Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: 12/12/05-Sharif//I spoke with Ray Palker, Stationary Engineer and he told me they are doing the in house clean up. Eastmond will do the rest of it on Monday.Spill occured due to overfill and it impacted the side walk and some part went to the basement boiler room.I sent a letter to Mr. Ray Palker.01/30/06 Sharif// I called Ray Palker to follow up about the clean up of the spill. In absence of him, I spoke with Mr. Brewster who will convey my concern to Ray Palker.02/28/06 Sharif Rahman- Ray Palker called me to say they will forward all paper work and photographs to DEC by next week.05/17/06 Sharif Rahman- Rec'd report from St. Lukes hospital , Director of Engineering, Sava Cucu,(212)523-5021. AL Eastmond did the clean up. Rec'd invoices and waste disposal manifest.Spill was all on concrete with no seepage to the environment. Photographs attached. NFA required.  
Remarks: STORAGE TANK OVERFILL. CLEAN UP IN PROGRESS.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Sangesland spoke to Rene at Eastmond. He says the building is a dorm of Columbia University. 5,000 gal tank in basement failed and several hundred gallons of #6 fuel oil are on the basement floor. Eastmond is doing the cleanup. DEC-Ketani responded to the site 11/21/05 - Raphael Ketani. I reached the site at about 11:30AM. I met George Pelissier (superintendent for the building), Rene Lewis (Eastmond Tank Cleaning (718)378-3000), and Gunther Zigel (building manager for Columbia University (212) 854-9427). Mr. Pelissier told me that he first noticed the oil seeping out through the concrete enwrapment. He added that there had been no recent deliveries. The crew from Eastmond was already on site. The cleanup was well under way. All of the oil had been vacuumed out of the tank. They were throwing down many bags of sand and Speedi-Dri to absorb the oil. It appeared that several hundred gallons had leaked out from the very bottom of the tank as it was seeping from the very bottom of the concrete encasement. The oil had seeped through a cinder block wall into the next room, but the floor of the tank room and the next room didn't have cracks and didn't have drains or gratings. It was not possible to see the back side of the concrete encasement as it was almost against the boiler room wall, but that wall forms part of the alleyway/walkway for the building and I didn't see any oil seeping through this wall. Next, I checked the boiler room and I didn't see any oil seeping through the wall that separates the second room from the boiler room. The boiler room, itself, showed no signs of oil spills. No oil was seeping outside of the tank room to outside of the building. I had Mr. Zigel take me to the first floor/lobby area of the building. Inside the elevator, there was only a very slight odor. The elevator shaft didn't seem to be a pathway for odors. Once there, we noticed a definite odor of oil. The odors seemed to be coming up from a recessed radiator box that sits over the tank room. I told Mr. Zigel that the floor needs to be ventilated. He opened the hallway doors and windows. Next, we went to the second floor. There was almost no odor there. Mr. Zigel opened up some windows in the hallway, anyway. I told Mr. Zigel that he would need to do soil borings around the tank footprint. He asked how many. I told him at least 6. He then asked what should be done next. I told him that it's up to Columbia University to decide whether to abandon the tank, repair it, or replace it. I told him that I would be sending a contaminated soil letter requesting that the site be investigated. Eastmond seemed to have things well in hand so I left. I sent a contaminated soil letter to: Peter Hoff, Institutional Real Estate, Columbia University Apartment Housing Office, 400 West 119 Street, NY, NY, 10027. This office's phone number is (212) 854-9300. The PBS case is #2-453978. 12/22/05 - Raphael Ketani. Issac Mungra of A. L. Eastmond & Son (718) 378-3000 called to say that the oil is completely cleaned up, but they discovered that the floor in the tank room is hollow sounding. There may be air space and another layer of concrete below. He asked me to join him for a site visit on 12/28 at 10AM to see

**APARTMENT (Continued)**

**S107489183**

whether the floor should be broken up to see whether oil exists below. I agreed to meet him. 12/28/05 - Raphael Ketani. I met Mr. Mungra at 10AM at the site. The #6 oil tank had been removed. There were well over 100 black plastic bags containing oily soil. The workers were digging southeast corner of the room and had gone down several feet when they hit a hard layer. I had them dig into the layer and it appeared to be made of loose cobbles and brick. The soil between the cobbles and brick was wet with oil. I told Mr. Mungra that they will have to dig below the rubble layer to get to clean soil. Mr. Mungra agreed to have his workers do this. Free oil seeped out of the southeast corner of the pit. Mr. Mungra said that they will clean this up, too. All of the work is being done by hand with pick and shovel. The workers have completely maybe 5% of the soil removal work in the tank room. Mr. Mungra ((718) 378-3000) and I walked up to the street level and we noticed staining on the wall next to the fill pipe. Mr. Mungra shook the fill pipe and noticed it was loose. I told Mr. Mungra that the wall will have to be cleaned and the fill pipe tightened up or repaired. He agreed to do this. I will send a letter to the Columbia University Housing Office telling them that they have to remove more soil and repair the fill pipe.

1/5/06 - Raphael Ketani. I left a message for Mr. Zagel of Columbia University telling him that Eastmond was digging in the tank room and that removing soil greater than 2 feet down may require bringing in an engineer to check on support for the building during the soil removal process. I also called Mr. Mungra and told him that he shouldn't dig more than 2 feet down without having an engineer look at the site. I told him that digging deeper could remove support for the columns and could result in building damage. He said that, right now, his crew is just digging laterally and no deeper than I had seen on 12/28/05. I told him that soil borings may need to be done in the court yard behind the building and in the sidewalk in front to see whether the oil had spread that far. Mr. Mungra said that he wanted to first dig up the entire tank room and adjacent room floor and see whether the oil spread any further. He added that if the oil did spread more, then he will have soil borings done.

2/7/06 - Raphael Ketani. I made a site visit. No one was there from Eastmond. Digging had stopped in the tank room. Only the southern third of the floor had been broken open - which was as I left it the last time I was there. The digging had gone down about 5 feet at the southern end of the former tank footprint. Black debris and soil were evident. There was a moderate oily odor, but no free oil. The edge of the soil exposed at the northern end of the pit just below the floor looked clean, but it was not clear if the soil under the rest of the floor was clean. Later, I was able to reach Isaac of Eastmond. I told him that his crew should expose more of the soil under the floor because there are lots of cracks in the concrete. He said he would do this. I told him that there is still lots of oily soil in the dug out pit, but that he should get an engineer to look at how deep he has dug before removing more soil. He said he would get an engineer, also.

2/13/06 - Raphael Ketani. Mr. Zagel called me to say that he had stopped Eastmond from digging out more of the basement as they had dug 4 feet deep at one point and had left very little support for 2 columns. I told him to get an engineer to look at the open pit. I also told him that Eastmond shouldn't dig deeper than 2 feet anywhere or else he should have an engineer evaluate the site for structural integrity of the building. He said he would. I told him that the rest of the tank room floor needed to be broken open as there are cracks

**APARTMENT (Continued)**

**S107489183**

in the floor and the oil most likely seeped into the soil below. He said the will call Eastmond again and bring them back to do some shallow digging. 3/6/06 - Raphael Ketani. I tried to reach Mr. Zagel, but he wasn't in. So I left a message for him to call me back. I talked to Isaac of Eastmond and he said that his crew finished the contaminated soil removal last week. He said that they dug down about 2' in most of the tank room, but not the whole area, as the oil hadn't soaked into the ground everywhere. He added that they power washed the tank room and the room next door that had a little oil seep through the cinder block wall. He said he will send me a letter report regarding the work that was done. 3/22/06 - Raphael Ketani. I spoke to Issac. He said that he is done digging the floor and has power washed it. He said he will send soil manifests to Mr. Zagel. He said that Eastmond will backfill with clean fill and recement the floor. He added that Eastmond will replace the tank and connect all lines, but he didn't give me a date when all this will start. 4/6/06 - Raphael Ketani. I called Isaac of Eastmond and asked him for the status of the cleanup. He said that everything is the same as the last time I talked to him. He said nothing has been backfilled. I told Isaac that I needed progress to be made and a spill cleanup report. He said he will call Mr. Zagel. 4/12/06 - Raphael Ketani. Mr. Zagel called me back and said that he will contact Eastmond and have them backfill the site and recement the floor. 6/21/06 - Raphael Ketani. I tried to call Mr. Zagel, but he was on vacation until the end of July. I left a message on his cell phone (917) 750-8106. I called Issac of Eastmond and he said that after the digging was finished, his company was released from the job and Columbia University took over the project themselves. I called up the Columbia University Apartment Housing Office and tried to talk to someone involved with the building. They referred me to the superintendent of the building, Mr. George Pelissir (212) 866-8643. I called up the super. and asked him what was the status of the site. He said that the hole was filled back in and a new tank was installed 2 days ago. I asked him who did this. He said that another company put in the tank. I asked him whether he had the paperwork from Eastmond, the soil manifests, and the paperwork for the tank installation. He said no, but he will call the housing management office to have it sent to me. 8/11/06 - Raphael Ketani. I reached Mr. Zagel. He said he was in California right now, but could hear me via his cell phone. He said he has all of the paperwork and will put it together by the end of next week and will send it to me sometime during the week of August 21. 8/30/06 - Raphael Ketani. I contacted Mr. Zagel. He said that there were several contractors involved and that's why it's taking so long to get all of the paperwork. I asked him about the revised PBS registration. He said that is one of the things that is holding him up. 10/3/06 - Raphael Ketani. I received a package of documents from Mr. Zagel. It contained a cover letter, a letter from an architect stating that the 3 borings he observed did not have oil in them, 2 building permits for the tank work, a copy of the certificate of occupancy, 2 asbestos exemption certification letters, 3 oily soil manifests, 3 digital photos of the tank room, and a blueprint from the architect for installation of the new 2500 gal. tank. The revised PBS Application was not included in the package. I tried to reach Mr. Zagel at (212) 854-9427, but could only leave a voice mail. 10/26/06 - Raphael Ketani. Mr. Zagel (917) 750-8106 left a voice mail stating that he is working on the revised PBS application. 11/10/06 - Raphael Ketani. I tried reaching Mr. Zagel, but could only leave a voice mail

on his cell answering service. The PBS record has not been revised to show removal of the old tank and installation of a new one. Mr. Zagel left me a voice mail that he sent the PBS form on 11/9/06 and to call him when I receive it. 11/17/06 - Raphael Ketani. I spoke to Nick Lombardo of the PBS Unit regarding the submission of the revised form. Mr. Lombardo informed me that Mr. Zagel submitted the wrong form, it was also unsigned, the old tank was listed twice, the line for the new tank was not completely filled out. Mr. Lombardo said he sent the form back with a checklist regarding what needed correction. 4/5/07 - Raphael Ketani. I checked the PBS case #2-453978 and it shows that the 5,000 gal. tank was closed and removed and the new 2,500 gal. tank was installed. As the revised PBS was the only item holding up closing the spill case and this has been taken care of, I am closing the case today based upon the documentation in the case file.

Remarks: tank wrapped in concrete ruptured, cleaning up at this time

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "DEMEO"10/13/05, SA: PBS record shows that an above ground 5000 gal cap. tank was closed on 6/1/02 at this location. Left message on both nos. to call me back.10/21/2005: Talked to Vol. of America (212 865 7000 ext 217). That person informed me that he was working there at that time but could not remember any incident happend like that. Also informed, the site is now very clean and there is no problem exits now. (Sadique)12/22/2005: Site visit may help to close the spill. (Sadique)01/20/2006: John Grathwol and I visited the spill location on 01/18/2006 at 12:00pm. Met with building superintendent Mr. Arpad Szabo. Inspected the basement. They removed the old tank and put in a new tank. Vault around the tnak. Inside the vault and surrounding floor was very clean. Well maintained. No oil mark or spill were visible. Spill can be closed. (Sadique)01/20/2006: Spill closed. (Sadique)

DEC Region:	2
DER Facility ID:	208296
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEMO" Tank test failure letter sent to Gerald Picasso Inc. 11/17/2003 PTC sent in a letter with manifest showing that the tank was leaking. The floor was cleaned and resulted in 4 - 55 gal drums of waste (manifested) The floor is solid concrete with no visible cracks. Attempts were made to drill into the floor for subsurface samples, after 14" of concrete, gave up drilling. Spill Closed

**Remarks:** Tank test failure at above location. Tank is a 5000 gallon above ground wrapped tank and caller suspects sand under tank is contaminated. Tank to be emptied and further testing to be done.

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "M TIBBE"10/06/2005: Citi Bank abandond that underground storage tank and closed in place 04/10/99. As per PBS record the UST was closed on 5/1/99. Citi Bank is now using gas from Con Ed for heating purposes. There is a complete report submitted by Tyree Brothers Environmental, Inc. After abandonment of the UST in-place, they collected 3 soil samples around the tank and 1 GW sample from one of the hole. All four samples were analyzed for VOC via EPA method 8021 and 3 soil samples were also analyzed for SVOC via EPA method 8270. Findings: Lab results indicated that only one VOC compound was noted slightly above its method detection limit in all the soil samples. But it was well within its NYSDEC guidance value. No VOC were noted in the groundwater sample. SVOC results indicated that no compounds were noted above method detection limits in any of the soil samples. As per Tyree Brothers Environmental, Inc the tank had a hole which causes the tightness test failure. However, the tank was encased within concrete and the whole was on the top of the tank, it appears that the surrounding soils were prevented from being impacted by a release. They recommended that this spill may be closed. 12/27/2005: Page 6 (analysis report) is missing from the Tyree

Organization report. Talked to Joseph Fortunato (212 615 9281), representative of Citi Bank and requested to fax the missing page. (Sadique)12/29/2005: Received the fax copy of missing page. This is the SOVC analysis report for boring soil sample #1. As per this lab analysis report all the SOVCs concentration well within the NY states cleanup limits. There is no lab analysis for SVOC of GW. Shared the information with Jack Aversa and Joseph Zalewski. Joseph Zalewski's comment "It would be reasonable in this situation to close the spill without the SVOC data for GW if the rest of the data supports their claim that there was no evidence of a release to the environment outside the containment". As rest of the data supports their claim, no further action is required and the spill is closed. (Sadique)

Site Description: Location: The site is located in Manhattan and is bordered on the west by Frederick Douglass Boulevard, on the south by West 110th Street (Central Park North), on the north by West 111th Street and on the east by mixed commercial and residential buildings. Site Features: The site is a 0.31-acre parcel and is developed with a one-story service station building and roof canopy over gasoline dispensers. The service station closed in December 2013 and the site is currently unoccupied. Current Zoning and Land Use: The site is zoned R8A residential and C1-4 commercial. It is currently unoccupied. Past Use of the Site: The northwest portion of the site was originally developed in 1912 with a single-story building and a booth occupied by Aero Drome, a moving pictures company. In 1922, this building was occupied by stores on the first floor and a dance hall and billiard parlor on the second floor. In 1951, the first

MAP FINDINGS

**FORMER 110TH STREET SERVICE STATION (Continued)**

**S116041506**

floor was occupied by a gasoline station and auto repair facility with offices on the second floor. The present commercial building located in the eastern portion of the site was constructed in 1955 and utilized as a gasoline station until December 2013. Site Geology and Hydrogeology: The subsurface at the site consists of approximately 15 feet of silty non-native historic fill material with brick, concrete and rubble. Beneath the fill, native material is present consisting of brown silty sand, followed by a silty clay layer which is encountered between 22 and 37 feet below grade. Groundwater is present at a depth of approximately 35 feet below surface grade and flows in a south/southeast direction.

Env Problem: Nature and extent of contamination: Petroleum-related contaminants are present in the soil and groundwater beneath the site, due to the historic use of the property as a gasoline and automobile service station. Soil: Petroleum-related volatile organic compounds (VOCs) have been identified site-wide at concentrations that exceed the Unrestricted Use Soil Cleanup Objectives (UUSCO) and the Protection of Groundwater SCOs, but are below the Soil Cleanup Objectives for Restricted Residential Use of the site. The primary area of contamination is below the current and former Underground Storage Tanks (USTs). Petroleum-related VOCs identified in soil at concentrations exceeding the SCOs include: benzene detected as high as 0.4 parts per million (ppm) compared to the UUSCO of 0.06 ppm; ethylbenzene detected as high as 10 ppm compared to 1 ppm; xylene as high as 20 ppm compared to 0.26 ppm; 1,2,4-trimethylbenzene as high as 34 ppm compared to 3.6 ppm; and 1,3,5-trimethylbenzene detected as high as 11 ppm compared to 8.4 ppm. A few metals were detected at concentrations exceeding the UUSCOs as well including lead as high as 82 ppm compared to the UUSCO of 63 ppm and mercury as high as 0.44 ppm compared to 0.18 ppm. The contamination in soil was identified at the water table interface, which is typically encountered at approximately 35 feet below surface grade. Site-related soil contamination is not expected to extend off-site based on the available data. Groundwater: Petroleum-related VOCs and semi-volatile organic compounds (SVOCs) have been identified in groundwater at concentrations above the applicable groundwater standards (NYSDEC Class GA Ambient Water Quality Standards and Guidance Values (AWQSGV)). Petroleum product was also identified floating on the groundwater surface in 3 out of 8 on-site groundwater monitoring wells and 1 of 2 off-site monitoring wells (where detected, product thickness ranges from 0.02 feet to 1 foot). Petroleum- and oil-related VOCs detected in groundwater above the AWQSGV include: 1,2,4-trimethylbenzene detected as high as 670 parts per billion (ppb); 1,3,5-trimethylbenzene detected as high as 360 ppb; bromobenzene detected as high as 2,600 ppb; and total xylenes as high as 120 ppb. The AWQSGV for these contaminants is 5 ppb. Petroleum-related SVOCs detected above the AWQSGV include fluoranthene as high as 240 ppb and phenanthrene as high as 190 ppb (compared to the AWQSGV of 50 ppb for these contaminants); naphthalene detected as high as 1,000 ppb (compared to the AWQSGV of 10 ppb); and chrysene as high as 0.12 ppb, benzo(a)anthracene as high as 0.12 ppb; and benzo(b)fluoranthene as high as 0.35 ppb (compared to the AWQSGV of 0.002 ppb for these contaminants). Soil vapor: A wide range of VOCs were identified in soil vapor samples. No chlorinated solvents were identified at elevated concentrations.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the

site. Direct contact with contaminants in the soil is unlikely because the site is covered by buildings and pavement. Volatile organic compounds in groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates soil vapor is contaminated on-site and actions have been recommended to address the potential for soil vapor intrusion to occur in future on-site buildings. Sampling indicates that soil vapor intrusion is not a concern for off-site buildings.

and line tests. This spill was called in due to a line test failure on the super line. He provided the original line test failure as well as a subsequent meeting with Tyree Organization to discuss repairs and finally the passing line test. I contacted Terry Koch of Tyree (631-249-3150) to determine which if any repairs were needed. He faxed an invoice detailing their work done on site. The problem was determined to be a failure under the dispenser pan. Tyree excavated to the super line to expose the leak and replaced the flexhose and associated piping. Any product release was contained in the secondary containment system. All documents are pertaining to the clean-up are in eDocs. Spill closed

Remarks: LINE TEST FAILURE DUE TO SOMEONE RUNNING INTO THE LINE - THE SUPER TANK

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "DEMEO/VOUGHT"12/17/2002-Vought-Spoke with Isaac Mungra (PTC) who was hired to clean spill. PTC performed site visit and found water in tank room. Sidewalk was cleaned by AL Eastmond. PTC will drum water and send disposal manifest. Concrete is in good condition. Source of water is porous wall which will be sealed. Will also replace fill line which has small leak into tank room. Tank will be rescraped and painted. Will send pictures, manifest and NFA letter.  
1/17/2003-Vought-Spoke with Isaac Mungra who will have someone take pictures today and send closure report by Tues 1/21. Vought called Hertz (516-238-40520) and told him to call PTC to have them send NYSDEC report.1/21/2003-Vought-Spoke and received fax from Isacc Mungra. Fax was closure report including work description (with confirmatory statement that concrete had no cracks or crevices). Work performed included removing vent alarm from sidewalk vent and replacing at tank top, replaced fill line, removed five drums speedy dry (disposal manifest provided), scrape/wipe/paint tank exterior, epoxy tank room floors and walls. Spill on concrete and no sewers or drains were affected. Spill #9206075 closed due to same location within tank room. Both spills closed by Vought.

Remarks: BROKEN GUAGE ON TANK. SPILLED ONTO CONCRETE SIDEWALK. BEING CLEANED UP. SUMMIT TRANSPORT DELIVERS FOR AMERADA HESS. AMERADA HESS WILL NOTIFY CUSTOMER OF BROKEN GUAGE.

DEC Memo:

01/30/06: This spill transferred from J.Kolleeny to S.Kraszewski. Soil contamination found during the removal of one 33K tank in 1990. A Phase II report was conducted in 1993 to assess the extent of the contamination. Eight soil borings and five monitoring wells were installed. The greatest oil concentrations in soil were found around tank 001 and the boiler room wall. TPH ranged from ND to 48,000 ppm. Free product was found in MW-2 and a sheen noticed in MW-1, MW-4 and MW-5. Several VOCs detected but noe above guidance values. Phase II proposed additional MWs and a product recovery well. In 1995 a pneumatic system with 2 RWs was installed. Last update for the system was 2002 and it was on-line with no product in the RW. Need a site status update for the recovery system. - SK02/14/06: This spill closed to consolidate with open spill #9103651. - SK03/06/06: This spill reopened and has no connection with spill #9103651. - SK9/22/06: Spill transferred from Kraszewski to Kann.1/25/07 - J.Kann

- monitoring report submitted on 11/14. No product in wells. Will prepare a generic letter commenting on report format. A work plan is past due - Schedule D indicates it as December 2006. NYCHA was informed this in the letter of 1/5 which approved the submitted Schedule D.3/29/07 - J.Kann - WP submitted 3/23/07 and is under review. WP based on discussions with NYCHA at a March 13, 2007 meeting.7/31/07 - J. Kann - Work Plan approved on April 3, 2007. Work performed on site. Issue regarding current seepage into basement boiler room. NYCHA's consultant GF to arrange a site visit with DEC to determine what additional work is necessary.10/25/07 - J.Kann - requested a site visit from NYCHA based on their consultants findings. Walked through boiler room and found no evidence of seepage. Discussed preliminary results of field work conducted earlier this year. No floating product and minimal dissolved SVOCs found in upgradient wells. NYCHA will finalize report and submit to DEC for review.05/23/08 - J.Kann - based on review of Gannett Flemings report, minimal SVOC exceedences exist in soils at 8 ft bgs. Groundwater samples detected no VOCs and minor SVOC exceedences in two upgradient wells. Discussed site with Vadim and agreed on closure. NYCHA was sent an email.

DEC Memo: 01/20/06: This spill transferred from J.Kolleeny to S.Kraszewski. One 9.5K tank removed in 1998 and replaced by one 6K tank. No contamination discovered during excavation. According to documentation a site assessment was to be performed on 6/5/98 by DC-Environmental. Must contact NYCHA to find out if assessment was done. - SK09/01/06: DEC Lead for this spill changed from "unassigned" to S. Kraszewski. - J. Kolleeny02/09/07 - J.Kann - Spill reassigned from S.Kraszewski to J.Kann.3/10/11: J.Kann - Investigative work plan submitted on 3/3/11.11/13/14: J.Kann - emailed NYCHA on 8/14/14 requesting they try to locate the 1998 assessment. They responded on 9/25/14 indicating that they could not locate the assessment. Therefore, the SIWP was reviewed today and approved.12/29/14. J.Kann - Email sent to NYCHA today approving Work plan. SSIR due 6/29/14  
Remarks: 10K TANK FAILED HORNER EZY CHECK WITH A GROSS LEAK,WILL EXCAVATE, ISOLATE & RETEST.

