Funds Appropriated	\$48 million	\$50 million	\$50 million	\$50 million

Syringe Service Programs

The NYC Department of Health and Mental Hygiene has provided funding for sustaining and expanding hours and services at the City’s existing syringe service programs (SSPs) that operate overdose prevention centers (OPCs) to reduce the risk of overdose among people who use drugs and offer them connections to other services and supports, such as treatment.

Provider: OnPoint NYC, with administration via Public Health Solutions (PHS)

OnPoint NYC is a community-based nonprofit organization that offers a wide range of services to people who use drugs, experience homelessness, or engage in sex work in order to improve the quality of life for program participants. OnPoint NYC provides social services that include drop-in centers, harm-reduction services, on-site medical and mental health services, community outreach and syringe litter cleanup, and supportive services along with overdose prevention services. OnPoint NYC, through its parent organizations (New York Harm Reduction Educators and Washington Heights Corner Project), has been providing services in the Bronx and Manhattan since 1992.

Data

In fiscal year 2026, OnPoint NYC provided:

- In FY26 Q1 (July 2025-September 2025), OnPoint NYC provided 18,840 harm reduction services to 3,672 participants. Services include provision of naloxone, health education, buprenorphine prescription, rapid HCV tests, and referrals to outside organizations for care.

- In FY26 Q1 (July 2025-September 2025), OnPoint NYC provided 58,859 services addressing participants' basic needs such as respite, meals, and laundry and bathroom/shower use in their drop-in centers.
- In FY26 Q2 (October 2025-December 2025), OnPoint NYC provided 19,708 harm reduction services to 3,479 participants. Services include provision of naloxone, health education, buprenorphine prescription, rapid HCV tests, and referrals to outside organizations for care.
- In FY26 Q2 (October 2025-December 2025), OnPoint NYC provided 76,225 services addressing participants' basic needs such as respite, meals, and laundry and bathroom/shower use in their drop-in centers.

Demographic Characteristics of Participants Receiving Harm Reduction Services at OnPoint NYC, July 2025 Through December 2025

Source: eSHARE | Extraction Date: March 3, 2026

Number of Harm Reduction Services at OnPoint NYC, July 2025 Through December 2025

Source: eSHARE | Extraction Date: March 4, 2026

	FY 26 July-September	FY 26 Q2 October-December
	Number	Number
Total Harm Reduction Services		
Basic needs ³	58,859	76,225

Identified/confidential services ⁴	11,497	12,182
Anonymous/group services ⁵	7,343	7,526

3 Includes services addressing participants' basic needs such as respite, meals, laundry and bathroom/shower use in their drop in center

4 Identified and confidential services require a program intake and include services such as infectious diseases testing, harm reduction education, and naloxone distribution.

5 Anonymous events do not require an individual program enrollment and include services such as targeted case finding and group health education.

Relay

Relay, launched in June 2017, is an innovative hospital-based support system for people who have experienced a suspected nonfatal opioid overdose. Most individuals who experience an overdose are transported to an emergency department (ED), which often lack standardized protocols or staff capacity to address a patient's future overdose risk. Through Relay, Wellness Advocates with lived experience with substance use provide 24/7 on-call support to patients presenting to emergency departments following a nonfatal overdose. After providing services in the ED, Wellness Advocates continue follow-up over a three-month follow-up period. Services include overdose risk reduction education, opioid overdose rescue training, naloxone distribution, and referrals and navigation to harm reduction services, substance use disorder treatment, and other health and social services. Relay is currently operational in 16 hospitals citywide.

*Please note that OSF funds currently support 1 Relay hospital; the data below is reflective of all Relay services across hospitals in NYC.

