---

**JUNE 2015**

## EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by the New York City Mayor's Office of Environmental Remediation to perform a Phase I Environmental Site Assessment (ESA) of the properties located at 103-107 and 143-159 West 108<sup>th</sup> Street (also identified as Manhattan Tax Block 1863, Lots 5, 10, 13, and 26). The Property consists of two discontinuous parcels with a public park between the two parcels totaling approximately 37,845 square feet.

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" or REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC (HREC), Controlled REC (CREC), and *De Minimis* Condition. A *De Minimis* Condition is defined as an environmental concern that is not a threat to human health or the environment and would not be subject to enforcement action.

At the time of AKRF's reconnaissance, the buildings at 103-107, 143, and 151-159 West 108<sup>th</sup> Street were utilized as parking garages and 145-149 West 108<sup>th</sup> Street was utilized as an emergency senior citizen shelter. The properties were bordered by: West 108<sup>th</sup> Street followed by Booker T Washington Junior High School and a Time Warner Cable garage to the south; residential and commercial buildings, followed by Columbus Avenue, to the east; mixed-use retail and residential developments, followed by Amsterdam Avenue to the west; and residential buildings followed by West 109<sup>th</sup> Street to the north. A public park is located between 103-107 and 143 West 108<sup>th</sup> Street. The greater surrounding area was predominantly commercial and residential, with numerous new commercial and/or residential buildings under construction.

This assessment revealed the following:

### ***Recognized Environmental Conditions (RECs)***

- Potential underground storage tanks (USTs) and former aboveground storage tanks (ASTs) were noted as follows:
  - 103-107 West 108<sup>th</sup> Street – Historical Sanborn maps identified two gas tanks at 103-107 West 108<sup>th</sup> Street in 1951. A decommissioned 275-gallon AST with no associated piping was noted in the partial basement of the 103-107 West 108<sup>th</sup> Street building. No record of its closure, removal, or regulatory status was available.
  - 143 West 108<sup>th</sup> Street - Historical Sanborn maps identified three 550-gallon buried gasoline tanks at 143 West 108<sup>th</sup> Street between 1951 and 2005. The operator Mr. Schoemberg indicated fill ports were previously located in the middle of the first floor leading to the basement of each building. Mr. Schoemberg was unaware of tank closure or removal.
  - 145-149 West 108<sup>th</sup> Street – DOB records identified an oil burner permit dated 1958.
  - 151-159 West 108<sup>th</sup> Street - Historical Sanborn maps identified four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street between 1951 and 2005. During

reconnaissance, gauges for four tanks were observed. Operator Mr. Schoenberg indicated fill ports were previously located in the middle of the first floor leading to the basement of each building. Mr. Schoenberg was unaware of tank closure or removal.

- Historical uses of the existing buildings included an automobile repair facility at 103-107 West 108<sup>th</sup> Street and a Cadillac Service Station at 143 West 108<sup>th</sup> Street, based on Sanborn Maps and interviews. Based on Sanborn Maps and interviews, there is also potential for prior use as vehicle maintenance at 151-159 West 108<sup>th</sup> Street. In addition to the tanks mentioned above, additional tanks and hydraulic lifts may also be present beneath the basement floor or where the vehicle maintained may have been performed.
- Chemical and material storage noted during inspections including: propane and concrete at 143 West 108<sup>th</sup> Street; plastic drums, bags, and smaller containers of paint, ammonia, floor stripper, floor finish, salt, and soaps at 145-149 West 108<sup>th</sup> Street; and bags of concrete, five gallon containers of silicone coating and paint, and propane tanks stored on the roof, as well as a 55-gallon drum of unknown material with some oily residue at the top in the basement of 151-159 West 108<sup>th</sup> Street. Based on the observed storage and uses, undocumented discharges may have affected subsurface conditions at the site.
- A sump with unconfirmed discharge point was observed in the basement of 143 West 108<sup>th</sup> Street building in the southeastern portion of the site.
- The surrounding area historically included factories, ConEd Substations, auto repair, and garages with gasoline USTs.
- Potential buried debris from former on-site structures that could contain historic fill of unknown origin and/or abandoned USTs.

***Other On-site Environmental Concerns (items outside the scope of ASTM E1527-13 such as ACM, LBP and/or PCBs in building materials or fill/debris)***

- Based on the age of the existing buildings, suspect asbestos-containing materials (ACM) may be present. Suspect ACM observed included: suspected historic in-ground hydraulic lifts at 143 West 108<sup>th</sup> Street and 151-159 West 108<sup>th</sup> Street, vinyl floor tile, vinyl stair cover, and associated mastic; suspended ceiling tile; thermal pipe insulation; electrical panel partitions; plaster; wallboard; and roofing materials, which were noted to be in good condition.
- Based on the age of the buildings, window caulking, fluorescent lighting fixtures and electrical equipment in these buildings may utilize polychlorinated biphenyl (PCB)-containing components. Fluorescent lights may contain mercury. The hydraulic building elevator at 145-147 West 108<sup>th</sup> Street and current and former hydraulic lifts at 143 West 108<sup>th</sup> Street and 151-159 West 108<sup>th</sup> Street and may utilize PCB-containing oil.
- Based on the age of the buildings, suspect lead-based paint may be present. Painted surfaces were observed to be in poor to good condition.
- Potential fill materials and/or demolition debris in the Property subsurface may contain lead-based paint, ACM, and/or PCBs.

### Potential for Vapor Migration

This Phase I ESA identified a potential for subsurface vapors, and thus a potential for vapor migration into future buildings at the Property, based on the RECs noted above.

## RECOMMENDATIONS

- Prior to undertaking subsurface disturbance, a subsurface investigation should be performed, including the collection and laboratory analysis of subsurface samples. It is possible that this investigation may uncover evidence of a petroleum spill or other situation reportable to NYSDEC and/or other regulatory agencies.
- Future development entailing soil (or bedrock) disturbance could encounter contaminated soil and/or bedrock. AKRF recommends that, if evidence of contaminated soil or rock (e.g., stains or odors) is encountered, these materials (and all other materials requiring off-site disposal) should be disposed of in accordance with applicable federal, state and local regulations. Any encountered spills should be reported and remediated in accordance with applicable regulatory requirements. Fill, soil and/or bedrock intended for off-site disposal should be tested in accordance with the requirements of the receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc.
- Past and/or present petroleum storage tanks have been identified by the Phase I ESA. If abandoned tanks are discovered, they should be properly registered, if required, with the NYSDEC and/or the New York City Fire Department, and closed and removed in accordance with all applicable regulations.
- Based upon the findings of the subsurface investigation, a determination should be made as to whether vapor mitigation measures should be developed and implemented for future buildings at the Property.
- Any containers of cleaning fluids and chemicals including paints and waste material should be properly disposed of in accordance with all federal, state and local regulations.
- Unless information or test results exist to indicate that suspect ACM do not contain asbestos, these materials should be sampled by a NYC-certified asbestos investigator prior to any renovation or demolition activities that may disturb them. Any ACM should be removed and disposed prior to the disturbance in accordance with local, state and federal requirements.
- Unless there is labeling or test data indicating that suspect PCB-containing fluorescent lighting fixtures, electrical equipment, elevators, and hydraulic lifts do not contain PCBs, and that fluorescent lighting fixtures do not contain mercury, if disposal is required, it should be performed in accordance with applicable federal, state and local requirements.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).
- If suspect ACM or PCB-containing equipment (e.g., fluorescent lighting fixtures or electrical equipment) are identified in fill or demolition debris beneath the Property, handling and disposal should be in accordance with applicable federal, state and local regulations and guidelines.