DEC Memo: 6/22/06 - Raphael Ketani. I called Mr. Joe Ostrowski of PTC (718) 624-4842. He said that the oil sprayed from the filter on the boiler. He added that the boiler got most of the oil and his men are there now and are cleaning it up. Some oil got onto the floor and his men are cleaning this oil, also. He said the floor doesn't have any cracks and no drains are affected. Mr. Ostrowski said that they should be done in 1/2 hour. Based upon this information, I am closing the case.  
Remarks: FILTER ON BURNER LEAKED CAUSING SPRAYING OUT ONTO CONCRETE FLOOR;

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "TIPPLE" See also spills 9712384,9913364, 02076989/9/02 Called tenant numerous times and there was no one at the phone number, only an answering machine. I left two messages. The rental agent contacted the building superintendant. The super stated that a few gallons of oil spilled onto the floor on friday night when a nipple in the boiler failed, the oil was cleaned and the nipple replaced. The boiler is scheduled to be replaced Tuesday 9/10/02. A site visit is scheduled for Monday afternoon.9/17/02 Site visit revealed Eastman cleaning the boiler room which had a maximum of 15 to 20 gal oil floating on water. Carlos Arenas is the super,phone 212-663-0318. The boiler is being replaced beginning on the week of Sept. 16th. A temporary boiler will be placed outside the building while the work is being completed. A representative from the building will call when all work has been completed and all messes associated with the burner replacement are cleaned.10/25/2002 - Sangesland on "Desk Duty" received another spill report on smells from this basement. Spill # 0207698No call back name or phone number was provided.Sangesland spoke with Super's wife. She said a new tank was built in place on 10/23 & 10/24 and all the work is now finished. Building manager is David Eisientien at 212-582-9080.11/13/2002 spoke with mgnt. co. David E., he stated that the boiler replacement was completed, all of the residual oily stains were cleaned and DEC was welcome to stop by to inspect the final cleanup anytime.11/21/03 nfa

DEC Memo: Below is e-mail from Columbia University Rep for spill

event.\*\*\*\*\*

\*As promised, I am providing all requested documentation for spill#0701313 assigned to 404 West 115th St, New York, NY 10027 in an effort to close the spill. Columbia University has been the owner of the property in question since October 2002. Columbia University acquired the property as a vacant lot, which remained vacant until April 2007 when Columbia began sitework to repave the lot. During site work, our paving contractor, Yonkers Paving Concepts, unearthed a vaulted 3,000 gallon fuel oil tank. Columbia University had no knowledge of the presence of a UST on the site prior to or after purchase of the property. Subsequent to raising the tank from the ground on April 20, 2007, I performed a "dipstick" test of the tank which revealed that the tank contained residual product, which appeared to be #6 fuel oil. The tank was removed from the ground and repositioned on-site awaiting cleaning and removal. The tank pit/vault was visually inspected and did not show any evidence of oil staining and a visual inspection of the tanks exterior did not reveal any evidence of breaching. Columbia contracted with Clean Harbors Environmental Services (CHES) to perform the tank cleaning and prepare the tank for removal from the site as scrap metal. Pascap Co., Inc as a subcontractor to Yonkers paving Concepts. CHES was on-site May 1st and 2nd to complete the project. On May 1st, CHES removed approximately 1,200 gallons for product from the tank using a vacuum truck. It appears that a neighbor, seeing the CHES equipment and oil tank, was concerned that an oil spill had occurred and contact NYSDEC, but in fact no spill had occurred as confirmed in our telephone conversation on May 1st. As supported by the attached photos, any my repeated visual inspections of the exterior and interior integrity of the tank, which was also confirmed by CHES, all surfaces of the tank were intact and no release occurred. On May 2nd, CHES performed a tank entry and cleaned the interior walls of the tank, cut the tank into two sections and left the tank on-site for removal as scrap metal on May 3rd by Pascap Co., Inc. I have attached several photos of the project and contractor work tickets as evidence of the work that was completed. If you should have any questions or require additional information, please let me know. Please confirm receipt of this message and all attachments via email response. Thank you. Christopher Pettinato, MPH, CSP Director of Environmental Safety Programs Columbia University 500 West 120th St, MC 2215 S.W. Mudd Building, Suite 350 New York, NY 10027 ph: 212-854-0108 fax: 212-316-4937

Remarks: NOT YET CLEANED; UNSURE IF CONTAINED OR IF TANK IS FULLY REMOVED;

 DEC Memo:

Ketani responded to the site - Oil spill to floor of a daycare center.12/14/06 - Raphael Ketani. Site has a 4750 gal. tank in service with #6 oil. The PBS case is #2-406473. From the PBS, the owner is listed as: Park Front Apartments, LLC, 360 Shore Road, Ste 1200, Long Beach, NY, 11561. Mail goes to: Park Front Apartments, LLC, 315 Central Park West, Ste 1200, NY, 10025.I got to the site at about 11:00AM due to traffic in midtown. There were ten pieces of FDNY fire equipment outside the building with about 40 firemen. The firemen had been the initial responders and had done a preliminary containment, and assesment. I initially met the battalion chief for the FDNY and the NYC DEP, Industrial Waste Div., person, and the assistant property manager. Other agency people showed up later. The firemen left shortly after I arrived. The full list of attending agency people is below:Mr. Okelly, Battalion Chief FDNYDennis Huacon, Spills Unit, Div. of Industrial Waste, NYC DEPMr. Brook Haberman, Asst. Manager, Park Front Apartments, LLC (212) 873-7575several people from Hazmat Div., NYC DEP (they just observed and were not involved in any way)Matthew Brown, Supervisor, the Central Park Conservancy, (347) 582-0595Compton Tucker, Inspector, Environmental Investigations, NYC DOH, (212) 442-3372Grace Cobb, Daycare Unit, NYC

**PARK FRONT APARTMENTS (Continued)**

**S108299096**

Dept. of Health & Mental Hygiene (718) 579-7775 Kathy Roemer, Director, Park West Montessori School, (212) 678-6072 (she was not present) Rene Louis, Supervisor, A. L. Eastmond & Sons, (718) 378-3000 - cleanup company I went to the basement through the back courtyard of the building via the back entrance from a side street to Central Park West. There was a childrens' outdoor play area with playground seats and other equipment. The back courtyard was covered with soft playground matting. The matting was getting oily and dirty from everyone walking back and forth from the daycare school, which was in the basement. Once inside I met Rene Louis (supervisor) of A. L. Eastmond & Sons (718) 378-3000. His company had been hired by Empire Fuel Oil (718) 573-4500 to do the remediation. His crew was busy cleaning up the site, bagging things, and moving things around. The scene was chaotic. There were pools of oil on the floor. The vapors were 4700 ppb, as measured by PID meter. Oil was dripping from the air ventilation ducting and the ceiling. Mr. Louis pointed out the fill pipe from which the oil had leaked. It was about 4 inches in diameter and passed over one corner of the daycare center through the ceiling. Mr. Louis said that the pipe had cracked during fueling and had poured oil into the air duct, which then ran outside the air duct, through the ceiling, behind the sheet rock and out onto the floor. Mr. Louis said that when they investigated the ducting, more oil poured out. So he put the total loss at 50 gals. Oil was on most of the floor and on many of the school belongings and personal belongings. Oil was dripping from the ceiling and the ducting onto the floor. I met Matthew Brown of the Central Park Conservancy. He was concerned about the 100th Street Pool in Central Park. He said that when it rains, the rain goes into the city storm sewers and then into the Pool. I told him that everything was contained in the school's main work/play area. I also told him that no drains were affected. Then I met Mr. Haberman. I explained to him and Mr. Louis what had to be done to remediate the site so that it would be safe for children. This included removal of all affected sheet rock, ceiling tiles, repair of the fill pipe, ripping up some floor tiles to see if the oil got underneath, cleaning of all concrete walls and floors that are affected, soil borings to see if the oil got below the floor, disposal of all oil contaminated materials and vapor contaminated materials (inside and outside of the school) and ventilation of all halls, rooms, and sealing of the school front door at the end of the building's internal hallway. Mr. Haberman and Mr. Louis said they understood. Mr. Haberman then showed Mr. Huacon and myself the tank room and boiler room. There were no signs of loose oil. Mr. Haberman said that the tank was now almost at full capacity. He said that most of the 3000 gal. fillup was successfully delivered. Mr. Tucker of NYC DOH then showed up and we visited apartments on the second floor and the third floor. Oil odors were slightly noticeable in the stairway that was near the school's front door and in the elevator. I told Mr. Haberman to get some kind of ventilation for these areas. He said he would. We went to apartment "2S." The vapors were 660 ppb in the hallway and 1130 ppb in the apartment, according to my PID. Mr. Tucker got a similar reading. Next, we went to apartment "3S." The vapors in the hallway were 375 ppb in the hallway and 155 ppb in the apartment. Mr. Tucker said that he will issue letters to the school, and the apartment building stating that the apartments, the building, and the school have to be ventilated. Lastly, we met Grace Cobb of the NYC Dept. of Health & Mental Hygiene. Mr. Haberman, Mr. Tucker, Mr. Huacon, and myself

**PARK FRONT APARTMENTS (Continued)**

**S108299096**

informed her about what had been going on and what needed to be done to clean up the site and ventilate all of the affected areas. After this I left to investigate a spill in the Bronx. 12/18/06 - Raphael Ketani. I spoke to Kathy Roemer (reemer), Director of the Park West Montessori School. I asked her what conditions were like now. She said that everything that was touched by the oil has been removed, except for the wall board. She said that Eastmond is taking down the walls now. I asked her about the concrete floor. She said that, except for the corner where the oil came in, there was no staining. I set up an appointment for wednesday, 12/20 at 11AM to see the facility. 12/20/06 - Raphael Ketani. I visited the site today and met Kathy Roemer (reemer), the director of the Park West Montessori School, Sinclair Haberman, the brother of Brook and owner of the school, and Eric Joseph, Inspector, Environmental Investigations, NYC DOH (in place of Mr. Tucker). We visited the room where the spill had taken place. The back door was open and the room was cold. Someone had set out 2 large (8 inch diameter) fragrance candles in the room (the type that don't need to burn). Due to the cold air with a breeze and the candles, meter readings were unreliable and inaccurate. The door was closed and the room was allowed to warm up a little from an outside temperature of about 42F to about 56F. Vapor readings were taken again and were about 1800 to 1900 ppb at about 3 feet above the floor (about the breathing zone for a 3 year old child). Vapor concentrations in the corner of the room where the spill happened were about 6500 ppb. Mr. Joseph was getting similar numbers with his older PPM PID. The brick wall under the oil pipe (5 inch pipe with coupling) was stained with the oil and higher PID readings were obtained at the wall. Stains were present where the oil pipe and the smaller 3 inch diameter pipe came through the wall, hinting that there was oil under the sidewalk also. The room had been stripped of its linoleum covering, students desks and belongings, some of the ceiling tiles, all of the sheet rock that was against the brick wall under the pipes, some of the bottom portions of the sheet rock in other places, and the ventilation ducts. Some wires hanging from the ceiling and some pipes which ran along the floor still were stained with oil. In the smaller adjacent room, the linoleum had been stripped from the floor and the students desks, furniture and belongings were gone. However, this room never had any free oil. It was simply contaminated by oil being tracked in on the shoes of the firemen who responded to the spill. I took 6 pictures of the large room and one of the smaller room. I then had a discussion with Sinclair Haberman and described what needed to be done to at least reduce, if not eliminate, the oil vapors. I told him that the stained brick wall, and in places the floor, needed to have an epoxy sealant applied. He agreed to have this done and called up his assistants to let them know what they needed to do. He also told me and his assistants that a vapor barrier with insulation would be installed and then sheet rock. Next, we entered the hallway outside the school's office and the vapors were 1200 ppb. However, this reading was not of oil vapors, but was the result of the floor cleaning products being used, which smelled like a lemon cleaner. Brook Haberman joined us at this point. Next, we went to the second and third floors. We couldn't get into the apartments, but the hallway vapor concentrations were 208 ppb and 224 ppb in the second and third floor hallways, respectively. We then went down to the school office and finished our discussion regarding what needed to happen and what the NYC DOH and the NYS DEC would do next. Mr. Joseph said that he still couldn't

**PARK FRONT APARTMENTS (Continued)**

**S108299096**

allow the children to return to either affected room as the vapors were too high. I told everyone that the DEC would be back sometime after the installation of the epoxy sealant and the vapor barrier to check the vapor concentrations. Mr. Joseph said that he would be back, too. Then the site visit ended. When I got back to my office, I called Rene Louis of Eastmond. I asked him whether the brick wall could be powerwashed more to get rid of more of the oil. He said his crew tried, but they could not get more of the oil out. I asked him who was going to replace the broken oil pipe. He said that Brook Haberman told him a plumber would break up the sidewalk and replace the oil pipe and any oil stained copper pipes in the classroom. I tried to find out who the plumber was by calling Brook Haberman, but he wasn't in. So, I left a message for him to call me back. Brook Haberman called me back and said that H H G Plumbing will replace the fuel line. I told him that the section of the pipe under the sidewalk would have to be replaced as I saw stains where the pipes pass through the wall suggesting that the oil had leaked into the soil under the sidewalk. He said that the firemen told him they saw a crack in the fuel pipe where it was exposed in the ceiling and so only this portion of the pipe will be replaced. I told him that some of the copper pipes running along the floor still had oil on them and to have someone clean the pipes with a rag and LESTOIL to get rid of the oil. He said he would have someone from his staff do this. 1/5/07 - Raphael Ketani. I made a scheduled site visit today at the day care center/school. This was an appointment that I set up with Kathy Roemer, Director of the school. I also met Brook Haberman, Asst. Manager Park Front Apartments, and, Compton Tucker of the NYC DOH. Mr. Tucker said that he had already done air surveys of the affected rooms and apartment 2S above. He said that the vapor concentrations were low enough in the rooms (despite the vapors from the fresh paint on the walls of the two rooms) that the children could be allowed back in to use them. He also said that he had no vapor detections in apartment 2S. I entered the rooms and sensed a moderate odor of fresh paint. The two rooms had been completely restored, but were bare of furniture, wall decorations and poster boards, children's belongings, etc. There was new sheet rock and ceiling tiles. The closets had been rebuilt. Mr. Haberman told me that cleaning the pipe that were contaminated with oil was too time consuming. So he had the plumber replace the fuel pipe. The rooms were in fresh, pristine condition and were fully ready to be put back into use. The paint vapors were about 250 to 320 parts per billion in concentration. Closet vapor concentrations were a little higher. Mr. Haberman and Ms. Roemer both said that they will air out the rooms before letting the children in. I told Mr. Haberman that all I needed to close the case was a letter report from A. L. Eastmond stating what they did to clean up the site with disposal manifests and an invoice and paid bill from the plumber who replaced the pipe, or an official letter from the school stating the specifics about the work done by the plumber. Mr. Haberman said that he will get these documents for me. 2/23/07 - Raphael Ketani. I spoke to Mr. Brooke Haberman regarding the documentation that I needed to close the spill case. He said that he had the paid bills from the plumber and could send me copies. I also asked him for the manifests from Eastmond. He said that he will call Eastmond to get them and then send me copies. 5/9/07 - Raphael Ketani. I spoke to Isaac of Eastmond regarding the closing paperwork for the site. He said that everything is finished and that Rene is working on the paperwork. 5/11/07 - Raphael Ketani. Mr. Haberman called to say that

he had all of the manifests for the material that Eastmond removed, a letter from the plumber stating the work that he did to replace the piping and a cover letter explaining what was done to clean up the site.5/23/07 - Raphael Ketani. Dr. Kathy Roemer of the Park West Montessori School sent me a cover letter with a manifest for the oil contaminated material that was removed and a letter from the plumber who replaced the piping. Dr. Roemer asked that the DEC issue and NFA.I wrote the draft NFA and submitted it to Randall Austin, Chief Spill Prevention and Response Unit for approval.Mr. Austin approved the NFA letter and it was sent out today.Based upon the waste manifest, the letter from the plumber, the 1/5/07 site visit by Compton Tucker of NYC DOH approving the reoccupation of the school by the children, and my own site visit on 1/5/07 whereby I saw that the affected rooms had been completely cleaned up and rebuilt inside, I am closing the spill case.

DEC Memo: TTF letter sent - see eDocs8/18/08: DEC is in receipt of letter from Eva Matos related to TTF. Consultant to the property owner also provided sketchy information in the letter about the current status of the tank. August 13, 2008 oil tank was cleaned and isolated, the tank only that was tested passed while fill line and vent line failed. Repair work to start soon. (MA)09/02/08: Spoke w/ Eva Matos from Buchbinder & Warren and Dianna Parker from Pretroleum Tank Cleaners with respect to the TTT and all other associated work. Eva Matos confirmed from Dianna Parker that results of TT will be sent to DEC on 09/12/08. (MA) 04/27/09: Eva Matos called to find out status of the spill and PBS cases associated with the facility, following recent faxed documents dated Aug. 14, 2008 and Sept. 19, 2008 respectively. The documents narrate causes of TTF and work order activities carried out by PTC, however the documents failed to provide information related to the soil condition along the fuel and vent lines. I requested Eva Matos to furnish me with detail info. regarding soil condition. Detail of the document can be foud in eDocs. (MA) 04/28/09: PTC representative (Mark Salamack) on behalf of the property owner faxed one page report dated April 28, 2009 related to soil condition around the fuel and vent line. Based on documents submitted with respect to this site, the spill case is hereby close, see eDocs for details. (MA)

Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB10/20/2014 - V. BrevdoThis TTF Spill Case is pertinent to the same property and the same AST in the basement of the residential building as in the Spill Case No. 0904155. Tank failed test on 05/12/2009 and then failed again the 2nd tightness test on 07/09/2009. Records for spill case no. 0904155 reveal that the No. 2 fuel oil tank was removed from concrete vault. "The floor beneath was stained and PTC continued to break up floor. Soils beneath concrete smelled of fuel oil. Two samples were collected."Records for spill case no. 0904155 further state that "Analytical results for samples revealed low level VOCs and SVOCs... A site visit was performed on 9-14-09 with Mark from PTC and Rich Vicari of hospital. PID readins of 9.5 ppm were

detected. I (project manager - V.B.) recommended that some soil removal should take place and new endpoints collected. PTC will restore, epoxy paint and install two new 275 ASTs."On September 18, 2009, DEC project manager for spill case no. 0904155 "inspected the site after PTC dug down beneath the concrete. PID readings of 2 ppm were detected. No significant oil staining or odors." Following completion of remedial work, DEC project manager for spill case no. 0904155 received documentation of cleanup with no significant detection of petroleum. Spill Case No. 0904155 was closed on 07/26/2010. As described above, this spill case (0901728), tank test failure and remediation activities are pertinent to the same tank as in spill case no. 0904155. Remediation completed in September 2009 fully addressed environmental concern related to tank test failures at this property. The Department hereby determined that the closure of this spill case - 0901728 - is appropriate at this time. Remediation is completed. Spill case is closed effective 10/20/2014. V. Brevdo

DEC Memo: 06/28/06-Zhune-Called Marlon Joseph from PTC (718)624-4842 and He gave me the following information: address, name and phone # of the owner: P.O.Box 8496 New york, NY 10150, 212-6637858, Ms.Carole Williams. He said thank capacity is 6000 gals and the product stored is #4 fuel oil, registration shows 6000 gals, #2 fuel oil. The thank is located in the basement in the tank room and it is in used. He said the problem is not in the thank is coming for one of the line so next step they are going to evacuate the tank and retest it. I also called carole Williams I let her know that DEC Is sending a TTF letter to her. She gave me her address: P.O. Box 8525 New York, NY 10150 and Fax # 917-4930477. Carol PH # 212 663785807/6/06- Results of the test was received.Petroleum tank Cleaners tested the tank on june 27.2008. The ullage portion failed the test. 08/28/08- Carol Williams Manager of the building sent a letter and the results of the Tank and system tightness test and the invoice.The invoice described the work that was performed On March 13, 2008: 3/13/2008-Removed existing 3" fill line. Installed new 2" fill line.3/18/2008Re- tested tank and System. Tank passed the testRental 2-275 gallons temporary fuel oil storage tanks from 3/6/08 to 3/18/20083/18/2008 Temp tank Removed. Petroleum Tank Cleaners tested the tank on February 28, 2008

Only the tank passed the test. Petroleum Tank Cleaners tested the system on March, 18, 2008. The system passed test. 09/02/08- Zhune spoke to Mark Salamack from PTC. Mark verbally said he did not see any contamination but we are waiting for a written report. 09/03/08- PTC sent a letter saying the following. The facility is an apartment building that has a 60000 gallon above ground #4 fuel storage tank. This tank was tested on 27, June 2006 for refinancing of the building and failed. In February of this Year PTC was contacted by the manager of the building to investigate and remedy the source of failure. The tank was emptied and all the lines were tested and the tank isolated and tested by itself. The fill line was found to leak, all other lines were good and the tank only test passed. Subsequently the fill line which is entirely above ground was replaced. There was no actual hole in the line, just some loose fittings that, although soaked with oil has not dripped any oil. During this work no contamination. The tank system was tested on 18, March 2008 and passed.

Remarks: ABOVE LIQUID LEAK.

with Joe Zelewski, it is recommended that this spill remain open. Recommend sending back to regional office.8/17/05 - Mike Samouha6/17/10 - added TTF to spill name (JOC)08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo8/24/12 TJDT/C with property owner (Mr. Samouha - 516-773-3094) regarding open spill file. Owner states site has been redeveloped - building footprint has been expanded and is now a diner. Owner states he has performed borings on the property and no contamination has been found. DEC requested copy of the investigation report be mailed to Regional Office for review. Owner states he will copy the report and put it in the mail early next week. DEC requested a current mailing address and was provided the following:135-36 82nd AvenueKew Gardens, NY 11435No PBS record found for this address. Awaiting requested docuemtation. (TD)9/17/12 TJDFile review. Current property owner has submitted a copy of Phase II - Subsurface Investigation Report dated 6/3/10 (on E-DOCS). A total of (5)geoprobe borings were performed on the property prior to the expansion of building footprint - borings advanced to 12-15 ft bgs. All sample results were within RSCO. Site has been redeveloped and structure expanded over former tank field. No historical correspondence in file. File administratively closed based upon documentation submitted by current owner.

Remarks:

(11) 550 GALLON TANKS FAILED AIR PRESSURE TEST, UNREADABLE LEAK RATE, SYSTEM FAILURE, WILL NOTIFY OWNER OF FAILURE.

Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB05/08/2014 - V. BrevdoOn June 25, 2010 Eastmond & Sons Boiler Repair and Welding Services performed a system tightness test on the 10,000 gallon AST oil tank and test failed. Eastmond & Sons then isolated the oil lines and retested, and tank passed the tightness test. The cause of first test failure was a leaking vent line. Eastmon installed a new vent line, retested system on August 23rd 2010 and passed tightness test. Report of the passed test was submitted by Eastmond on May 8, 2014 at the Department's request. Eastmond verified that they found no discharge of oil into

 DEC Memo: 4/23/07 - Raphael Ketani. I spoke to Joe Ostrowski of PTC (718)624-4842 regarding the spill. He said that it was all cleaned friday, 4/20/07, and he is just waiting for the report to arrive on his desk. The spill happened inside the building, not outside as previously reported. He said that there were 2 temporary 275 gal. tanks inside the and the delivery guy overfilled the tanks. The #2 oil came out the guage and onto the floor. He couldn't tell me more until he gets the report.4/24/07 - Raphael Ketani. I made an unannounced site visit. There were very light oil vapors in the lobby. The vapors were light to moderate in the inner lobby at the top of the stairs to the basement. I met Mr. Mejias, the super. He showed me the tank room. The vapors were strong. One fan was working, but there was no where to blow the vapors. I told Mr. Mejias to open the cellar doors to let the vapors escape. I told him to call PTC and have them bring in a second fan to push the vapors directly out the cellar doors. He said he would do this. A large oil tank (PBS#2-453846, 5000 gal., #2 oil) had been removed. It was apparent that there had been significant leakage. The wall under where the fill pipe used to be was black. There was oil staining on the bottom of the wall where the tank used to be and along the bottom of the adjacent wall. The small spill out of the gauge of one of the

**COLUMBIA UNIVERSITY (Continued)**

**S104501528**

temporary tanks had been cleaned up. The floor of the tank room looked intact with no cracks. I took 4 pictures. 4/25/07 - Raphael Ketani. I spoke to Joe Ostrowski of PTC. He said that PTC was responding to only the small 25 gal. He said that the big tank spill was originally caused by the leaking fill pipe. He said that Empire State Fuel is the building oil supplier. I tried contacting Gunther Zagel, Chief Engineer for Columbia University, at a regular phone number, but was unable to reach him. I left a message for him to call me on his cell phone (917) 750-8106 and stated that the tank room needed to be ventilated immediately. As I couldn't get ahold of Mr. Zagel, I tried to contact Nelson Falcon via (212) 854-9300, the building manager. I left a message that the vapors needed to be ventilated immediately and for him to call me back. I wrote a CSL for both Mr. Zagel and Mr. Falcon and submitted it to Randall Austin, Chief Spills Unit Region 2, for approval. Mr. Falcon called me back. I explained to him that the tank room needed to be ventilated immediately. He said he will get someone over there to open up the cellar doors and bring in a second fan. I also told him to have a soil sample taken at the base of the wall that is below the fill pipe and to have the floor power washed. He said he will have this done. Mr. Zagel called me back. He said that he had just gone to the site and had a second fan installed in the tank room and had the cellar doors opened. He said that the big tank that was removed really didn't have a leak of any consequence. He said he saw a little dripping where the fill line connected to the tank, but nothing else. He said that he is conducting a university wide program of tank replacement even if no leaks are apparent. He said he wanted to replace all of the old tanks with new ones on saddles without the vault. Mr. Zagel said that PTC has been hired to clean up the tank room. The CSL went out today. 4/26/07 - Raphael Ketani. Chris Pettinato, Director of Environmental Safety Programs, Environmental Health and Safety Group (212) 854-0108, called to update me on progress cleaning the tank room. He said that PTC was there until 10PM yesterday trying to clean the room. He said they cleaned the base of the walls. He added that they tried to clean the heavily stained wall under the former fill pipe, but they could only remove the residual oil. Mr. Pettinato said that the wall is still heavily stained, even though PTC used detergent on the wall with their powerwash. I asked him whether the wall emits odors. He said it doesn't. However, he said, they dug 2 test pits in the floor, one 2 feet from a wall and 21" by 30", and another 2 feet square that is 3 feet from the northeast corner. He said that no contamination was noted in the pit that is 2 feet from the wall, but the one 3 feet from the corner had contaminated soil and bedrock. Mr. Pettinato said that there isn't much soil below the floor. I told him to open up more of the floor from the corner pit and remove as much soil as possible. I added that he should send soil manifests, pictures, PID readings and so forth. I told him that if some soil can't be removed because they will be too close to a bearing wall, then DEC will need an official letter from a NYS licensed engineer explaining this. Mr. Pettinato said he will remove as much soil as they can find and which is contaminated. 5/3/07 - Raphael Ketani. Mr. Zagel called me today. He said that he had the soil removed down to bedrock in the room. He said this was a depth of 6'. I told him that DEC told Mr. Pettinato on 4/26/07 not to go so deep as to jeopardize the safety of any bearing walls or columns. Mr. Zagel said that he was not concerned about the depth because the bearing walls rested on the bedrock. I

told him not to go further and to just powerwash any oil on the bedrock, collect the oil with absorbent material, take pictures, backfill with compacted fill, put down a concrete slab, and submit a report with the pictures and the manifests and get the tank registered. Mr. Zagel said that he will do all this. Dennis O'Hagan of Columbia University, Facilities, Health & Safety called to find out what DEC needed to close the case. I told him that the bedrock needed to be powerwashed with soap, all liquids collected, backfilling with clean fill and tamping down the material, pouring of a concrete slab, and powerwashing of the wall below the fill pipe. I told him that DEC will need manifests for all of the soil removed, photos of each step in the cleanup process, and a cover letter describing what happened, why it happened, how the situation was handled, and the end result. He said he will make sure the remediation goes the way I described and he will get me the documentation that DEC needs. 5/17/07 - Raphael Ketani. Mr. O'Hagan called to say that everything is cleaned up, and all of the contaminated soil and material will be shipped out next week. He added that the DEC should get a copy of the cleanup report by the end of next week. 5/25/07 - Raphael Ketani. I received a package of documents from Mr. O'Hagan. The package contained a cover letter which explained what had happened at the site, what was done to remove the contamination, and what was done to restore the site to pre-spill conditions. It also contained bills from PTC for work performed, a manifest for the contaminated material that was removed, pictures of the work that was done, a NYC work permit, and a copy of the revised PBS form. Based upon the package of documents that I received today, I am closing the spill case.

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "AUSTIN"3/11/03 - SAMUEL- File available in active unassigned spill files.5/14/04 - TRANSFERRED FROM TOMASELLO FOR REASSIGNMENT - END3/3/05 - Austin - Reassigned to Rahman5/6/2005 Sangesland took over this case. Spoke to consultant who said the #6 fuel oil tank was abandoned in place (filled with cement) back in 1998 (?). Apparently in 1997 or 1998 Sangesland wrote a letter to the owner saying that borings/wells were required around this tank and clean samples would be required to close the case out. Consultant said some boring/well work was done in 1998, but the case was not closed. They will review the data from then and redo anything that needs to be done. A new "Closure Package" will be sent to the DEC "Soon".6/2/2005 Sangesland reviewed a work plan submitted by Ted Yen of Don Carlo Environmental (718-857-3100) The work plan outlined 3 boring locations - 7 feet diagonally off the corners of the tank. Sangesland called Mr. Yen today, the work has already been done and a final report should be submitted "Soon".7/25/2005 Sangesland reviewed a Subsurface Closure Report dated July 12, 2005. All sampling was performed. Minor "hit" were found at Boring 3, however groundwater samples and another boring between the fill port and the building was clean. OK to close

out.Spill is Closed with "No Further Action" - Does NOT meet Stds.5/5/14-Vought-Received call from and spoke to Martin Rosenblatt (martinrosenblatt@hotmail.com Ph:917-972-8105) who formerly worked for NYC Public Adovcates Office and also worked for Mario Cuomo as well. Rosenblatt lives across street from site and is a concerned citizen and was informed of developement associated with open spill 1306324 and had attended a prior public meeting as well. Rosenblatt was referred to Vought by RSE. Rosenblatt has concerns with contamination on-site and Vought summarized scope of work including excavation of site to bedrock with installation of vapor/moisture barrier. Vought also noted lead agency was NYSDOH. Rosenblatt inquired about a Toxics Targeting Report that noted that site was "not up to standards" and requested explanation and Vought provided explanation of CP51 Guidance. Vought requested that Rosenblatt inform DEC if he has any other questions or observations of the site that are of concern (eg vapors).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014	Source: EPA
Date Data Arrived at EDR: 01/08/2015	Telephone: N/A
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 04/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/01/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/08/2015
	Data Release Frequency: Quarterly

### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/21/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/07/2014	Telephone: 703-603-8704
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 04/08/2015
Number of Days to Update: 13	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

### CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/01/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/08/2015

Next Scheduled EDR Contact: 07/13/2015  
Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2014  
Date Data Arrived at EDR: 12/29/2014

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014  
Date Data Arrived at EDR: 12/29/2014  
Date Made Active in Reports: 01/29/2015  
Number of Days to Update: 31

Source: Environmental Protection Agency

Last EDR Contact: 03/31/2015  
Next Scheduled EDR Contact: 07/13/2015  
Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2014  
Date Data Arrived at EDR: 12/29/2014  
Date Made Active in Reports: 01/29/2015  
Number of Days to Update: 31

Source: Environmental Protection Agency

Last EDR Contact: 03/31/2015  
Next Scheduled EDR Contact: 07/13/2015  
Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014  
Date Data Arrived at EDR: 12/29/2014  
Date Made Active in Reports: 01/29/2015

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 02/26/2015
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/15/2015
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 02/26/2015
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/15/2015
	Data Release Frequency: Varies

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/03/2014	Source: Department of the Navy
Date Data Arrived at EDR: 12/12/2014	Telephone: 843-820-7326
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 02/16/2015
Number of Days to Update: 48	Next Scheduled EDR Contact: 06/01/2015
	Data Release Frequency: Varies

## ***Federal ERNS list***

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/29/2014	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 09/30/2014	Telephone: 202-267-2180
Date Made Active in Reports: 11/06/2014	Last EDR Contact: 03/31/2015
Number of Days to Update: 37	Next Scheduled EDR Contact: 07/13/2015
	Data Release Frequency: Annually

## ***State- and tribal - equivalent CERCLIS***

### NY SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 03/25/2015	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 03/26/2015	Telephone: 518-402-9622
Date Made Active in Reports: 04/07/2015	Last EDR Contact: 03/26/2015
Number of Days to Update: 12	Next Scheduled EDR Contact: 06/01/2015
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

Date of Government Version: 03/02/2015	Source: New Jersey Department of Environmental Protection
Date Data Arrived at EDR: 03/04/2015	Telephone: 609-292-8761
Date Made Active in Reports: 03/19/2015	Last EDR Contact: 02/23/2015
Number of Days to Update: 15	Next Scheduled EDR Contact: 06/08/2015
	Data Release Frequency: Varies

## NY VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 11/01/2014	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/19/2014	Telephone: 518-402-9814
Date Made Active in Reports: 01/12/2015	Last EDR Contact: 02/20/2015
Number of Days to Update: 54	Next Scheduled EDR Contact: 06/01/2015
	Data Release Frequency: Varies

## ***State and tribal landfill and/or solid waste disposal site lists***

### NY SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 04/08/2015	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 04/10/2015	Telephone: 518-457-2051
Date Made Active in Reports: 04/30/2015	Last EDR Contact: 04/06/2015
Number of Days to Update: 20	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Semi-Annually

### NJ SWF/LF: Solid Waste Facility Directory

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/31/2014	Source: Department of Environmental Protection
Date Data Arrived at EDR: 02/04/2015	Telephone: 609-984-6741
Date Made Active in Reports: 02/25/2015	Last EDR Contact: 05/06/2015
Number of Days to Update: 21	Next Scheduled EDR Contact: 08/17/2015
	Data Release Frequency: Quarterly

## ***State and tribal leaking storage tank lists***

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### NY LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 03/19/2015	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 03/19/2015	Telephone: 518-402-9549
Date Made Active in Reports: 03/26/2015	Last EDR Contact: 03/19/2015
Number of Days to Update: 7	Next Scheduled EDR Contact: 06/01/2015
	Data Release Frequency: Varies

### NY HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/08/2005	Telephone: 518-402-9549
Date Made Active in Reports: 07/14/2005	Last EDR Contact: 07/07/2005
Number of Days to Update: 6	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### INDIAN LUST R8: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming.