Demographic characteristics of participants receiving Relay services, July 2025 Through December 2025

Source: eSHARE | **Extraction Date:** January 14, 2026

	FY26 Q1		FY26 Q2	
	Number	Percent	Number	Percent
Total Participants Receiving Relay Services¹	445	100%	363	100%

- 1 Individuals with more than one Relay encounter may be counted more than once.
- 2 “Man” and “Woman” includes both cisgender and transgender men and women, respectively.
- 3 Another race(s) includes Asian, Middle Eastern or North African, American Indian or Alaska Native, Multiracial, or any other self-described race/ethnicity. White, Black, and “Another race(s)” categories exclude Latino/a ethnicity. Latino/a includes Hispanic or Latino/a of any race.

Staten Island Initiative

Purpose and update: Improve and expand substance use service provision on Staten Island across prevention, harm reduction, treatment, and recovery services.

Note: Initial data reporting for contracted Staten Island OSF programs is still being finalized, so program summaries are listed below. Subsequent reporting will include data once it has been received

United Activities Unlimited (UAU) - Prevention Program

Program description: United Activities Unlimited, Inc (UAU) utilizes Prevention Specialists to provide curriculum implementation, Social Emotional Learning (SEL) Coaching, and prevention counseling services. To effectuate a dramatic increase in the number of students served, UAU is hiring two new full-time Prevention Specialists and two part-time Prevention Specialists. These new Prevention Specialists will also be able to bridge the school-day culture with the afterschool SEL culture to create a universal approach to prevention, SEL, and behavioral approaches at local schools. This expands prevention strategies and evidence-based practices to more youth in these priority neighborhoods. The public schools and community centers UAU currently serves are located within the priority neighborhoods experiencing high rates of overdose on Staten Island.

Domain	Indicator	Number (Q1)	Number (Q2)
Prevention services	Number of participants that completed lessons	185*	194

* corrected Q1 figure

Camelot - OASAS Certified Part 822 Program

Program description: Camelot of Staten Island’s (“Camelot”) works to improve the lives of individuals with substance use disorder (SUD) by providing them with the skills necessary to achieve and maintain recovery as they see acceptable. This goal will be accomplished by reducing the alcohol and substance use for patients actively using substances, providing clinical support to those who have begun to move toward goals related to their specific stages of recovery, and addressing the emotional and behavioral issues of individuals who have been affected by the substance use of someone close to them. As part of service expansion efforts, Camelot is introducing a new service focused on providing comprehensive aftercare support for individuals transitioning from treatment to recovery. This service includes ongoing counseling, case management, peer support, and life skills training to help individuals maintain treatment goals, prevent relapse, and achieve long-term recovery goals.

Domain	Indicator	Number (Q1)	Number (Quarter 2)
SUD Treatment Services	Number of participants receiving all aggregate treatment modalities outlined in this service domain	*No data to report from Q1	446
Recovery/Wraparound Services	Number of participants receiving Peer Support, Navigation Assistance, Vocational Support, and Housing Support	*No data to report from Q1	29

"Richmond University Medical Center (RUMC) - OASAS Certified Part 822 Program

Program description: Richmond University Medical Center (RUMC) has developed a multifaceted approach to increase provision of services, utilizing its experience and success in the areas of enhanced treatment, Certified Recovery Peer Advocate (CRPA) outreach and engagement, harm reduction, and community engagement. Staff will promote the health and well-being of people who use drugs by preventing overdose deaths, reducing disease transmission, and providing low-threshold access to health and mental health care, substance use treatment, and social services; as well as providing access to harm reduction and education. Additional aims include providing effective, person-centered, and trauma-informed substance use disorder treatment, including medications for opioid use disorder; providing comprehensive vocational, social, and behavioral health supports for people in substance use recovery; and providing linkages to additional care and support."

