Dear Colleague:

We want to make you aware of the vaccine codes for the flu vaccines that are available for the 2023-2024 season (see table attached). Please share this notice with your information technology staff, billing system staff or vendor, and/or electronic health record (EHR) vendor so that your system's vaccine codes can be updated. Regularly updating your system will enable you to report vaccines correctly to the Citywide Immunization Registry (CIR).

If you are reporting immunizations directly from your EHR via the CIR HL7 Web Service, reach out to your EHR vendor or onsite technical contact for assistance reporting sale NDC11 to the CIR and note the following:

1. When reporting NDC for an immunization administered, you must report the **sale NDC11 value**, which can be found on the vaccine box. For instance, a dose of Fluzone Quadrivalent (2023/2024 flu season, CVX 150) would be reported with **sale NDC11 value 49281-0423-50** (as opposed to the NDC10 value of 49281-0423-88).
2. Report CVX codes with NDC codes if possible.

Please take this opportunity to review all your vaccine codes and check for miscoding errors. Please refer to the Center of Disease Control and Prevention (CDC) NDC Crosswalk Tables, CVX, CPT Vaccine Code Sets, at: <https://www.cdc.gov/vaccines/programs/iis/code-sets.html>.

If you need technical assistance, please contact us at cir_interop@health.nyc.gov, or call us at (347) 396-2400.

Thank you.
