

# What's Going On Here?

The ESCR team is installing new water mains to service East River Park. The upgraded system replaces mains that are over 50 years old, and it will provide water to drinking fountains, irrigation, water sprays, and other amenities in the rebuilt East River Park.

Because this work requires excavations in the roadway, shown to the right, it can be disruptive and loud. We are required to perform many of these activities at night to minimize traffic disruptions. We apologize for the disturbance.

During lane closures, please follow all flaggers and on-site signage for safety. Thank you for your patience as we make these critical upgrades!

**This work is part of the ESCR project's Project Area 1 contract, SANDRESM1.**

Visit the ESCR website, [nyc.gov/escr](https://nyc.gov/escr), to sign up for weekly Construction Bulletins, Community Advisories, and other project communications.

## **Questions? Preguntas? 问题?**

Please contact our Community Construction Liaisons (CCLs) for any project-related inquiries/concerns:
