

Model Notice to Families: Visual Inspection Results

Dear Parent or Guardian,

Every year our child care program conducts a visual inspection for peeling lead paint, records the findings and makes any needed repairs. Under a new local law, we are also now sending the inspection results to the New York City Health Department and to families in our program.

The results of our recent inspection are enclosed. If you have any questions, please contact us at «**Phone Number**» or «**Email Address**». For more information about lead paint, its risks and testing children for lead, visit the Health Department's website at **nyc.gov/lead**.

Sincerely,
