Table 2. Unintentional drug poisonings by drug type[1], number and age-adjusted rate[2] per 100,000 residents, New York City, 2001

Source: New York City, Office of Chief Medical Examiner (OCME)

	2001		
	N	%	AAR
All drugs	792	100%	12.2
Drug Type[1]			
Alcohol	326	41%	5.1
Benzodiazepine	101	13%	1.6
Cocaine	386	49%	5.9
Opioids	517	65%	8
Heroin	416	53%	6.4
Methadone	158	20%	2.4
Opioid Analgesics	66	8%	1.0

[1]Includes toxicology confirmed by the medical examiners office. Categories are not mutually exclusive, thus will not add to 100%

[2]Rates are calculated using intercensal New York City population denominators updated December 2014. Rates are adjusted to US 2000 Standard Population.
