

Protect Yourself and Others From MPV

Do not have sex and other intimate contact if you or your partners have a new rash or sores, feel sick, or were recently exposed to monkeypox (MPV). Ask your partners whether they have MPV symptoms and about their recent sexual history.

Frequently wash your hands, bedding, towels and other shared items. Sex toys should be washed after each use.

Get vaccinated if you have been exposed to MPV or may be in the future. Everyone should get two doses. To find a vaccination site, visit nyc.gov/vaccinefinder. City-run sites accept walk-ins.

Talk to your health care provider about testing, pain management and treatment if you have MPV symptoms. If you do not have a provider, call **311** to get connected to care.

For more information, visit nyc.gov/mpv or scan the QR code. Text “MONKEYPOX” to 692-692 to receive alerts.