Date of Government Version: 01/28/2015	Source: EPA Region 8
Date Data Arrived at EDR: 01/30/2015	Telephone: 303-312-6271
Date Made Active in Reports: 03/13/2015	Last EDR Contact: 04/27/2015
Number of Days to Update: 42	Next Scheduled EDR Contact: 08/10/2015
	Data Release Frequency: Quarterly

### INDIAN LUST R9: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Arizona, California, New Mexico and Nevada

Date of Government Version: 01/08/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/08/2015	Telephone: 415-972-3372
Date Made Active in Reports: 02/09/2015	Last EDR Contact: 01/08/2015
Number of Days to Update: 32	Next Scheduled EDR Contact: 05/11/2015
	Data Release Frequency: Quarterly

### INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

Date of Government Version: 02/03/2015	Source: EPA Region 10
Date Data Arrived at EDR: 02/12/2015	Telephone: 206-553-2857
Date Made Active in Reports: 03/13/2015	Last EDR Contact: 04/27/2015
Number of Days to Update: 29	Next Scheduled EDR Contact: 08/10/2015
	Data Release Frequency: Quarterly

### INDIAN LUST R7: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Iowa, Kansas, and Nebraska

Date of Government Version: 09/23/2014	Source: EPA Region 7
Date Data Arrived at EDR: 11/25/2014	Telephone: 913-551-7003
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 04/27/2015

	Data Release Frequency: Varies

## **State and tribal voluntary cleanup sites**

### NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

## **State and tribal Brownfields sites**

### NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### **Local Lists of Hazardous waste / Contaminated Sites**

#### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/25/2015	Source: Drug Enforcement Administration

#### NY DEL SHWS: Delisted Registry Sites

A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

Date of Government Version: 03/25/2015	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 03/26/2015	Telephone: 518-402-9622
Date Made Active in Reports: 04/08/2015	Last EDR Contact: 03/26/2015
Number of Days to Update: 13	Next Scheduled EDR Contact: 06/01/2015
	Data Release Frequency: Annually

#### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## **Local Land Records**

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014

Data Release Frequency: Varies

### NJ LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharge occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

Date of Government Version: 03/26/2015

## NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/08/2005	Telephone: 518-402-9549

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

	Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy
Date Data Arrived at EDR: 10/07/2011	Telephone: 505-845-0011

	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 02/23/2015
Number of Days to Update: 25	Next Scheduled EDR Contact: 06/08/2015
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 01/23/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/06/2015	Telephone: 202-564-5088
Date Made Active in Reports: 03/09/2015	Last EDR Contact: 04/09/2015
Number of Days to Update: 31	Next Scheduled EDR Contact: 07/27/2015
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 07/01/2014	Source: EPA
Date Data Arrived at EDR: 10/15/2014	Telephone: 202-566-0500
Date Made Active in Reports: 11/17/2014	Last EDR Contact: 04/17/2015
Number of Days to Update: 33	Next Scheduled EDR Contact: 07/27/2015
	Data Release Frequency: Annually

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 12/29/2014	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 01/08/2015	Telephone: 301-415-7169
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 03/09/2015
Number of Days to Update: 21	Next Scheduled EDR Contact: 06/22/2015
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 02/27/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/27/2015	Telephone: 202-343-9775
Date Made Active in Reports: 03/25/2015	Last EDR Contact: 04/09/2015
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/20/2015
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 01/18/2015	Source: EPA
Date Data Arrived at EDR: 02/27/2015	Telephone: (212) 637-3000
Date Made Active in Reports: 03/25/2015	Last EDR Contact: 03/09/2015
Number of Days to Update: 26	Next Scheduled EDR Contact: 06/22/2015
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

## NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

#### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

#### Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	40073-G8 CENTRAL PARK, NY NJ
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

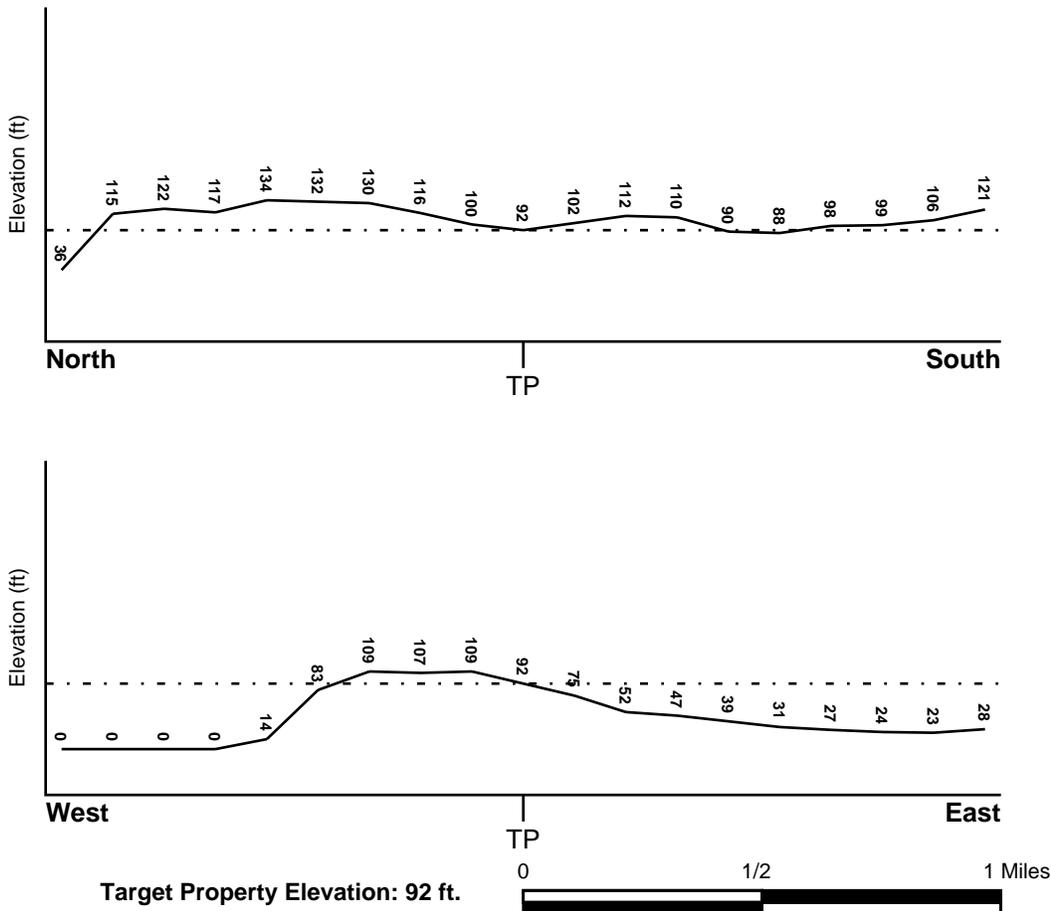

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

Target Property County  
NEW YORK, NY

FEMA Flood  
Electronic Data

## NATIONAL WETLAND INVENTORY

NWI Quad at Target Property  
CENTRAL PARK

NWI Electronic  
Data Coverage  
YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### *Site-Specific Hydrogeological Data\*:*

Search Radius: 1.25 miles  
Status: Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

Era: Paleozoic  
System: Ordovician  
Series: Lower Ordovician and Cambrian carbonate rocks  
Code: OC (*decoded above as Era, System & Series*)

### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Basement	1.490 pCi/L	81%	19%	0%

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Dear Ms. Matamoros:

This is to acknowledge receipt of your Freedom of Information Law request seeking records regarding: **103-107 and 143-158 West 108th Street, New York, NY 10025.**

I have referred your request to the following Records Custodian(s) / Freedom of Information Law Coordinator(s) who may possess the records you are requesting:

Dr. Fawzy Abdelsadek - Region 2  
2 Hunters Point Plaza 4740 21st Street  
Long Island City, NY 11101-5407 (718) 482-4507

You may expect a response to your request by **7/2/2015.**

If I can be of further assistance, please contact me at (518) 402-9522 . Refer to request number **15-1953** , if you write or call.

Sincerely,

Ruth L. Earl  
Records Access Officer

Environmental Compliance

59-17 Junction Boulevard  
Flushing, NY 11373

Dear Ms. Matamoros:

In response to your Freedom of Information Law information request of 5/28/2015, the Division of Air/Noise Enforcement and Policy has searched its files for records pertaining to 103 West 108 Street and:

Has located and enclosed the requested documents.

A total of \_\_\_\_\_ pages of materials have been located, for which we are required to charge a fee of \$.25 per page. Please send your check, in the amount of \$\_\_\_\_\_, to:

Records Access Officer  
NYC Department of Environmental Protection  
59-17 Junction Boulevard, 19<sup>th</sup> Floor  
Flushing, NY 11373

The check should be made payable to **The City of New York** and include the Log # noted below.

Upon receipt of the check, copies of these records will be sent to you.

Does not have the requested documents.

Sincerely,

Geraldine Kelpin  
Director, Air/Noise Enforcement &  
Policy

## Potential Brownfields

### *Site A: 103 West 108th Street*

Located at 103 West 108<sup>th</sup> between Columbus and Amsterdam Avenues this site is a total of 7,569 square feet. Owned by the New York City Department of Housing Preservation and Development, there is currently a 21,800 square foot parking facility on the site. The site is zoned R8B and under the existing zoning, the building could be expanded.

Situated adjacent to a playground, mixed use commercial-residential buildings, and several residential buildings owned by the Manhattan Valley Development Corporation along the northern edge of the block, it has been a garage since at least 1943 when the New York City Department of Building issued a Certificate of Occupancy for this building for a public garage. While there are no documented environmental violations or citations on the site, its long history of automotive repairs and storage signify a likely potential for environmental contamination. Additionally, according to Sanborn Fire Insurance records, this property was used for storage of paints dating back to 1902. Because this site is currently used for auto-related activities and was historically used for paint storage, any redevelopment requiring environmental review must complete a hazardous materials assessment per the City Environmental Quality Review (CEQR) Technical Manual.

### *Site B: 143 West 108th Street*

Located at 143 West 108<sup>th</sup> Street between Columbus and Amsterdam Avenues this site is a total of 10,092 square feet. Owned by the New York City Department of Housing Preservation and Development there is currently a 45,000 square foot parking facility on the site and is zoned R8B. Under current zoning, the existing structure cannot be expanded.

Situated adjacent to a playground, mixed use commercial-residential buildings, and several residential buildings owned by the Manhattan Valley Development Corporation along the northern edge of the block, it has a long history of automotive service. While it is not documented in any state or national databases for environmental hazards, the New York City Department of Buildings has issued several violations that point towards the possibility of environmental contamination on the site. In February of 2010, the property was served with building violations for illegally performing auto repairs with auto fluids, flammable fluids, paint and compression, for illegal storage of combustible flammable paints and thinners used by an illegal auto body shop, for illegal storage of containers in an open area, and for illegal junk storage. As per these activities listed above for which the site has received citations from the Department of Buildings, any redevelopment action requiring environmental review must complete a hazardous materials assessment per the City Environmental Quality Review (CEQR) Technical Manual.

Re: **FOIL Request**  
Project No.: 22304  
103-107 and 143-159 West 108<sup>th</sup> Street, New York NY 10025 Block 1863 Lots 5, 10, 13, 26

Dear Sir or Madam:

Pursuant to the Freedom of Information Law, we are requesting information regarding underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials and/or hazardous materials activities for the above referenced site. Your response can either be faxed to [\(914\) 949-7559](tel:9149497559) or mailed to the address identified above as soon as possible. Please notify me if there are any costs associated with processing this request. In addition, please indicate AKRF's project number (22304) on all correspondence. If you have any questions, please call me at [\(914\) 922-2397](tel:9149222397).

Thank you in advance for your assistance and cooperation

Sincerely,  
AKRF, Inc.

# EDR BUILDING PERMIT REPORT

## About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

## ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

## Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

## EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of AKRF, Inc. on May 18, 2015.

### TARGET PROPERTY

103-107 and 143-159 West 108th Street  
New York, NY 10025

### SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

### RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## GLOSSARY

### General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

## GLOSSARY

### Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

### Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

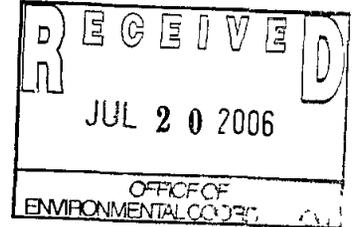

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

AND DEVELOPMENT**  
SHAUN DONOVAN, Commissioner

**Office of Development**  
DIVISION OF PLANNING AND PIPELINE DEVELOPMENT  
100 GOLD STREET NEW YORK, N.Y. 10038

RAFAEL E. CESTERO, Deputy Commissioner  
HOLLY LEICHT, Assistant Commissioner

**NEGATIVE DECLARATION**

**Date:** July 14, 2006

**CEQR No.:** 06HPD024M

**Name:** West 108<sup>th</sup> Street Garages  
(5<sup>th</sup> Amendment to Cathedral Parkway Urban Renewal Plan)

**LOCATION:** 107/07, 137/43, 151/59 West 108<sup>th</sup> Street

**Block/Lots:** Block 1863/Lots 5, 13 and 26

**Location:** Manhattan, CD# 7

**DESCRIPTION OF PROPOSED ACTION**

Enclosed is the Negative Declaration for West 108<sup>th</sup> Street Garages (a 5th Amendment to the Cathedral Parkway Urban Renewal Plan) CEQR No. 06HPD024M. The New York City Housing Preservation and Development is seeking the approval of the Uniform Land Use Procedure (ULURP) actions needed to facilitate the proposed project sales of three existing garages. The ULURP actions are:

1) the disposition of City-owned property, 2) designation of the site as an Urban Development Action Area Plan (UDAAP) project, and 3) an amendment to the Cathedral Parkway Urban Renewal Plan.

These actions will facilitate the sale of three existing garages to the current tenants, to be operated as commercial non-accessory parking garages. These actions will generate a total of 625 garage parking spaces with approximately 30,000 square feet of City-owned property.

Page 2.

**STATEMENT OF NO SIGNIFICANT EFFECT**

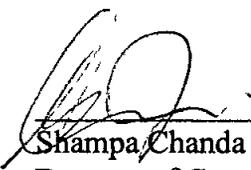

Pursuant to the CEQR rules adopted on June 6, 1991, Executive order 91, the Department of Housing Preservation and Development (HPD) has assumed the role of Lead Agency for the purpose of making the following determination

HPD has determined that the proposed action will have no significant effect on the quality of the environment

**SUPPORTING STATEMENTS**

The above determination is based upon an Environmental Assessment Statement (EAS), dated July 11, 2006 The EAS is on file with HPD and available for public review

This Negative Declaration has been prepared in accordance with Article 8 of the Environmental Conservation Law 6NYCRR Part 617

## EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

**EDR Environmental LienSearch™ Report**

**Deed - Exhibit**

072586/URE/RENEW/DEED 335

THIS INDENTURE made as of the 26<sup>th</sup> day of August, in the year of One Thousand Nine Hundred Eighty Six between THE CITY OF NEW YORK, a municipal corporation, having its principal office at the City Hall, Borough of Manhattan, City and State of New York (hereinafter referred to as the "Grantor"), and Valley Lodge Housing Development Fund Corporation a not-for-profit corporation duly organized pursuant to the provisions of Article XI of the New York State Private Housing Finance Law ("PHFL"), having its principal office at 230/40 West 103rd Street, New York, New York (hereinafter referred to as the "Grantee")

WHEREAS, the Board of Estimate of The City of New York has, by resolution adopted on the 14th day of August, 1986 (Cal. No. 6), annexed hereto as Exhibit A and made a part hereof, duly authorized the conveyance by the Grantor to the Grantee of the premises (hereinafter referred to as the Disposition Area and as further described) for the negotiated price of One (\$1.00) Dollar, pursuant to Article XV of the New York State General Municipal Law.

NOW THEREFORE, WITNESSETH: that the Grantor in consideration of the sum of \$ 1.00 lawful money of the United States and other good and valuable consideration paid by the Grantee does hereby grant and release unto the Grantee its successors and assigns forever all those plots, pieces or parcels of real property, together with the improvements thereon, situate, lying and being in the Borough of Manhattan, County of New York, City and State of New York as such Disposition Area is bounded and described as shown on attached Exhibit B..

1124 351

TO HAVE AND TO HOLD said Premises herein granted unto the Grantee, its successors and assigns forever, as follows:

FIRST: This conveyance is made pursuant to and for the purposes set forth in Article XV of the General Municipal Law of the State of New York (hereinafter referred to as "Article XV of the General Municipal Law").

SECOND: Simultaneously with the delivery of this Deed, the Grantee shall pay any New York City Real Property Transfer Tax and any New York State Real Property Transfer Tax which may be due as a result of this conveyance.

THIRD: The Grantee accepts this Deed subject to:

1. Any state of facts an accurate survey will show.
2. All covenants, easements, and restrictions of record, encroachments and utility easements and rights of way, provided that they do not prohibit the development or proposed use of the Disposition Area.
3. The trust fund provisions of Section 13 of the New York State Lien Law.
4. The provisions of the Urban Renewal Plan (the "Urban Renewal Plan") for the Cathedral Parkway Urban Renewal Area (the "Urban Renewal Area").
5. Any and all municipal liens, taxes, charges, or encumbrances affecting the Premises as of the date of the delivery of this Deed, whether the same be of record on such date or are thereafter listed or recorded; provided, however, that the Grantor agrees that it shall not enforce any such liens, taxes, charges, or encumbrances against the Premises, the improvements erected or to be erected thereon, the Grantee hereunder, any purchaser of the

Premises; except that with respect to real estate taxes, water charges and sewer rents, the Grantor will forward bills, adjusted so that such rents, taxes and charges will be due commencing from the date of the delivery of this Deed.

6. The rights, if any, of tenants or person in possession, if any.

7. Building restrictions and zoning regulations in effect as of the date hereof and any facts disclosed in the City of New York tax and zoning maps and zoning resolutions.

8. The provisions of all laws, codes, statutes, ordinances, acts, rules and regulations of any local, state or federal government, or any agency or subdivision thereof, having jurisdiction or any violation of the same existing at the time of conveyance title.

**FOURTH:** The Grantor and the Grantee agree that, if subsequent to the conveyance hereunder and prior to the completion of the Reconstruction Work (as hereinafter defined):

1. The Grantee (or its successor in interest) shall be in default of or violate its obligations with respect to the covenants and conditions of a certain Development Contract (or "Use Agreement") between the Grantor, acting by and through its Department of Housing Preservation and Development, and the Grantee, as the same may be amended from time to time, entered into for the purpose of carrying out the renovation, rehabilitation and operation of the Premises ("Reconstruction Work"), including any dates specified in the Contract for the commencement and completion of the Reconstruction Work, as such default or violations may be determined by the Commissioner of the Department of Housing Preservation and Development of the City of New York, or his successor (the "Commissioner"); or

2. The Grantee shall fail to comply with the terms, conditions set forth in the Urban Renewal Plan contained in Schedule C annexed to this Agreement, as said Urban Renewal Plan may be amended from time to time. Said covenant shall run for the duration of the controls of said Urban Renewal Plan and shall expire on December 19, 2008.

3. The Grantee (or successor in interest) shall fail to pay real estate taxes, assessments, water and sewer rents and charges on the Premises or any part thereof when due, or shall place any encumbrance or lien upon the Premises in violation of any security interest or mortgage made to finance the Reconstruction Work, or shall suffer any levy or attachment to be made, or any other encumbrance or lien to attach (other than a lien for taxes or City assessments) and such encumbrance or lien shall not have been removed or discharged, or provision satisfactory to the Commissioner made for such removal or discharge, within ninety (90) days after written demand by the Commissioner so to do; or

4. There is a transfer of the ownership of the Premises or any part thereof, including a change with respect to the identity of the parties in control of the entity constituting the Grantee or a change with respect to the degree of control or ownership interest of any individual or entity which is a member, partner or stockholder of the Grantee (or successor in interest) without the prior written approval of the Commissioner; or

5. There is a violation of the Use Agreement, Article XV of the General Municipal Law, or any other terms and conditions of carrying out the Project, which violation is not cured within sixty (60) days after written demand by the Commissioner;

Then in any of these instances the Grantee (or its successor in interest) shall reconvey to the Grantor, without consideration, by bargain and sale deed with covenants, all the Premises together with the buildings and improvements thereon, free and clear of all liens, encumbrances.

In the event that the Grantee (or its successor in interest) shall be obligated to and shall fail to reconvey said Premises in accordance with the provisions herein, the Grantor may institute such actions or proceedings as it may deem advisable including, but not limited to, proceedings to compel specific performance to acquire fee title, free and clear of all liens, encumbrances and mortgages. The Grantor may apply for and shall have the right to have a Receiver appointed without notice to the Grantee in any such action or proceeding.

**FIFTH:** The Grantee, by its execution of this Deed, covenants and agrees for and on behalf of itself, its successors and assigns, and every successor in interest to the Premises or any part thereof, which covenants shall be covenants running with the land;

1. To undertake the operation and management of the Project as described in the Urban Renewal Plan attached hereto as Exhibit C in accordance with all the terms and conditions of the Project Documents (as defined below) for a period of ten (10) years from the date of issuance of a Certificate of Occupancy for the Premises ("Use Agreement Period").

2. To not sell, transfer, change or otherwise dispose of or lease all or substantially all of the all of the Premises, without written approval of the Commissioner of the City's Department of Housing Preservation and Development ("HPD").

3. During the Use Agreement Period or after the Use Agreement Period expires, Grantor may convert the Premises to permanent housing and in such event, Grantor shall permit all remaining tenants of the Premises to remain as tenants by offering all tenants leases for a minimum period of one year. Grantor shall further offer all vacant units upon initial vacancy of such units to persons referred to Grantor by the New York City Human Resources Administration, HPD or an alternative source approved by same and all units shall be subject to the rent stabilization laws of 1969. Rental charges shall be no higher than the applicable

than the applicable maximum amount for Shelter Allowance and all rent increases shall be in accordance with the increases authorized by the Rent Guidelines Board or its successor.

4. To not change, alter or in any manner modify the certificate of occupancy without obtaining written approval from the Commissioner of HPD.

5. To not engage in financing or permit any lien to be placed on the Premises or any portion thereof without written approval from the Commissioner of HPD. Grantee may only utilize the proceeds from such financing for the Project. In any event the Grantee shall promptly notify the Grantor of any encumbrance or lien that has been placed upon or attached to the Premises or any portion thereof, whether by voluntary act of the Grantee or otherwise.

6. To utilize the Premises for person of low income as defined in Article 8 of PHFL.

7. To forever comply with all State and local laws in effect from time to time prohibiting discrimination or segregation by reason of race, religion, sex, color, creed, national origin, ancestry, marital status or disability, in the sale, lease, rental, occupancy or use of the Premises, or any buildings and improvements erected or to be erected thereon or any part thereof.

8. Not to ever effect or execute any agreement, lease, conveyance or other instrument whereby the Premises or any part thereof are restricted upon the basis of race, religion, creed, color, sex, national origin, ancestry, marital status or disability, in the sale, lease or occupancy thereof.

The Grantee agrees that if it should fail to perform or abide by any of the covenants set forth in subsections (1), (2), (3), (4), (5) or (6) of this Section FIFTH, the Grantee (or its successor in interest) shall reconvey to the Grantor, upon demand of the

Grantor and without consideration, by bargain and sale deed with covenants, all the Premises together with the buildings and improvements thereon, free and clear of all liens, encumbrances and mortgages.

The agreements, covenants and provisions heretofore provided in this Deed and all agreements, covenants and provisions in the Agreement shall, as provided in accordance with the Agreement, run in favor of, and be enforceable by, the City, the United States of America, the State of New York, and the owner of any interest in any other land in the Urban Renewal Area, which is subject to the land use requirements and restrictions of the Urban Renewal Plan, against Grantee and each successor and assign and every successor in interest to the Disposition Area and every part thereof, and each party in possession or occupancy of the Disposition Area, or any part thereof, provided however that such agreements and covenants shall be binding on the Grantee itself, and each successor in possession or occupancy, respectively, only for such period as such party shall have title to, or an interest in, or possession or occupancy of, the Disposition Area or any part thereof.

The Grantor is hereby conveying the Premises to the Grantee subject to all of the terms, conditions, provisions and covenants of this Deed, the Urban Renewal Plan (Exhibit C), the Use Agreement, made to finance the Reconstruction Work (collectively referred to as the "Project Documents"); and provided further, that the Grantee by its execution of the instrument of conveyance agrees to comply with all such terms, conditions, provisions and covenants and further agrees on behalf of itself and its successors in interest to perform all of the obligations of the Grantee under the Project Documents.

Notwithstanding the specific recital in this Deed of certain of the covenants and agreements which are provided for in the Project Documents, no covenant nor agreement contained in the Project Documents shall in any respect be merged with this Deed

but each and every such covenant and agreement shall survive this grant and remain in full force and effect. The Grantor agrees to cause the Project Documents to be recorded simultaneously with this Deed.