## 1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by the New York City Mayor's Office of Environmental Remediation to perform a Phase I Environmental Site Assessment (ESA) of the Property located at 103-107 and 143-159 West 108<sup>th</sup> Street, New York, NY (herein referred to collectively as the Property or the project site). The Property is also identified as Manhattan Tax Block 1863, Lots 5, 10, 13, and 26 totaling approximately 37,845-square feet. The Property consists of two discontinuous parcels with a public park between the two parcels. A site location map is provided as Figure 1.

At the time of AKRF's reconnaissance, the buildings at 103-107, 143, and 151-159 West 108<sup>th</sup> Street were utilized as parking garages and 145-149 West 108<sup>th</sup> Street was utilized as an emergency senior citizen shelter. The Property was bordered by: West 108<sup>th</sup> Street followed by Booker T Washington Junior High School and a Time Warner Cable garage to the south; residential and commercial buildings, followed by Columbus Avenue, to the east; mixed-use retail and residential, followed by Amsterdam Avenue to the west; and residential buildings followed by West 109<sup>th</sup> Street to the north. A public park is located between the 103-107 and 143 West 108<sup>th</sup> Street portions of the project site. The greater surrounding area was predominantly commercial and residential, with numerous new commercial and/or residential buildings under construction. A site plan is provided as Figure 2.

The scope of services for this assessment was in conformance with ASTM Standard E1527-13 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*). Any exceptions to, or deletions from, this practice are described in Section 8.0. The scope included the following:

- Observations of the Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Readily available geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration (including in soil, soil vapor and/or groundwater) within, from and onto the Property.
- The reconnaissance of the Property included observation of any readily visible suspect asbestos-containing materials (ACMs) and potential lead-based paint. However, no samples were collected or analyzed and this reconnaissance provides neither definitive nor exhaustive information.
- A state database of county-level radon concentrations was used to determine typical indoor radon levels and compare them to United States Environmental Protection Agency (USEPA) guidelines.
- Historical fire insurance maps, historical USGS topographic maps, and historical aerial photographs for the Property and nearby sites were reviewed to evaluate historical land uses. Additionally, historic city directories for the project site were reviewed.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Property and other properties within the ASTM-defined radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF) and the USEPA Civil Enforcement Docket. The federal listing of facilities

which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

- The following state regulatory databases were reviewed to determine the regulatory status of the Property and other properties within predetermined radii: petroleum and hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Hazardous Substance Disposal Site Draft Study; Hazardous Waste Treatment, Storage or Disposal Facilities; Major Oil Storage Facilities (MOSF); Brownfield Cleanup Program (BCP); and Historic Utility Sites.
- Local agency reviews including NYC Fire Department records (obtained as part of the database search), online Buildings and Finance Departments records, and Environmental Quality Review (CEQR) E Designation Sites were conducted for the Property only.

## 2.0 PHYSICAL SITE DESCRIPTION

On May 29, 2015, Ms. Elizabeth Matamoros of AKRF conducted a reconnaissance of the Property, accompanied by Ms. Ariel Krasnow of West Side Federation for Senior and Supportive Housing (WSFSSH), and Ms. Brenda Washington of NYC Housing Preservation and Development (HPD), who answered pertinent questions. Additionally, Mr. John Reccy, the garage operator of 103-107 West 108<sup>th</sup> Street; Mr. Roy Schoemberg, the garage operator of 143 and 151-159 West 108<sup>th</sup> Street; and Ms. Karen Jorgensen, the director of the senior citizen shelter, accompanied AKRF in their respective properties, and answered pertinent questions. Neighboring properties were also viewed, but only from public rights-of-way. At the time of the inspection, the weather was sunny and approximately 70 °F, the visibility good, and the premises adequately illuminated. Photographs from the reconnaissance are included in *Appendix A*.

### 2.1 General Site Conditions

#### 103-107 West 108<sup>th</sup> Street

The 103-107 West 108<sup>th</sup> Street portion of the Property consisted of a three-story building with a small subgrade mechanical room accessible by the sidewalk. Access to the building was gained through a vehicle entrance on West 108<sup>th</sup> Street, in the middle of the building.

At the time of the inspection, the building was occupied as a parking garage with three floors of parked cars and a small office space on the first floor at the front (south side) of the building. Mr. John Reccy, the garage operator, indicated that the garage had been in operation for 30 years under the current lease. No auto work currently takes place in the building, but when he first took over the building there were car batteries, waste oil, and 55-gallon drums throughout the building. Mr. Reccy reported that asbestos was recently identified in the furnace room, which was reportedly removed. The building was of brick and concrete construction with concrete floors, and building materials were observed to be in fair to good condition. The building was illuminated by fluorescent lights and served by one traction elevator for moving cars between floors. The elevator machine room and a small partially-enclosed space occupied by pigeons were located on the roof, and the roof was constructed of rolled-on roofing.

The building was heated with electric radiant heat, and no natural gas or fuel oil served the building. An old boiler and decommissioned 275-gallon aboveground storage tank (AST) were noted in the mechanical space, along with debris and broken glass on the floor. According to Mr.

Reccy, the building was previously used as a vehicle service station and performed oil changes. No significant oil staining was noted on the concrete floors and no evidence of tanks or fill ports were noted during the inspection. The exterior of the building was in fair condition with some peeling paint, and boarded up windows. The surrounding sidewalk was noted to be in good condition.

#### 143 West 108<sup>th</sup> Street

The 143 West 108<sup>th</sup> Street portion of the Property consisted of a five-story parking garage plus full basement. Access to the building was gained through an entrance on West 108<sup>th</sup> Street.

At the time of inspection, the building was occupied and operating as a parking garage. Mr. Roy Schoemberg, the garage operator, indicated that he had been associated with the operation of this garage for approximately 30 years and is on a month-to-month lease. The building was not currently heated, but when he took over the building, he noted there were fill ports in the middle of the building on the first floor which led to the basement. Mr. Schoemberg indicated that any tanks associated with prior gasoline filling station or used for heating would likely still be in place. Hydraulic parking lifts for the cars were noted in the building. All observed lifts were above-ground and fully contained; however, Mr. Schoemberg believed below-ground lifts may have been associated with prior uses of the building.

