I'm writing in support and advocate for the proposed New District 43, which would create a new community of interest around our growing Asian Community here in South Brooklyn.

The Asian American community is the fastest growing in the country, and many come to New York City and call it home. Having a district with the proposed lines as the current New District 43 has been drawn and proposed would ensure that there is Brooklyn-representation of this vital and important community in the largest borough by population in the City.

Sincerely,