Domain	Indicator	Number (Q1)	Number (Quarter 2)
Harm reduction services	Number of participants receiving harm reduction services (e.g. supplies outlined in Harm Reduction services domain, provision of counseling, care coordination, referrals, or other services)	1,287	2,166
Recovery/Wraparound services	Number of participants served via the services outlined in the recovery support/wraparound services domain (Yoga/meditation)	101	253
SUD Treatment Services	Number of participants in MAT client roster	103	108

"Young Men's Christian Association (YMCA) - Part 822 OASAS Certified Program

Program description: Young Men's Christian Association of Greater New York ("The Y") will expand the breadth and depth of our services across domains. The program aims to provide, at program locations and in the community, where indicated: 1) more intensive and specialized support from clinicians as well as more individual services; 2) increased mental health support with a focus on in-person services; 3) increased access to Medication for Addiction Treatment (MAT) with a focus on low-threshold MAT; 4) more access to supplies to reduce the risk of overdose for individuals who are actively using substances; 5) enhanced peer support services; 6) support accessing pro-social opportunities; and 7) vocational/educational support. Services will be provided to all populations; however, the program will attempt to reach out to and serve priority populations including identified priority neighborhoods, individuals involved in the legal system, LGBTQ+ youth and individuals who use opioids."

Domain	Indicator	Number (Q1)	Number (Quarter 2)
SUD Treatment Services	Number of participants receiving treatment services	261*	65
Harm reduction services	Number of people trained to use naloxone	17*	5
Recovery/Wraparound services	Number of participants receiving recovery/wraparound services	32*	50

*corrected Q1 figure

Community Health Action Of Staten Island, Inc. (CHASI) - Recovery Center

Program description: Community Health Action Of Staten Island, Inc. (CHASI) is augmenting the Peer Training Institute with three new/expanded services: 1) expanded training and certification, 2) workforce development and placement assistance, and 3) housing advocacy. Priority populations include people who use substances; people with current or past substance use disorders; people at risk of opioid overdose; families impacted by overdose death and substance use disorders who live in Staten Island. Specific priority populations will include people who use opioids, people with prior involvement or history in the criminal legal system (e.g. prior arrest or incarceration), and residents of Port Richmond and Stapleton-St. George. "

Domain	Indicator	Number (Q1)	Number (Quarter 2)
Recovery/Wraparound services	Number of participants receiving group career coaching	51	52
Recovery/Wraparound services	Number of participants receiving individual career coaching	126	65
Recovery/Wraparound services	Number of graduates of new training tracks placed in internships	5	0
Recovery/Wraparound services	Number of participants enrolled in individual housing assistance and educational workshop services	24	7
Recovery/Wraparound services	Number of participants enrolled in the Administrative/Office Training Track	14	5
Recovery/Wraparound services	Number of participants enrolled in the janitorial training track	2	18

Staten Island Performing Provider System (SI PPS)

Program description: Staten Island Performing Provider System (SI PPS) is expanding its Hotspotting the Opioid Epidemic Program, an algorithm for "hotspotting" high-risk populations. The program works to reduce overdose deaths and unnecessary hospitalizations, promoting harm reduction, and increasing retention in treatment and recovery services. The program identifies those most likely to become victims of an overdose event or death and seeks to engage them with a preventative program. In addition to identification, the program features shared use of a care coordination platform to reach potential participants, coordinate care, document referrals, and monitor progress and results. This subcontract specifically supports SI PPS' oversight, technology, data analysis, and coordination activities—with a focus on harm reduction and recovery services/wraparound support."

Domain	Indicator	Number (Q1)	Number (Quarter 2)
Harm reduction services	Number of hotspotting partner orgs successfully using the channels platform	9	N/A
Harm reduction services	Number of individuals receiving harm reduction services including naloxone kits and other opioid reversal medications, xylazine and fentanyl test strips, sterile syringes and access to syringe exchange programs and infectious disease testing and programs	172	377
Recovery/Wraparound services	Number of individuals receiving wraparound/recovery services, including care plan initiation, peer coaching, certified peer advocate engagement, PCP visits, health-relates social needs (HRSN) assessments and HSRN referrals	117	392

The Staten Island Partnership for Community Wellness, Inc (SIPCW)