The building was served by ConEdison electricity and natural gas, but is not currently heated. Radiators from a former heating system were noted throughout the building with ceiling-mounted units noted on the fifth floor. A sump was noted along the eastern wall in the basement. The building was of brick and concrete construction with concrete floors. Building materials were observed to be in fair to good condition. The building was illuminated by fluorescent lights and served by two traction elevators on the southern side of the building for moving cars between floors. The roof consisted of roll-on roofing, and was recently patched. Mr. Schoemberg indicated that a new roof would be placed on top of the existing roof in the coming weeks. The roof contained the elevator machine rooms, and a discarded propane tank was observed.

#### 145-149 West 108<sup>th</sup> Street

The 145-149 West 108<sup>th</sup> Street portion of the Property consisted of a five-floor residential building plus basement, which occupied the majority of the lot footprint. A concrete patio was located on the northern side of the building, and a patio and garden were located on the eastern side of the building. Access to the building was gained through an entrance on West 108<sup>th</sup> Street.

At the time of inspection, an emergency senior citizen shelter occupied the building. The director of the shelter, Ms. Karen Jorgensen, led the reconnaissance and answered pertinent questions. The shelter was originally two buildings, and in 1986, the building at 145 West 108<sup>th</sup> Street was demolished, and 147-149 West 108<sup>th</sup> Street was gut renovated. Asbestos was removed during the 1986-1988 renovation, and the shelter opened in May 1988. The top four floors of the building are residential, with private rooms off a hallway and communal bathrooms. The first floor contains a lobby, small offices, a medical office, conference room, commercial kitchen, and dining space.

The building was heated by steam generated by a natural gas-fired boiler in the basement. Window air conditioning units cooled parts of the building, and a larger central air conditioning system served the first floor. Finishes noted include tile, painted walls, drywall, some carpeted and hard floors, all in good condition. The rear deck on the northern side of the building was of concrete construction with a crawl space underneath for storage. The building was illuminated by fluorescent lights and served by a hydraulic elevator. Trash was stored in the rear of the building

and picked up regularly by the City of New York. A small garden with newly imported topsoil was located on the eastern side of the building. Cleaning materials and chemical storage noted in the basement near the laundry room included ammonia, detergent, floor stripper, and floor finish. No odors or staining were noted in the chemical storage area. The exterior of the building was noted to be in good condition.

#### 151-159 West 108<sup>th</sup> Street

The 151-159 West 108<sup>th</sup> Street portion of the Property consisted of a four-floor parking garage plus basement. Access to the building was gained through an entrance on West 108<sup>th</sup> Street.

At the time of inspection, the building was occupied and operating as a parking garage. Mr. Roy Schoenberg, the garage operator, indicated that he had been associated with the operation of this garage for approximately 25 years and is on a month-to-month lease. The building was not currently heated or cooled. Gauges for four tanks were observed in the front office; however, these tanks are not currently in use and their exact location was unknown. According to Mr. Schoenberg, fill ports for the tanks were previously located in the center of the building on the first floor leading to the basement. Aboveground hydraulic parking lifts were noted on the first floor for vehicles. Patched concrete was noted in the basement of the garage.

The building was of brick and concrete construction with concrete floors. Building materials were observed to be in fair to good condition. The building was illuminated by fluorescent lights and served by two traction elevators on the south side of the building for moving cars between floors. The roof consisted of roll on roofing, recently replaced on top of the existing roof. The roof contained the elevator machine rooms. Bags of concrete, five gallon containers of silicone coating and paint, and propane tanks were stored on the roof. Additionally some broken windows, loose pipes and building materials, and stained rags were noted in the building.

## **2.2 Topography and Hydrogeology**

The Property surface topography was observed to slope slightly down toward the east. Based on the U.S. Geological Survey Central Park Quadrangle map, the Property slopes from approximately 105 to 90 feet above the North American Datum of 1983 (an approximation of mean sea level). Based on USGS mapping, the approximate depth to bedrock is 80 feet below grade. Based on USGS mapping and reports in the vicinity of the project site, groundwater is anticipated to flow in an east-southeasterly direction. However, actual water table depth and groundwater flow direction can be affected by many factors including subsurface openings or obstructions such as basements, utilities and subway tunnels (particularly the 1 Line tunnels to the west beneath Broadway, and the A/C/B/D tunnels to the east beneath Central Park West), current or past pumping of groundwater, past filling, and other factors beyond the scope of this assessment. Groundwater in this part of Manhattan is not used as a source of potable water.

## **2.3 Storage Tanks**

### **2.3.1 Underground Storage Tanks (USTs)**

The review of regulatory databases and computerized FDNY records did not reveal any records relating to USTs at any of the addresses comprising the Property.

Evidence of at least four USTs (four gauges) was noted at 151-159 West 108<sup>th</sup> Street. In addition, the current operator at 143 West 108<sup>th</sup> Street reported that USTs were formerly used at the Property. These USTs may have been removed, or may remain beneath the Property. Historical Sanborn maps identified tanks at three of the four site lots: two

gasoline tanks at 103-107 West 108<sup>th</sup> Street, three 550-gallon buried gasoline tanks at 143 West 108<sup>th</sup> Street, and four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street. These USTs may have been removed, or may remain beneath the Property. Additional USTs may have been used for heating of the buildings or other prior uses. No record of their closure, removal, or regulatory status was available.

Off-site USTs are discussed in Section 5.2.2.

### **2.3.2 Aboveground Storage Tanks (ASTs)**

The review of regulatory databases and computerized FDNY records did not reveal any records relating to ASTs at any of the addresses comprising the Property.

A decommissioned 275-gallon AST with no associated piping was noted in the partial basement of the 103-107 West 108<sup>th</sup> Street building. No record of its closure, removal, or regulatory status was available.

Off-site ASTs are discussed in Section 5.2.2.

## **2.4 Polychlorinated Biphenyls (PCBs) and Mercury**

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were used in a variety of products, in particular electrical equipment such as transformers, capacitors, fluorescent light fixtures, and voltage regulators, but also in hydraulic fluids and some other products such as caulking.

Based on the age of the buildings, fluorescent lighting fixtures, electrical equipment, transformers, elevator, hydraulic lifts, and caulking may contain PCBs. No evidence of leaks or stains from such equipment was observed.

## **2.5 Lead-Based Paint**

After 1977, the use of lead-based paint inside commercial structures was also restricted and its use elsewhere became less common, but lead-based paint may still sometimes be used outdoors. Lead-based paint can present a hazard, particularly to children, especially when it is in poor condition. Painted surfaces were observed to be in fair to good condition.

Activities (such as renovation or demolition) with the potential to disturb lead-based paint are subject to a variety of requirements, including US Occupational Safety and Health Administration regulation 29 CFR 1926.62 (Lead Exposure in Construction).

