Different Collections Categories

Curbside Collection routes serve individual districts; trucks on these routes pass over scales each day which transmit tonnage data into DSNY's centralized computer system. For this reason, monthly statistics, by Community Districts, can be tracked and reported.

See Municipal Refuse and Recycling in NYC, by Borough and District for District level detail.

Other DSNY Collection routes cross district boundaries. Like Curbside routes, the weights of collections are uploaded into the DSNY computer system daily. However, unlike curbside routes, these other DSNY collections cannot be reported by district.

These tonnage numbers are reported monthly by vendor, citywide only. Figures reflect the calendar month and year. Metals recovered from waste delivered to Essex, Niagara, and Delaware Valley facilities are included in Other Metal Bulk.

As of May 2025, Niagara Valley is offline and no longer reporting metal recovery tonnages.

Diversion Definitions

Disposed is sent via transfer stations to landfills or waste-to-energy facilities outside NYC.

Diverted is sent to reuse, recycling or composting inside or outside NYC.

Diversion Rate is tonnage diverted divided by the sum of tonnage diverted and disposed.

Material Type Categories

Paper/Cardboard Recycling includes the source-separated collection of paper and cardboard items, the "green" recycling stream.

Metal/Glass/Plastic Recycling includes the source-separated collection of metal, glass bottles & jars, rigid plastics, and beverage cartons, the "blue" recycling stream.

*Organics currently includes Christmas Trees, Leaves and Yard Waste, and Food Waste, Down Trees. Green Market Food Waste was added as of April 2012, School Food Waste was added in September 2012, Residential Food Waste was added in May 2013. These programs are not citywide, and some are seasonal.

Please note:

Annual numbers may differ from monthly numbers due to data adjustments.

Additional tonnage managed by DSNY is diverted through the mechanisms, but only available for annual reporting.

Materials including Textile & Used Materials Donations, E-Waste, Hazardous Waste, other Organics collections, Redeemed Bottle & Can Deposit containers, and other take-back and diversion programs are included on the annual report only, and contribute to an overall annual diversion percentage of DSNY-managed waste that is different from the monthly reports.

Organics collection (45) suspended on 5/3/2020.

Organics collection restarted on week starting 10/4/2021.
