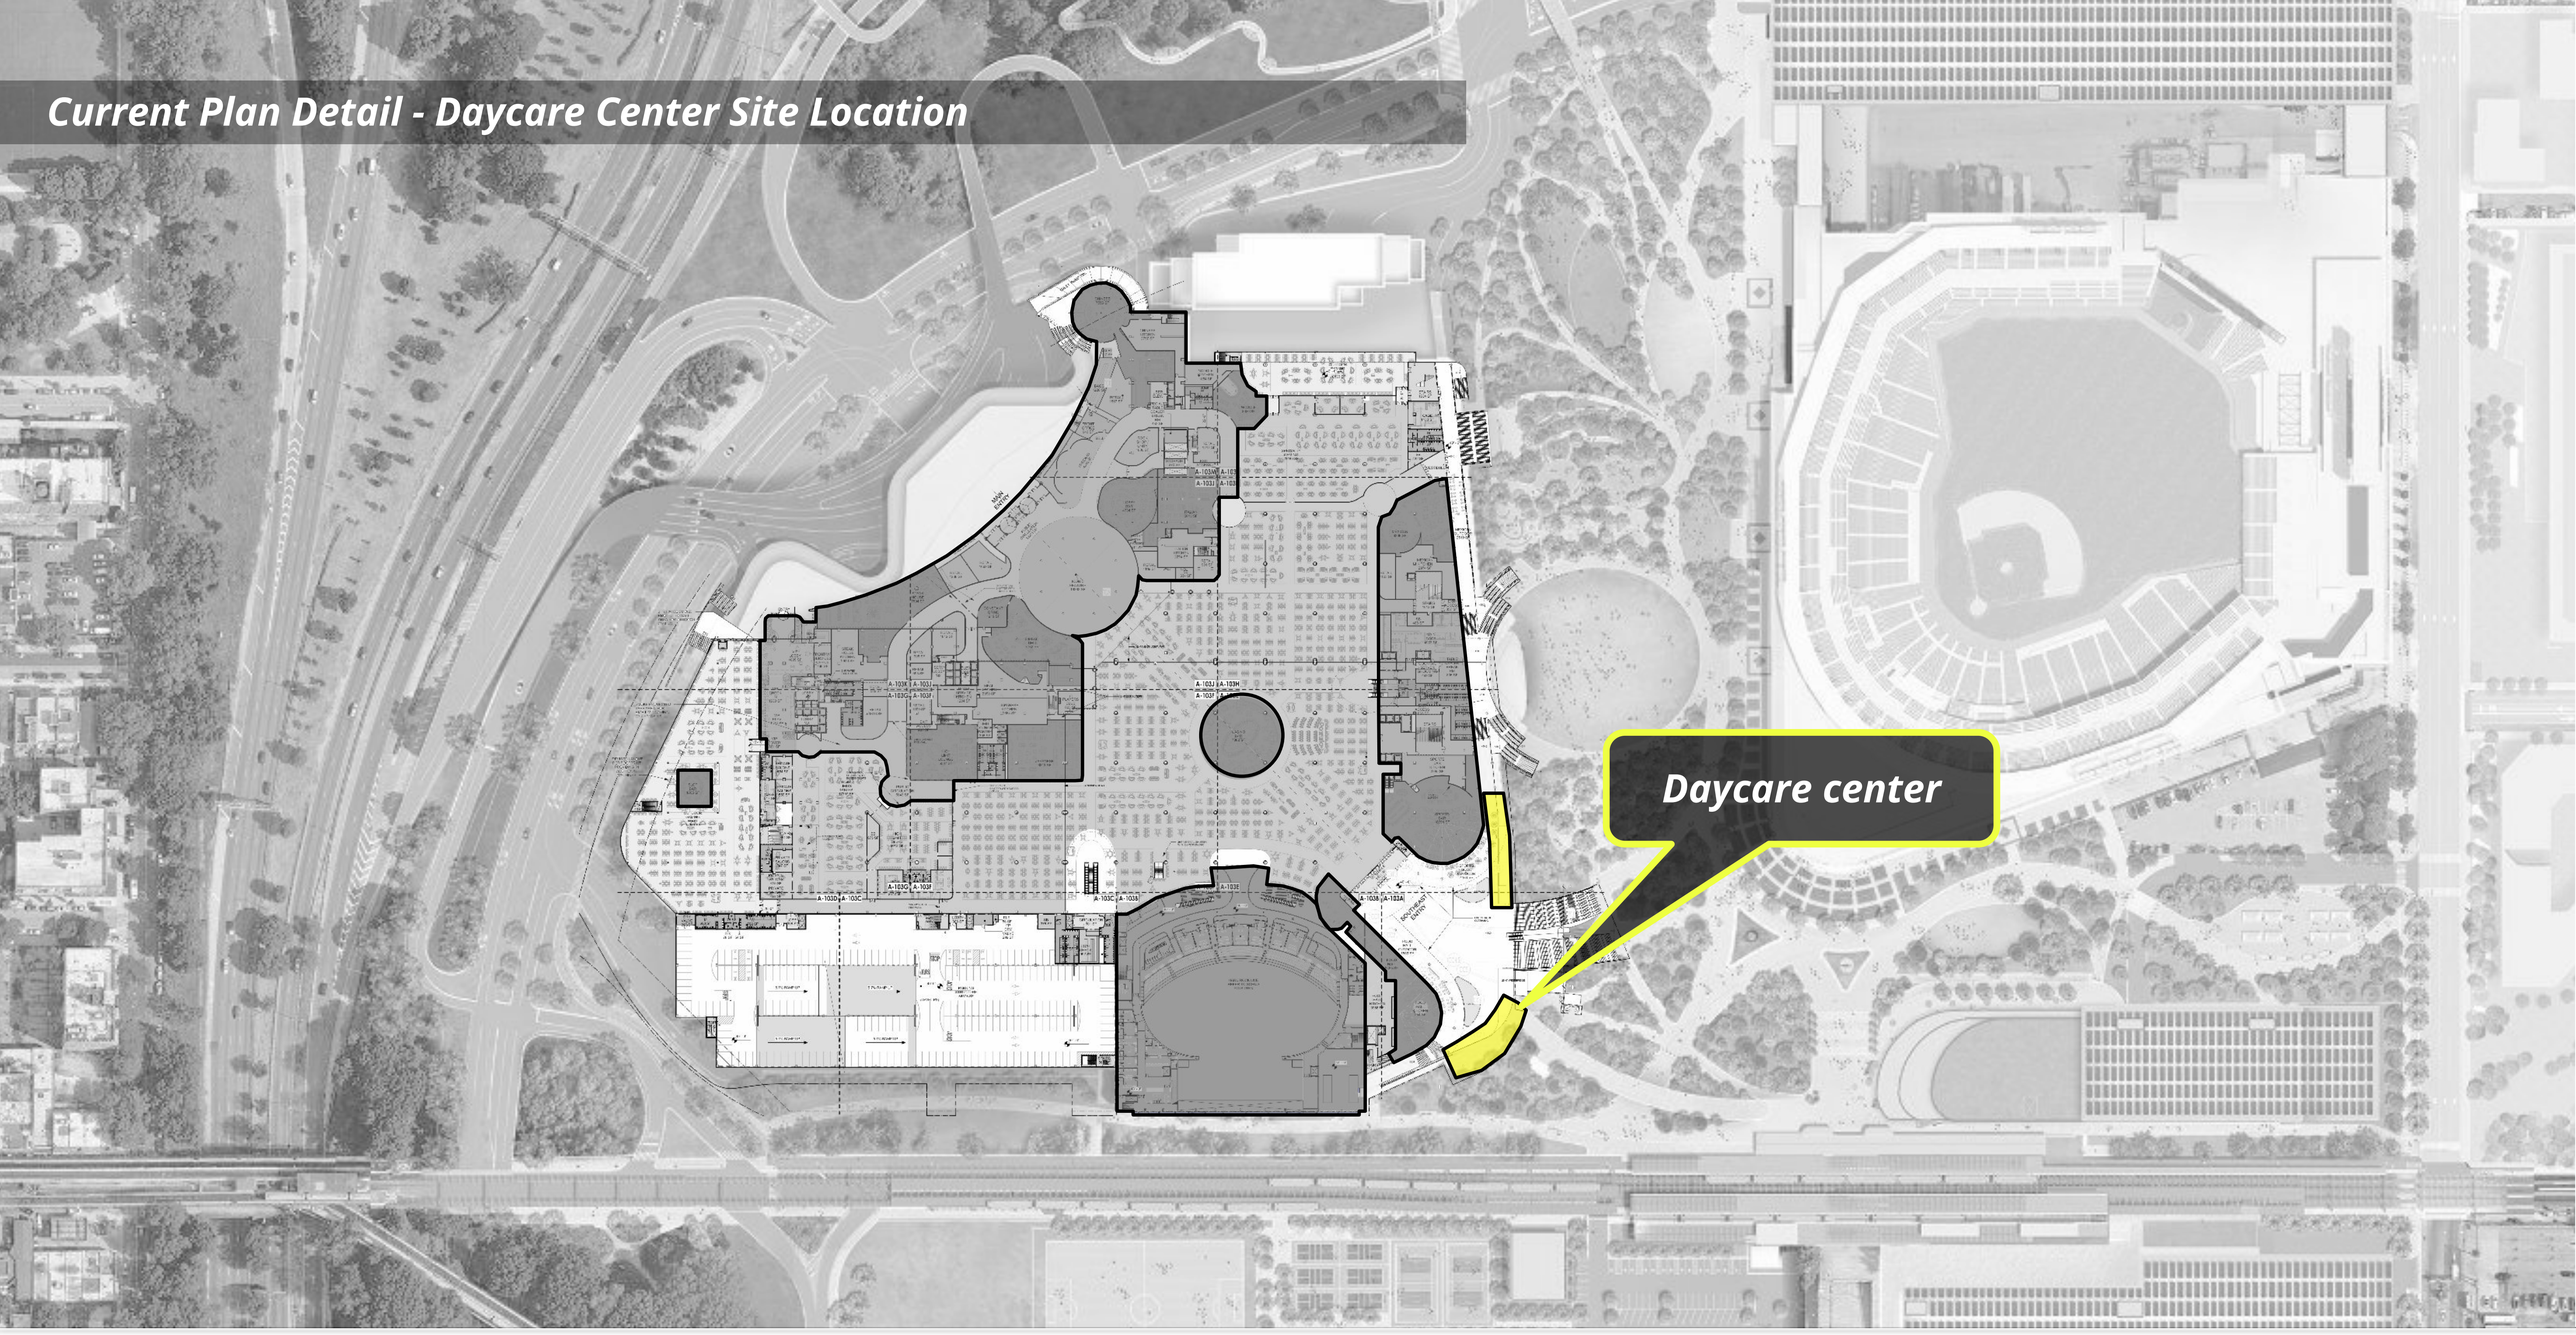
Service road entry point is critical to preserve venue operations and egress capacity