## **2.6 Utilities**

Consolidated Edison (Con Ed) provided electricity and natural gas to this area of the Manhattan. The Property was reportedly connected to the municipal water and sewer systems. A large sump with an unconfirmed discharge point was noted in the eastern portion basement of the building at 143 West 108<sup>th</sup> Street.

## **2.7 Waste Management and Chemical Handling**

No chemical storage was noted at 103-107 West 108<sup>th</sup> Street.

Chemical storage of propane and concrete was noted at 143 West 108<sup>th</sup> Street.

Chemical storage at 145-149 West 108<sup>th</sup> Street included plastic drums, bags, and smaller containers of paint, ammonia, floor stripper, floor finish, salt, and soaps associated with janitorial and small site repair uses, and were stored in containers in the basement. No evidence of releases

associated with this storage was observed. Medical waste generated from the small on-site clinic was containerized and disposed of by a private hauler. Waste at 147-149 West 108<sup>th</sup> Street was bagged and stored in the rear of the building. Trash disposal and recycling services were provided by NYC Department of Sanitation.

Chemical storage at 151 West 108<sup>th</sup> Street included bags of concrete, five gallon containers of silicone coating and paint, and propane tanks stored on the roof. A 55-gallon drum of unknown material was noted in the basement. The drum had some oily residue at the top, but no evidence of releases to the ground was observed.

Waste (refuse) at the garages was disposed of by private haulers. No generation of waste other than commercial waste was reported.

## 2.8 Radon

Radon is a colorless, odorless gas most commonly produced by the natural radioactive decay of certain rocks. According to a New York State Department of Health database the average level of radon found in basements in Manhattan is 2.12 picocuries/liter, below the USEPA recommended action level of 4.0 picocuries/liter.

## 3.0 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Asbestos is also commonly found in vinyl flooring, plaster, sheetrock, joint compound, ceiling tiles, roofing materials, gaskets, mastics, caulks and other products. Materials containing more than one percent asbestos are considered asbestos-containing materials (ACM). ACM are classified as either friable (i.e., more readily release fibers, such as most spray-applied fireproofing) or non-friable (such as floor tiles).

Suspect ACM observed during the reconnaissance included: thermal pipe insulation; electrical panel partitions; plaster; wallboard; and roofing materials, which were noted to be in varied condition. ACM may also be present in other locations not readily accessible during the reconnaissance. Additionally, buried structures (e.g., utility conduits) and/or historical fill material could include ACM. This reconnaissance did not constitute and cannot substitute for an asbestos survey which includes comprehensive inspection and material sampling with laboratory testing.

Regulatory requirements for ACM (or suspect ACM until proven not to be ACM) include maintenance requirements and, prior to any renovation or demolition, inspection/sampling by a NYC-certified asbestos investigator to determine if the project will disturb ACM. Any such ACM (and any other ACM subsequently identified) must be removed prior to the renovation or demolition. Any suspect ACM encountered during excavation should be sampled and disposed of in accordance with applicable requirements.

## 4.0 ADJACENT LAND USE

The Property was bordered by: West 108<sup>th</sup> Street followed by Booker T Washington Junior High School and a Time Warner Cable garage to the south; residential and commercial buildings, followed by Columbus Avenue, to the east; mixed-use retail and residential, followed by Amsterdam Avenue to the west; and residential buildings followed by West 109<sup>th</sup> Street to the north. A public park is located between the 103 West 108<sup>th</sup> Street and 143 West 108<sup>th</sup> Street portions of the Property. The greater

surrounding area was predominantly commercial and residential, with numerous new commercial and/or residential buildings under construction.

## 5.0 PROPERTY HISTORY AND RECORDS REVIEW

### 5.1 Prior Ownership and Usage

#### 5.1.1 Historical Land Use Maps

Historical maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage or disposal on or near the Property. Specifically, Sanborn Fire Insurance Maps from 1902, 1912, 1951, 1976, 1979, 1980, 1982, 1983, 1985, 1986, 1988, 1989, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, and 2005 were reviewed.

##### 1902

The portion of the Property at 103-107 West 108<sup>th</sup> Street was occupied by a structure shaded in gray. The portion of the Property at 143-159 West 108<sup>th</sup> Street was occupied by nine five-story row houses.

The parcels between the project site lots (i.e., the current park) were occupied by two wagon yards, two five-story dwellings, a structure labeled paints and storage, and an unlabeled structure. The remainder of the Property block was occupied by row houses. Across West 108<sup>th</sup> Street was the Lion Lager Beer Brewery, a large factory which occupied the majority of the block to the south. One block north was the National Academy of Design. Two blocks south was the Home for the Aged of the Little Sisters of the Poor at 129-149 West 106<sup>th</sup> Street, Laundry at 160-162 West 107<sup>th</sup> Street, a smoking pavilion and a two story structure with a tank at 110 West 107<sup>th</sup> Street. The surrounding area was developed primarily with dwellings.

##### 1912

The portion of the Property at 103-107 West 108<sup>th</sup> Street was labeled a garage that extended west to include 109-111 West 108<sup>th</sup> Street. The portion of the Property at 143-159 West 108<sup>th</sup> Street appeared similar to the 1902 map.

The parcel at 127 West 108<sup>th</sup> Street contained two dwellings, with an auto house for the Lion Brewery and a 550-gallon gasoline tank. A Chinese Laundry was shown on the site block at 984 Columbus Avenue and 991 Amsterdam Avenue. The north-adjacent block contained the State Women's Hospital, a restaurant in addition to the National Academy of Design. In addition to the Lion Brewery, the south-adjacent block contained the NY Edison Company Substation including a store house, an auto and wagon builder, and other office uses. An auto repair shop, machine shop, and garage were shown at 102-110 West 107<sup>th</sup> Street. The Cathedral of St John the Divine was shown two blocks north of the Property.

##### 1951

The portion of the Property at 103-107 West 108<sup>th</sup> Street contained a three-story garage with two gas tanks and capacity for 120 cars. The building was noted to be constructed in 1922. 143 West 108<sup>th</sup> Street contained a Cadillac Motor Car Service Station noted to be constructed in 1925 with three 550-gallon buried gasoline

tanks. 145-149 West 108<sup>th</sup> Street contained three five-story dwelling row houses. 151-159 West 108<sup>th</sup> Street contained a garage with capacity for 320 and four 550-gallon gasoline tanks. The building was constructed in 1925.

The lots between the site buildings at 109-135 West 108<sup>th</sup> Street contained an open and vacant structure, open space labeled wagon yard, and a gas tank. On the site block along Amsterdam Avenue was an undertaker, carpenter, and paints in addition to a Chinese Laundry. Along Columbus Avenue on the site block were a bakery, a Chinese Laundry, and a structure labeled paints. The remainder of the site block appeared residential. The south-adjacent block contained Public School 54, Booker T Washington Junior High School, and a playground in the place of the former Lion Brewery. The Consolidated Edison Substation was still shown. Auto repair with one 550-gallon buried tank was shown at 163 West 107<sup>th</sup> Street. The remainder of the surrounding area was commercial, residential, and storage, and largely similar to the 1951 map.