IN WITNESS WHEREOF, The Grantor has caused this Deed to be executed by the Deputy Commissioner of the Department of General Services in charge of the Division of Real Property and by the City Clerk, and its corporate seal to be hereunto affixed, and the Grantee has fully executed this Deed as of the day and year first above written.

CITY OF NEW YORK  
BOARD OF ESTIMATE  
BUREAU OF SECRETARY

REC'D. AUG 13 1986

REFERRED CALENDAR  
Reg. No. 9880 Vol. No. 151

BOARD OF ESTIMATE  
CITY OF NEW YORK  
(Cal. No. 6)

WHEREAS, The Board of Estimate on March 11, 1971 (Cal. No. 2) approved the Urban Renewal Plan for the Cathedral Parkway Urban Renewal Area ("Urban Renewal Area") pursuant to Article 15 of the General Municipal Law of the State of New York, as amended and supplemented; and

WHEREAS, The City of New York (the "City") has acquired title to certain real property (the "Disposition Area") in said Urban Renewal Area, in accordance with said Urban Renewal Plan; and

WHEREAS, the Disposition Area, designated as Site 3 in said Urban Renewal Plan, is located in the Borough of Manhattan, City and State of New York, and identified as the following block and lots on the Tax Map:

<u>BLOCK</u>	<u>LOTS</u>
1863	Tentative Designation 10 (Formerly known as 10, 11, 12)

WHEREAS, Valley Lodge Housing Development Fund Corporation ("Sponsor") a not-for-profit corporation duly organized pursuant to Article XI of the Private Housing Finance Law, has been designated as a qualified and eligible sponsor by the Department of Housing Preservation and Development ("HPD") to undertake the rehabilitation of the Disposition Area for the development of transitional housing for homeless persons (the "Project"); and

WHEREAS, the sale of the Disposition Area to Sponsor will be

URB/RESO/292a

at the negotiated price of One (\$1.00) Dollar per tax lot, upon the terms and conditions set forth in the deed conveying the Disposition Area and a proposed Use Agreement between the City and the Sponsor without public auction or sealed bids, and

WHEREAS, The Board of Estimate held a public hearing on January 26, 1986 (Cal. No. 14 ) pursuant to Section 197-c of the New York City Charter, considered and approved the favorable recommendation by the City Planning Commission (Report No. C831231HDM, dated January, 4, 1984) of the proposed disposition and use of Site 3 for the rehabilitation of the Disposition Area for the development of transitional housing for homeless persons upon the finding that the proposed application therefore was consistent with the objectives and the provisions of the Urban Renewal Plan; and

WHEREAS, HPD has recommended that the Board of Estimate proceed with the sale of the Disposition Area pursuant to the provisions of Article 15 of the General Municipal Law of the State of New York; and

WHEREAS, The Board of Estimate has held a public hearing pursuant to Article 15 of the General Municipal Law to consider the proposed Disposition Agreement; and

NOW, THEREFORE, BE IT RESOLVED by the Board of Estimate:

1. That the Board of Estimate approves the sale of City-owned land in the Cathedral Parkway Urban Renewal Area designated as Site 3 and known as and by the following New York County Tax Map Block and Lot(s):

BLOCK  
1863

LOT(S)  
Tentative designation 10  
(Formerly known as 10,  
11, 12)

to Sponsor pursuant to Section 507 of the General Municipal Law.

2. That the proposed Use Agreement between the City of New York and the Sponsor has been approved in substantially the form submitted and the Mayor or the Deputy Mayor has been authorized to execute the same, after approval as to form by the Corporation Counsel and the City Clerk (or Acting City Clerk) has been directed to attest the same and affix thereto the seal of the City of New York.

3. That HPD shall file reports on the status of the Project and the anticipated date of the transfer of title to the Disposition Area at the next Board of Estimate meetings following the eighth and sixteenth months from the date hereof.

4. That the Mayor, Deputy Mayor, or Deputy Commissioner or Acting Deputy Commissioner of the Department of General Services, Division of Real Property, is authorized to execute or deliver to the Sponsor a deed of conveyance of title to the Disposition Area, at the negotiated price fixed in the deed, and upon the terms and conditions contained therein, without public auction or sealed bids, after approval as to form by Corporation Counsel and the City Clerk or Acting City Clerk is hereby directed to attest said deed and to affix the seal of the City of New York thereto, provided however, that this authority shall expire two years from the date of the adoption of this resolution.

APPROVED AS TO FORM:

Acting Corporation Counsel

**SECTION A: DESCRIPTION OF URBAN RENEWAL AREA****1. BOUNDARIES OF URBAN RENEWAL AREA**

The boundaries of the Urban Renewal Area are as shown on Project Boundary and Land Acquisition Map, dated August, 1969 and revised April 1980, and are generally as follows:

Central Park West, West 11th Street, Manhattan Avenue, Cathedral Parkway, Amsterdam Avenue, West 114th Street, Broadway, West 116th Street, Claremont Avenue, West 119th Street, Riverside Drive, West 104th Street, Broadway, West 108th Street, Borough of Manhattan, City of New York, and is as described in the attached EXHIBIT B.

**2. NEIGHBORHOOD CHARACTERISTICS:**

The Cathedral Parkway Project is a 28 block area on the Upper West Side of Manhattan, and is adjacent to the Harlem East Harlem Urban Renewal Area.

The area is predominantly residential and its population reflects to a large extent the proximity of the dozen or so major medical and educational institutions in the vicinity.

Two subways and several bus lines serve the area, and provide ready access to midtown Manhattan. The area is also served by two major parks, Central and Riverside, as well as by a large local one --- Morningside Park.

7. CODE ENFORCEMENTS - A vigorous program of Code Enforcement will be undertaken in connection with these buildings not to be acquired.

8. PROPOSED TIME FOR EFFECTUATING OF THIS PLAN - Estimated completion date of project: December 1987

<u>Project Activity</u>	<u>Start</u>	<u>Completion</u>
a) Land Acquisition	April 1969	June 1971
b) Relocation of Site Occupants	July 1969	Sept. 1985
c) Demolition and Site Clearance	June 1971	Oct. 1985
d) Site Preparation Including Installation of Project Improvements	Aug. 1971	Nov. 1987
e) Disposition of Land in Project Area	Aug. 1971	Dec. 1986
f) Completion of Development		Dec. 1987

#### SECTION G: PROVISIONS FOR AMENDING PLAN

##### 1. CHANGES IN APPROVED PLAN

This Urban Renewal Plan may be modified at any time by the City of New York provided that, if modified prior to the termination of the financial obligation of the United States Government under the Loan and Capital Grant Contract, such modification be concurred by the Department of Housing and Urban Development, and provided further that if such modification adversely affects, as determined by the New York Department of Housing Preservation and Development, any land disposed of by the City of New York for redevelopment, written consent to such

ND #: 401

Area: Cathedral Parkway

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

modification must be obtained from the purchaser mortgagee, and/or leasee of such real property or its successors and assigns which consent shall not be unreasonably withheld.

2. MINOR CHANGES:

Where, owing to special conditions, a literal enforcement of these restrictions, in regard to the physical standards of these requirements as referred to in Section C and D of this Urban Renewal Plan would result in unnecessary hardship, involve practical difficulties, or would constitute an unreasonable limitation beyond the intent and purpose of these restricts, the Department of Housing Preservation and Development shall have the power upon appealing in specific cases, to authorize such minor changes of the terms of these restrictions to conform with the intent and purpose of this Urban Renewal Plan, provided that no variation or modification shall be permitted which is less restrictive than applicable State and local codes and ordinances and provided that HUD concurrence is obtained.

EXHIBIT B - BOUNDARY DESCRIPTION

The boundary of the Cathedral Parkway Urban Renewal Project is described as follows:

Lying within the Borough of Manhattan in the City of New York, New York;

Beginning at the intersection of the northerly line of W. 119th Street with the westerly line of Riverside Drive, as these Streets are laid out on the City Map;

Running thence easterly, along said northerly line of W. 119th Street, to its point of intersection with the easterly line of Claremont Avenue;

Thence southerly, along said easterly line of Claremont Avenue, to its point of intersection with the northerly line of W. 116th Street;

Thence easterly, along said northerly line of W. 116th Street, to its point of intersection with the easterly line of Broadway;

Thence southerly, along said easterly line of Broadway, to its point of intersection with the northerly line of W. 114th Street;

Thence easterly, along said northerly line of W. 114th Street, to its point of intersection with the easterly line of Amsterdam Avenue;

Thence southerly, along said easterly line of Amsterdam Avenue, to its point of intersection with the northerly line of Cathedral Parkway;

Thence easterly, along said northerly line of Cathedral Parkway to its point of intersection with the westerly line of Manhattan Avenue;

Thence northerly, along said westerly line of Manhattan Avenue, to its point of intersection with the prolongation of the northerly line of W. 111th Street;

Thence easterly, along the northerly line of W. 111th Street, to its

point of intersection with the easterly line of Central Park West;

Thence southerly, along said easterly line of Central Park West, to its intersection with the prolongation of the southerly line of W. 108th Street;

Thence westerly, along said southerly line of W. 108th Street, to its point of intersection with the easterly line of Broadway;

Thence southerly, along said easterly line of Broadway, to its point of intersection with the southerly line of W. 104th Street.

Thence westerly, along the southerly line of W. 104th Street, to its point of intersection with the westerly line of Riverside Drive.

Thence northerly, along the westerly line of Riverside Drive, to its point of intersection with the northerly line of W. 119th Street, which is the point of place of beginning.

EXHIBIT C

PROPERTY REHABILITATION STANDARDS AND CONTROLS

Cathedral Parkway

I. GENERAL STATEMENT

These standards have been developed to serve as a basis for rehabilitation of residential and non-residential properties according to the Urban Renewal Plan for Cathedral Parkway. The requirements set forth herein supplement all State and Local codes and ordinances applicable to the regulation and control of building construction and renovation and therefore constitute additional controls and requirements. The rehabilitation of any building under the standards contained herein must also be in

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

compliance with all such applicable codes and ordinances. These include but are not limited to:

- a. Chapter 26, Title C Building Code of the Administrative Code of the City of New York;
- b. Chapter 26, Title D the Housing Maintenance Code of the City of New York;
- c. Chapter 713, L. 1929 Multiple Dwelling Law as amended;
- d. Zoning Resolution of The City of New York; 1961 as amended;
- e. Chapter 30, Title B Electrical Code of New York

## II. GENERAL STANDARDS FOR RESIDENTIAL REHABILITATION AND CONSERVATION

All properties designated for rehabilitation and conservation in the Cathedral Parkway Urban Renewal Plan NYR-215 shall comply with the standards set forth in all applicable statutes, codes, and ordinances, as amended from time to time, relating to the use, maintenance, facilities, and occupancy of property. These code standards are hereby incorporated by reference and made part of these property rehabilitation standards.

In addition to compliance with local, statute, codes and ordinance, all properties in the Cathedral Parkway Urban Renewal Area that have been designated by the Urban Renewal Plan shall conform to the following standards.

- a. Properties devoted to residential uses shall be maintained at a level which achieves adequate standards of safety and sanitation.

ND #: 401

Area: Cathedral Parkway

Page 19

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

- b. Exterior physical characteristics of structures are to be aesthetically pleasing and architecturally consistent with the surrounding neighborhood.
- c. All residential structures shall be structurally sound and of a type and quality of construction to permit healthful long-term occupancy.
- d. All open-space areas shall be appropriately landscaped with trees, grass, and/or shrubs, and shall be provided with all necessary paving, drainage and fencing.
- e. To eliminate conditions which are detrimental to public health safety and general welfare of the community; all facilities necessary for adequate heat, light and plumbing must be provided and maintained. Adequate space for occupants are to be provided in all dwelling units for healthful living conditions.
- f. To prevent unsafe conditions to persons or damage to adjacent structures, potential fire hazards and unsafe yard conditions shall be eliminated.
- g. Adequate and properly buffered off-street parking shall be provided whenever possible. Buffer materials shall consist of decorative fencing or plantings sufficient in height and compactness to adequately screen parking areas from adjacent properties.

ND #: 401

Area: Cathedral Parkway

Page 20

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

h. All structures containing dwelling units shall have direct access to a public street.

1. Deterioration or failure of material settlement, cracks, holes, leakage inadequate drainage, rodents, insects or other conditions impairing the safety or sanitation of the building shall be repaired, replaced or corrected in a workman-like manner with materials of good quality and reasonable durability.

**III. GENERAL STANDARDS AND CONTROLS FOR NON-RESIDENTIAL REHABILITATION**

A. These standards are to form a basis for rehabilitation of existing commercial semi-public, industrial and public properties, designated in the Urban Renewal Plan. The reference listed below form the controlling standards.

**B. Introduction**

These Standards are to function as a base for rehabilitating non-residential structures of the area that affect the environment. Existing State Construction Laws together with Local Laws and Building Ordinances that apply remain pertinent. Five major references, however, are:

1. N.Y. State Labor Laws
2. Zoning Resolution of The City of New York
3. N.Y.C. Health Code Chap. 22
4. N.Y.C. Electrical Code
5. Building Code of the Administrative Code of The City of New York

ND #: 401

Area: Cathedral Parkway

Page 21

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

C. Non-Residential Rehabilitation Standards

Rehabilitation standards and requirements are set forth to achieve safe and sound buildings, with all necessary facilities provided in these buildings. These shall be protected from corrosion and decay, resistant to the elements, durable, economically maintainable, of quality workmanship, and of acceptable appearance.

Structural components of a building are to be in sound condition and serviceable for the useful life of the rehabilitated structure. Sagging floors, partitions or stairs, bulging exterior walls, etc. are to be restored to acceptable level plumb position, supported and braced. Individual structural members in a deteriorated condition are to be replaced with sound material. Loose or improper jointing of structural members are to be restored to rigidity.

All buildings and relocation facilities designated in the Urban Renewal Plan for rehabilitation and conservation shall conform with established codes and standards referred to in B above.

All non-residential properties designated in the Urban Renewal Plan for rehabilitation and conservation shall provide for adequately buffered off-street parking and loading whenever possible. Buffer materials shall consist of decorative fencing or plantings sufficient in height and compactness to adequately screen parking areas from adjacent properties. All open space areas shall be appropriately landscaped with trees, grass and/or shrubs, and shall be provided with all necessary paving, drainage, and fencing.

ND #: 401

Area: Cathedral Parkway

Page 22

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

IV. GENERAL EXCEPTION CLAUSE

Where special site or structural condition may make it impractical to carry out one or more of the minimum requirements listed above without severe hardship, a variance may be granted by the HPD providing that no variance shall be permitted which is less restrictive than applicable codes and ordinances.

V. GENERAL COMPLIANCE CLAUSE

Designated properties failing to comply with the above rehabilitation standards and controls as stated in this Urban Renewal Plan shall be subject to acquisition by The City of New York to insure the elimination of substandard conditions.

VI. GENERAL OBJECTIVES FOR REHABILITATION AND CONSERVATION WITHIN THE CATHEDRAL PARKWAY RENEWAL AREA.

The objectives of rehabilitation within the Cathedral Parkway urban renewal area are generally the same as, but not limited to those outlined in the rehabilitation standards above in Sections I-V. These objectives are accessory to and harmonious with the residential character and legal uses under existing law. The objectives are permissible and desirable in the renewal area; however, they are not legally mandatory under existing laws.

- a. All Properties within the Cathedral Parkway urban renewal area and not specifically designated for rehabilitation or conservation in the urban renewal plan should be maintained at a level which is safe, standard, sanitary and which reflects the residential character of the community.

ND #: 401

Area: Cathedral Parkway

1124 377

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

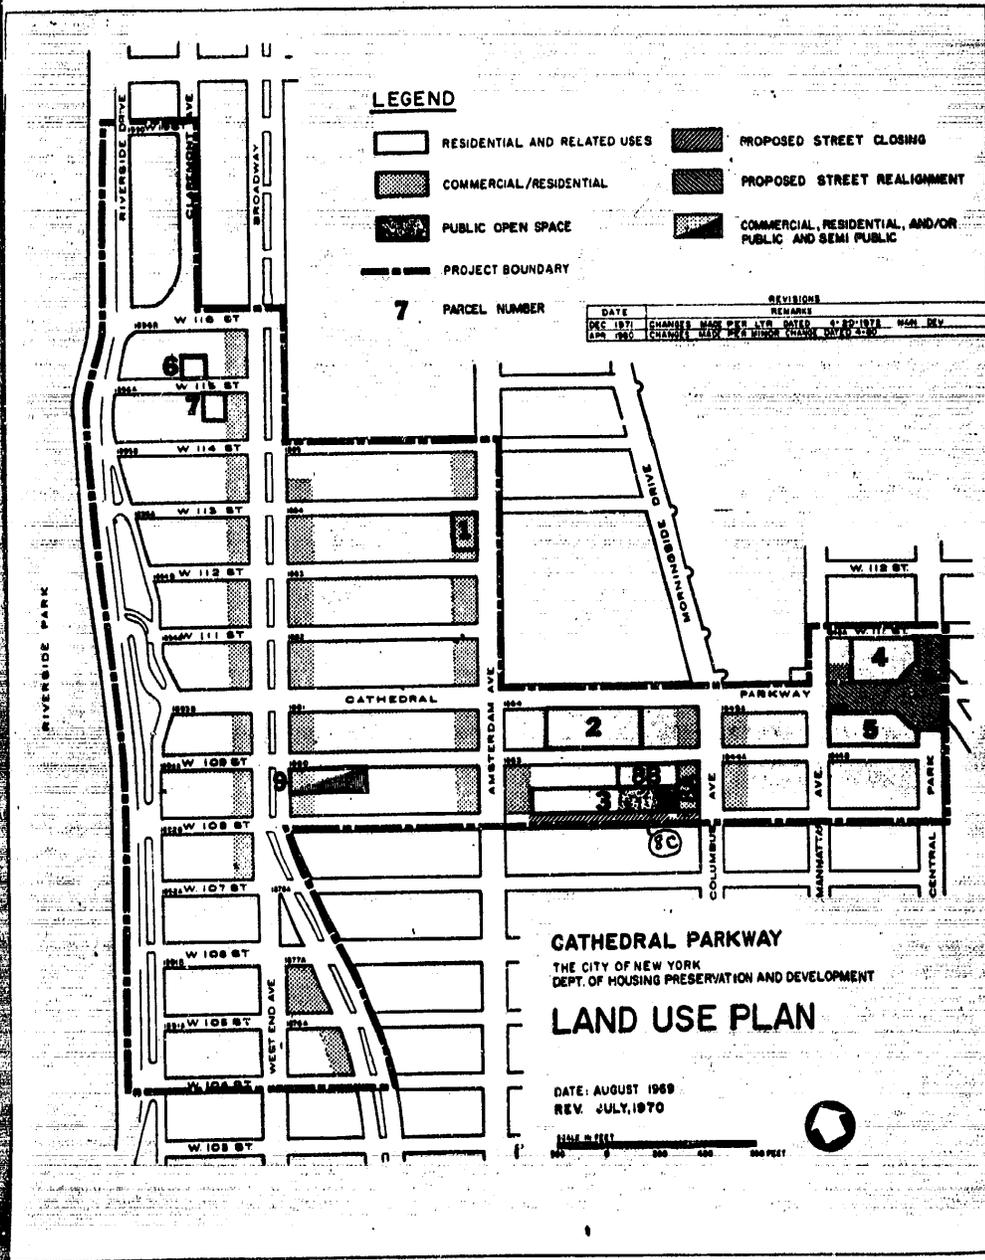

c. Where a property in the urban renewal area is determined by appropriate authorities to be detrimental to the health and safety of its inhabitants, this property is subject to legal proceedings instituted by The City of New York.

ND #: 401

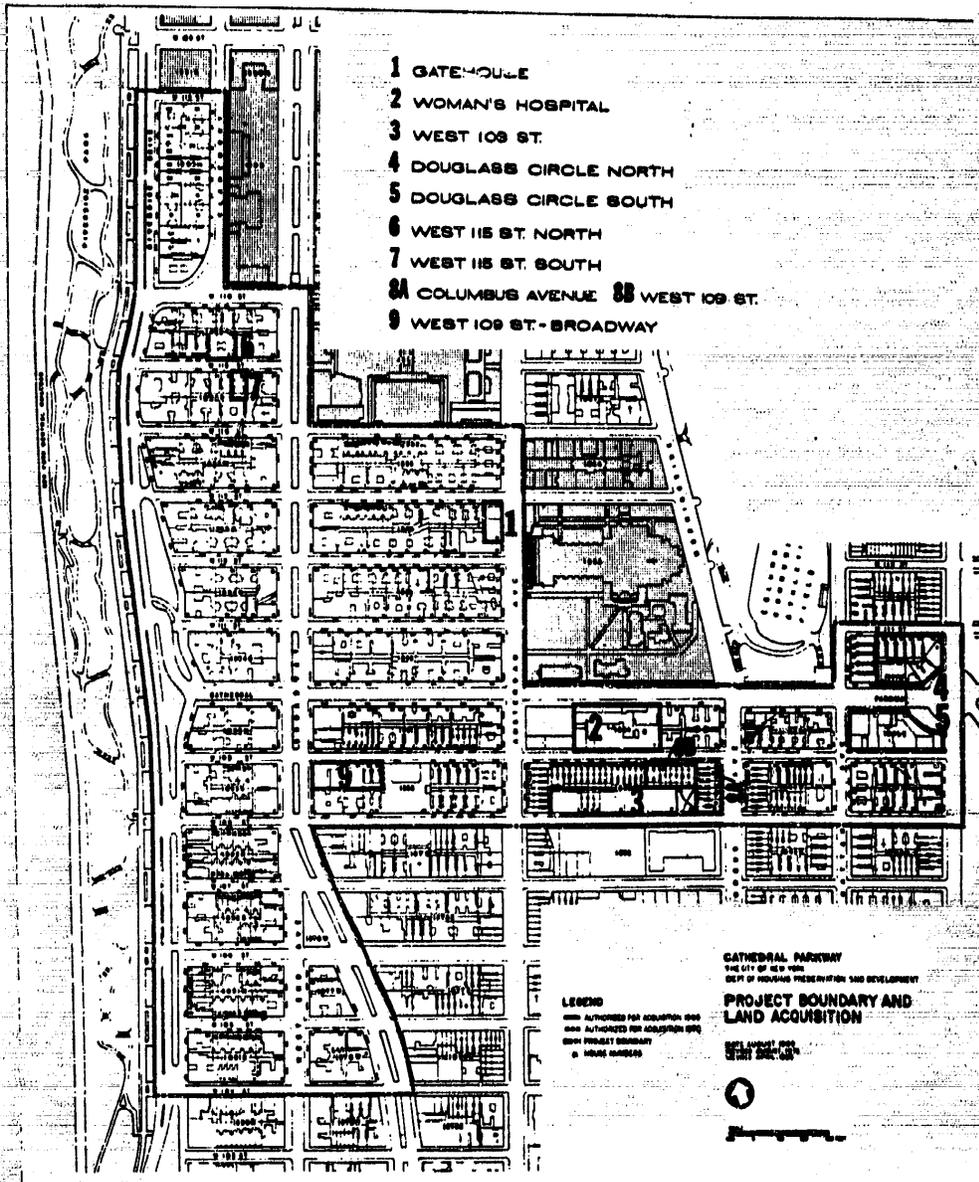

Area: Cathedral Parkway

Page 24

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

The condition of the housing stock, although varied, is generally in a state of decline and consists of many deteriorating old law tenements, incompatible and blighting land uses particularly in the eastern and southern portions of the project area.

The Cathedral Parkway Area has many assets to draw upon which give it potential as one of the prime residential areas in New York City.

**SECTION B: OBJECTIVES OF URBAN RENEWAL PLAN**

The Urban Renewal Plan is intended to create a healthy and attractive urban environment by accomplishing the following specific objectives:

- a. To remove structurally substandard and obsolete building types which are not capable of being improved and successfully integrated into the project.
- b. To eliminate blighting influences which are a detrimental effect upon the residential environment.
- c. To provide for a substantial number of housing units of low or moderate cost on land to be disposed of for residential purposes built to high standards of construction and design.
- d. To undertake a rehabilitation program of sound building types which will strengthen the residential quality of the community and preserve its particular distinctive character.
- e. To improve public and semi-public facilities through expansion and new construction where needed and necessary to serve the

ND #: 401

Area: Cathedral Parkway

ND #: 401

## URBAN RENEWAL PLAN

Area: Cathedral Parkway

diverse needs of the neighborhood.

- f. To improve shopping and related commercial development by concentrating new facilities in choice locations to serve the residents of the area.
- g. To create off-street parking and loading facilities to serve commercial and residential uses, thereby relieving congestion in the streets.
- h. To improve the appearance of the neighborhood through such measures as landscaping, street improvements, and the provision of street furniture.
- i. To improve additional and improved recreation and park facilities including improvement of Morningside Park.
- j. To encourage good building design including harmonious relationship with existing buildings.
- k. Provision of a more efficient street pattern.
- l. Provision of maximum community participation.
- m. To provide a continuous pedestrian overpass system connecting sites 4 (Block 1846S), Site 5 (Block 1845E) and Central Park in order to maximize the safe public pedestrian flow of Neighborhood Development Program Area residents.

SECTION C: GENERAL LAND USE PLAN1. LAND USE MAP

The Land Use Plan Map, dated August, 1969, Revised April, 1983 shows:

- a. All thorough fares and street rights-of-way; the major streets include: Riverside Drive, Broadway, Amsterdam Avenue, Columbus Avenue, Manhattan Avenue, Central Park West, and Cathedral Parkway.

Area: Cathedral Parkway  
April, 1983

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

## b. Proposed land uses.

2. LAND USE PROVISIONS AND BUILDING REQUIREMENTS

References in this Urban Renewal Plan to the Zoning Resolution refer to the provisions of the Comprehensive Amendment to the Zoning Resolution of the City of New York, as published in the City Record on November 10, 1960 and approved by the Board of Estimate on December 15, 1960, as subsequently amended. In any case in which a specific control of this Urban Renewal Plan conflicts with a provision of the Zoning Resolution, the more restrictive of the two shall govern.

a. Permitted Uses

The uses permitted shall be shown on the Land Use Plan and as specified below. Combinations of various permitted uses for given sites shall be as shown on said Map 2. Any change, alteration, extension, or enlargement of industrial or commercial uses, or of structures on properties shown on the Project Boundary and Land Acquisition Maps, not to be acquired shall be subject to approval by the Housing and Development Administration.

Land Use Plan(1) Residential

Residential uses shall be permitted including appurtenant community facility, recreational and park uses.

Appurtenant community facilities and recreational uses as medical offices, health centers, limited recreational facilities, day care centers and uses of a similar nature. New residential uses to serve families of low and moderate income as determined by the New York City Housing and Development

ND #: 401

Area: Cathedral Parkway

ND: # 401

Urban Renewal Plan

Area: Cathedral Parkway

Administration will be developed at densities compatible with residential patterns of the area. A minimum of fifty (50) percent of the total housing units to be built on the sites approved for acquisition by the Board of Estimate shall be for occupancy by families of low income in public housing as defined in the Housing Act of 1937 as amended. It is intended that this housing will be built and managed by the New York City Housing Authority.

The Cathedral Parkway Neighborhood Development Program Area shall contain zoning densities ranging from R7 to R10 as defined in the Comprehensive Amendment to the Zoning Resolution of the City of New York. Further study of specific sites may indicate a change from existing zoning if desirable. In these instances, appropriate application will be made to the City Planning Commission for an amendment to the Zoning Resolution.

(2) Commercial Uses

Appropriate accessory and other retail and service commercial uses will be permitted to support residential development in the project area. New Hotels or other structures for transient re-

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

idential use are not permitted.