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

DAYCARE CENTER

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Current Plan Detail - Daycare Center Site Location



© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Current Plan Detail - Daycare Center

- A comprehensive childcare and after-school program that provides employees with childcare tailored to their work schedules.
- 14,200 square feet of interior space, accommodating up to 268 Children (160 Children for daycare and 108 for after-school.)
- A mix of 10 daycare classrooms and 6 after-school classrooms with service and support space
- A dedicated 3,000 square feet of outdoor green space for play and recreation.

Examples include potential “storefront” style secure bike lockers, space for street vendors….

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

...and/or art installations that enliven the streetscape and invite pedestrians into the campus

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Along Roosevelt Ave, the activation would connect to the Queens' Culture Walk along the IR facades

© 2025 SHoP Architects LLP + Field Operations. All Rights Reserved.

Behind the "activated" facades, the portion of the Taste of Queens Garage along Seaver Way will discreetly provide the critical storage for both the displaced equipment and new landscape maintenance equipment required to operate the campus

Maintenance + Groundskeeping:
- *Daily care and upkeep of landscapes, hardscapes, and site furnishings using small utility vehicles and seasonal maintenance tools.*

Event Setup + Programming:
- *Temporary infrastructure for gatherings, including staging, signage*

Crowd + Access Management, Security + Safety
- *Systems of barriers, signage that organize movement*