#### 1976

The portion of the Property at 103-107 West 108<sup>th</sup> Street was labeled West Side Rehabilitation Center. The buildings on the 143-159 West 108<sup>th</sup> Street portions of the Property appeared similar to the 1951 map.

The area at 109-135 West 108<sup>th</sup> Street was shown as a playground with a small comfort station in the middle. The structure labeled Paints on Columbus Avenue is no longer shown, and the remainder of the site block appears similar to the 1951 map. The former ConEd substation on the south-adjacent block was shown as vacant. A venetian blinds manufacturer was shown at 167-169 West 107<sup>th</sup> Street. The Home for the Little Sisters of the Poor was no longer shown two blocks south, and that lot was vacant. Cathedral Parkway housing was shown on the north-adjacent block in place of the former Women's Hospital. A ConEd substation was shown on the north-adjacent block in place of the former NY Academy of Design.

#### 1979

The portion of the Property at 103-107 West 108<sup>th</sup> Street was labeled auto repair. The lots at 143-159 West 108<sup>th</sup> Street appeared similar to the 1976 map.

The auto repair at 163 West 107<sup>th</sup> Street on the 1951 and 1976 maps was now shown as a church. No further significant changes were noted from the 1976 map.

#### 1980

The building at 145 West 108<sup>th</sup> Street was no longer shown. The remaining portions of the Property appeared similar to the 1979 map.

No significant changes were noted in the surrounding area.

#### 1982-1986

The Property appeared similar to the 1980 map.

Housing for the Elderly was developed at 129-149 West 106<sup>th</sup> Street, two blocks south of the Property at the former housing for the Little Sisters of the Poor. No further significant changes were noted in the surrounding area

1988

The building at 147-149 West 108<sup>th</sup> Street was labeled as a shelter, with a small addition in the building on the lot at 145 West 108<sup>th</sup> Street. The remaining portions of the Property appeared similar to the 1986 map.

No significant changes were noted in the surrounding area.

1989-2005

No significant changes were noted.

To summarize, the historical Sanborn maps indicated that the Property was occupied prior to 1902 by dwellings at 143-159 West 108<sup>th</sup> Street, and a paints and storage building at 103-107 West 108<sup>th</sup> Street. The historical buildings were demolished at various times between 1902 and 1920, with the exception of the building at 145 West 108<sup>th</sup> Street, which was demolished around 1980. Buildings consistent with the current structures on the project site were shown on the 1951 map.

The maps showed buried gasoline tanks at the existing garages. Tanks were identified at three of the four Property lots: two gas tanks at 103-107 West 108<sup>th</sup> Street in 1951, three 550-gallon buried gasoline tanks at 143 West 108<sup>th</sup> Street between 1951 and 2005, and four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street between 1951 and 2005.

The surrounding area was mixed-use throughout its history, with mostly commercial and residential uses, some auto-related uses and factories in the mid-20<sup>th</sup> century, and some educational uses in the middle and late 20<sup>th</sup> century. Land uses in the surrounding area with the potential to affect subsurface conditions beneath the Property included factories, paints and storage facility, auto repair, and garages and filling stations with gasoline USTs, including the historic gasoline tank noted in the current playground between the Property lots.

### 5.1.2 Historical Aerial Photographs

Historical aerial photographs were reviewed for indications of industrial usage or other evidence suggesting the use or disposal of hazardous materials on or adjacent to the subject property. Specifically, aerial photographs from 1924, 1940, 1943, 1951, 1954, 1961, 1966, 1974, 1976, 1984, 1991, 1995, 2006, 2008, 2009, 2010, and 2011 were reviewed. Copies of the aerial photographs are included in *Appendix B*. Details of these photographs are discussed below:

1924

The project site appeared to be developed with structures. The entire Property block and surrounding blocks were shown as densely developed. A small park or open space with trees was shown on the south-adjacent block. Central Park was shown two blocks east of the project site. Morningside Park was shown two blocks north-northeast of the project site. The Cathedral of St John the Divine and associated buildings and landscaping were shown two blocks north of the project site. An elevated track was shown running on the east-adjacent street. The West Side Highway followed by the Hudson River were shown approximately 0.5-mile west of the project site.

1940

The project site appeared to be similar to the 1924 photograph. Many of the buildings on the site block and the surrounding area appear similar to each other and are likely predominantly residential buildings.

1943

Due to the resolution of the photograph, details of the project site could not be clearly identified. The surrounding area appeared to be developed with more high-rise buildings than the earlier photographs, including tall buildings on the west-adjacent block.

1950

The project site block appeared to have a layout similar to the current layout. Open space was shown on the site block in the location of the current playground. The south-adjacent block was developed with a large building, likely the current JHS 54 and associated playground. The elevated track is no longer shown on the east-adjacent street (Columbus Avenue), and now appears open to regular traffic.

1954

The project site appeared to be similar to the 1950 photograph. The playground on the site block appeared to have some small structures. The greater surrounding area appeared similar to the 1950 photograph.

1961-1966

The project site appeared to be similar to the 1954 photograph. New development of high rise buildings was shown five blocks south of the project site, likely the existing public housing projects. The greater surrounding area appeared similar to the 1954 photograph.

1974

The project site appeared similar to the 1966 photograph. The area south of the project site was not shown. Columbia University was shown approximately 0.5-mile north-northwest of the project site. The greater surrounding area appeared similar to the 1966 photograph.

1976

Due to the resolution of the photograph, features could not be clearly identified.

1984

The project site appeared similar to the 1974 photograph. A large building was shown two blocks south of the project site. The greater surrounding area appeared similar to the 1974 photograph.

1991-2011

The project site and surrounding area appeared similar to the 1984 photograph.

To summarize, the project site parcel was developed prior to 1924 with structures that resemble the current site layout. The area surrounding the study site historically consisted of residential properties, larger buildings, Columbia University to the north, Central Park to the east, the Hudson River to the west, and Morningside Park to the north-northeast. A school and playground were noted on the south-adjacent block.

### 5.1.3 Historical USGS Topographic Maps

USGS Topographic Maps from 1897, 1947, 1956, 1966, 1979, and 1995 were reviewed. The USGS maps are included in Appendix D.

#### 1897: Harlem Quadrangle 1:625000

The project site appeared to be developed with unspecified buildings. The project site appeared at an elevation of approximately 90 to 105 feet, sloping slightly to the east, and with the surrounding area generally level. This area of Manhattan was densely developed, with buildings shown in the surrounding area, with the exception of Central Park two blocks east, the Hudson River approximately 0.5-mile west, and less dense development in the vicinity of Morningside Park, three blocks north of the project site.

#### 1947: Central Park Quadrangle 1:25000

The project site and surrounding area were shaded black indicating unspecified urban development. St. John the Divine Cathedral was shown two blocks north of the project site. Subway tracks were shown in the vicinity of the project site running north/south along Central Park West and Broadway. Columbia University was shown approximately 0.5-mile north-northwest of the project site. The entire surrounding area, with the exception of Central Park, was densely developed.