**(3) Public and Semi-Public**

Permitted public and semi-public uses shall be those specified in use groups 3 and 4 of the aforementioned Zoning Resolution. Permitted uses in groups 3 and 4 includes schools, libraries community centers, hospitals, and other essential service uses which can function best in a residential environment and are not objectionable in residential areas. Sites designated to support the above uses will be identified at such time as study of the residential patterns indicate their appropriateness.

**(4) Public Open Space**

Permitted uses shall be for playgrounds or similar open space available for public recreational purposes. Sites will be designated to support the above uses at such time as study of the residential patterns indicate their appropriateness. Site 3 within Cathedral Parkway now supports a community wide playground (Block 1863; Lot 17). It is intended that this playground will be maintained on site or relocated within the boundaries of this redevelopment site and/or adjacent sites. Said relocation is contingent upon authorization by the State Legislature, if required.

**3. PLANNING CRITERIA AND STANDARDS****General:**

The analysis of necessary renewal treatment indicated that a substantial portion of existing dwelling units will be conserved or rehabilitated while clearance will be kept to a minimum. The substantial rehabilitation creates a

ND #: 401

Area: Cathedral Parkway

Page 7

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

strong base on which to reinforce the residential character of the project area.

a. Proposed Land Use

(1) Residential:

In order to strengthen the residential character of the plan area, re-developed and rehabilitated residential uses and, to the extent possible, appurtenant commercial and community facilities uses, shall be located within the Land Use Plan Area. Moderate and low rent housing will be developed on sites appropriate for clearance and residential development as needed to meet the needs of low and moderate income families in the area.

(2) Commercial Use:

The land use plan proposes to preserve the commercial character existing along Broadway. In appropriate locations in Rehabilitation Areas, existing commercial uses will be permitted to remain and will be encouraged to modernize. Any new residential development will try to incorporate commercial uses where the need is justified.

(3) Public Improvements:

As part of the total development program, public and semi-public and Public Open Space uses will be provided within the project area as necessary to meet the needs of the community and will be located according to the general location criteria provided in section C2a(3) and C2a(4) above.

ND #: 401

Area: Cathedral Parkway

Page 8

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

**City Wide General Criteria for School Sites**

1. Elementary Schools, minimum of 100,000 square feet.
2. Intermediate to schools, minimum of 120,000 square feet.
3. High Schools, minimum of 10 acres.

Exceptions to the above general criteria are anticipated, particularly in Manhattan, where the scarcity of land and the high site assemblage cost render the above criteria infeasible. It is intended that the standardized criteria, the educational needs of the community and the availability of land will all be considered in proposing any school sites within the Cathedral Parkway Area.

**(4) Circulation System**

The existing functional pattern of streets is generally adequate to meet the circulation needs of the project area. To allow for improved site design, pedestrian and vehicular circulation, certain streets will be modified within the project area in accordance with the appropriate zoning resolution and will take into consideration the objectives of this Plan, community needs, and the policies and requirements of any City agency involved. The closing of West 108th Street beginning 100 feet east of the intersection of Amsterdam Avenue and West 108th Street and extending to Columbus Avenue is proposed in conjunction with the redevelopment of sites 3 and 8.

Anticipated realignments and street closings are shown on the Land Use Plan for Cathedral Parkway.

**General Criteria for Streets:**

1. Local Streets, minimum width of 60' with a 38' roadway
2. A) Major streets, minimum width of 80' with a 50' roadway  
B) Boulevards over 100' have a central mall

ND #: 401

Area: Cathedral Parkway

WD #1 401

Urban Renewal Plan

Area: Cathedral Parkway

## 2. Acquisition and Clearance

All properties (tax lots) within the project area to be acquired for rehabilitation or for clearance and redevelopment, in compliance with Federal standards, are as shown on Project Boundary and Land Acquisition Map, and are listed in exhibit A.

Land is to be acquired:

- a) to remove substandard conditions;
- b) to remove blighting influences;
- c) to provide land for public improvements or facilities;
- d) to promote historic or architectural preservation;
- e) to provide land for redevelopment; and other plan objectives.

## 3. Special Conditions Under Which Properties Not Designated for Acquisition May be Acquired

A continuous and vigorous enforcement of applicable existing laws, codes and ordinances, and regulations of the City of New York will be in effect and in force in all areas designated as "Not to be Acquired Q". All properties shall be required to meet at least the minimum standards contained in these City codes and ordinances and all applicable laws, codes and regulations of the City and State of New York.

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

**SECTION E: LAND DISPOSITION PROVISIONS**

**1. PERMITTED USES**

The uses permitted shall be as shown on the Land Use Plan and as set forth under Section C2 of this Urban Renewal Plan.

**2. CIRCULATION**

A proper relationship between the internal circulation system and major streets, and between proposed uses or buildings and the internal circulation system shall be maintained by means of the following:

- a. Compliance with the provisions of the aforementioned Zoning Resolution governing density, building bulk, off-street parking and loading requirements.
- b. Maximum cooperation with developers on specific design problems which affect the efficiency of the circulation system.
- c. "It is intended that a continuous pedestrian overpass system between sites 4(1846S) site 5 (1845E) and Central Park will be provided to assure safe flow of pedestrians across busy traffic arteries (Central Park West, Cathedral Parkway). This overpass circulation system for public use will be owned and maintained by the City of New York and will form a continuous system with the housing and community facilities proposed on the connected sites."

ND #: 401  
Page 10A

Area: Cathedral Parkway

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

3. REDEVELOPER'S OBLIGATIONS

- a. The regulations and controls set forth in Section C hereof, will be implemented, wherever applicable, by appropriate co-venants or other provisions in agreement for land disposition and conveyance, excuted pursuant thereto.
- b. The redevelopers shall devote the land solely to the uses specified in this Urban Renewal Plan.
- c. The redeveloper shall begin and complete the development of the land for the uses required in this Urban Renewal Plan, and the construction of the improvements agreed upon in the respective land disposition contract within a reasonable time, as determined and set forth in the contract between the City of New York and each developer.
- d. The developers of project land shall not sell, lease, or otherwise transfer such land at any time prior to the completion of the redevelopment thereof without the prior

ND #: 401

Area: Cathedral Parkway

Page 11

ND #: 401

Urban Renewal Plan

Area: Cathedral Parkway

written consent of the City of New York.

e. No covenant, agreement, lease conveyance or other instrument shall be affected or executed by the City of New York, or by a redeveloper or any of his successors or assigns, whereby land in the project area is restricted upon the basis of race, creed, color, or national origin in the sale, lease, use or occupancy thereof. Appropriate covenants running with the land, which will prohibit any such restrictions, shall be included in the disposition instruments.

f. Site plans, architectural drawings, outline specifications and schedules of materials and finishes for the construction of improvements on the land, all in sufficient detail to permit determination of compliance with the intent and controls of the Urban Renewal Plan and the design and character of proposed construction, shall be submitted for review and approval to the Department of Housing Preservation and Development by each redeveloper prior to commencement of construction. Any material changes proposed after receipt of such approval by the Department of Housing Preservation and Development shall be similarly submitted for review and approval. Final drawings shall be submitted to the Department of Housing Preservation and Development after construction for final approval of compliance.

4. LOW AND MODERATE COST HOUSING:

See Section C (2) (a) (1) above.

5. Underground Utility Lines:

Existing overhead telephone and electric lines in the redevelopment area are to be removed and relocated underground.

6. STATEMENT OF URBAN DESIGN OBJECTIVES (See Section B above).7. DURATION OF LAND USE PROVISIONS AND BUILDING REQUIREMENTS

The foregoing land use provisions and building requirements shall remain in effect for a period of forty (40) years from the date of approval of the Urban Renewal Plan by the Board of Estimate of The City of New York, except as provided in Section G hereunder.

SECTION F: OTHER PROVISIONS TO MEET STATE AND LOCAL REQUIREMENTS

The following statement is set forth to indicate compliance with Article XV of the General Municipal Law of The State of New York and, more particularly, Section 502, subdivision 7 thereof:

1. STATEMENT OF PROPOSED LAND USES

See Section C of this Urban Renewal Plan

2. PROPOSED LAND ACQUISITION, DEMOLITION AND REMOVAL OF STRUCTURES

See Section D of this Plan

3. PROPOSED METHODS OR TECHNIQUES OF COMMUNITY DEVELOPMENT

See Section D of this Plan

4. AIR-RIGHTS DEVELOPMENT - None proposed5. PROPOSED PUBLIC, SEMI-PUBLIC, PRIVATE OR COMMUNITY FACILITIES OR UTILITIES - See Section C and D of this Urban Renewal Plan6. PROPOSED NEW CODES AND ORDINANCES AND AMENDMENTS TO EXISTING

CODES AND ORDINANCES - No new codes or ordinances are required to effectuate this Urban Renewal Plan; however, amendments to the existing Zoning Regulation for portions of the project are anticipated

At a Special Term, Part VI, for the Hearing of Condemnation Proceedings of the Supreme Court of the State of New York, First Judicial District, held in and for the County of New York, at the New York County Court House, in the Borough of Manhattan, City of New York, on the 25<sup>th</sup> day of June, 1971.

P R E S E N T :

HON. BIRDIE AMSTERDAM  
J u s t i c e .

-----x  
In the Matter of the Application of The City of New York relative to acquiring title in fee simple absolute to real property required for a project known as

FINAL  
DECREE

THE CATHEDRAL PARKWAY URBAN RENEWAL PROJECT,  
STAGE 2  
within the area generally bounded by Claremont Avenue, West 116th Street, Broadway, West 114th Street, Amsterdam Avenue, Cathedral Parkway, Manhattan Avenue, West 111th Street, 8th Avenue Central Park West, West 108th Street, Broadway, West 104th Street, Riverside Drive and West 119th Street, Borough of Manhattan, City of New York, situated within the Cathedral Parkway Urban Renewal Area.

-----x

The City of New York having heretofore made application to this Court for an order authorizing the condemnation of the real property acquired in the above entitled proceeding and directing that the compensation to the owners of the said real property be determined by this Court without a jury, and said application having been granted by an order of this Court dated December 30, 1969, and entered in the office of the Clerk of the County of New York on the same day; and pursuant to the approval of the Deputy Mayor of The City of New York dated November 25, 1969 (Certificate No. N.D.P-5), title to the real property acquired herein vested in The City of New York on the date of the entry of the order granting the City's application to condemn, to wit: December 30, 1969; and four similar surveys, diagrams, maps or plans of the real property acquired having

11845  
1, 2.  
11846  
3, 4, 5, 7, 8, 9, 10,  
11, 12  
11863  
13, 14, 15, 16, 17,  
18, 19

been prepared and filed upon which was stated the amount or valuation at which each parcel of real property acquired had been assessed for purposes of taxation on the City Tax Rolls for each of the three years preceding the date of the selection of such property; and one of such surveys, diagrams, maps or plans having been duly filed in the office of the agency submitting the departmental estimate, the second in the office of the Corporation Counsel, the third in the office of the Register of the County of New York, and the fourth in the office of the Commissioner of Real Estate; and the Corporation Counsel having duly filed in the office of the Clerk of the County of New York a notice of the pendency of this proceeding, describing the property affected and the persons interested therein, all pursuant to the statutory provisions applicable thereto; and thereafter the Corporation Counsel having caused to be published in the City Record, a corporation newspaper, the notice required by statute, requiring the owners of the property acquired to serve and file their claims and to submit proof of title in the manner prescribed by law; and claims having been filed herein and proofs of title having been submitted to the Corporation Counsel by various parties and persons; and the Corporation Counsel having duly served all parties or attorneys for said purpose appearing with a Note of Issue, designating the County of New York as the County in which the trial of said proceeding should be had; and the proceeding having been regularly brought on for trial before Hon. Birdie Amsterdam, one of the Justices of this Court, at Special Term, Part VI, for the Hearing of Condemnation Proceedings, held in the County of New York, at the New York County Court House, in the Borough of Manhattan, City of New York, on November 9, 1970 adjourned and continued from time to time and concluded on

December 17, 1970, and The City of New York and various claimants having appeared upon the trial in person or by counsel; and the Court having heard the allegations and proofs of the claimants and of The City of New York, and the arguments of counsel; and the Justice presiding at the trial having viewed the property acquired, and the Court after considering the proofs and testimony of The City of New York and the claimants herein, having directed the preparation of the Tentative Decree herein in instructions contained in its decision dated February 9, 1971; and the Corporation Counsel having made a Tentative Decree dated April 12, 1971, containing an estimate of the compensation which should justly be made to the owners of and the persons interested in said property; and the said Justice having annexed to said Tentative Decree, a copy of the Damage Map of the property prepared for and used by the Court upon the trial; and each and every parcel of land having been designated in said Tentative Decree by a Damage Parcel number with reference to said Damage Map; and the names of the owners of and persons interested in said lands and premises, so far as the same could be ascertained, having been stated in the said Tentative Decree, together with the maps annexed thereto having been duly filed in the office of the Clerk of the County of New York on April 12, 1971, for the inspection of whomsoever it might concern; and the Corporation Counsel of The City of New York having caused to be published in the City Record the notice required by statute of such filing of said Tentative Decree, and that objections thereto by any party aggrieved might be filed and served in the manner prescribed by law; and objections thereto pursuant to said notice, having been filed by various parties and persons; and objections having duly come on to be heard before this Court at Special Term, Part VI, for the Hearing

of Condemnation Proceedings on May 13, 1971, concluded on the same day,

N O W, on reading the objections filed by the various claimants and The City of New York; and on reading the testimony, proofs and evidence taken upon the trial, which were filed together with said Tentative Decree; and the Court having heard the arguments of the various parties and counsel herein upon the aforesaid hearing of such objections; and the Court having directed the preparation of the Final Decree herein in instructions contained in its Memorandum decisions dated June 8 and 16th, 1971; it is

ORDERED, ADJUDGED AND DECREED, that the following objections hereby allowed to the extent herewith indicated:

<u>DAMAGE PARCEL NO.</u>	<u>TENTATIVE AWARD</u>	<u>FINAL AWARD</u>
5 & 7	\$302,600 (less \$100. for Gore)	\$302,500.
6	Fixture	7,500.

and the Corporation Counsel is directed to include a fixture award for Damage Parcel No. 2 to the Gulf Oil Company- U.S. a division of Gulf Oil Corporation in the sum of \$900.00, the filing of the tentative decree was waived, pursuant to Chapter 821 of the Laws of 1960, all as more fully shown in the tabular abstract of awards; and it is further

ORDERED, ADJUDGED AND DECREED, that all objections filed herein be and the same hereby are in all respects overruled; and it is further

ORDERED, ADJUDGED AND DECREED, that the amounts set opposite the respective damage parcels in the column headed "FINAL AWARDS," in the tabular abstract annexed to and made part of this Final Decree, amounting in the aggregate to the sum of Two Million, Five Hundred Ninety Thousand, Eight Hundred Seventy Five Dollars and No Cents....\$2,590,875.00

constitute and are the just compensation which the respective owners of said damage parcels are entitled to receive from The City of New York for the taking of the property in this proceeding, which amounts have been ascertained and determined as of December 30, 1969, the date of vesting of title in The City of New York; and it is further

ORDERED, ADJUDGED AND DECREED, that each of the awards as set forth in the said tabular abstract is subject to all taxes, assessments, water rates and other lawful charges due and unpaid and a lien on the property acquired herein on December 30, 1969; and it is further

ORDERED, ADJUDGED AND DECREED, that pursuant to Chapter 1055 Laws of 1960, the owner of a condemned parcel of real property herein who has paid taxes, water rates, sewer rents or other lawful charges covering a period subsequent to the vesting of title therein in The City of New York, shall be reimbursed therefor in the sum which is allocable to the period subsequent to the vesting of title; and it is further

ORDERED, ADJUDGED AND DECREED, that the Comptroller of The City of New York, upon payment of any of the awards herein to the Director of Finance of The City of New York as required by law, shall deduct from such awards all unpaid taxes, assessments, water rates and other lawful charges which are liens upon said awards, and upon making such payment to the Director of Finance of The City of New York The City of New York shall be discharged from any and all liability in respect to said awards so paid.

# The EDR Property Tax Map Report

## EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

## NO COVERAGE

***Thank you for your business.***

## CERTIFICATION

I, Marc Godick, L.E.P., am a Qualified Environmental Professional (QEP), as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of this Phase II Environmental Site Investigation for 103-107 and 143-159 West 108<sup>th</sup> Street. I am responsible for the content of this Site Investigation Report, have reviewed its contents, and certify that this report is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

Marc S. Godick, LEP

## EXECUTIVE SUMMARY

The Phase II Environmental Site Investigation Report (SIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The site investigation described in this document is consistent with applicable guidance.

### Site Location and Current Usage

The Site is identified as Block 1863, Lots 5, 10, 13, and 26 on the New York City Tax Map. Figure 1 shows the Site location. The Property consists of two discontinuous parcels between Columbus and Amsterdam Avenues, fronting West 108<sup>th</sup> Street with a public park between the two parcels totaling approximately 37,845 square feet. A map of the Site boundary is shown in Figure 2.

Currently, the buildings at 103-107, 143, and 151-159 West 108<sup>th</sup> Street are utilized as parking garages and 145-149 West 108<sup>th</sup> Street as an emergency senior citizen shelter. The Site is surrounded primarily by commercial and residential, with numerous new commercial and/or residential buildings under construction.

### Summary of Past Uses of Site and Areas of Concern

AKRF's October 2015 Phase I Environmental Site Assessment (ESA) indicated that historical uses of the Site included an automobile repair facility at 103-107 West 108<sup>th</sup> Street and a Cadillac service facility at 143 West 108<sup>th</sup> Street. It is also possible that vehicle maintenance activities were conducted at 151-159 West 108<sup>th</sup> Street. Petroleum storage tanks were identified on historical maps at three of the four lots: two gasoline storage tanks at 103-107 West 108<sup>th</sup> Street in 1951, three 550-gallon buried gasoline tanks at 143 West 108<sup>th</sup> Street between 1951 and 2005, and four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street between 1951 and 2005.

The following Recognized Environmental Concerns (RECs), identified during the Phase I ESA, were considered Areas of Concern (AOCs) for this investigation:

1. Potential underground storage tanks (USTs) and former aboveground storage tanks (ASTs) were noted as follows:
  - a. 103-107 West 108<sup>th</sup> Street – Historical Sanborn maps identified two gasoline tanks at 103-107 West 108<sup>th</sup> Street in 1951. A decommissioned 275-gallon AST with no associated piping was noted in the partial basement of the 103-107 West

- 108<sup>th</sup> Street building. No record of its closure, removal, or regulatory status was available.
- b. 143 West 108<sup>th</sup> Street – Historical Sanborn maps identified three 550-gallon gasoline USTs at 143 West 108<sup>th</sup> Street between 1951 and 2005. The operator, Mr. Schoemberg, indicated fill ports were previously located in the middle of the first floor leading to the basement of each building. Mr. Schoemberg was unaware of tank closure or removal.
  - c. 145-149 West 108<sup>th</sup> Street – New York City Department of Buildings (NYCDOB) records identified an oil burner permit dated 1958.
  - d. 151-159 West 108<sup>th</sup> Street – Historical Sanborn maps identified four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street between 1951 and 2005. During Site reconnaissance, gauges for four tanks were observed. Mr. Schoemberg indicated fill ports were previously located in the middle of the first floor leading to the basement of each building. Mr. Schoemberg was unaware of tank closure or removal.
2. Historical uses of the existing buildings included an automobile repair facility at 103-107 West 108<sup>th</sup> Street and a Cadillac service facility at 143 West 108<sup>th</sup> Street, based on Sanborn Maps and interviews. Based on Sanborn Maps and interviews, there is also a potential for prior use as vehicle maintenance at 151-159 West 108<sup>th</sup> Street. In addition to the tanks mentioned above, additional tanks and hydraulic lifts may also be present beneath the basement floor or where the vehicle maintenance may have been performed.
  3. Chemical and material storage noted during inspections including: propane and concrete at 143 West 108<sup>th</sup> Street; plastic drums, bags, and smaller containers of paint, ammonia, floor stripper, floor finish, salt, and soaps at 145-149 West 108<sup>th</sup> Street; and bags of concrete, five-gallon containers of silicone coating and paint, and propane tanks stored on the roof, as well as a 55-gallon drum of unknown material with some oily residue on the top located in the basement of 151-159 West 108<sup>th</sup> Street. Based on the observed storage and uses, undocumented discharges may have affected subsurface conditions at the Site.
  4. A sump with unconfirmed discharge point was observed in the basement of 143 West 108<sup>th</sup> Street building in the southeastern portion of the Site.
  5. Potential buried debris from former on-site structures that could contain historic fill of unknown origin and/or abandoned USTs.
  6. Suspect asbestos-containing material (ACM) and lead-based paint (LBP) are likely

present in building materials. These materials are expected to be addressed separately and prior to any remedial action in accordance with applicable federal, state, and local regulations and are not discussed in this SIR.

### **Summary of the Work Performed under the Phase II Environmental Site Investigation**

The following activities were performed as part of the Phase II Environmental Site Investigation:

1. Conducted a geophysical survey and utility mark-outs;
2. Installed 17 soil borings throughout the Site and collected 22 soil samples from the borings for chemical analysis;
3. Installed eight temporary soil vapor monitoring points throughout the Site and collected eight soil vapor samples from the points and one ambient air sample for chemical analysis; and
4. Installed three groundwater monitoring wells in basements throughout the Site, and collected three groundwater samples from the wells for chemical analysis.

### **Summary of Hydrogeological Findings**

The following geologic and hydrogeologic conditions were noted by the investigation for the Site:

1. Elevation of the Site ranges from approximately 90 to 105 feet above mean sea level (msl), sloping slightly down toward the east.
2. Groundwater elevation ranged between 84 and 89 feet (North American Vertical Datum of 1988) at the Site.
3. Groundwater flow is generally easterly beneath the Site.
4. Depth to apparent bedrock at the Site varied from approximately 5 to 22 feet below basement grade.
5. The stratigraphy of the Site, from the surface down, consists of up to 7 feet of historic fill comprising sand, silt, brick, and concrete, underlain by native soil consisting of fine to medium sand, silt, followed by weathered bedrock.

### **Summary of Environmental Findings**

1. The results of the soil sampling completed during the investigation showed volatile organic compounds (VOCs) were detected in 12 of the 22 soil samples, as well as in

QA/QC samples including two blind duplicates, two trip blanks and the two associated aqueous field blanks. The VOCs 1,2-dichlorobenzene, 1,2-dichloroethane, acetone, carbon disulfide, cyclohexane, ethylbenzene, isopropylbenzene, and o-xylene were detected in one or more of the soil samples. Benzene (0.13 milligrams per kilogram (mg/kg)), M,p-xylene (0.41 mg/kg), and Toluene (1.5 mg/kg) exceeded their respective Unrestricted Use SCOS. No VOCs were detected at concentrations exceeding the RRSCOs.

Up to 18 semi-volatile organic compounds (SVOCs) were detected in all 22 soil samples with a maximum total SVOC concentration of 28 mg/kg. SVOCs exceeding the USCOs and RRSCOs included benzo(a)anthracene (2.2 mg/kg), benzo(a)pyrene (2.4 mg/kg), benzo(b)fluoranthene (3.1 mg/kg), dibenz(a,h)anthracene (0.63 mg/kg), and indeno(1,2,3-c,3')pyrene (2.5 mg/kg). Chrysene (2.3 mg/kg) and benzo(k)fluoranthene (1.1 mg/kg) were detected above their respective USCOs, but below their respective RRSCOs. All SVOC detections in the remaining soil samples were at concentrations below both the USCOs and RRSCOs.

A review of the analytical results indicates that up to 22 of the 23 TAL metals analyzed were detected in all 22 soil samples analyzed. Nine metals, including arsenic (max of 18.5 mg/kg), barium (max of 421 mg/kg), copper (max of 88.5 mg/kg), cadmium (max of 6.3 mg/kg), hexavalent chromium (1.9 mg/kg in W108-SB-12 (0-2)), lead (max. of 1,990 mg/kg), mercury (max. of 0.46 mg/kg), nickel (max. of 38.7 mg/kg), and zinc (max. of 679 mg/kg), exceeded their respective USCOs.

Up to four pesticides were detected in four of the 22 soil samples. Dieldrin (0.0088 mg/kg), 4,4'-DDT (maximum concentration of 0.019 mg/kg), 4,4'-DDD (maximum estimated concentration of 0.0051 mg/kg) and 4,4'-DDE (at 0.0052 mg/kg) exceeded their respective USCO. No pesticides exceeded their respective RRSCOs in any samples. There were no detections of polychlorinated biphenyls (PCBs), with the exception of an estimated concentration of 0.057 mg/kg in W108-12(0-2), which is below the USCO and RRSCO for PCBs.

The results of the groundwater sampling showed that only one VOC, isopropylbenzene, was detected at a concentration of 17 micrograms per liter ( $\mu\text{g/L}$ ), exceeding the AWQS of 5  $\mu\text{g/L}$ . Six SVOCs, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, and indeno(1,2,3-cd)pyrene, were detected at concentrations above their respective AWQS in groundwater samples. The metals manganese and sodium were detected above the AWQS in all

- three dissolved samples. These metals are indicative of groundwater quality in Manhattan. No PCBs or Pesticides were detected in the groundwater samples.
6. The results of the soil vapor sampling showed up to 27 VOCs were detected in the 8 samples. No VOCs were detected above the air guideline values (AGVs) established by the New York State Department of Health (NYSDOH). PCE was detected in six of the eight soil vapor samples at a maximum concentrations of 29 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ), below the AGV of  $30 \mu\text{g}/\text{m}^3$ . TCE was not detected in any of the soil vapor samples. VOCs associated with petroleum [including benzene, toluene, ethylbenzene, xylenes (collectively referred to as BTEX), 1,2,4- and 1,3,5-trimethylbenzene, cyclohexane, n-heptane, n-hexane, 4-ethyltoluene, and 2,2,4-trimethylpentane] were detected at concentrations up to  $1,400 \mu\text{g}/\text{m}^3$ . Other solvent-related VOCs [including acetone, chloroform, and methyl ethyl ketone (MEK)] were detected at concentrations up to  $73 \mu\text{g}/\text{m}^3$ . Low level VOC concentrations were also noted in the ambient air sample.
  7. The investigation findings identified the presence of petroleum contamination, in both the western portion of the Site (151-159 West 108<sup>th</sup> Street) and the eastern portion of the Site (103-107 West 108<sup>th</sup> Street) likely attributed to former on-site uses. Stained soil and high photoionization detector (PID) readings were observed, and the New York State Department of Environmental Conservation (NYSDEC) was notified and Spill Numbers 1603624 and 1603667 to 151-159 West 108<sup>th</sup> Street and 103-107 West 108<sup>th</sup> Street, respectively. While elevated PID readings were observed at the borings located at 143 West 108<sup>th</sup> Street (SB-8, SB-9, and SB-10), no other evidence of petroleum contamination was observed such as staining, odors, or elevated VOC and SVOC analytical results.

A draft Supplemental Phase II investigation plan has been developed in consultation with OER. This plan will be implemented after OER obtains approvals from NYSDEC. A remediation action plan should be prepared in conjunction with the Site redevelopment plans to address any residual petroleum contamination, soil excavation and stockpiling, soil disposal and transportation; groundwater handling/treatment; dust control; and contingency measures should petroleum storage tanks or other contamination be unexpectedly encountered. The plan should also include measures for worker and community health and safety monitoring/protection during remedial activities requiring ground disturbance, including personal protective equipment, dust control, air monitoring, and emergency response procedures.

