

Personal Protective Equipment and Medical Supply Companies

We know that many health care providers struggled with procuring personal protective equipment (PPE) and other medical supplies during the emergence of COVID-19.

The PPE supply chain remains strained but is improving daily. Some items may still be unavailable or on long back orders. We have assembled the information below to assist providers in locating PPE as the supply chain recovers from the severe shortages of the last two years.

This list is neither exclusive nor exhaustive. The NYC Health Department is providing this information to assist New Yorkers with locating services and for general information but does not make any representation or warranty concerning the quality or accuracy of the services provided by these identified establishments.
