Note:

(1) Building ownership of shelters and lease terms for shelter providers vary by site. Thus, the party responsible for remedying violations also varies by site. Shelters can be: (a) provider-owned and provider-operated; (b) city-owned and city-operated; (c) city-owned and provider-operated; or (d) privately-owned, and provider-operated under lease with the building owner. Where shelter service providers do not own the buildings they occupy, their responsibility for responding to violations may vary in accordance with their lease terms.

(2) Violations are reported by building, and shelters do not always occupy an entire building. The total number of violations reported for the building as a whole may include violations that are not found within or do not directly impact the DHS shelter unit(s) within a building.

(3) Administrative processes relating to curing violations, including but not limited to re-inspection of corrected conditions, and posting updated information on the Scorecard can take up to 90 days and changes may not be immediately reflected. Prior month violations are also removed from the scorecard if the location is no longer used by DHS.

(4) Flexible Capacity refers to shelter locations DHS expects to use for a limited time period and allow DHS to address significant increases in shelter population. For the most part these are commercial hotel buildings, with the bulk being Sanctuary locations obtained under the DHS Emergency Solicitation City Sanctuary Facilities Contract to serve the migrant influx. DHS and providers have limited ability to correct or cause to be corrected violations identified at these sites.