# PHASE II ENVIRONMENTAL SITE INVESTIGATION REPORT

## 1.0 SITE BACKGROUND

AKRF prepared this Phase II Environmental Site Investigation (ESI) Report (SIR), on behalf of the New York City Office of Environmental Remediation (NYCOER), for the 103-107 and 143-159 West 108<sup>th</sup> Street properties in New York, NY (Site). This SIR summarizes the nature and extent of contamination identified during the investigation performed on July 11 through July 14 and July 29, 2016. The goal of this SIR was to determine whether past onsite and offsite activities have adversely affected the Site. Investigation activities were conducted in accordance with the Site-Specific: 1) Phase II Environmental Site Investigation Work Plan (Work Plan); 2) Health and Safety Plan (HASP) outlining the safety procedures to be employed to protect on-site personnel and the public during the site work; and 3) Quality Assurance Project Plan (QAPP) that describes the protocols and procedures that will be followed during the implementation of the Work Plan, all prepared in March 2016. The USEPA approved the Work Plan, HASP, and QAPP in June 2016.

## 2.0 BACKGROUND

### 2.1 Site Description

The Site is located at 103-107 and 143-159 West 108<sup>th</sup> Street in Manhattan, New York and is identified as Tax Block 1863, Lots 5, 10, 13, and 26. The approximate 37,845-square feet Site consists of two discontinuous parcels separated by a public park. The buildings at 103-107, 143, and 151-159 West 108<sup>th</sup> Street are utilized as parking garages, and 145-149 West 108<sup>th</sup> Street is utilized as an emergency senior citizen shelter. The Site is bordered by: West 108<sup>th</sup> Street followed by the Booker T Washington Junior High School and a Time Warner Cable garage to the south; residential and commercial buildings, followed by Columbus Avenue to the east; mixed-use retail and residential followed by Amsterdam Avenue to the west; and residential buildings followed by West 109<sup>th</sup> Street to the north.

### 2.2 Previous Environmental Investigations

Available information about the Site status and history was limited to a Phase I Environmental Site Assessment (ESA) conducted by AKRF in October 2015. The Phase I ESA identified several on-site conditions that may have affected the Site. The Site was occupied prior to 1902 by dwellings at 143-159 West 108<sup>th</sup> Street, and a paints and storage building at 103-107 West 108<sup>th</sup> Street. The historical buildings were demolished at various times between 1902 and

1920, with the exception of the building at 145 West 108<sup>th</sup> Street, which was demolished around 1980. The current buildings located at 103-107 West 108<sup>th</sup> Street, and 149-159 West 108<sup>th</sup> Street were constructed circa 1951.

Historical uses of the Site included an automobile repair facility at 103-107 West 108<sup>th</sup> Street and a Cadillac service facility at 143 West 108<sup>th</sup> Street. It is also possible that vehicle maintenance activities were conducted at 151-159 West 108<sup>th</sup> Street. Petroleum storage tanks were identified on historical maps at three of the four lots: two gasoline storage tanks at 103-107 West 108<sup>th</sup> Street in 1951, three 550-gallon buried gasoline tanks at 143 West 108<sup>th</sup> Street between 1951 and 2005, and four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street between 1951 and 2005.

The surrounding area was mixed-use throughout its history, with mostly commercial and residential uses, some auto-related uses and factories in the mid-20<sup>th</sup> century, and some educational uses in the middle and late 20<sup>th</sup> century. Land uses in the surrounding area with the potential to affect subsurface conditions beneath the Site included factories, a paint and storage facility, auto repair, and garages and filling stations with gasoline underground storage tanks (USTs), including a historic gasoline tank noted in the current park between the Site lots.

No known assessments of the overall on-site soil, groundwater, or soil vapor had been conducted. Based on the historical and potential on-going presence of petroleum on the Site, it is possible that Site soil, groundwater, and/or soil vapor have been impacted as a result of historic operations.

### **2.3 Areas of Concern**

The following Recognized Environmental Concerns (RECs), identified during the Phase I ESA, were considered Areas of Concern (AOCs) for this investigation:

1. Potential USTs and former aboveground storage tanks (ASTs) were noted as follows:
  - a. 103-107 West 108<sup>th</sup> Street – Historical Sanborn maps identified two gasoline tanks at 103-107 West 108<sup>th</sup> Street in 1951. A decommissioned 275-gallon AST with no associated piping was noted in the partial basement of the 103-107 West 108<sup>th</sup> Street building. No record of its closure, removal, or regulatory status was available.
  - b. 143 West 108<sup>th</sup> Street – Historical Sanborn maps identified three 550-gallon gasoline USTs at 143 West 108<sup>th</sup> Street between 1951 and 2005. The operator, Mr. Schoemberg, indicated fill ports were previously located in the middle of the

- first floor leading to the basement of each building. Mr. Schoemberg was unaware of tank closure or removal.
- c. 145-149 West 108<sup>th</sup> Street – New York City Department of Buildings (NYCDOB) records identified an oil burner permit dated 1958.
  - d. 151-159 West 108<sup>th</sup> Street – Historical Sanborn maps identified four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street between 1951 and 2005. During Site reconnaissance, gauges for four tanks were observed. Mr. Schoemberg indicated fill ports were previously located in the middle of the first floor leading to the basement of each building. Mr. Schoemberg was unaware of tank closure or removal.
2. Historical uses of the existing buildings included an automobile repair facility at 103-107 West 108<sup>th</sup> Street and a Cadillac service facility at 143 West 108<sup>th</sup> Street, based on Sanborn Maps and interviews. There is also a potential for historic vehicle maintenance activities at 151-159 West 108<sup>th</sup> Street. In addition to the tanks mentioned above, additional tanks and hydraulic lifts may also be present beneath the basement floor or where the vehicle maintenance may have been performed.
  3. Chemical and material storage noted during inspections including: propane and concrete at 143 West 108<sup>th</sup> Street; plastic drums, bags, and smaller containers of paint, ammonia, floor stripper, floor finish, salt, and soaps at 145-149 West 108<sup>th</sup> Street; and bags of concrete, five-gallon containers of silicone coating and paint, and propane tanks stored on the roof, as well as a 55-gallon drum of unknown material with some oily residue on the top located in the basement of 151-159 West 108<sup>th</sup> Street. Based on the observed storage and uses, undocumented discharges may have affected subsurface conditions at the Site.
  4. A sump with an unconfirmed discharge point was observed in the basement of the 143 West 108<sup>th</sup> Street building in the southeastern portion of the Site.
  5. Potential buried debris from former on-site structures that could contain historic fill of unknown origin and/or abandoned USTs.
  6. Suspect asbestos-containing material (ACM) and lead-based paint (LBP) are likely present in building materials. These materials are expected to be addressed separately and prior to any remedial action in accordance with applicable federal, state, and local regulations and are not discussed in this SIR.

### **3.0 PROJECT MANAGEMENT**

The following personnel conducted the Phase II ESI at the Site.

#### **3.1 Project Director**

The project director was responsible for the general oversight of all aspects of the project, including scheduling, budgeting, data management, and decision-making regarding the field program. The project director communicated regularly with all members of the AKRF project team and NYCOER, to ensure a smooth flow of information between involved parties. Marc Godick, LEP served as the project director for this project.

#### **3.2 Project Manager**

The project manager was responsible for directing and coordinating all elements of the Work Plan. They prepared reports and participate in meetings with the contractors, client, the USEPA, and/or NYCOER. Deborah Shapiro served as the project manager for this project.

#### **3.3 Alternate Project Manager**

The alternate project manager was responsible for directing and coordinating all elements of the Work Plan in the absence of the project manager. They prepared reports and participate in meetings with the contractors, client, the USEPA, and/or NYCOER. Kenneth Wiles served as the alternate project manager for this project.

#### **3.4 Field Team Leader**

The field team leader was responsible for supervising the daily sampling and health and safety activities in the field and ensured adherence to the Work Plan and HASP. They reported to the Project Manager or Alternate Project Manager on a regular basis regarding daily progress and deviations from the Work Plan. The field team leader is a qualified, responsible person, able to act professionally and promptly during investigation activities. Elizabeth Matamoros served as the field team leader for this project.

#### **3.5 Project Quality Assurance/Quality Control Officer**

The Quality Assurance/Quality Control (QA/QC) Officer was responsible for adherence to the QAPP. They reviewed the procedures with all personnel prior to commencing any fieldwork and, if necessary, conducted periodic site visits to assess implementation of the procedures. The QA/QC officer was also responsible for reviewing analytical data reports and associated QA/QC sampling data. Stephen Malinowski, QEP,

served as the QA/QC officer for this project.

### **3.6 Laboratory Quality Assurance/Quality Control Officer**

The laboratory QA/QC officer was responsible for quality control procedures and checks in the laboratory and ensuring adherence to laboratory protocols. They tracked the movement of samples from the time they are checked in at the laboratory to the time that analytical results are issued. They conducted a final check on the analytical calculations and signed off on the laboratory reports. Ray Frederici of TestAmerica Laboratories, Inc. (TestAmerica) of Edison, New Jersey served as the laboratory QA/QC officer. TestAmerica performed soil, groundwater, and soil vapor laboratory analyses.

## 4.0 SITE INVESTIGATION ACTIVITIES

The following activities were performed as part of the Phase II ESI:

1. Conducted a geophysical survey and utility mark-outs;
2. Installed 17 soil borings throughout the Site and collected 22 soil samples from the borings for chemical analysis;
3. Installed eight temporary soil vapor monitoring points throughout the Site and collected eight soil vapor samples from the points and an ambient air sample for chemical analysis; and
4. Installed three groundwater monitoring wells in basements throughout the Site, and collected three groundwater samples from the wells for chemical analysis.

A map showing the locations of the soil borings, groundwater monitoring wells, temporary soil vapor monitoring points, and ambient air sample is provided as Figure 2. A photographic log of the fieldwork activities is provided as Appendix A. All field work was recorded in a field log book.

### 4.1 Geophysical Survey and Utility Mark-Outs

On July 11, 2016, a geophysical survey was conducted throughout the Site, by Enviroprobe Service, Inc. (Enviroprobe) of Mount Laurel, New Jersey, to clear the proposed drilling locations for subsurface utilities and to locate other potential buried structures. The geophysical survey included both electromagnetic and ground penetrating radar methods. Linear anomalies consistent with underground utilities were identified and marked with spray paint. No anomalies were identified. A geophysical survey report was prepared by Enviroprobe and is attached in Appendix B.

Utility mark-outs are required by law. Cascade Technical Services, LLC (Cascade) of Lynbrook, New York, the drilling subcontractor, called Dig Safely New York at least three days prior to the start of intrusive work.

### 4.2 Soil Boring Installation

Seventeen soil borings were advanced throughout the Site between July 11 and July 14, 2016 by Cascade. A limited access retrofitted track-mounted direct-push probe unit was used to advance 14 soil borings in accessible basement areas and one exterior location of the Site. The remaining three boring locations were inaccessible for the drill rig and were advanced with a hand auger. Soil borings were advanced to bedrock refusal or the soil/groundwater interface, whichever occurred first and ranged from approximately 2 to 16 feet below grade. Seven borings

were advanced within the basement of the parking garage located at 151-159 West 108<sup>th</sup> Street (SB-1, SB-2, SB-3, SB-4, SB-13, SB-14 and SB-15); one boring was advanced in the basement (SB-6) and one boring (SB-5) was advanced in the exterior portion of 145-149 West 108<sup>th</sup> Street; four borings were advanced in the basement of the parking garage located 143 West 108<sup>th</sup> Street (SB-7, SB-8, SB-9, and SB-10); and two borings were advanced in the partial basement (SB-12 and SB-12B) and two boring were advanced in the first floor of the parking garage located 103-107 West 108<sup>th</sup> Street (SB-11 and SB-12C). At many of the boring locations, due to shallow refusal, multiple attempts were advanced to reach target depths and in pursuit of groundwater, by stepping out approximately 5 feet from the initial location. The boring locations were established throughout the Site to achieve coverage and investigate the AOCs.

Soil cores were obtained using a stainless steel, macro-core sampler with an internal acetate liner. Soil cores were field-screened using a photoionization detector (PID), which measures relative concentrations of volatile organic compounds (VOCs) in the soil. The PID was calibrated at the beginning of each field day with 100 parts per million (ppm) isobutylene calibration gas. At each boring location, AKRF field personnel recorded and documented subsurface conditions.

Boring logs were prepared by an AKRF environmental scientist and are attached in Appendix C. Soil cores from the borings were obtained continuously and were screened for evidence of contamination using both visual inspection and a calibrated PID. Petroleum-like odors and elevated PID readings in soil headspace were noted in soil samples collected from borings SB-1, SB-2, SB-13, SB-14, and SB-15 in the basement of 151-159 West 108<sup>th</sup> Street (PID readings ranged from 10.3 ppm to 450 ppm), and in SB-12B in the basement of 103-107 West 108<sup>th</sup> Street (PID readings ranged from 36.9 ppm to 227 ppm). Elevated PID readings (ranging from 10 ppm to 407 ppm), but no odors were noted in soil borings SB-8, SB-9, and SB-10 in the basement of 143 West 108<sup>th</sup> Street. Detailed results of soil screening are recorded on the boring logs. The soil boring locations were surveyed using the Global Positioning System (GPS) upon their completion.

#### **4.3 Well Installation**

After the completion of the soil sampling, three permanent one-inch diameter polyvinyl chloride (PVC) groundwater monitoring wells (MW-4, MW-6, and MW-8) were installed within the boreholes of borings SB-4, SB-6 and SB-8 on July 13 and 14, 2016. Each well was constructed with pre-packed, 0.020-inch slotted well screen installed inside the direct-push casing. The wells were furnished with a locking well cap and a flush-mounted well cover. Monitoring Well logs were prepared by an AKRF environmental scientist and are attached in

## Appendix C.

Following installation, each well was developed by pumping and surging in order to remove accumulated fines and establish a hydraulic connection with the surrounding aquifer. Wells were developed until turbidity was less than 50 nephelometric turbidity units (NTUs) for three successive readings and until water quality indicators stabilized to within 10% for pH, temperature, and specific conductivity for three successive readings, or until at least three well volumes were purged from the well. Well development logs are included in Appendix D.

Following installation, each monitoring well was surveyed by Gallas Surveying Group, LLC of North Brunswick, New Jersey, a New York State licensed surveyor, to determine their accurate location and elevation. A copy of the survey is included in Appendix E.

### **4.4 Soil Vapor Probe Installation**

On July 11, 2016, eight temporary soil vapor monitoring points (SV-1 through SV-8) were installed by Cascade. The soil vapor monitoring points were installed by advancing a 0.75-inch diameter hollow probe rod fitted with an expendable 6-inch long stainless steel screened drive point 6 inches below the slab. Dedicated Teflon-lined polyethylene tubing with threaded fittings was connected to the probe. The hollow probe rod was then removed and the boring was backfilled with clean silica sand. Hydrated bentonite was used to fill the remaining void around the sampling tubing to ground surface.

### **4.5 Sample Collection and Chemical Analysis**

Soil, groundwater, and soil vapor have been sampled and evaluated in this report. The sampling performed and presented in this report provides a basis for evaluation of subsurface Site conditions and potential remedial action. All samples were analyzed by TestAmerica, a NYSDOH certified laboratory, with Category B deliverables. Sample containers were labeled and placed in an ice-filled cooler and shipped to the laboratory, along with SUMMA canisters, via courier with appropriate chain of custody documentation.

#### **4.5.1 Soil Sampling**

Twenty-two soil samples were collected for chemical analysis during this investigation. Two soil samples were collected for analysis if the boring was advanced to at least 5 feet below grade, and the water table was greater than 5 feet below grade; otherwise, only one soil sample was selected. The two soil samples were collected from the 0 to 2 feet below grade interval and the two-foot interval exhibiting evidence of contamination. In the absence of contamination, one sample was collected directly above the bedrock or soil/groundwater interface. Soil samples collected were analyzed for target compound list (TCL) VOCs according to USEPA Method

8260, TCL semi-volatile organic compounds (SVOCs) according to USEPA Method 8270, target analyte list (TAL) metals according to USEPA Methods 6020, hexavalent chromium according to USEPA Method 7196, mercury according to USEPA Method 7471, pesticides according to USEPA Method 8081, and polychlorinated biphenyls (PCBs) according to USEPA Method 8082.

Soil sample data is reported in Table 1 through Table 4, including analytical results, dates of collection, and sample depths.

#### **4.5.2 Soil Vapor Sampling**

Eight soil vapor samples and one ambient air sample were collected for chemical analysis during this investigation as described in Section 4.4. All soil vapor samples were collected from 6 inches below the basement slab. Prior to collection, each soil vapor monitoring point was purged of three sample volumes using a peristaltic pump at a flow rate of approximately 0.1 liters/minute. During purging, an inverted one-gallon plastic bucket was placed over each soil vapor monitoring point and helium gas was introduced through a small hole in the bucket to saturate the atmosphere around the sample port with helium gas. Purged vapors were collected in a Tedlar bag and field-screened for organic vapors using a PID. The purged air was also monitored using a portable helium detector to check for short-circuiting of ambient air into the vapor sampling point. All soil vapor points passed the seal integrity tests with helium readings being measured at less than 10%. PID readings were recorded at all sample locations. One soil vapor monitoring point (W108-SV-1) had a reading of 102 ppm, while the remaining had readings ranging from 2.0 to 22.3 ppm.

After purging, each vapor monitoring point was connected via Teflon-lined polyethylene tubing to a laboratory-supplied 6-liter SUMMA canister equipped with a flow regulator set to collect a sample over a two-hour sampling period. One ambient air sample (W108-AA-1-20160711) was collected in the courtyard outside 145-149 West 108<sup>th</sup> Street in a 6-liter SUMMA canister for an approximately two-hour sampling period. The ambient air sample was collected concurrently with the soil vapor samples to establish background conditions and for comparison purposes. Immediately after opening the flow control valve, the initial SUMMA canister vacuum (inches of mercury) was noted. After two hours, the flow controller valve was closed, the final vacuum noted, and the canister placed in a shipping carton for delivery to the laboratory. Soil vapor samples collected were analyzed for VOCs according to USEPA Method TO-15.

Soil vapor sample analytical data is reported in Table 5. Soil vapor sampling logs are included in Appendix F. Methodologies used for soil vapor assessment conform to the *New York State Department of Health (NYSDOH) Final Guidance on Soil Vapor Intrusion, October 2006*.

### 4.5.3 Groundwater Sampling

On July 29, 2016, two weeks after well installation, one groundwater sample was collected from each well using low-flow purging and sampling methods based on the procedures described in the USEPA's Ground-Water Sampling Guidelines for Superfund and RCRA Project Managers (USEPA 542-S-02-001). The samples were collected and containerized in accordance with The New York State Department of Environmental Conservation (NYSDEC)/USEPA protocols. The groundwater samples were analyzed for TCL VOCs according to USEPA Method 8260, TCL SVOCs according to USEPA Method 8270, and total and dissolved TAL metals according to USEPA Methods 6020, pesticides according to USEPA Method 8081, and PCBs according to USEPA Method 8082.

Groundwater sample analytical data is reported in Table 6 through Table 9. Well sampling logs are provided in Appendix G.

### 4.5.4 Chemical Analysis

Chemical analytical work has been performed under a quality assurance program that includes the following:

<b>Factor</b>	<b>Description</b>
Quality Assurance Officer	The chemical analytical QA/QC was directed by Stephen Malinowski, of AKRF.
Third Party Data Validator	The third-party data validation was performed by Lori Beyer of L.A.B. Validation Corp.
Chemical Analytical Laboratory	Chemical analytical laboratory used in this investigation was TestAmerica (Edison, New Jersey; Burlington, Vermont; and Pittsburgh, Pennsylvania) NYS Environmental Laboratory Approval Program (ELAP) certified laboratories.
Chemical Analytical Methods	<p>Soil analytical methods:</p> <ul style="list-style-type: none"> <li>• TCL VOCs by USEPA Method 8260C (rev. 2006);</li> <li>• TCL SVOCs by USEPA Method 8270D (rev. 2007);</li> <li>• TAL Metals by USEPA Method 6020A (rev. 1998)</li> <li>• Hexavalent Chromium by USEPA Method 7196A (rev. 1992);</li> <li>• Mercury by USEPA Method 7471B (rev. 1998);</li> <li>• Pesticides by USEPA Method 8081B (rev. 2000);</li> <li>• PCBs by USEPA Method 8082A (rev. 2000).</li> </ul> <p>Groundwater analytical methods:</p> <ul style="list-style-type: none"> <li>• TCL VOCs by USEPA Method 8260C (rev. 2006);</li> <li>• TCL SVOCs by USEPA Method 8270D (rev. 2007);</li> <li>• TAL Metals by USEPA Method 6020A (rev. 1998) (total and dissolved);</li> <li>• Pesticides by USEPA Method 8081B (rev. 2000);</li> </ul>

	<ul style="list-style-type: none"> <li>• PCBs by USEPA Method 8082A (rev. 2000).</li> </ul> Soil vapor and ambient air analytical methods: <ul style="list-style-type: none"> <li>• VOCs by USEPA Method TO-15.</li> </ul>
--	--

#### 4.5.5 Quality Assurance/Quality Control Sampling

QA/QC procedures were used to provide performance information with regard to accuracy, precision, sensitivity, representation, completeness, and comparability associated with the sampling and analysis for this investigation. Field QA/QC procedures were used (1) to document that samples are representative of actual conditions at the Site and (2) to identify possible cross-contamination from field activities or sample transit. Laboratory QA/QC procedures and analyses were used to demonstrate whether analytical results have been biased either by interfering compounds in the sample matrix, or by laboratory techniques that may have introduced systematic or random errors to the analytical process.

QA/QC sampling consisted of the following:

- two soil blind duplicate samples;
- two soil matrix spike/matrix spike duplicate (MS/MSD) samples;
- one groundwater blind duplicate sample;
- one groundwater MS/MSD sample;
- three aqueous trip blank samples;
- three aqueous field blank samples;
- one ambient air sample.

QA/QC samples were submitted with the accompanying collected soil, groundwater, and soil vapor samples. The field blanks, duplicate soil and groundwater samples, and MS/MSDs were analyzed for the same analyte list as the accompanying soil and groundwater samples. The trip blank samples were submitted for laboratory analysis for TCL VOCs by USEPA Method 8260. The ambient air sample was submitted for VOCs by USEPA Method TO-15.

The third-party data validation was performed by L.A.B. Validation Corporation of East Northport, New York and reported in Data Usability Summary Reports (DUSRs) for soil, groundwater, and air/soil vapor laboratory analytical data sets (Appendix H). No significant issues were identified in the DUSRs. The data validator identified additional qualifiers for specific compounds for specific samples. These qualifiers have been added to the data summary tables provided as Table 1 through Table 9. The data sets were determined to be acceptable for use with the additional data qualifiers. The changes included the addition of a “J” qualifier indicating that the contaminant detections in the samples were considered estimated values, or in

several cases, change to a “UJ” qualifier indicating the reported quantitation limit is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample. In addition, a “R” qualifier was added to the non-detects in W108-SB-3 (0-2) for non-recoverable 1,1,2,2-tetrachloroethane, and for 2,4-dinitrophenol based on a <10% recovery for the MS/MSD analysis. The “R” qualifier indicates that the sample results were rejected due to deficiencies in the ability to analyze the sample and meet quality control criteria; the presence or absence of the analyte cannot be verified. For the blind duplicate W108-SB-X (3-4) = W108-SB-2 (3-4), different results were reported likely due to different levels of methanol extraction. Detections of ethylbenzene, isopropylbenzene, xylenes, and toluene were rejected in the field duplicate. The DUSR recommends the results of the parent sample be utilized for decision making purposes. For SVOCs, non-detect acid compounds and 2,4,6-tribromophenol in W108-SB-1 (5-7) and W108-SB-12C (0-2) were rejected with an “R” qualifier as sufficient surrogate recovery was not achieved. As these are not specific contaminants of concern, the presence of an “R” qualifier did not have a significant impact on the findings of the investigation.

No compounds in the groundwater or soil vapor samples were qualified with an “R;” and “J” and “UJ” qualifiers were added as appropriate and shown in the tables.

Methylene chloride, acetone, and 2-butanone were detected in low concentrations in the soil field blank. Methylene chloride was detected in low concentrations in the groundwater field blank. Methylene chloride and acetone were detected in the method blank, and methylene chloride was detected in the trip blanks. Methylene chloride detections were negated for samples collected on corresponding days. Acetone was not negated as no field blank was generated on the day detections in samples were noted. 2-Butanone was not detected in any field samples. These compounds are common laboratory contaminants and their presence is not likely indicative of a compromise of on-site decontamination. No other VOCs or SVOCs were detected in the trip and field blanks.

#### **4.5.6 Results of Chemical Analyses**

Chemical analyses data, inclusive of data validation, for soil, groundwater, and soil vapor are summarized in Table 1 through Table 9, respectively. Laboratory data deliverables for all samples evaluated in this investigation are provided in digital form in Appendix H.

#### **4.5.7 Management of Investigation Derived Waste and Disposal**

Investigation-derived waste (IDW), including purged groundwater, was generated during the investigation. All IDW was containerized in a DOT-approved 55-gallon drum. The drum was sealed at the end of each work day and labeled with the date, the well or boring number, the type

of waste (i.e., development water, purge water) and the name of an AKRF point-of-contact.

One drum containing IDW remained labeled, sealed, and secured inside one of the Site building on a continuous basis during completion of the remedy until shipment for off-site disposal was completed. Sampling results were shared with the disposal facility. Waste characterization data, the correspondence and manifest documentation associated with the transportation and off-site disposal of IDW is included as Appendix I.

## **5.0 ENVIRONMENTAL EVALUATION**

### **5.1 Geological and Hydrogeological Conditions**

#### **5.1.1 Stratigraphy**

Soil observed in the borings during the investigation consisted primarily of sand, silt, and clay with varying amounts of gravel. Historic fill was observed and contained sand, silt, asphalt, brick, ceramic, paper, plastic and concrete. The fill layer was underlain in some areas by apparently native soil of fine to medium sand, silt, clay, gravel, and weathered bedrock. Suspect contamination (e.g., PID readings, staining, and odors) was observed in borings SB-1, SB-2, SB-4, SB-13, SB-14, and SB-15 within the basement of the parking garage at 151-159 West 108<sup>th</sup> Street; SB-8, SB-9, and SB-10 within the basement of the parking garage at 143 West 108<sup>th</sup> Street; and in SB-12B within the partial basement at 103-107 West 108<sup>th</sup> Street. Multiple shallow refusals, potentially large cobbles or bedrock, were encountered in soil borings across the Site.

#### **5.1.2 Hydrogeology**

Groundwater during this investigation was measured approximately 10 feet below sidewalk grade along West 108<sup>th</sup> Street in previously installed geotechnical wells GT-1 and GT-2; 3 feet below basement grade in MW-4; 6 feet below basement grade in MW-6; and one foot below basement grade in MW-8. Groundwater was not encountered in the all borings due to refusal/apparent bedrock. No monitoring wells were installed at the easternmost lot (103-107 West 108<sup>th</sup> Street), as groundwater was not encountered. Based on the well survey and static water level measurements taken 10 days following well development, the inferred groundwater flow direction is easterly. The groundwater elevation at the Site was measured to range between 84.18 feet and 89.20 feet (North American Vertical Datum of 1988). As the wells were installed in a straight line (east-west), there could also be northerly or southerly components to flow. Actual groundwater flow at the Site can be affected by many factors including geology, past/current pumping of groundwater in the vicinity, past filling activities, subsurface openings or obstructions such as basements, underground parking garages or underground utilities, and other factors beyond the scope of this study. Groundwater in Manhattan is not used as a source of drinking water. A groundwater elevation contour map is provided as Figure 3.

### 5.1.3 Spill Discovery and Notification

Evidence of petroleum contamination (e.g., odors, elevated PID readings, stained soil) was noted in the borings (SB-1, SB-2, SB-4, SB-13, SB-14, and SB-15) advanced in the western part of the Site (151-159 West 108<sup>th</sup> Street), with a maximum PID reading of 450 ppm in SB-2. Stained soil was observed in the vicinity of boring locations SB-1 and SB-2. The NYSDEC Spill Hotline was notified of the spill discovery on July 13, 2016, and Spill Number 1603624 was provided.

