7. a) How often are fund accounts audited by an independent accountant?
 Audited by the New York State Insurance Department. Every 5 years.
 b) Name and address of independent accountant

Response to question 6.

Upon appointment, each Firefighter becomes a member of the New York Fire Department Life Insurance Fund. A deduction of \$4.15 effective 01/01/1999 is taken from every paycheck and credited to this fund.

Upon the death of an active member, a lump sum benefit of \$8,500 effective 01/01/1999 is paid to the decedent's beneficiary(ies). At retirement, a \$9.00 deduction effective 01/01/1999 is made from each monthly pension check. Upon the death of a retired member, a lump sum benefit of \$5,600 effective 01/01/1999 is paid to the decedent's designated beneficiary(ies). Effective 01/01/2001, the retired death benefit was increased to \$5,800.00. Recent legislation Chapter 654 of the Laws of 1999 prescribes rules on how future member premiums are set.

Effective on July 1, 2007, the retired death benefit payment was increased from \$5,800.00 to \$6,000.00 for member who died on or after that date. At its meeting on December 6, 2007, The Office of the Actuary and the Board of Trustees of the New York City Fire Life Insurance Fund also approved the increased retired death benefit of \$6,000.00 for beneficiaries of retirees who died on or after December 1, 2006.

Effective 07/01/2017, the Office of the Actuary determined that the retired death benefit payment will increase from \$6,000.00 to \$7,500.00. This amount will be paid to designated beneficiary(ies). The death benefit payments to active members will remain at the current amount of \$8,500.00

GENERAL INTERROGATORIES (Continued)

8. Were any of the recipients of commissions and allowances, or of compensation for professional services shown on the accompanying schedules related through blood or marriage or associated in any business endeavor, profession or other occupation with any fund trustee administrator, officer, or union official?

**SPECIAL NOTES WITH REFERENCE
TO ITEMS 12-16 incl.**
TO THE EXTENT THAT THE FOLLOWING REQUIRED INFORMATION
IS CONTAINED IN AN ACTUARIAL REPORT SUBMITTED WITH THIS
ANNUAL STATEMENT. IT IS ONLY NECESSARY TO SO INDICATE
UNDER THE PERTINENT ITEMS.

12. Number of participants:---as of 06/30/2022 (most recent valuation):	
(a) Retired	15,709
(b) Active	10,685
(c) Active off payroll	
(d) Separated from Employment with Vested Benefits	71

13. Type and Basis of Funding--State the methods of funding and determination of costs currently being used for the Plan.

Funding of the Fire Life Insurance Fund is solely from participant contributions (i.e., premiums). The level of these premiums is based on recommendations of the Actuary (from actuarial valuations), Board of Trustees approval and regulatory limitations.

14. Actuarial Assumptions and Methods

Attach a statement of the actuarial assumptions currently being used in determining the contributions or premium payments under the contract identified in item 2a. Any such statements or reports submitted as attachments should be related to the contract involved by marketing such attachments with the contracts identification. Where, under the type and basis of funding, figures are entered in item 15, below, a further statement is required showing the actuarial assumptions and methods used in deriving the liabilities of the Pension Plan, including a descriptions of precise meaning assigned to each of the terms of item 15, below, with respect to the amounts shown.

Statement of actuarial assumption attached--Yes*

*Note, the actuarial assumptions used for assessing the level of premium is shown in Appendix G of the attached report.

15. Except for the benefits which are completely guaranteed by the carrier, give the following information:

(Benefits which are completely guaranteed by the carrier are those benefits under the contract for which no further premiums and due or are to be paid to the insurance carrier.)

Amount of current and past service liabilities as determined by the actuarial valuation:

(a) (1) Total accrued actuarial liability including any past service or supplemental cost.	1/\$	* see page 14a
(2) Current service or normal cost. 2/		* attached
(b) Enter the amount of the applicable reserve. 3/		*

1/ Before any offset for reserves entered in (b).

2/ The annual amount from the last valuation should be used.

3/ This should include any applicable assets maintained under a collateral fund or insurance company separate account fund. Any such assets should be valued on the basis regularly used for the fund in reports to the United States Treasury Department or on the basis of aggregate cost or present value, whichever is lower. If not reported to the United States Treasury Department.

16. (a) Date of last valuation 6/30/2022

(b) If last valuation was conducted in whole or in part by an actuary or other person not in the full-time salaried employment of the insurance carrier, state the name and business address of such actuary or other person.

Name	<u>Marek Tyszkiewicz, Chief Actuary</u>
	<u>NYC Office of the Actuary,</u>
Address	<u>255 Greenwich Street 9th Floor,</u>
	<u>New York, NY 10007.</u>

Name and title of the officer of the insurance carrier who signed the document certifying the information from the insurance carrier:

Name	_____
Title	_____

Response to question 15.

*While the actuarial valuation is used to determine the adequacy of current member premiums versus current benefits promised, it is not utilized directly to determine contributions to the Fund. However, in the attached report, the valuation assets are shown in Appendix A and the actuarial present value of all future benefits is shown in the table on Page 2.