Program description: The Staten Island Partnership for Community Wellness, Inc. (SIPCW) aims to enhance the TYSA coalition's (formerly called Tackling Youth Substance Abuse) prevention and harm reduction strategies to respond to Staten Island's growing opioid epidemic through the distribution of harm reduction materials and educational presentations/resources on opioids. This subcontract is growing TYSA's coalition membership and expertise, launching awareness and outreach campaigns, hiring dedicated staff to deliver new outreach and harm reduction interventions at various community-based locations, and investing in public health vending machines. Focused interventions are primarily concentrated in the priority United Hospital Fund (UHF) neighborhoods of Community District 1 (CD1), with priority being given to the neighborhoods of Port Richmond and Stapleton/St George. Targeting the interventions in CD1 ensures that the interventions reach people who are BIPOC, LGBTQ+ and involved with the justice system."

Domain	Indicator	Number (Q1)	Number (Quarter 2)
Prevention services	Number of individuals engaged at community tabling events	435	650
Harm reduction services	Number of community members reached by HRC/POCs	1,614	1,332

Staten Island University Hospital (SIUH)

Program description: Staten Island University Hospital (SIUH) concentrates initiatives in geographic areas where there are higher rates of both fatal and non-fatal opioid overdoses on Staten Island. Specifically, SIUH expands and provides Harm Reduction Education programs and tabling sessions at community events on Staten Island. These events focus on delivering community education regarding

harm reduction strategies and providing resources such as Narcan, Xylazine, and Fentanyl test strips. SIUH collaborates with community partners and the Borough President’s Office to participate in diverse wellness events, offering education and supplies to individuals seeking information. Furthermore, SIUH provides training and builds skills to engage community members in understanding the importance of harm reduction and the necessity of utilizing safe supplies."

Domain	Indicator	Number (Q1)	Number (Quarter 2)
Prevention services	Number of people who received SBIRT (Screening, Brief Intervention and Referral to Treatment) Screenings with successful connection to CATCH services	68	Data unavailable for Q2
Harm reduction services	Number of people who accessed overdose prevention training and education	1,793	750
Harm reduction services	Number of naloxone kits dispensed	1,793	750
Harm reduction services	Number of fentanyl test strips dispensed	3,586	1,500
Harm reduction services	Number of xylazine test strips distributed	3,586	1,500

DOHMH Updates

Updates on other programs currently being implemented using settlement funds

Program	Description	Awardees
Expansion of Wraparound Services in Additional SSPs	Funds will support wraparound services for syringe service programs, including on-site medical care, connections to health care and social services, and support for basic needs.	Bronx Movil, AHP, ACQC, Safe Horizon, ASCLM, BOOM, Community Health Action of Staten Island, Family Services Network of New York, HUCAC, Housing Works, OnPoint, Positive Health Project, St. Ann's Corner of Harm Reduction, VOCAL
Expansion of Access to and Engagement in Treatment	Funds will be used by substance use disorder treatment providers for increasing access to buprenorphine and methadone, outreach and engagement, and care navigation services.	Center for Comprehensive Health Practice Inc, Elmcove Youth and Adult Activities, Greenwich House, Interborough Developmental and Consultation Center, Odyssey House, Project Renewal, STARTCare, Sun River Health, VIP Community Services
Expansion of Recovery Support Services	Funds will be used to expand recovery support for people with current or previous substance use disorders, including employment coaching, community-based support, and life-skills training.	Exponents – JLC Wellness Center, Odyssey House, Samaritan Daytop Village (Bronx & Queens), Phoenix House, The Fortune Society, PILLARS – Let’s Talk Safety, Community Health Action of Staten Island