Subsequent to spill reporting, three delineation borings (SB-13 through SB-15) were advanced to delineate the extent of the observed contamination in the known vicinity of the former gasoline tanks. PID readings with a maximum of 130 ppm were noted in the SB-13. No borings were advanced beyond 7 feet below ground surface due to refusal, and no monitoring wells were able to be installed. Borings SB-13 through SB-15 are shown on Figure 2.

Additionally, evidence of petroleum contamination (e.g., odors, elevated PID readings, stained soil) was noted in the boring SB-12B advanced in the eastern part of the Site (103-107 West 108<sup>th</sup> Street). PID readings of up to a maximum of 227 ppm were noted in SB-12B. The NYSDEC Spill Hotline was notified of this second spill discovery on July 14, 2016, and Spill Number 1603667 was provided. Copies of the NYSDEC Spill Incidents database are provided in Appendix J.

While elevated PID readings were observed at the borings located at 143 West 108<sup>th</sup> Street (SB-8, SB-9, and SB-10), no other evidence of petroleum contamination was observed such as staining, odors, or elevated VOC and SVOC analytical results.

## 5.2 Soil Chemistry

Twenty-two soil samples were collected for laboratory analysis from borings SB-1 through SB-15. Soil sample analytical results were compared to the NYSDEC Unrestricted Use Soil Cleanup Objectives (USCOs) listed in 6 NYCRR Subpart 375. Analytical results were also compared to the NYSDEC Restricted Residential Use Soil Cleanup Objectives (RRSCOs) as a conservative measure in the event redevelopment of the Site is residential.

A summary table of data for chemical analyses performed on soil samples is included in Table 1 through Table 4 and sampling locations are shown on Figure 2. A map depicting exceedances of the USCOs and/or RRSCOs in soil is provided as Figure 4.

### 5.2.1 Volatile Organic Compounds in Soil

A review of the analytical results indicates that VOCs were detected in 12 of the 22 soil

samples, as well as in two trip blanks and the two associated aqueous field blanks. The VOCs 1,2-dichlorobenzene, 1,2-dichloroethane, acetone, carbon disulfide, cyclohexane, ethylbenzene, isopropylbenzene, and o-xylene were detected in one or more of the soil samples. Benzene was detected at an estimated 0.13 milligrams per kilogram (mg/kg) in soil sample W108-SB-2(0-2), which is slightly above its USCO of 0.06 mg/kg, but below its RRSCO of 4.8 mg/kg. M,p-xylene exceeded its USCO in two soil samples at concentrations of 0.41 mg/kg in W108-SB-2(0-2) and 0.35 mg/kg in W108-SB-2(3-4) slightly above its USCO of 0.26 mg/kg but well below the RRSCO of 100 mg/kg. Toluene exceeded its USCO of 0.7 mg/kg in one sample W108-SB-2(0-2) at a concentration of 1.5 mg/kg, but was well below its RRSCO of 100 mg/kg. No VOCs were detected at concentrations exceeding the RRSCOs. Soil VOC results are summarized in Table 1.

### 5.2.2 Semivolatile Organic Compounds in Soil

A review of the analytical results indicates that up to 18 SVOCs were detected in all 22 soil samples with a maximum total SVOC concentration of 28 mg/kg in soil sample W108-SB-5(0-2), located in the garden area adjacent to 145-149 West 108<sup>th</sup> Street. SVOCs exceeding the USCOs and RRSCOs were detected in soil sample W108-SB-5(0-2), including benzo(a)anthracene (2.2 mg/kg), benzo(a)pyrene (2.4 mg/kg), benzo(b)fluoranthene (3.1 mg/kg), dibenz(a,h)anthracene (0.63 mg/kg), and indeno(1,2,3-c,3)pyrene (2.5 mg/kg). Chrysene (2.3 mg/kg) and benzo(k)fluoranthene (1.1 mg/kg) were detected in soil sample W108-SB-5(0-2) above their respective USCOs, but below their respective RRSCOs. All SVOC detections in the remaining soil samples were at concentrations below both the USCOs and RRSCOs. Soil SVOC results are summarized in Table 2.

### 5.2.3 Metals (including Hexavalent Chromium) in Soil

A review of the analytical results indicates that up to 22 of the 23 TAL metals analyzed were detected in all 22 soil samples analyzed. A total of nine metals, including arsenic (max of 18.5 mg/kg), barium (max of 421 mg/kg), copper (max of 88.5 mg/kg), cadmium (max of 6.3 mg/kg), hexavalent chromium (1.9 mg/kg in W108-SB-12 (0-2)), lead (max. of 1,990 mg/kg), mercury (max. of 0.46 mg/kg), nickel (max. of 38.7 mg/kg), and zinc (max. of 679 mg/kg), exceeded their respective USCOs. Concentrations of metals exceeding RRSCOs included arsenic in sample W108-SB-1(5-7) at a concentration of 18.5 mg/kg (the RRSCO is 16 mg/kg); barium in sample W108-SB-5(0-2) at a concentration of 421 mg/kg (RRSCO is 400 mg/kg); cadmium in sample W108-SB-12(0-2) at a concentration of 6.3 mg/kg (RRSCO is 4.3 mg/kg); and lead in samples W108-SB-5(0-2) and W108-SB-12(0-2) at concentrations of 456 mg/kg and 1,990 mg/kg (RRSCO is 400 mg/kg), respectively.

No evidence of metals contamination was noted during the soil sampling activities. Based

on their nature and distribution, the detected concentrations of metals in all of the samples analyzed are either naturally occurring or likely attributable to historic fill. Soil metals results are summarized in Table 3.

#### **5.2.4 Polychlorinated Biphenyls and Pesticides in Soil**

A review of the laboratory analytical results indicates that PCBs were not detected in the soil samples, with the exception of an estimated concentration of 0.057 mg/kg in soil sample W108-12(0-2), which is below the USCO and RRSCO. Four pesticides were detected throughout 4 of the 22 soil samples. Dieldrin exceeded the USCO in one sample, W108-SB-5(0-2) at a concentration of 0.0088 mg/kg (USCO is 0.005 mg/kg). P,P'-DDT exceeded its USCO in three samples [W108-SB-5(0-2), W108-SB-5(8-10), W108-SB-12(0-2)] with a maximum concentration of 0.019 mg/kg (USCO is 0.0033 mg/kg). P,P'-DDD exceeded its USCO in three samples [W108-SB-1(0-2), W108-SB-5(0-2), W108-SB-12(0-2)] with a maximum estimated concentration of 0.0051 mg/kg (USCO is 0.0033 mg/kg). P,P'-DDE exceeded its USCO in W108-SB-5(0-2) with an estimated concentration of 0.0052 mg/kg (USCO is 0.0033 mg/kg). No pesticides exceeded their respective RRSCOs in any samples. Soil sample results for PCBs and pesticides are listed in Table 4.

### **5.3 Groundwater Chemistry**

Results from groundwater samples were compared to NYSDEC Class GA Ambient Water Quality Standards (AWQS) (drinking water standards), although groundwater is not used as a potable source in Manhattan. Table of data for chemical analyses performed on groundwater samples is included in Table 6 through Table 9 and sampling locations are shown on Figure 2. A map depicting exceedances of the AWQS in groundwater is provided as Figure 5.

#### **5.3.1 Volatile Organic Compounds in Groundwater**

VOCs were detected in well W108-MW-4, and the corresponding blind duplicate sample W108-MW-X of a total concentration of approximately 400 µg/L. None to negligible levels of VOCs were W108-MW-6 and W108-MW-8. One VOC, isopropylbenzene, was detected in W108-MW-4 and W108-MW-X at a concentration of 17 micrograms per liter (µg/L), exceeding the AWQS of 5 µg/L. The results of the groundwater sampling indicated no other VOCs were detected at concentrations exceeding the AWQS. Analytical results for VOCs are summarized in Table 6.

#### **5.3.2 Semivolatile Organic Compounds in Groundwater**

SVOCs were detected in samples from all three wells. The SVOCs benzo(a)anthracene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene and indeno(1,2,3-c,d)pyrene were

detected at estimated concentrations of 0.10 µg/L, 0.20 µg/L, 0.074 µg/L, 0.11 µg/L and 0.079 µg/L, respectively, in the groundwater sample collected from MW-6, which exceeded the AWQS of 0.002 µg/L for these compounds. The SVOC benzo(a)pyrene was detected at an estimated concentration of 0.069 µg/L, and also exceeded the AWQS of non-detect for this compound in MW-6. The SVOC bis(2-ethylhexyl)phthalate was detected at estimated concentrations of 17 µg/L, 7.6 µg/L, and 14 µg/L from the samples collected from wells MW-4, MW-6, and MW-8, which exceeded the AWQS of 5 µg/L. These compounds are most likely attributable to historic fill material at the Site and are not indicative of a release. Groundwater sample results for SVOCs are listed in Table 7.

### 5.3.3 Metals in Groundwater

Seventeen metals were detected in the unfiltered groundwater samples (total metals analysis) and nine metals were detected in the filtered samples (dissolved metals analysis). Five total metals: iron, lead, magnesium, manganese, and sodium; and three dissolved metals: magnesium, manganese, and sodium were detected above their respective AWQS.

In general, concentrations of metals were reduced in the filtered samples suggesting that some of the metals concentrations were due to the presence of sediment/soil particles in the samples entrained in the samples, resulting in overestimation of actual groundwater concentrations. The metals were detected above AWQS in the dissolved samples are typical of groundwater quality in the Manhattan. Analytical results for metals are presented in Table 8.

### 5.3.1 PCBs and Pesticides in Groundwater

A review of the laboratory analytical results indicates that PCBs and pesticides were not detected in the groundwater samples. Analytical results for PCBs and pesticides are presented in Table 9.

## 5.4 Soil Vapor Chemistry

Concentrations of VOCs detected in the soil gas samples were compared to the NYSDOH 2006 Guidance for Evaluating Soil Vapor Intrusion air guideline values (AGVs) and matrices, the September 2013 NYSDOH Fact Sheet update for Tetrachloroethylene (PCE), and the August 2015 NYSDOH Fact Sheet update for Trichloroethene (TCE). These values provide a means of comparison; however, since the AGVs reflect indoor air conditions, the comparison assumes that any soil vapor detected would completely penetrate into the building, a condition that does not typically occur. In addition, AGVs have only been established for four VOCs [methylene chloride, 1,1,1-trichloroethane (1,1,1-TCA), trichloroethene (TCE), and PCE] and matrices have only been established for carbon tetrachloride, PCE, 1,1,1-TCA, TCE, vinyl chloride, 1,1-dichloroethene, and cis-1,2-dichloroethene.

A review of the soil vapor sample analytical results identified 27 VOCs [1,1,1-trichloroethane, 1,1-dichloroethane, 1,2,4-trimethylbenzene, 1,2-dichloroethane, 1,3,5-trimethylbenzene, 1,3-butadiene, 2,2,4-trimethylpentane, 2-hexanone, 4-ethyltoluene, acetone, benzene, carbon disulfide, chloroform, cyclohexane, dichlorodifluoromethane, ethylbenzene, m,p-xylene, methyl ethyl ketone (MEK), methyl isobutyl ketone, n-heptane, n-hexane, o-xylene, styrene, tert-butyl alcohol, PCE, toluene, and trichlorofluoromethane] were detected throughout the 8 samples. PCE was detected in six of the eight soil vapor samples at concentration of 2.3  $\mu\text{g}/\text{m}^3$  to 29  $\mu\text{g}/\text{m}^3$ , below the AGV of 30  $\mu\text{g}/\text{m}^3$ . TCE was not detected in any of the soil vapor samples. None of the compounds with established AGVs were detected above their respective AGVs. VOCs associated with petroleum [including benzene, toluene, ethylbenzene, xylenes (collectively referred to as BTEX), 1,2,4- and 1,3,5-trimethylbenzene, cyclohexane, n-heptane, n-hexane, 4-ethyltoluene, and 2,2,4-trimethylpentane] were detected at concentrations up to 1,400 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ). Other solvent-related VOCs [including acetone, chloroform, MEK] were detected at concentrations up to 73  $\mu\text{g}/\text{m}^3$ .

Low level VOC concentrations were noted in the ambient air sample. These VOCs, MEK, n-hexane, and toluene, were detected at concentrations below the soil vapor concentrations, are not included in the NYSDOH matrices, and are not likely to be related to Site contamination.

A summary table of data for chemical analyses performed on soil vapor and ambient air samples is included in Table 5. Figure 2 shows the location of the soil vapor samples. A map depicting detections of VOCs in soil vapor and ambient air is provided as Figure 6.

## 5.5 Conclusions

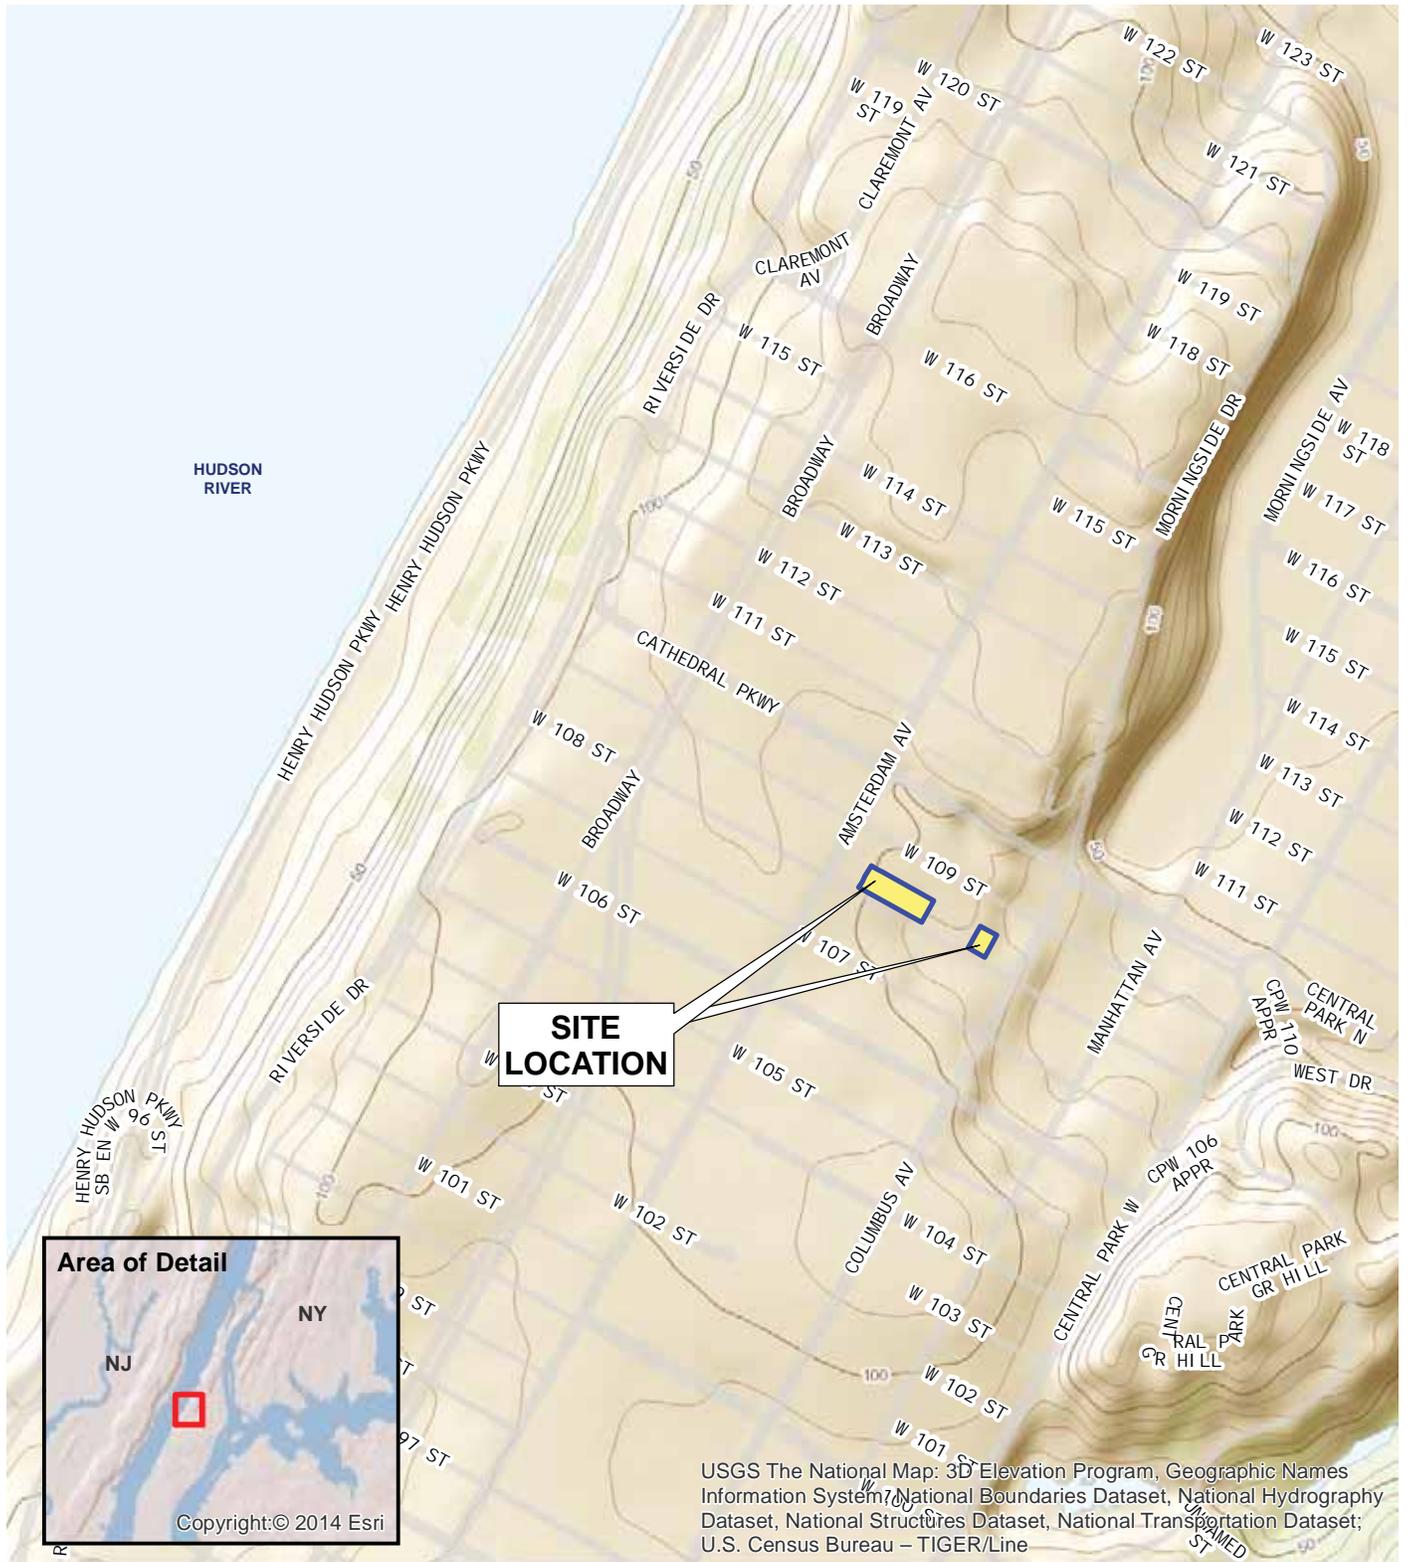

Based on an evaluation of the data and information from the investigation, contaminated soil, groundwater, and soil vapor was identified at the Site. Based on field observations, two petroleum spills were reported to NYSDEC during the investigation (Spill Numbers 1603624 and 1603667). As some detections in soil samples exceeded USCOs and few exceeded RRSCO, in the vicinity of the spills, field observations were likely of weathered petroleum material associated with a historic release. Many of the SVOCs and metals were identified in the shallow fill and are typical of historic fill. Metals exceedances in groundwater samples are likely attributed to entrained sediment in the samples. While no soil vapor concentrations exceeded the AGVs, elevated petroleum-related soil vapor concentrations were noted in all samples. Evidence of staining and detections in soil, groundwater, and soil vapor, are likely attributed to both historic fill and historic uses of the Site, including petroleum storage and maintenance operations within the garages. Prior to any soil disturbance or change in land use, including redevelopment

of the Site, additional investigation and/or remedial activities corresponding to the work are recommended.

Spill investigation and/or remediation plans should be developed and implemented under the oversight of NYSDEC and OER. In addition to any spill remediation required by NYSDEC, a remedial action work plan (under the City VCP) should be prepared in conjunction with the Site redevelopment plans to address any residual petroleum contamination, soil excavation and stockpiling, soil disposal and transportation; groundwater handling/treatment; dust control; and contingency measures should petroleum storage tanks or other contamination be unexpectedly encountered. The plan should also include measures for worker and community health and safety monitoring/protection during remedial activities requiring ground disturbance, including personal protective equipment, dust control, air monitoring, and emergency response procedures.

A draft Supplemental Phase II Investigation plan has been developed with OER. OER will take this plan to NYSDEC and get approvals. A copy of this work plan is included as an appendix in the Remedial Action Plan. This draft plan will be implemented after approvals are obtained.

J : The concentration given is an estimated value.

Part 375 Soil Clean-up Objectives : Soil Clean-up Objectives listed in NYSDEC (New York State Department of Environmental Conservation) "Part 375" Regulations (6 NYCRR Part 375).

mg/kg : milligrams per kilogram = parts per million (ppm)

\* Sample W108-SB-X (3-4) 20160712 is a blind duplicate of W108-SB-2 (3-4) 20160712  
 \* Sample W108-SB-Y 20160714 is a blind duplicate of W108-SB-12B (3-4) 20160714

Exceedences of Part 375 Unrestricted Soil Clean-up Objectives are highlighted in bold font.  
 Exceedences of Part 375 Restricted Residential Soil Clean-up Objectives are highlighted in gray.

*Notes*

**GENERAL**

**NS** : No standard listed.

**U** : The analyte was not detected at the indicated concentration.

**J** : The concentration given is an estimated value.

**UJ** : The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.

**R** : The data are unusable. The sample results are rejected due to serious deficiencies in meeting QA/QC criteria. The analyte may or may not be present in sample.

**N** : The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification."

**J+** : The result is an estimated quantity, but the result may be biased high.

**J-** : The result is an estimated quantity, but the result may be biased low.

**D** : Analyte concentration is from diluted analysis.

**P** : The Relative Percent Difference between the results for the two columns exceeds the method-specified criteria.

**NA** : Not analyzed.

**ND** : Not detected.

## 1.0 INTRODUCTION

Enviroprobe Service, Inc. (Enviroprobe) is an environmental investigation services firm which provides monitoring well installation (HSA), Geoprobe (DPT) drilling services and Environmental & Engineering Geophysics (EEG) services to the environmental consulting and engineering community.

Enviroprobe conducted a subsurface geophysical investigation at the subject property within client-specified areas of concern. Due to conditions and objectives, the investigation utilized a Radiodetection RD1000 cart-mounted ground penetrating radar (GPR) unit with a 250 MHz antenna, a Fisher TW-6 metallic locator, a Radiodetection multi-frequency transmitter, and a Radiodetection receiver.

Ground penetrating radar (commonly called GPR) is a geophysical method that has been developed over the past thirty years for shallow, high-resolution, subsurface investigations of the earth. GPR uses high frequency pulsed electromagnetic waves (generally 10 MHz to 2,000 MHz) to acquire subsurface information. An EM wave is propagated downward into the ground by a transmitting antenna. Where abrupt changes in electrical properties occur in the subsurface, a portion of the energy is reflected back to the surface. This reflected wave is detected by a receiver antenna and transmitted to a control unit for real time processing and display. The penetration depth of the GPR unit varies from several inches to tens of feet according to site-specific conditions. The penetration depth decreases with increased soil conductivity. The penetration depth is the greatest in ice, dry sands, and fine gravels. Clayey, highly saline or saturated soils, areas covered by concrete, foundry slag, or other highly conductive materials greatly reduce GPR penetration. GPR is a method that is commonly used for environmental, engineering, archaeological, and other shallow investigations.

The Fisher TW-6 metallic locator is designed to find pipes, cables and other metallic objects such as underground storage tanks (USTs). The TW-6 transmitter generates an electromagnetic field that induces electrical currents in the subsurface. These currents produce a secondary electromagnetic field that is measured by the TW-6 receiver. One surveyor can carry both the transmitter and receiver together to search for underground metallic objects, although the TW-6 response can also be affected by the electrical properties of non-metallic materials in the subsurface.

The Radiodetection (RD) transmitter and receiver are commonly used for pipe and cable locating. The multi-frequency transmitter can be directly connected, clamped, or used to induce a signal in a target line while the multi-frequency receiver is used to measure the signal from energized lines.

## 2.0 SCOPE OF WORK

On July 11, 2016, a geophysical technician from Enviroprobe Service Inc. was mobilized to the subject property to perform a geophysical investigation. The purpose of

the investigation was to clear proposed boring locations and designate underground conduits/utilities at active parking garages. The ground surface of the survey area consisted of concrete and asphalt surfaces.

### **3.0 SURVEY RESULTS**

The utility survey was conducted using a cart-mounted GPR unit and a RD unit. The RD unit was used to trace common utilities from sources in and around the survey area. The RD receiver was also used in the passive mode to search for live underground electrical power cables and other utilities emitting 60Hz electromagnetic signals. When possible, the location of utilities was confirmed with the GPR. The GPR survey was also performed in a grid pattern in at least two orthogonal directions to search for evident and non-evident underground utilities. Linear anomalies consistent with underground utilities were designated on site with spray paint using the following colors: green – storm sewer and pink – unknown utilities. Suspect piping on the first floor of 143 West 108<sup>th</sup> Street were directly connected to, traced down the pillar into the basement, but did not detect the pipes connecting to a metallic anomaly which may consist with an UST.

At location 151-159 approximately four, location 145-149 approximately two, location 143 approximately four, and at location 103-107 approximately two proposed boring locations were investigated with the GPR, TW-6, and RD receiver. When possible, an area of approximately 10 ft by 10 ft surrounding each location was scanned. In some cases, obstructions prevented an investigation of the entire 10 ft by 10 ft area.

### **4.0 LIMITATIONS**

Due to surface conditions and subsurface content, the GPR penetration depth was estimated as about 3 feet in the majority of the survey area.

Due to the dielectric properties of the subsurface, plastic polymer and fiberglass utilities may not have been detected.

The underground utility survey was conducted in compliance with the industry standard of care guidelines found in ASCE 38-02 (Level B).

### **5.0 WARRANTIES**

The field observations and measurements reported herein are considered sufficient in detail and scope for this project. Enviroprobe Service, Inc. warrants that the findings and conclusions contained herein have been promulgated in accordance with generally accepted environmental engineering methods. There is a possibility that conditions may

exist which could not be identified within the scope of this project and were not apparent during the site activities performed for this project.

Enviroprobe represents that the services were performed in a manner consistent with that level of care and skill ordinarily exercised by environmental consultants under similar circumstances. No other representations to Client, express or implied, and no warranty or guarantee is included or intended in this agreement, or in any report, document, or otherwise.

Enviroprobe Service, Inc. believes that the information provided in this report is reliable. However, Enviroprobe cannot warrant or guarantee that the information provided by others is complete or accurate. No other warranties or guarantees are implied or expressed.

GPR data is subject to signal anomalies and operator interpretation. The GPR data is intended to provide the locations of areas of concern requiring additional investigation or the approximate location of underground structures and utilities. Great care must be utilized when excavating and/or drilling around underground structures and utilities since GPR data can only be used for estimation purposes and GPR data is subject to misinterpretation. Enviroprobe can not guarantee that utilities, post-tension cables, and/or rebar will not be incurred during drilling, cutting, coring, or excavating activities.

