

## **New York City Syphilis Registry: Health Care Provider Instructions**

New York State (NYS)-licensed health care providers can request syphilis test results and treatment information in the New York City (NYC) Syphilis Registry, a repository of reported positive, negative and indeterminate syphilis test results and syphilis treatment information for NYC residents. Providers located outside of NYS should contact their local health department to request information from the Syphilis Registry for patients who currently reside or previously resided in NYC.

To request a Syphilis Registry check, NYS-licensed providers should fax the following information on their facility's letterhead (marked "CONFIDENTIAL") to the NYC Department of Health and Mental Hygiene (NYC Health Department) at 347-396-7355:

- Their first name and last name, phone number, and professional license numbers (including their NYS provider license number and National Provider Identifier number)
- Their facility's name, address and phone number
- Their patient's first name and last name, with middle initial if available (plus their middle name or aliases if applicable), date of birth, address and phone number

The NYC Health Department will respond to requests by the following business day via phone.

For more information on requesting a Syphilis Registry check or reporting requirements for syphilis, call 347-396-7201, Monday through Friday, 8 a.m. to 4 p.m.

For consultation on the medical management of syphilis, call 347-396-7200, Monday through Friday, 8 a.m. to 4 p.m.