Forensic Toxicology

The NYC Office of Chief Medical Examiner Department of Forensic Toxicology provides Forensic Toxicology testing covering all five boroughs of the City of New York and serving a population of

approximately 8.6 million people. The primary mission of the Laboratory is postmortem analysis to determine the absence or presence of drugs and their metabolites or other toxic substances in human fluids and tissues, and to evaluate their role as a determinant or contributory factor in the cause and manner of death. The Laboratory also carries out analysis of cases submitted by law enforcement agencies with the purpose of determining the absence or presence of ethanol and other drugs and to evaluate their role in modifying human performance or behavior (primarily as related to the operation of motor vehicles and for victims of alleged drug facilitated crimes). The NYC OCME Forensic Toxicology Laboratory has experienced an unprecedented increase in opioid positive cases. Not only has the number of cases increased but the opioids detected are continually changing presenting a significant challenge to the Laboratory.

All of the OTPS opioid funds are spent on a vendor "National Medical Services," who assists OCME Toxicology Unit on Toxicology testing and reduces current testing backlog. We provide our services to the entire City of New York irrespective of zipcode, gender, ethnicity or languages spoken. There are not metrics that would be measured by a Forensic Toxicology Laboratory. The work we do is dictated by who dies, who is arrested or who is a victim of drug facilitated crime. The testing service we offer is not predicated by any of the metrics requested. The opioid funding has and continues to allow us to develop and validate new testing methodologies so we can provide a state-of-the-art service to the City of New York.

Drug Intelligence and Intervention Group

The Drug Intelligence and Intervention Group (DIIG) at the NYC Office of Chief Medical Examiner (OCME) is involved in multiple local efforts related to overdose surveillance, prevention, and response. During fiscal year 2023, the DIIG relaunched a pilot with opioid settlement funds to serve New Yorkers who had lost a loved one to drug overdose.

This initiative is intended to reach highly vulnerable New Yorkers, as research suggests that individuals who witness overdoses are at higher risk of overdose than the general population.^{1,2,3} Overdose bereaved individuals are also at higher risk of depression, post-traumatic stress disorder, and prolonged grief than other bereaved populations.⁴ Oftentimes, individuals who have lost a loved one to overdose have intense feelings of shame and isolation due to the stigma associated with drug use.^{5,6}

⁶ Feigelman W, Jordan JR, Gorman BS. Parental grief after a child's drug death compared to other death causes: Investigating a greatly neglected bereavement population. 2011;63(4):291-316. doi:[10.2190/OM.63.4.a](https://doi.org/10.2190/OM.63.4.a)

DIIG social workers check in with overdose bereaved New Yorkers multiple times in the weeks and months after their loss, connecting survivors with long- and short-term mental health care, emergency financial support services, harm reduction and substance use treatment, housing support programs, and immigration services. Additionally, the Family Support Team helps families navigate common administrative issues related to the sudden and unexpected passing of a loved one, including benefits transfers and applications, financing of funeral arrangements, and retrieval of the decedent’s property. The OCME takes a person-centered approach to care, meeting the needs identified by the client as the most urgent and important, whether they are material or socioemotional. Whenever possible, any referrals to other agencies or social service providers are done using a warm handoff approach.

Data: New Clients Only (Between July 1st, 2025 through December 31st, 2025)

Gender	Q1 (Jul 1-Sep 30)		Q2 (Oct 1-Dec 31)

Addiction Response Team

The Addiction Response Team (ART) is a multidisciplinary pilot program at three NYC H+H acute care facilities: Jacobi, Harlem, and Queens. ART expands the existing SUD acute care service team (ED leads) to include addiction-trained medical providers and community health workers and extends service delivery beyond the emergency department to inpatient units and SUD walk-in and bridge clinics. Under the direction of the ART associate medical director, the team provides comprehensive SUD treatment care, including provision of MAT, SBIRT, peer support, care coordination, post-discharge bridging services, and harm reduction.

