**Job Description:**

New York City is home to approximately 1.64 million older adults, and the Department for the Aging (DFTA) is committed to helping them age in their homes and communities. The mission of DFTA is to eliminate ageism and ensure the dignity and quality of life of diverse older adults. DFTA also works to support caregivers through service, advocacy, and education.

The New York City Department for the Aging (DFTA) is seeking a professional senior application developer to design and code functional programs and applications. The successful candidate will work as part of a team as well as independently. The candidate must have excellent knowledge of .Net, JAVA, JQuery, SQL Server and IIS. They must be familiar with a variety of operating systems and platforms. The ideal candidate will also have project management skills, and an analytical mindset with a keen eye for details.

Below are typical tasks the candidate will perform:

- Participate in team meetings to understand client requirements and how they translate into application features.
- Collaborate with other IT professionals to set specifications for new applications.
- Design and create prototypes according to specifications.
- Write high quality source code to program complete applications within deadlines.
- Write, optimize and/or debug large complicated SQL statements and stored procedures.
- Perform unit and integration, functional and non-functional testing before launch.
- Troubleshoot and debug applications.
- Evaluate and enhance existing applications to reprogram, update and add new features based on new user requirements.
- Develop project plans, technical documents and handbooks to accurately represent application design and code.
- Keep abreast of the latest technologies and participate in training courses to maintain skills.

**\*Non-City rate.**

**\*\*City incumbent rate.**

**Minimum Qualifications:**