This report was prepared pursuant to the contract Enviroprobe has with the Client. That contractual relationship included an exchange of information about the property that was unique and between Enviroprobe and its client and serves as the basis upon which this report was prepared. Because of the importance of the communication between Enviroprobe and its client, reliance or any use of this report by anyone other than the Client, for whom it was prepared, is prohibited and therefore not foreseeable to Enviroprobe.

Reliance or use by any such third party without explicit authorization in the report does not make said third party a third party beneficiary to Enviroprobe contract with the Client. Any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

**APPENDIX E**  
**MONITORING WELL SURVEY**

- NOTES:**
1. THE PURPOSE OF THIS PLAN IS TO SHOW THE LOCATION AND THE ELEVATIONS OF THE RIMS AND INNER CASING OF THE FIVE NEW MONITORING WELLS.
  2. THE LOCATION OF UNDERGROUND UTILITIES HAVE NOT BEEN SHOWN, BEFORE ANY EXCAVATION IS TO BEGIN, ALL UNDERGROUND UTILITIES SHOULD BE VERIFIED AS TO THEIR LOCATION, SIZE AND TYPE BY THE PROPER UTILITY COMPANIES.
  3. THIS SURVEY WAS PREPARED WITHOUT BENEFIT OF A TITLE COMMITMENT REPORT AND IS SUBJECT TO THE COVENANTS, RESTRICTIONS AND EASEMENTS THAT MAY BE CONTAINED THEREIN.
  4. ELEVATIONS ARE BASED UPON NAVD 88 DATUM.
  5. COORDINATES ARE BASED UPON AN ASSUMED DATUM.

## CASE NARRATIVE

Client: AKRF Inc

Project: West 108th Street

Report Number: 460-116807-1

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) as a result of a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes or interferences which exceed the calibration range of the instrument.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

### RECEIPT

The samples were received on 7/11/2016 7:40 PM, 7/12/2016 6:40 PM, 7/13/2016 7:00 PM, 7/14/2016 8:00 PM and 7/19/2016 7:40 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 6 coolers at receipt time were 1.2° C, 1.4° C, 1.5° C, 1.5° C, 1.6° C and 2.1° C.

### Receipt Exceptions

The Chain-of-Custody (COC) was incomplete as received and/or improperly completed. The samples from the following logins were marked for the same analyses multiple times, and marked for 8270D Low Level and 8260C SIM which are only applicable to ground water samples: 460-116807 and 460-116858. Per the client, the following methods are required for these samples:

8260C TCL VOC  
6020A/7471B TAL Metals (7470A for mercury field blank)  
7196A Hexavalent Chromium  
8081B Pesticides  
8082A PCBs  
8270D TCL SVOC

The Chain-of-Custody (COC) was incomplete as received and/or improperly completed. Samples were checked off for the following tests twice: 8081B, 8082A, 8270D, 7196A.

The Chain-of-Custody (COC) was incomplete as received and/or improperly completed. No Project identification listed on COC. TB received 2 vials, but 3 listed on COC.

In addition, the project information was not listed on the chain of custody.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

### VOLATILE ORGANICS

Samples W108-SB-12 (0-2) (460-116807-1), W108-SB-5(0-2) (460-116858-1), W108-SB-7 (0-2) (460-116922-1), W108-SB-13(0-2) (460-116994-1), W108-SB-5(8-10) (460-116858-2), W108-SB-9 (0-2) (460-116922-2), W108-SB-14(0-2) (460-116994-2), W108-SB-8 (0-2) (460-116922-3), W108-SB-Y (460-116994-3), W108-SB-10 (0-2) (460-116922-4), W108-SB-12C(0-2) (460-116994-4), W108-SB-6 (0-2) (460-116922-5), W108-SB-12B(0-2) (460-116994-5), W108-SB-2-(0-2) (460-116858-6), W108-SB-11(0-2) (460-116994-6), W108-SB-X(3-4) (460-116858-7), W108-SB-12B(2-4) (460-116994-7), W108-SB-2(3-4) (460-116858-8), W108-SB-15(0-2) (460-116994-8), W108-SB-3(0-2) (460-116858-9), W108-SB-4(0-2) (460-116858-10), W108-SB-4(5-7) (460-116858-11), W108-SB-1(0-2) (460-116858-12) and W108-SB-1(5-7) (460-116858-13) were analyzed for Volatile organics in accordance with EPA SW-846 Method 8260C. The samples were prepared on 07/12/2016, 07/13/2016 and 07/15/2016 and analyzed on 07/14/2016, 07/15/2016, 07/16/2016, 07/17/2016 and 07/18/2016.

The continuing calibration verification (CCV) analyzed in batch 460-379053 was outside the method criteria for the following analyte(s): Carbon Tetrachloride and Bromoform (biased low) and Trichlorofluoromethane (biased high). A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The continuing calibration verification (CCV) associated with batch 460-378974 recovered above the upper control limit for Dichlorodifluoromethane and Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

The continuing calibration verification (CCV) analyzed in batch 460-379152 was outside the method criteria for the following analytes: Dichlorodifluoromethane and Trichlorofluoromethane (biased high) and Chloromethane (biased low). A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes is considered estimated.

The continuing calibration verification (CCV) associated with batch 460-379412 recovered above the upper control limit for Trichlorofluoromethane and Dichlorodifluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

The continuing calibration verification (CCV) associated with batch 460-379129 recovered above the upper control limit for Vinyl chloride, Dichlorodifluoromethane, Chloromethane and Trichlorofluoromethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

The continuing calibration verification (CCV) analyzed in batch 460-379154 was outside the method criteria for the following analyte: Bromoform. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

The continuing calibration verification (CCV) analyzed in batch 460-379260 was outside the method criteria for the following analyte(s): Bromoform. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The continuing calibration verification (CCV) analyzed in batch 460-379524 was outside the method criteria for the following analyte(s): Vinyl chloride and Chloromethane. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The continuing calibration verification (CCV) analyzed in batch 460-379471 was outside the method criteria for the following analyte(s): Trichlorofluoromethane, Dichlorodifluoromethane (biased high); 1,1,2,2-Tetrachloroethane and Chloromethane (biased low). A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The laboratory control sample (LCS) for analytical batch 460-378974 recovered outside control limits for the following analytes: Dichlorodifluoromethane, Chloroethane, and Trichlorofluoromethane. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) for analytical batch 460-379152 recovered outside control limits for the following analytes: Dichlorodifluoromethane and Trichlorofluoromethane. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) for analytical batch 460-379053 recovered outside control limits for the following analytes: Carbon disulfide, Carbon tetrachloride, Chlorodibromomethane and Bromoform. These analytes were not detected in the associated samples; therefore, the data have been reported.

Method(s) 8260C: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 460-379337 recovered outside control limits for the following analyte: Chloroethane. This analyte was biased high in the LCS/LCSD and was not detected in the associated sample; therefore, the data have been reported.

The laboratory control sample duplicate (LCSD) for analytical batch 460-379412 recovered outside control limits for the following analytes: Trichlorofluoromethane and Dichlorodifluoromethane. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) for analytical batch 460-379422 recovered outside control limits for the following analyte: Chloroethane. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 460-379154 recovered outside control limits for the following analytes: Dibromochloromethane and Bromoform. These analytes were not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) for analytical batch 460-379260 recovered outside control limits for the following analytes: Carbon disulfide, Chlorobenzene, 1,3-Dichlorobenzene, 1,4-Dichlorobenzene, Chlorodibromomethane and Bromoform. These analytes were not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 460-379524 recovered outside control limits for the following analytes: Vinyl chloride and Chloromethane. These analytes were not detected in the associated samples; therefore, the data have been reported.

Methylene Chloride was detected in method blank MB 460-379412/7 at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Methylene Chloride was detected in method blank MB 460-379471/7 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Chloroethane, Dichlorodifluoromethane and Trichlorofluoromethane failed the recovery criteria high for LCS 460-378974/3. Bromoform, Carbon disulfide, Carbon tetrachloride and Dibromochloromethane failed the recovery criteria low for LCS 460-379053/3. Dichlorodifluoromethane and Trichlorofluoromethane failed the recovery criteria high for LCS 460-379152/3. Bromoform and Dibromochloromethane failed the recovery criteria low for LCS 460-379154/3. 1,3-Dichlorobenzene, 1,4-Dichlorobenzene, Bromoform, Carbon disulfide, Chlorobenzene and Dibromochloromethane failed the recovery criteria low for LCS 460-379260/5. Chloromethane and Vinyl chloride failed the recovery criteria low for LCS 460-379524/4. Bromoform and Dibromochloromethane failed the recovery criteria low for LCSD 460-379154/4. Dichlorodifluoromethane and Trichlorofluoromethane failed the recovery criteria high for LCSD 460-379412/4. Chloromethane and Vinyl chloride failed the recovery criteria low for LCSD 460-379524/5. Refer to the QC report for details.

Acetone was detected in method blank LB3 460-378784/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Methylene Chloride was detected in method blank LB3 460-379235/1-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been flagged. Refer to the QC report for details.

Bromodichloromethane, Bromoform, Carbon disulfide and Dibromochloromethane failed the recovery criteria low for the MS of sample 460-116581-13 in batch 460-379053.

Bromoform and Dibromochloromethane failed the recovery criteria low for the MSD of sample 460-116581-13 in batch 460-379053.

Several analytes failed the recovery criteria low for the MS of sample 460-116771-1 in batch 460-379260. Several analytes failed the recovery criteria low for the MSD of sample 460-116771-1 in batch 460-379260. 1,4-Dioxane exceeded the RPD limit.

Several analytes failed the recovery criteria low for the MS of sample W108-SB-3(0-2)MS (460-116858-9) in batch 460-378974. Trichloroethene failed the recovery criteria high. For the MSD of sample W108-SB-3(0-2)MSD (460-116858-9) in batch 460-378974, Several analytes failed the recovery criteria low. Trichloroethene failed the recovery criteria high. Also, 1,2,4-Trichlorobenzene exceeded the RPD limit.

Several analytes failed the recovery criteria low for the MS of sample W108-SB-15(0-2)MS (460-116994-8) in batch 460-379471. Trichloroethene failed the recovery criteria high. For the MSD of sample W108-SB-15(0-2)MSD (460-116994-8) in batch 460-379471, Several analytes failed the recovery criteria low. Acetone failed the recovery criteria high. Also, Several analytes exceeded the RPD limit.

Refer to the QC report for details.

The following samples were diluted to bring the concentration of target analytes within the calibration range and due to the abundance of non-target analytes: W108-SB-4(5-7) (460-116858-11). Elevated reporting limits (RLs) are provided.

The following sample was diluted to bring the concentration of target analytes within the calibration range: W108-SB-2(0-2) (460-116858-6). Elevated reporting limits (RLs) are provided.

The following sample was diluted due to the abundance of non-target analytes: W108-SB-2(3-4) (460-116858-8). Elevated reporting limits (RLs) are provided.

No other difficulties were encountered during the Volatile organics analysis.

All other quality control parameters were within the acceptance limits.

#### **VOLATILE ORGANICS**

Samples TB20160714 (460-117248-1), TB20160712 (460-116858-4), FB20160712 (460-116858-5) and FB20160714 (460-116994-10) were analyzed for Volatile organics in accordance with EPA SW-846 Methods 8260C. The samples were analyzed on 07/16/2016 and 07/22/2016.

The continuing calibration verification (CCV) analyzed in batch 460-379337 was outside the method criteria for the following analytes: Chloroethane and Trichlorofluoromethane (biased high); and Bromoform (biased low). A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes is considered estimated.

The continuing calibration verification (CCV) analyzed in batch 460-379422 was outside the method criteria for the following analyte(s): Chloroethane, Trichlorofluoromethane (biased high); and Bromoform (biased low). A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The continuing calibration verification (CCV) analyzed in batch 460-380463 was outside the method criteria for the following analytes: 1,2,3-Trichlorobenzene, 1,1,2,2-Tetrachloroethane, Methyl acetate and Trichlorofluoromethane. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analytes is considered estimated.

Chloroethane failed the recovery criteria high for LCS 460-379337/3. Chloroethane failed the recovery criteria high for LCS 460-379422/3. Chloroethane failed the recovery criteria high for LCSD 460-379337/4.

Chloroethane failed the recovery criteria high for the MS of sample 460-116741-1 in batch 460-379422. Chloroethane and Trichlorofluoromethane failed the recovery criteria high for the MSD of sample 460-116741-1 in batch 460-379422.

1,4-Dioxane exceeded the RPD limit for the MSD of sample 460-117128-3 in batch 460-380463. The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Refer to the QC report for details.

No other difficulties were encountered during the Volatile organics analysis.

All other quality control parameters were within the acceptance limits.

#### **SEMIVOLATILE ORGANIC COMPOUNDS (GC/MS)**

Samples FB20160712 (460-116858-5) and FB20160714 (460-116994-10) were analyzed for semivolatile organic compounds (GC/MS) in accordance with EPA SW-846 Method 8270D. The samples were prepared on 07/13/2016 and 07/15/2016 and analyzed on 07/14/2016 and 07/16/2016.

Surrogates recoveries for the following laboratory control sample and laboratory control sample duplicate (LCS/LCSD) associated with batch 460-378878 were outside limits. All spike recoveries were within limits. Sample has been qualified and reported.

2-Fluorobiphenyl and Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria low for LCS 460-378878/4-A. 2-Fluorobiphenyl and Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria low for LCSD 460-378878/5-A. Refer to the QC report for details.

Several analytes failed the recovery criteria high for the MS of sample 460-116960-1 in batch 460-379378.

Refer to the QC report for details.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

#### **PESTICIDES**

Samples W108-SB-12 (0-2) (460-116807-1), W108-SB-5(0-2) (460-116858-1), W108-SB-7 (0-2) (460-116922-1), W108-SB-13(0-2) (460-116994-1), W108-SB-5(8-10) (460-116858-2), W108-SB-9 (0-2) (460-116922-2), W108-SB-14(0-2) (460-116994-2), W108-SB-8 (0-2) (460-116922-3), W108-SB-Y (460-116994-3), W108-SB-10 (0-2) (460-116922-4), W108-SB-12C(0-2) (460-116994-4), W108-SB-6 (0-2) (460-116922-5), W108-SB-12B(0-2) (460-116994-5), W108-SB-2-(0-2) (460-116858-6), W108-SB-11(0-2) (460-116994-6), W108-SB-X(3-4) (460-116858-7), W108-SB-12B(2-4) (460-116994-7), W108-SB-2(3-4) (460-116858-8), W108-SB-15(0-2) (460-116994-8), W108-SB-3(0-2) (460-116858-9), W108-SB-4(0-2) (460-116858-10), W108-SB-4(5-7) (460-116858-11), W108-SB-1(0-2) (460-116858-12) and W108-SB-1(5-7) (460-116858-13) were analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 07/13/2016, 07/14/2016, 07/15/2016, 07/16/2016 and 07/18/2016 and analyzed on 07/14/2016, 07/15/2016, 07/18/2016 and 07/19/2016.

No difficulties were encountered during the Pesticides analysis.

All quality control parameters were within the acceptance limits.

#### **PESTICIDES**

Samples FB20160712 (460-116858-5) and FB20160714 (460-116994-10) were analyzed for Pesticides in accordance with EPA SW-846 Methods 8081B. The samples were prepared on 07/13/2016 and 07/15/2016 and analyzed on 07/13/2016 and 07/18/2016.

Surrogate recovery for the following sample was outside the upper control limit: FB20160712 (460-116858-5). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

The %RPD between the primary and confirmation column exceeded 40% for 4,4'-DDD for the following sample: W108-SB-12 (0-2) (460-116807-1). The lower value has been reported and qualified in accordance with the laboratory's SOP.

Method(s) 8081B: The following samples required a mercury clean-up, via EPA Method 3660A, to reduce matrix interferences caused by sulfur: W108-SB-X(3-4) (460-116858-7), W108-SB-2(3-4) (460-116858-8) and W108-SB-4(0-2) (460-116858-10). The reagent lot number used was: SLBC3181V.

The following sample required a mercury clean-up, via EPA Method 3660A, to reduce matrix interferences caused by sulfur: W108-SB-4(5-7) (460-116858-11). The reagent lot number used was: SLBC3181V.

DCB Decachlorobiphenyl and Tetrachloro-m-xylene failed the surrogate recovery criteria high for FB20160712 (460-116858-5).

Endrin aldehyde failed the recovery criteria high for LCS 460-378802/2-A.

Refer to the QC report for details.

No other difficulties were encountered during the pesticides analysis.

All other quality control parameters were within the acceptance limits.

#### **POLYCHLORINATED BIPHENYLS**

Samples W108-SB-12 (0-2) (460-116807-1), W108-SB-5(0-2) (460-116858-1), W108-SB-7 (0-2) (460-116922-1), W108-SB-13(0-2) (460-116994-1), W108-SB-5(8-10) (460-116858-2), W108-SB-9 (0-2) (460-116922-2), W108-SB-14(0-2) (460-116994-2), W108-SB-8 (0-2) (460-116922-3), W108-SB-Y (460-116994-3), W108-SB-10 (0-2) (460-116922-4), W108-SB-12C(0-2) (460-116994-4), W108-SB-6 (0-2) (460-116922-5), W108-SB-12B(0-2) (460-116994-5), W108-SB-2-(0-2) (460-116858-6), W108-SB-11(0-2) (460-116994-6), W108-SB-X(3-4) (460-116858-7), W108-SB-12B(2-4) (460-116994-7), W108-SB-2(3-4) (460-116858-8), W108-SB-15(0-2) (460-116994-8), W108-SB-3(0-2) (460-116858-9), W108-SB-4(0-2) (460-116858-10), W108-SB-4(5-7) (460-116858-11), W108-SB-1(0-2) (460-116858-12) and W108-SB-1(5-7) (460-116858-13) were analyzed for polychlorinated biphenyls in accordance with EPA SW-846 Method 8082A. The samples were prepared on 07/13/2016, 07/14/2016, 07/15/2016 and 07/18/2016 and analyzed on 07/14/2016, 07/15/2016, 07/18/2016 and 07/19/2016.

The following samples required a mercury clean-up, via EPA Method 3660A, to reduce matrix interferences caused by sulfur: W108-SB-X(3-4) (460-116858-7), W108-SB-2(3-4) (460-116858-8) and W108-SB-4(0-2) (460-116858-10). The reagent lot number used was: <SLBC3181V>.

Surrogate recovery for the following samples were outside the upper control limit: W108-SB-14(0-2) (460-116994-2) and W108-SB-12B(0-2) (460-116994-5). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

DCB Decachlorobiphenyl failed the surrogate recovery criteria high for W108-SB-14(0-2) (460-116994-2). DCB Decachlorobiphenyl failed the surrogate recovery criteria high for W108-SB-12B(0-2) (460-116994-5).

Aroclor 1260 failed the recovery criteria high for the MS of sample W108-SB-6 (0-2)MS (460-116922-5) in batch 460-379556.

Refer to the QC report for details.

No other difficulties were encountered during the PCBs analysis.

All other quality control parameters were within the acceptance limits.

#### **POLYCHLORINATED BIPHENYLS (PCBS)**

Samples FB20160712 (460-116858-5) and FB20160714 (460-116994-10) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082A. The samples were prepared on 07/13/2016 and 07/15/2016 and analyzed on 07/13/2016 and 07/18/2016.

No difficulties were encountered during the PCBs analysis.

All quality control parameters were within the acceptance limits.

#### **SEMIVOLATILE ORGANIC COMPOUNDS**

Samples W108-SB-12 (0-2) (460-116807-1), W108-SB-5(0-2) (460-116858-1), W108-SB-7 (0-2) (460-116922-1), W108-SB-13(0-2) (460-116994-1), W108-SB-5(8-10) (460-116858-2), W108-SB-9 (0-2) (460-116922-2), W108-SB-14(0-2) (460-116994-2), W108-SB-8 (0-2) (460-116922-3), W108-SB-Y (460-116994-3), W108-SB-10 (0-2) (460-116922-4), W108-SB-12C(0-2) (460-116994-4), W108-SB-6 (0-2) (460-116922-5), W108-SB-12B(0-2) (460-116994-5), W108-SB-2-(0-2) (460-116858-6), W108-SB-11(0-2) (460-116994-6), W108-SB-X(3-4) (460-116858-7), W108-SB-12B(2-4) (460-116994-7), W108-SB-2(3-4) (460-116858-8), W108-SB-15(0-2) (460-116994-8), W108-SB-3(0-2) (460-116858-9), W108-SB-4(0-2) (460-116858-10), W108-SB-4(5-7) (460-116858-11), W108-SB-1(0-2) (460-116858-12) and W108-SB-1(5-7) (460-116858-13) were analyzed for Semivolatile organic compounds in accordance with EPA SW-846 Method 8270D. The samples were prepared on 07/14/2016 and 07/15/2016 and analyzed on 07/15/2016, 07/18/2016, 07/19/2016 and 07/20/2016.

A full list spike was utilized for this method. Due to the large number of spiked analytes, there is a high probability that one or more

analytes will recover outside acceptance limits. The laboratory's SOP allows for five analytes to recover outside criteria for this method when a full list spike is utilized. The LCS associated with batch 460-379075 had five analytes (Bis(2-ethylhexyl) phthalate, Butyl benzyl phthalate, 2,2'-oxybis[1-chloropropane], 1,1'-Biphenyl and Di-n-octyl phthalate) outside control limits; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

The continuing calibration verification (CCV) analyzed in 460-378964 was outside the method criteria for the following analyte(s): Indeno[1,2,3-cd]pyrene, Benzo[g,h,i]perylene, Hexachlorocyclopentadiene, Benzo[a]pyrene and Dibenz(a,h)anthracene. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The continuing calibration verification (CCV) analyzed in batch 460-379179 was outside the method criteria for the following analyte(s): Bis(2-ethylhexyl) phthalate, Butyl benzyl phthalate, 2,4,6-Tribromophenol, 2,2'-oxybis[1-chloropropane], Hexachlorobenzene, Hexachlorobutadiene and Di-n-octyl phthalate. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

The continuing calibration verification (CCV) analyzed in batch 460-379971 was outside the method criteria for the following analyte(s): Phenol, bis (2-chloroisopropyl) ether and Hexachlorocyclopentadiene. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Surrogate recovery for the following samples was outside the upper control limit: (LCS 460-379071/2-A) and (LCS 460-379071/3-A).

Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: W108-SB-X(3-4) (460-116858-7), W108-SB-3(0-2) (460-116858-9), W108-SB-3(0-2) (460-116858-9[MS]), W108-SB-3(0-2) (460-116858-9[MSD]) and W108-SB-1(5-7) (460-116858-13). These results have been reported and qualified.

Six surrogates are used for this analysis. The laboratory's SOP allows two of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: W108-SB-7 (0-2) (460-116922-1). These results have been reported and qualified.

Surrogate recovery for the following samples was outside the upper control limit: (LCS 460-379309/2-A) and (LCS 460-379309/3-A).

Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: W108-SB-12C(0-2) (460-116994-4). These results have been reported and qualified.

Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: W108-SB-2-(0-2) (460-116858-6). These results have been reported and qualified.

The following laboratory control sample (LCS) associated with batch 460-379075 contained one acid/base surrogate outside acceptance limits: (LCS 460-379075/2-A) and (LCS 460-379075/3-A). The laboratory's SOP allows one acid and/or one base surrogate to be outside acceptance limits; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

2,4,6-Tribromophenol (Surr) failed the surrogate recovery criteria low for W108-SB-1(5-7) (460-116858-13). 2-Fluorobiphenyl failed the surrogate recovery criteria high. 2,4,6-Tribromophenol (Surr) failed the surrogate recovery criteria low for W108-SB-2-(0-2) (460-116858-6). 2-Fluorobiphenyl failed the surrogate recovery criteria high for W108-SB-X(3-4) (460-116858-7). 2-Fluorobiphenyl failed the surrogate recovery criteria high for W108-SB-3(0-2) (460-116858-9). 2,4,6-Tribromophenol (Surr) and 2-Fluorophenol (Surr) failed the surrogate recovery criteria low for W108-SB-7 (0-2) (460-116922-1). 2,4,6-Tribromophenol (Surr) failed the surrogate recovery criteria low for W108-SB-12C(0-2) (460-116994-4). 2,4,6-Tribromophenol (Surr), 2-Fluorobiphenyl, 2-Fluorophenol (Surr) and Nitrobenzene-d5 (Surr) failed the surrogate recovery criteria high for LCS 460-379071/2-A. 2,4,6-Tribromophenol (Surr), 2-Fluorobiphenyl and 2-Fluorophenol (Surr) failed the surrogate recovery criteria high for LCS 460-379071/3-A. 2-Fluorobiphenyl failed the surrogate recovery criteria high for LCS 460-379075/2-A. 2-Fluorobiphenyl failed the surrogate recovery criteria high for LCS 460-379075/3-A. 2,4,6-Tribromophenol (Surr) and 2-Fluorobiphenyl failed the surrogate recovery criteria high for LCS 460-379309/2-A. 2,4,6-Tribromophenol (Surr) and 2-Fluorophenol (Surr) failed the surrogate recovery criteria high for LCS 460-379309/3-A. 2-Fluorobiphenyl failed the surrogate recovery criteria high for W108-SB-3(0-2)MS (460-116858-9MS). 2-Fluorobiphenyl failed the surrogate recovery criteria high for W108-SB-3(0-2)MSD (460-116858-9MSD).

bis (2-chloroisopropyl) ether failed the recovery criteria low for LCS 460-379075/2-A. 1,1'-Biphenyl, Bis(2-ethylhexyl) phthalate, Butyl benzyl phthalate and Di-n-octyl phthalate failed the recovery criteria high. Refer to the QC report for details.

Several analytes failed the recovery criteria low for the MS of sample W108-SB-3(0-2)MS (460-116858-9) in batch 460-379179. Several analytes failed the recovery criteria low for the MSD of sample W108-SB-3(0-2)MSD (460-116858-9) in batch 460-379179.

Several analytes failed the recovery criteria low for the MS of sample 460-116902-4 in batch 460-379174. Several analytes failed the recovery criteria low for the MSD of sample 460-116902-4 in batch 460-379174. Several analytes exceeded the RPD limit.

Several analytes failed the recovery criteria low for the MS of sample W108-SB-15(0-2)MS (460-116994-8) in batch 460-379971. Several analytes failed the recovery criteria low for the MSD of sample W108-SB-15(0-2)MSD (460-116994-8) in batch 460-379971.

Refer to the QC report for details.

Sample W108-SB-7 (0-2) (460-116922-1)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the semivolatiles analysis.

All other quality control parameters were within the acceptance limits.

**TOTAL METALS**

Samples W108-SB-12 (0-2) (460-116807-1), W108-SB-5(0-2) (460-116858-1), W108-SB-7 (0-2) (460-116922-1), W108-SB-13(0-2) (460-116994-1), W108-SB-5(8-10) (460-116858-2), W108-SB-9 (0-2) (460-116922-2), W108-SB-14(0-2) (460-116994-2), W108-SB-8 (0-2) (460-116922-3), W108-SB-Y (460-116994-3), W108-SB-10 (0-2) (460-116922-4), W108-SB-12C(0-2) (460-116994-4), W108-SB-6 (0-2) (460-116922-5), W108-SB-12B(0-2) (460-116994-5), W108-SB-2-(0-2) (460-116858-6), W108-SB-11(0-2) (460-116994-6), W108-SB-X(3-4) (460-116858-7), W108-SB-12B(2-4) (460-116994-7), W108-SB-2(3-4) (460-116858-8), W108-SB-15(0-2) (460-116994-8), W108-SB-3(0-2) (460-116858-9), W108-SB-4(0-2) (460-116858-10), W108-SB-4(5-7) (460-116858-11), W108-SB-1(0-2) (460-116858-12) and W108-SB-1(5-7) (460-116858-13) were analyzed for total metals in accordance with EPA SW-846 Method 6020A. The samples were prepared on 07/13/2016, 07/14/2016 and 07/17/2016 and