#### 1956: Central Park Quadrangle 1:25000

The project site and the surrounding area were shaded pink, indicating unspecified urban development. The playground, likely the one on the current site block was shown. Junior High School 54 was shown on the south-adjacent block. A women's hospital was shown on the north-adjacent block. Several churches and schools were shown on the adjacent and surrounding blocks.

#### 1966, 1979, and 1995: Central Park Quadrangle 1:25000

No significant changes were noted from the 1956 map.

### 5.1.4 Property Tax Files and Zoning Records

Based on information provided by the City of New York, the lots are all zoned as R8-B (residential district). Lots 5, 13, and 26 were classified by the DOB as G-1 (Garage/Gas Station), Lot 10 was classified as N2 (Asylums and Homes). The buildings were listed as constructed between 1910 and 1930.

### 5.1.5 Local Street Directories

A City Directory summary prepared by Environmental Data Resource, Inc. was reviewed as part of this Phase I ESA. The City Directory summary consisted of the names of businesses located on-site and in adjacent properties, compiled from city and reverse telephone directories at approximately five-year intervals starting in 1928. There were no listings provided for 103-107 West 108<sup>th</sup> Street, 143 West 108<sup>th</sup> Street, or 145 West 108<sup>th</sup> Street.

#### 147 West 108<sup>th</sup> Street

- Residential tenants in 1927, 1931, 1950, 1956, 1958, 1963, 1968, 1973, and 1978.

149 West 108<sup>th</sup> Street

- Residential tenants in 1920, 1927, 1931, 1942, 1950, 1956, 1958, 1963, 1968, 1973, 1978, and 1983.
- Valley Lodge in 1993, 1998, 2000, 2006, and 2008.
- West Side Federation for Senior Housing in 2000, 2006, and 2013.

151 West 108<sup>th</sup> Street

- Tailor in 1920.
- Residential tenants in 1920.
- Gerdes First National Bank in 1920.
- Meat Center in 1920.
- Park York Garage Corporation in 1938, 1942, 1947, 1950, 1956, 1958, 1963, 1968, 1973, 1978, 1983, 1988, 1993, and 1998.
- Yorkshire Garage in 1927, 1950, 1978, 1983, 1988, 1993, 1998, 2000, 2006, and 2013.
- Russo's Auto Repair in 1956, 1958, 1963, 1958, and 1973.
- Zephyr Contracting in 2000, 2006, and 2008.

153 West 108<sup>th</sup> Street

- Residential tenants in 1920 and no listings thereafter.

155 West 108<sup>th</sup> Street

- Residential tenants in 1920 and 1923.

157 West 108<sup>th</sup> Street

- Residential tenants in 1920.
- Midtown Purchasing Co in 1983.

159 West 108<sup>th</sup> Street

- Residential tenants in 1920 and no listings thereafter.

Copies of the directories provided by EDR are included in Appendix E.

## 5.2 Regulatory Review

The regulatory database listings, shown in Appendix F, were obtained from Environmental Data Resources (EDR), of Milford, Connecticut. It includes summaries of the databases searched, their radii around the Property, and limitations of the data. The databases searched and associated radii were consistent with ASTM E1527-13.

### 5.2.1 Federal

Databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory

System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF); and the USEPA Civil Enforcement Docket. Facilities subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) are discussed with State RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's database of some of the most serious uncontrolled or abandoned hazardous waste sites identified for probable remedial action under the Superfund Program. These sites may constitute an immediate threat to human health and the environment. Due to the amount of public attention focused on NPL sites, they pose a significant risk of stigmatizing surrounding properties and potentially impacting property values.

The Property was not listed in the NPL database, and one NPL site, the Hudson River PCB cleanup, was identified within a one-mile radius of the Property. Based on the distance (0.45-mile away) and anticipated groundwater flow direction and the contamination, this listing is not anticipated to have affected the Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of known or suspected, uncontrolled or abandoned hazardous waste sites which the USEPA has investigated, or plans to investigate, for a release, or threatened release, of hazardous substances pursuant to the Superfund Act of 1980 (CERCLA). Some of these sites may constitute a potential threat to human health and the environment. While it has been determined by the USEPA that some CERCLIS sites require no action, others could pose a real or perceived environmental threat to neighboring properties, thus affecting property values.

One listing, the Hudson River PCBs, 0.45-mile west of the Property, was identified within a ½-mile radius of the Property. Based on distance, anticipated groundwater flow direction, and/or listing details, these facilities are not anticipated to have affected the Property.

Comprehensive Environmental Response, Compensation, and Liability Information System-No Further Remedial Action Planned (CERCLIS-NFRAP)

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" have been removed from CERCLIS. NFRAP sites may be sites where, following an investigation, no contamination was discovered, contamination was removed quickly without the need for the project site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

The project site was not listed in the CERCLIS-NFRAP database, and no CERCLIS NFRAP sites were identified within a half-mile radius of the project site.

Corrective Actions Report (CORRACTS)

The CORRACTS database identifies hazardous waste handlers with RCRA corrective action activity.

The project site was not listed in the CORRACTS database and no CORRACTS sites were identified within a one-mile radius of the project site.

Resource Conservation and Recovery Information System (RCRIS)

The Resource Conservation and Recovery Information System includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste defined by the Resource Conservation and Recovery Act (RCRA).

Twenty-six RCRA hazardous waste generators and transporters were listed within ¼-mile of the project site. The following significant RCRA listings were noted based on proximity to the site and current regulatory status:

- Eight Large Quantity Generators (LQGs) were identified, including seven Con Edison service boxes and manholes listed for lead wastes.
- Rite Aid, located approximately 0.2-mile northwest of the properties at 2833 Broadway, was listed as a LQG of corrosive and ignitable wastes, heavy metals, and organic compounds.
- Three Small Quantity Generators (SQGs) were listed, including the Cathedral of St John the Divine, located approximately 750 feet north of the project site, for lead generation; Public School 145 located approximately 830 feet south-southwest of the project site, for lead; and Verizon located approximately 550 feet east-southeast of the properties for halogenated solvents.
- Several ConEdison service boxes and manholes were listed as Conditionally Exempt Small Quantity Generator (CESQGs), and as historic SQGs and LQGs of ignitable waste, PCBs, and spent halogenated solvents.
- PS 165 located approximately 470 feet northwest of the Property was listed as a CESQG of ignitable, corrosive, and reactive wastes.

Due to their regulatory status, distance from the project site, and assumed groundwater flow direction, the facilities identified are not expected to impact groundwater beneath the project site.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on reported releases of petroleum and other potentially hazardous substances.

The project site was not listed in the ERNS database.

Toxic Chemical Release Inventory System (TRIS)

This federal database, compiled by the EPA, identifies facilities that release chemicals to the air, water, and land in reportable quantities.

