

What's Going On Here?

The ESCR team is facilitating the replacement of utility lines beneath the FDR Drive at Grand Street through January 2025.

These upgraded Con Edison gas and electric conduits will bring critical utilities to the new amenities in East River Park.

Because this work requires excavations in the roadway, it can be disruptive and loud. We are required to perform many of these activities at night to minimize traffic disruptions. We apologize for the disturbance.

During lane closures, please follow all flaggers and on-site signage for safety. Thank you for your patience as we make these critical upgrades!

This work is part of the ESCR project's Project Area 1 contract, SANDRESM1.

Visit the ESCR website, nyc.gov/escr, to sign up for weekly Construction Bulletins, Community Advisories, and other project communications.
