# New York City Government Property Energy Benchmarking Results Calendar Year 2025

## Overview

The Department of Citywide Administrative Services (DCAS) submitted benchmarking results for City government properties for calendar year 2025 to the Department of Finance (DOF) for publication on September 1, 2026, in compliance with Local Law 84 of 2009 (LL84). Since 2009, DCAS has coordinated with City agencies each year to benchmark nearly 3,000 public properties including libraries, police stations, firehouses, schools, colleges, courthouses, hospitals, community centers, and government offices. EDC and DOE benchmark their properties and share the data with DCAS to include with the City submission.

The following report discloses energy performance metrics for calendar year 2025 for City government properties that are covered by LL84. It also includes data from calendar year 2010, which was published in the original New York City Government Building Energy Benchmarking Results, as required by LL84. The performance metrics included in the report are: [ENERGY STAR score, energy use intensity \(EUI\), and greenhouse gas \(GHG\) emissions intensity](#). The U.S. EPA ENERGY STAR Portfolio Manager Tool calculates ENERGY STAR scores for certain common property types. For property types that are ineligible for an ENERGY STAR score, or for which property or energy consumption data was not available, the report indicates “Not Available.”

As a result of a rule change<sup>1</sup> issued by the NYC Department of Buildings (DOB), City government properties were benchmarked differently starting calendar year 2021. Previously, when multiple buildings were located on the same tax lot and/or shared a utility meter, they were benchmarked as a single property with all energy and square footage data from the individual buildings aggregated to this single benchmarked property. Starting in 2022, data for each individual building that met these criteria was directly entered into Portfolio Manager and a “parent property” was created to aggregate the data from the group of individual buildings (also known as a “benchmarking group”). The aggregated data for the parent property was used by Portfolio Manager to generate EUIs and ENERGY STAR scores, wherever applicable, and these metrics were then associated back to each individual building within the benchmarking group.<sup>2</sup> As such, the dataset enclosed with this report includes all buildings that were entered into Portfolio Manager; buildings that were part of benchmarking groups have received the EUIs and Energy Star Scores, if applicable, that were generated for the parent properties of their benchmarking group.

---

<sup>1</sup> [§ 103-06 Benchmarking Energy and Water Use](#)

<sup>2</sup> Note that, with the change in benchmarking procedure, not all buildings that are part of benchmarked groups are eligible for an ENERGY STAR score, though most receive an EUI and GHG emissions intensity.

## Summary of Results

EPA Portfolio Manager calculates the following energy metrics based on EPA Methodology and EPA Greenhouse Gas Emissions Factors: ENERGY STAR score, Source EUI and GHG Intensity indicated in the table below. The average ENERGY STAR score for eligible City properties in calendar year 2025 was 61, which is 3% higher than in 2010<sup>3</sup>, the first year of benchmarking City properties. The average Source EUI in 2025 decreased by 7% and the average GHG intensity in 2025 increased by 14% as compared to 2010. Please see Table 1 for additional details.<sup>4</sup>

*Table 1: Comparison of Benchmarking Results, 2025 vs 2010\**

| Years    | Average ENERGY STAR Score | # of Records <sup>3</sup> | Average EUI (kBtu/ft <sup>2</sup> ) | # of Records <sup>3</sup> | Average GHG Intensity (kgCO <sub>2</sub> e/ft <sup>2</sup> ) | # of Records <sup>3</sup> | Cooling Degree Days (CDD) | Heating Degree Days (HDD) | Total Degree Days |
|----------|---------------------------|---------------------------|-------------------------------------|---------------------------|--------------------------------------------------------------|---------------------------|---------------------------|---------------------------|-------------------|
| 2010     | 59                        | 1,196                     | 174.6                               | 1,654                     | 6.6                                                          | 1,661                     | 1,712                     | 4,227                     | 5,939             |
| 2025     | 61                        | 1,328                     | 162.0                               | 1,954                     | 7.5                                                          | 1,951                     | 1,293                     | 4,435                     | 5,728             |
| % Change | 3%                        | 11%                       | -7%                                 | 18%                       | 14%                                                          | 17%                       | -24%                      | 5%                        | -4%               |

For additional information on these benchmarking results, contact NYC DCAS Energy Management at [energy@dcas.nyc.gov](mailto:energy@dcas.nyc.gov).

<sup>3</sup> ENERGY STAR scores are not always directly comparable from year-to-year, as reporting procedures and methodologies are frequently updated in EPA Portfolio Manager. Note that the population of properties included in the reporting dataset for 2010 may not be the same as in 2025.

<sup>4</sup> To facilitate a one-to-one comparison between benchmarking results for 2010 and 2025 in Table 1, the 2025 reporting dataset includes properties that were benchmarked individually (i.e., where there is only one building on a BBL) and the parent properties for any benchmarking groups (i.e., where multiple buildings share a BBL and/or share energy). Properties belonging to benchmarking groups were not individually included in the counts in Table 1, since these properties take the ENERGY STAR score and other metrics of the parent record.

\* Data used to generate this report is collected and reported by City operating agencies. The information in this report is subject to change due to data quality improvements, energy efficiency efforts, and changes in building use over time.

\* 2010 data as published in 2013 New York City Government Building Energy Benchmarking Results.

\* Score of "Not Available" indicates building use types for which the EPA Portfolio Manager (EPA PM) does not provide an ENERGY STAR score.

\* Source EUI and GHG Emissions Intensity calculations performed by U.S. Environmental Protection Agency (EPA) methodology with EPA greenhouse gas emissions factors.

\* Data used to generate this report is collected and reported by City operating agencies. The information in this report is subject to change due to data quality improvements, energy efficiency efforts, and changes in building use over time.

\* 2010 data as published in 2013 New York City Government Building Energy Benchmarking Results.

\* Score of "Not Available" indicates building use types for which the EPA Portfolio Manager (EPA PM) does not provide an ENERGY STAR score.

\* Source EUI and GHG Emissions Intensity calculations performed by U.S. Environmental Protection Agency (EPA) methodology with EPA greenhouse gas emissions factors.