The project site was not listed in the TRIS database.

Superfund Consent Decrees (CONSENT)

Superfund consent decrees are major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. These decrees are periodically released by the United States District Courts after settlement by parties to litigation matters.

The project site was not listed in the CONSENT database, and one CONSENT site, the Hudson River PCBs, was identified within a one-mile radius of the project site. As discussed above, this listing is not anticipated to affect the subsurface of the Property.

Records of Decision (ROD)

Record of Decision documents mandate permanent remedies at NPL sites, and contain technical and health information to aid in the cleanup.

The project site was not listed in the ROD database, and one ROD site, Hudson River PCBs, was identified within a one-mile radius of the project site. As discussed above, this listing is not anticipated to affect the subsurface of the Property.

Delisted NPL (National Priority List Deletions)

This database described former NPL sites that are removed from the NPL list by the US EPA. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establish the criteria used by the EPA to delist sites where no further federal response is needed.

The project site was not listed in the delisted NPL database, and no delisted NPL sites were identified within a one-mile radius of the project site.

## 5.2.2 State

New York SPILLS Database

The New York SPILLS database includes a list of releases reported to NYSDEC, including those attributed to tank test failures and tank failures. The tank test failures list only covers tanks that are below ground, while the tank failures list includes tanks that are either below or above ground. This database also lists spills that occur during the transportation of chemicals.

One hundred thirty-eight spills were reported within a ½-mile radius of the project site, including six active status spills. No spills were listed for the project site.

Twenty-nine closed-status spills were reported within a 0.1-mile radius of the project site for small quantities of recovered material identified in manholes, vaults, and service boxes on the surrounding intersections. Recovered materials include petroleum, dielectric fluid, and lead, and due to regulatory status are not anticipated to have affected the subsurface conditions at the project site.

The SPILLS listings occurred in a presumed downgradient groundwater flow direction with respect to the project site, or were of an insignificant nature and, as such, would not be expected to have significantly affected subsurface of the project site. Details from all spills are included in Appendix F.

Chemical Bulk Storage (CBS) Database

The New York CBS is a list of facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

No CBS facilities are listed within a ¼-mile radius of the Project Site.

Solid Waste Facilities/Landfill Sites (SWF/LF)

This database includes certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

No Solid Waste Facilities/Landfill Sites were identified within a half-mile radius of the project site.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database (see below).

Two hundred thirty-nine PBS facilities were identified within a 1/8-mile radius of the Property. No tanks were registered at the project site. Details of the nearest PBS facilities with the potential to affect the project site are included in Table 1 below:

**Table 1**  
**Area Petroleum Bulk Storage Facility Data**

Location	Capacity (gallons)	Product Stored	Status	Distance/Direction from Study Site
170 West 109 <sup>th</sup> Street	1 x 3000 AST	#2 Fuel Oil	Closed-In Place	North-adjacent
174 West 109 <sup>th</sup> Street	1 x 1200 AST	#2 Fuel Oil	Open-In Use	North-adjacent
981 Amsterdam Avenue	1 x 3000 AST	Gasoline	Open-In Use	West-adjacent
200 West 108 <sup>th</sup> Street Housing Corp	1 x 7500 AST	#6 Fuel Oil	Closed-Removed	160 feet/west
200 West 108 <sup>th</sup> Street	1 x 4000 AST	#2 Fuel Oil	Open-In Use	
201 West 108 <sup>th</sup> Street Corp	1 x 4000 AST	#2 Fuel Oil	Open-In Use	175 feet/west
201 West 108 <sup>th</sup> Street				
Ascension School 224 West 108 <sup>th</sup> Street	1 x 5,000 UST	#2 Fuel Oil	Open-In Use	370 feet/west-northwest
221 West 107 <sup>th</sup> Street Corp	1 x 2000 UST	Leaded Gasoline	Closed-Converted	400 feet/west
221 West 107 <sup>th</sup> Street	1 x 2000 AST	#2 Fuel Oil	Open-In Use	

**Notes:** AST - aboveground storage tank  
UST - underground storage tank

State Hazardous Waste Disposal Site Registry (SHWS)

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

No State Hazardous Waste Disposal Sites were identified within a one-mile radius of the project site.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were reported within a 1/8-mile radius of the project site.

Environmental Restoration Program (ERP)

These sites (which are generally municipally-owned) are receiving New York State funding for site investigation and remediation. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No ERP sites were identified within a 1/2-mile radius of the project site.

Voluntary Cleanup Program

The Voluntary Cleanup Program is a NYSDEC program for investigation and remediation of (generally) privately-owned sites. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No Voluntary Cleanup Program sites were identified within a 1/2-mile radius of the project site.

Brownfield Cleanup Program (BCP)

This NYSDEC program is the successor to the Voluntary Cleanup Program. Some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

One BCP site was identified within a 1/2-mile radius of the project site. The former 110<sup>th</sup> Street Service Station is located at 2040 Frederick Douglass Boulevard approximately 0.25-mile east of the Property. Groundwater flow at this site was reported to be to the east-southeast, and is not anticipated to impact the project site.

**5.2.3 Local Agency File Review**

Records available online from the New York City Fire, Buildings and Finance Departments were viewed for the Property. Since the records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, and records indicating prior uses. Copies of pertinent information are included in Appendix H.

Buildings Department

Computerized New York City Department of Buildings records for the Property tax lots identified the following:

103 West 108<sup>th</sup> Street

- A demolition permit dated 1922.
- A 1923 Certificate of Occupancy (C of O) for a three-floor public garage with boiler room.

- Numerous DOB violations, related to the elevator, including two active violations.

143 West 108<sup>th</sup> Street

- Numerous DOB violations, related to the construction, including two active violations.

145 West 108<sup>th</sup> Street

- An oil burner application dated 1958.
- A demolition permit dated 1979.
- 1983 and 1991 C's of O for a 5-story office building with basement. The C of O included records for an elevator, kitchen, boiler room, and gas and water meter.
- A new building permit dated 1997.

151 West 108<sup>th</sup> Street

- Numerous DOB violations, related to the elevator, including three active violations.

There were no online DOB listings for 105-107 West 108<sup>th</sup> Street or for 147-149 West 108<sup>th</sup> Street. Files pertaining to the demolition and new building permits were unavailable for review.

Land Title Records and Tax Records

Electronic property transaction records for the Property Block and Lot were reviewed from the New York City Department of Finance Office of the City Register Automated City Register Information System (ACRIS). Deed information obtained from the ACRIS files is summarized as follows:

103-107 West 108<sup>th</sup> Street

No records were identified for this Property.

137 West 108<sup>th</sup> Street

Year	Grantor/Grantee
1966	Grantor is: The Welton Brothers; Grantee is: 137 West 108 <sup>th</sup> Street Corporation

Additionally, a court order from 1866 granting the Property in the Cathedral Parkway Urban Renewal Area.

