

## **Finding of No Significant Impact**

To: All Interested Agencies, Groups and Individuals

Date: July 18, 2017

The City of New York - Department of Housing Preservation & Development (HPD) intends to undertake the following new construction project with funding provided through the United States Department of Housing and Urban Development's (HUD) HOME Investment Partnerships Program (HOME Program). Additional assistance/funding from HUD may also be provided to the project in addition to HOME funding. HPD is serving as the Responsible Entity under 24 CFR Part 58 for the project in connection with the HOME funding as well as any other assistance that may originate from HUD to facilitate the project. The project is described at the bottom of this notice.

HPD has determined that the environmental review record for the project identified below complies with the requirements of 24 CFR Part 58 of HUD Environmental Review regulations. Written notice providing environmental clearance will be required prior to the removal of the limitation on commitment of federal funding in accordance with the regulations found at 24 CFR 58.22.

The HOME Program in New York City is administered by HPD. An environmental review record is established for each new construction project receiving HOME funds and is maintained on file at HPD's Office of Development, located at 100 Gold Street, New York, New York 10038. A project's environmental assessment (EA) may be obtained from HPD. Requests for project-specific EAs may be sent to [nepa\\_env@hpd.nyc.gov](mailto:nepa_env@hpd.nyc.gov).

It has been determined that the project described below would not constitute actions significantly affecting the quality of the environment and, accordingly HPD has decided not to prepare an Environmental Impact Statement (EIS) under the National Environmental Policy Act of 1969. The reasons for the decision not to prepare EISs are as follows:

1. There are no significant adverse physical impacts, either direct or indirect, associated with the project.
2. There are no significant adverse social impacts, either direct or indirect, associated with the project.
3. There are no significant adverse economic impacts, either direct or indirect, associated with the project.

The City of New York has certified to HUD in its Request for Release of Funds that the City and HPD's Commissioner, in her official capacity as certifying officer for HOME Program funds, consents to accept jurisdiction of the federal courts if an action is brought to enforce responsibilities in relation to environmental reviews, decision-making and action, and that these

responsibilities have been satisfied. HPD has certified that a site-specific environmental review for the project described below has been completed. The environmental review was conducted prior to any obligation of funds.

Comments or objections to the obligation of HOME Program funds to the project identified below must be submitted to HPD no later than 18 days from the date of this notice. Comments should be submitted electronically to [nepa\\_env@hpd.nyc.gov](mailto:nepa_env@hpd.nyc.gov). No comments or objections received after this date will be considered by HPD.

**839 St. Marks Avenue, Brooklyn**

This proposed project involves the partial demolition of an existing building and the new construction of a 4½ story new structure facing St. Marks Avenue and a 6-story structure facing Brooklyn Avenue. This new addition would be fully integrated with the existing building on the site, which will also undergo significant interior and exterior renovations. Upon completion of the proposed project, the existing building and addition would accommodate approximately 70 units of supportive and affordable housing. The proposed project would be developed through HPD's *Supportive Housing Loan Program (SHLP)*.
