September 2021

New York City Government Property Energy Benchmarking Results Calendar Year 2020

Overview

The Department of Citywide Administrative Services (DCAS) submitted benchmarking results for City government properties for calendar year 2020 to the Department of Finance (DOF) for publication on September 1, 2021 in compliance with Local Law 84 of 2009 (LL84). Since 2009, DCAS has coordinated with City agencies each year to benchmark nearly 3,000 public properties including libraries, police stations, firehouses, schools, colleges, courthouses, hospitals, community centers and government offices.

The following report discloses energy performance metrics for calendar year 2020 for all City government properties that are covered by LL84. It also includes data from calendar year 2010, which was published in the original New York City Government Building Energy Benchmarking Results, as required by LL84. The performance metrics included in the report are: [Energy Star score](#), [energy use intensity \(EUI\)](#), and [greenhouse gas \(GHG\) emissions intensity](#). The U.S. EPA Energy Star Portfolio Manager Tool calculates Energy Star scores for certain common property types. For property types that are ineligible for an Energy Star score, or for which property or energy consumption data was not available, the report indicated “Not Available.”

Summary of Results

The average ENERGY STAR score for eligible City properties in calendar year 2020 was 73, which was a 25% improvement since 2010, the first year of benchmarking City properties. The average Source EUI in 2020 was 143 kBtu/ft² and the average GHG intensity was 5.4 kgCO₂e/ft², which was an improvement from 2010 of 27% and 28% respectively. Please see Table 1 for more details.

Table 1: Comparison of Benchmarking Results, 2020 vs 2010*

Years	Average Energy Star Score	EUI (kBtu/ft ²)	GHG Intensity (kgCO ₂ e/ft ²)	Cooling Degree Days (CDD)	Heating Degree Days (HDD)	Total Degree Days
2010	58	196	7.5	1,712	4,227	5,939
2020	73	143	5.4	1,635	3,929	5,564
% Change	+25%	-27%	-28%	-4%	-7%	-6%

*Table 1 accounts for all properties that received an EPA Energy Star Score in both calendar years 2010 and 2020.

The information in this report is subject to change due to ongoing data quality improvements. For additional information on these benchmarking results, contact NYC DCAS Energy Management at energy@dcas.nyc.gov.

* Data used to generate this report is collected and reported by City operating agencies. The information in this report is subject to change due to data quality improvements.

* 2010 data as published in 2013 New York City Government Building Energy Benchmarking Results.

* Score of "Not Available" indicates building use categories for which the Portfolio Manager does not provide an ENERGY STAR score or for which the required information is not available.

* Source EUI and GHG Emissions Intensity calculations performed by U.S. Environmental Protection Agency (EPA) methodology with EPA greenhouse gas emissions factors.

* Score of "Not Available" indicates building use categories for which the Portfolio Manager does not provide an ENERGY STAR score or for which the information is not available.

* Source EUI and GHG Emissions Intensity calculations performed by U.S. Environmental Protection Agency (EPA) methodology with EPA greenhouse gas emissions factors.

* Score of "Not Available" indicates building use categories for which the Portfolio Manager does not provide an ENERGY STAR score or for which the information is not available.

* Source EUI and GHG Emissions Intensity calculations performed by U.S. Environmental Protection Agency (EPA) methodology with EPA greenhouse gas emissions factors.