Re: June 30, 2022 Actuarial Valuation Results of the New York Fire Department
Life Insurance Fund

Dear Members:

This letter presents the results of the June 30, 2022 actuarial valuation of the New York Fire Department Life Insurance Fund (FLIF). The valuation was performed with both a 5% Actuarial Interest Rate (AIR) assumption (used historically) and an alternate, more conservative, 3.75% AIR assumption. Based on these results, the current premium of \$9.00 per month is sufficient to support the benefit levels currently provided. Details of the valuation follow below.

Background

The FLIF provides lump sum death benefits to designated beneficiaries of active and retired participants. The statutory provisions of the FLIF are contained in Subchapter 3, Section 13-380 of the Administrative Code of the City of New York (ACCNY).

The Board of Trustees of the New York City Fire Pension Fund (FIRE) is the head of the FLIF and has the power and authority to establish and amend the rules and regulations for the administration and transactions of business.

FLIF membership is mandatory for all employees and retirees of the uniformed force of the Fire Department and is optional for vested members prior to the commencement of their pension benefit from the New York City Fire Pension Fund (FIRE). The sources of funding are participant contributions and earnings on FLIF investments.

Contributions to support fund benefits are received from active employees and retirees who contribute biweekly and monthly, respectively, to the FLIF. The Actuary, at the discretion of the Board of Trustees, is to periodically, but not longer than every three years, prepare a report on the financial condition of the FLIF. The purpose of such report is to determine the adequacy of funding FLIF benefits. Any increases or decreases in FLIF benefits must be certified by the Actuary before adoption by the Board of Trustees.

Summary of Results

The results of this June 30, 2022 actuarial valuation indicate that based on the census data and actuarial assumptions and methods employed, the current participant premium rate of \$9.00 per month is sufficient to support the benefit levels currently being provided.

The table below summarizes the results:

FLIF ACTUARIAL VALUATION RESULTS		
As of June 30, 2022		
Benefit Level		
Active		\$8,500
Retired		\$7,500
Monthly Premium per Member		\$ 9.00
Census Data		
Active		10,685
Deferred Vested*		71
Retired		<u>15,709</u>
Total Members		26,465
Actuarial Interest Rate	<u>5.0%</u>	<u>3.75%</u>
1. Present Value (PV) of FLIF Benefits	\$66,498,230	\$82,165,241
2. FLIF Reserve for Future Benefits (Fund Balance)	\$41,077,259	\$41,077,259
3. PV of Future Premiums	\$39,265,565	\$45,824,225
4. Excess FLIF Assets (including PV of Future Premiums) (2.+3.-1.)	\$13,844,594	\$4,736,243
5. Funded Ratio (2.+3.)/1.	120.8%	105.8%

* Deferred vesteds have the option to pay premiums and remain covered during their deferral period. If they choose to not pay premiums during their deferral period, the total unpaid premiums will be deducted from their first pension check. This valuation assumes the latter.

The Actuarial Interest Rate (AIR) assumption is a reflection of the expectation of future investment earnings. The FLIF valuation results above are provided using both a 5% and a 3.75% AIR. The 5% AIR assumption was used in the last triennial FLIF valuation and since that valuation the funded status of the plan has improved from 117.2% to the 120.8%, assuming future annualized investment returns are on average equal to 5%.

Based on the current FLIF asset allocation where approximately 40% of the assets are invested in equities and the remaining assets are allocated between cash and short-term investments, it is plausible to assume that the average future annual returns will be in the 4% - 5% range. Based on that assumption, the 3.75% AIR results above reflect a more conservative estimate of the FLIF funded status.

Benefits

For the June 30, 2022 actuarial valuation, the benefit levels for participants who decease are as follows:

- Death in Active Service (Active): \$8,500.
- Death not in Active Service (Retired): \$7,500.

Census Data

Membership of FLIF at June 30, 2022 consists of 10,685 active participants with an average age of 41.0 years, 71 deferred vesteds with an average age of 43.9 years and 15,709 retired participants with an average age of 67.4 years. Consistent with Actuarial Standards of Practice, the Office of the Actuary has reviewed the census data for consistency and reasonability but has not audited it.

Assets

During Fiscal Year 2022 (i.e., July 1, 2021 to June 30, 2022) FLIF paid death benefits of approximately \$3.1 million.

Appendix A presents a comparison of the assets of FLIF as of June 30, 2022 and June 30, 2021.

Actuarial Assumptions

The financial results presented in this letter have been determined based upon the census data provided by FIRE for FLIF participants as of June 30, 2022 and upon the actuarial assumptions and methods shown in Appendix B.

The Actuary believes the actuarial assumptions used in this analysis are reasonable for the purpose of analyzing the financial status of FLIF as of June 30, 2022.

Risk and Uncertainty

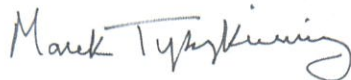

The results presented in this letter depend highly on the realization of the actuarial assumptions used, as well as certain demographic characteristics of FIRE and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the results of this analysis could differ from those presented herein. Costs are also dependent on the actuarial methods used, and therefore different actuarial methods could produce different results. Quantifying these risks is beyond the scope of this analysis.

Statement of Actuarial Opinion

I, Marek Tyszkiewicz, am the Chief Actuary for, and independent of, the New York City Retirement Systems and Pension Funds. I am an Associate of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. To the best of my knowledge, the results contained herein have been prepared in accordance with generally accepted actuarial principles and procedures and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

Respectfully submitted,

Marek Tyszkiewicz, ASA, MAAA
Chief Actuary