Services include:

- Expert evaluation, diagnosis, and treatment of patients with SUD (including alcohol use disorder and OUD) within any acute care service area
- Withdrawal management support

- MAT
- Individual counseling
- Peer support
- Referral to SUD (including OUD) treatment as part of the discharge plan
- Care coordination and navigation to care
- Naloxone education and kit distribution (offered to all acute care patients, including those who have experienced a nonfatal opioid overdose or have an OUD)
- Fentanyl and xylazine test strip distribution (offered to people who have experienced a nonfatal opioid overdose or have an OUD)
- SUD bridging, including for patients who have experienced a nonfatal opioid overdose

ART Program Planning Accomplishments: Fiscal Year 2026, Second Quarter (October 1, 2025, Through December 31, 2025)

- ART Associate Medical Directors now oriented; unification across ED and inpatient teams has begun.

Emergency Department Leads

Since 2017, NYC Health + Hospitals (H+H) has been provided funding to engage with medical emergency department (ED) patients who may be at risk for a substance use disorder (SUD), including opioid use disorder (OUD). ED leads teams consist of social workers or licensed counselors and certified peer counselors in all 11 NYC H+H acute care facility emergency departments who provide screening, brief intervention and referral to treatment (SBIRT), peer support, and counseling services, including to people who have co-occurring mental health conditions or are experiencing homelessness. In 2022, NYC H+H was provided additional funding via New York State (NYS) opioid settlement funds to expand ED leads coverage to 24/7 (in progress) across all facilities. This allows ED leads to increase patient engagement, as well as provide coverage in NYC H+H hospital service areas outside of the medical ED, as per service need. This “roving” model allows for further continuity of care from hospital admission to discharge and beyond. With regards to combatting the opioid epidemic, ED leads play an integral role in supporting NYC H+H medical providers with medication assisted treatment (MAT) care coordination. Once initiated into MAT, ED leads assist in connecting patients to long-term MAT services post-discharge. In addition, ED leads provides patients with harm reduction resources and connections to community-based services and supports, as well as supporting a warm hand off to a treatment or recovery center’s transportation services.

Services include:

- SBIRT for SUD (including OUD) treatment post-discharge
- Individual counseling
- Peer support
- Naloxone education and kit distribution (offered to all ED leads patients, including those who have experienced a nonfatal opioid overdose or have an OUD)
- Fentanyl test strip and xylazine test strip distribution (offered to patients who have experienced a nonfatal opioid overdose or have an OUD)

ED Leads Program Planning Accomplishments: Fiscal Year 2026, Second Quarter (October 1, 2025, Through December 31, 2025)

- A report enhancement was completed allowing for more precise tracking of fentanyl and xylazine test strip distribution. 1527 fentanyl test strips were distributed across 576 encounters. Correspondingly, 1314 xylazine test strips were distributed across 528 encounters.
- 5 vacancies were filled, including 3 Social Workers and 2 Peer Counselors.
- Hotspotting program identified as a new referral source to support high-risk patients using opioids.

Obstetrics Addiction Counselors

This initiative supports one dedicated obstetrics addiction counselor at each of the 11 NYC H+H acute care facilities to prioritize perinatal patients experiencing SUD. Working as part of the ART, the obstetrics addiction counselor will support perinatal patients with SUD in birthing units, emergency departments, inpatient units, and bridging outpatient clinics and improve linkages to ongoing addiction care.

Services include:

- Referral to SUD (including OUD) treatment as part of the discharge plan
- Care coordination and navigation to care
- Screening, identification, and assessment of patient needs for SUD support
- Ongoing support, counseling, and connection to internal and external SUD resources for pregnant and postpartum patients and families
- Longitudinal perinatal support, counseling, and linkage to addiction services

- Collaboration with SUD team members, as well as local behavioral health, social work, medical, nursing, and other care team staff
- Enhancement of the care team’s education and knowledge around topics of SUD and available supports
- Naloxone education and kit distribution
- Fentanyl and xylazine test strip distribution

Obstetrics Addiction Counselor Program Planning Accomplishments: Fiscal Year 2026, Second Quarter (October 1, 2025, Through December 31, 2025)

Progress to date:[†]

- 8 of 11 sites have hired OB Addiction Counselors; staff consistently attending Office Hours in support of onboarding and cross-site learning.
- New Patient List for OB Addiction Counselors that gives staff the ability to review eligible patients in L&D/Mother Child units now live.
- Reported encounters reflect total ED/IP engagement and are not limited strictly to perinatal encounters as OB Addiction Counselor workflows are still in ramp-up.

Street Health Outreach and Wellness Mobile Harm Reduction

NYC H+H’s Street Health Outreach and Wellness (SHOW) program utilizes mobile units to provide health screenings, vaccinations, wound care, basic material necessities such as socks and bottled water, mental health and recovery support service referrals, and harm reduction services to New Yorkers who are unsheltered. A further goal of the program is to connect patients to NYC H+H facility-based Primary Care Safety-Net clinics, where they can receive ongoing medical care, including primary and preventive care and treatment for physical, behavioral, or mental health needs. NYC H+H is utilizing opioid settlement funding to create Mobile Harm Reduction roving teams consisting of a social worker, an addiction counselor, and a peer recovery counselor. With a focus on MAT and building patient trust, the goal of the program is to offer low-barrier health care and meet patients who are unsheltered where they are at.

Services include:

- SUD screening, brief intervention, and referral to treatment (SBIRT)
- Peer recovery counselor support
- Linkage to NYC H+H, community SUD, or mental health treatment
- Support NYC H+H staff with patients experiencing co-occurring SUD or other mental health disorders and homelessness
- Naloxone, fentanyl, and xylazine education and kit and test strip distribution

Data: Fiscal Year 2026, Second Quarter (October 1, 2025, Through December 31, 2025)

Substance Use Disorder Workforce Training Program

NYC H+H’s Office of Behavioral Health (OBH) has been allocated opioid settlement funds to implement the Substance Use Disorder Workforce Training Program (SUD WTP), a pivotal initiative aimed at enhancing the quality of care for individuals with opioid use disorder seeking treatment at NYC H+H. The mission of the SUD WTP is to drive a transformative cultural and clinical shift, fostering a more

compassionate, evidence-based, and patient-centered approach to OUD treatment. Through a comprehensive series of educational initiatives, the program seeks to equip behavioral health providers, medical professionals, and support staff with the necessary skills and knowledge to deliver high-quality care that is both anti-stigmatic and aligned with best practices. By focusing on improving clinical competence and cultural sensitivity, the SUD WTP aims to create a supportive, inclusive, and effective environment for individuals living with OUD across the NYC H+H system.

Training initiatives include:

- Emergency department OUD simulations: Synchronous training with simulated patients.
- E-learning (Relias): Asynchronous modules on an electronic learning platform for behavioral health providers and staff.
- Lunch and learn: Synchronous interactive modules for social workers and peers.
- Community learning: Synchronous, case-based learning for acute care providers, social workers, and peers.

Enhanced services for patients include:

- Grant-funded buprenorphine
- Sober socialization events

Goals and Benefits

- To provide easy-to-access and evidence-based information on medical treatment, special populations (women, perinatal patients, families, and patients with co-occurring disorders), harm reduction, destigmatized language for behavioral health and non-behavioral health providers and staff that interact with patients living with OUD.
- To provide facility-determined, enhanced services for patients living with OUD.

Data: Fiscal Year 2026, Second Quarter (October 1, 2025, Through December 31, 2025)

Note: SUD-WTP started implementation and ramp up in FY23-24 and continues to develop, hire, and roll-out in FY26.

Metric	Fiscal Year 2026, Second Quarter
Number of Phase 1 emergency medicine providers trained in OUD simulation	97
Total percentage of Phase 1 emergency medicine providers trained in OUD simulation	35%
Number of participants in non-simulation, synchronous trainings	170
Number of patients receiving enhanced services*	409

Number (#) of participants enrolled in asynchronous training platform	15
---	----

*Enhanced services include unique patients receiving grant-funded buprenorphine and total patient attendance at patient community-building events which include Sober Socialization, Creative Healing, and Patient Recognition projects. The Creative Healing group is a weekly therapeutic arts group for patients. The Harlem Recognition events are monthly celebrations to honor the hard work, dedication, and success of patients in their outpatient Addiction Service.

**Number reflects total number of patient attendees at patient community-building events only (i.e., Sober Socialization, Creative Healing Group)

Table 2: Q2 Programmatic Updates
As of FY26 Q2, OUD Sim has trained a total of 350 emergency providers. Up to 3 trainings per month are scheduled for the remainder of FY26.
In FY26 Q2, 15 additional Behavioral Health (BH) staff are registered on the asynchronous platform for a total of 513 with 354 (69%) completing at least one training. 34 internally produced training videos to be distributed on the asynchronous learning platform were completed in the first two quarters of FY26.
In FY26 Q2, 13 Patient Enhancement Events (Sober Socialization and Creative Healing groups) were held, and a total of 197 patients received grant-funded buprenorphine support.
Other synchronous trainings included monthly, case-based learning for acute care medical providers and peer counselors.

Recovery, Integrated Support, Empowerment (R.I.S.E. Center at Lincoln)

The RISE Center at Lincoln Hospital integrates Adult and Child Family Medicine/OBGYN, Adult and Child Behavioral Health, and Addiction Medicine co-located at one NYC H+H location with the goal of meeting the critical needs of pregnant and parenting people and their children impacted by substance use disorder (SUD). RISE is a multidisciplinary specialty care model that will serve pregnant and parenting people and their children receiving care at participating NYC H+H facilities as well as those referred from outside the NYC H+H system. RISE's family-based model builds upon NYC H+H's clinical expertise in the management of substance use during pregnancy, and its experience developing and implementing family-based mental health services for families affected by HIV and substance use. The program will leverage a team of medical/behavioral health providers, social workers, community health workers, and certified peer counselors with lived SUD experience to support pregnant and parenting people struggling with addiction while also addressing the primary care, psychosocial, and mental health needs of their children.

Services include:

- Expert evaluation, diagnosis and treatment of pregnant and postpartum patients and their children impacted by SUD seeking care for themselves and their children.
- Family Medicine Services such as routine primary care and /OBGYN visits; annual well visits; annual immunizations; vitals checks for adults and children.
- BH Services with 1:1 therapy sessions, group therapy sessions, child developmental assessments.
- Addiction Medicine Services to provide medically supervised out-patient program offering medically assisted treatment and individual and group recovery support services.

Recovery, Integrated Support, Empowerment Planning: Fiscal Year 2026, Second Quarter (October 1, 2025, Through December 31, 2025)

Progress to date:[†]

- The CFO and Finance teams undertook a comprehensive review of the RISE Center budget during this period to update revenue projections and ensure efficient staffing operations. The first position, that of Associate Director, was awaiting final approval to post in late December.
- Planning meetings now occur weekly to track steps toward submission of a limited review application for the three outpatient licenses, aiming to submit a comprehensive application by June 2026.
- The Office of Facilities Development and Lincoln secured an outside vendor to conduct the Health Equity Impact Assessment (HEIA), Monroe Plan, to be paired with the Certificate of Need (CON) underway for the IOS LRA submission.
- The architectural firm that will design the Lincoln clinical service areas for the RISE Center, Barr + Barr, received contract approval; however, the firm is still awaiting registration with the Comptroller's Office, to be followed by a Notice to Proceed (NTP).
- Meetings with the Lincoln clinical work group were suspended between November and February 2026, at which time meetings will resume for key updates and once NTP is issued, a schematic review by key informant providers.

* Program data will be available after the RISE Center opens.
