PLWHA=Persons living with HIV/AIDS; n/a=Not applicable. All percents are column percents unless otherwise indicated.

¹ For events reported by December 31, 2012. ² HIV diagnosed concurrently with AIDS (within 31 days of HIV diagnosis). Row percent is percent of total HIV diagnoses that were concurrent with AIDS diagnoses. ³ AIDS was diagnosed in 2012 and includes concurrent HIV/AIDS diagnosis. ⁴ Includes deaths from any cause in persons with HIV/AIDS. ⁵ For technical notes on race/ethnicity: <http://www.nyc.gov/html/doh/html/ah/hivtables.shtml#abbrev>. ⁶ For HIV and AIDS diagnoses, age at diagnosis; for PLWHA, age as of June 30, 2012; and for deaths, age at death. ⁷ Borough of residence for PLWHA and deaths is based on residence at AIDS diagnosis if surveillance status is AIDS, or residence at HIV diagnosis if HIV-only. ⁸ Includes persons who had heterosexual sex with a person they know to be HIV-infected, an injection drug user, or a person who has received blood products. For females only, also includes history of prostitution, multiple sex partners, sexually transmitted disease, crack/cocaine use, sex with a bisexual male, probable heterosexual transmission as noted in medical chart, or sex with a male and negative history of injection drug use.
