Overall Coverage (all infants)		98426	3078	92866	72706	78.3	n/a

Average Coverage (facility-level)	84.2%
Median Coverage (facility-level)	91.4%

* Includes hepatitis B vaccination given on day 0 (birth), day 1, day 2 and day 3 to infants regardless of birth weight. Source: NYC Department of Health and Mental Hygiene Citywide Immunization Registry

† This measure is for infants born in 2022 in a NYC delivery facility. The numerator includes infants who received hepatitis B vaccine regardless of birth weight; the denominator excludes infants with birth weight < 2000 grams, based on data from the NYC Health Department Office of Vital Statistics. The percent vaccinated may be greater than 100% because some infants with birth weights < 2000 grams may have received the hepatitis B vaccine at birth.