145-147 West 108<sup>th</sup> Street

Year	Grantor/Grantee
1986	Grantor is: The City of New York; Grantee is: Valley Lodge Housing

151 West 108<sup>th</sup> Street

Year	Grantor/Grantee
1982	Grantor is: Park Yorkshire Garage Co; Grantee is: Park Yorkshire Garage Corp

The title information search did not indicate evidence of RECs in connection with the Property. A review of computerized ACRIS records, and an EDR Lien Search identified no environmental liens or environmental records for the Property.

Department of City Planning

A search of NYC Environmental Quality Review Requirements (CEQR) data indicated that the Property lots were not assigned (E) designations.

A negative declaration for CEQR action number 06HPD024M for 107, 143 and 151 West 108<sup>th</sup> Street (Block 1863, Lots 5, 13, and 26) was recorded on July 14, 2006 by the City of New York. The ULURP actions included the disposition of city-owned property, designation of the sites as an Urban Development Action Area Plan (ADAAP) Project, and an amendment to the Cathedral Parkway Urban Renewal Plan. The declaration included a statement of no significant effect on the environment, and no RECs are associated with this action.

Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be reviewed (i.e., beyond those included as part of the standard database search or checked online) when, in judgment of the environmental professional, such records for the Property or any adjoining property would be reasonably ascertainable; and useful, accurate and complete in light of the objective of the records review. These records may include:

- Local Brownfields Lists
- Local Lists of Landfill/solid waste disposal sites
- Local Lists of Hazardous Waste/Contaminated Sites
- Local Lists of Registered Tanks
- Local Land Records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records include:

- Department of Health/Environmental Division
- Fire Department
- Building Permit/Inspection Department
- Local/Regional Pollution Control Agency
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In AKRF's judgment, no such additional local records meeting the ASTM criteria are pertinent for the Property.

Freedom of Information Law (FOIL) requests for information relevant to environmental conditions on the Property were submitted to the NYC Department of Environmental Protection (NYCDEP), NYC Department of Health and Mental Hygiene (NYCDOH), New York State Department of Health (NYSDOH), and NYSDEC. In letters dated May 28, 2015 and June 4, 2015, respectively, the NYCDEP and NYSDEC indicated that no records for the Property addresses were identified. To date, no other responses have been

provided to AKRF. In the event that pertinent information is provided following the completion of this report, an addendum to the report will be prepared to discuss the findings.

## 6.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the Property owners and operators provide any pertinent information regarding the Property, specifically:

- Whether any *environmental liens* or *activity and land use limitations (AULs)* are in place or filed or recorded against the Property?
- Whether they had any specialized knowledge or experience related to the Property or nearby properties (e.g., specialized knowledge of any chemicals used on-site)?
- Whether the (anticipated) purchase price reflects that the Property is or could be contaminated?
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Property?
- Whether they were aware of any obvious indicators of contamination at the Property?
- Whether they were aware of any pending, threatened, ongoing or past litigation/enforcement action/consent order/notice of violation related to hazardous substances or petroleum products?

According to Ms. Ariel Krasnow, of WSFSSH, the Phase I was performed to evaluate the Property as part of due diligence related to its potential redevelopment with a new apartment buildings. Neither Ms. Krasnow nor any of the site operators were aware of any: environmental liens or activity use limitations on the Property; property value reduction due to environmental issues; any pending, threatened, ongoing or past litigation/enforcement action/consent order/notice of violation related to hazardous substances or petroleum products; or any obvious indicators of contamination on the Property. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

## 7.0 PREVIOUS STUDIES

Brownfields Opportunity Area Pre-Nomination Material for 103 and 143 West 108<sup>th</sup> Street was provided to AKRF for review. The material did not include any additional information for the purposes of this report, and is included in Appendix G.

No additional studies or reports were provided for the completion of this report.

## 8.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- Some vehicles were parked at the on-site parking lot, which limited the ability to inspect the pavement for staining, presence of wells or catch basins, or other features.

- The parking bays on the eastern portion of the Property were locked and inaccessible.
- Building areas viewed during the reconnaissance included typical offices, a meeting room on the second floor, the garage in the western portion of the building, and mechanical spaces.
- Interviews and user provided information were limited to those discussed in Section 6.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The Property area history was not conducted in five-year intervals. However, sufficient information about the history of the site and surrounding area could be obtained from the available historical Sanborn maps, New York City Buildings Department records, and interviews, and this data gap is not likely to alter the conclusions of this report.
- Agency File Reviews for the Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 5.2), and FOIL requests for pertinent records submitted to the NYCDEP, NYCDOH, NYSDOH, and NYSDEC. AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions or other environmental concerns at the Property and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

## 9.0 CONCLUSIONS AND RECOMMENDATIONS

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term “Recognized Environmental Condition” or REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC (HREC), Controlled REC (CREC), and *De Minimis* Condition. A *De Minimis* Condition is defined as an environmental concern that is not a threat to human health or the environment and would not be subject to enforcement action.

At the time of AKRF’s reconnaissance, the buildings at 103-107 West 108<sup>th</sup> Street, 143 West 108<sup>th</sup> Street, and 151-159 West 108<sup>th</sup> Street were utilized as a parking garages and 145-149 West 108<sup>th</sup> Street was utilized as an emergency senior citizen shelter. The properties were bordered by: West 108<sup>th</sup> Street followed by Booker T Washington Junior High School and a Time Warner Cable garage to the south; residential and commercial buildings, followed by Columbus Avenue, to the east; mixed-use retail and residential, followed by Amsterdam Avenue to the west; and residential buildings followed by West 109<sup>th</sup> Street to the north. The project site consists of two discontinuous parcels with a public park located between the 103-107 West 108<sup>th</sup> Street and 143 West 108<sup>th</sup> Street portions of the Property. The greater surrounding area was predominantly commercial and residential, with numerous new commercial and/or residential buildings under construction.

This assessment revealed the following:

### ***Recognized Environmental Conditions (RECs)***

- Potential underground storage tanks (USTs) and former aboveground storage tanks (ASTs) were noted as follows:
  - 103-107 West 108<sup>th</sup> Street – Historical Sanborn maps identified two gas tanks at 103-107 West 108<sup>th</sup> Street in 1951. A decommissioned 275-gallon AST with no associated piping was noted in the partial basement of the 103-107 West 108<sup>th</sup> Street building. No record of its closure, removal, or regulatory status was available.
  - 143 West 108<sup>th</sup> Street - Historical Sanborn maps identified three 550-gallon buried gasoline tanks at 143 West 108<sup>th</sup> Street between 1951 and 2005. The operator Mr. Schoemberg indicated fill ports were previously located in the middle of the first floor leading to the basement of each building. Mr. Schoemberg was unaware of tank closure or removal.
  - 145-149 West 108<sup>th</sup> Street – DOB records identified an oil burner permit dated 1958.
  - 151-159 West 108<sup>th</sup> Street - Historical Sanborn maps identified four 550-gallon gasoline tanks at 151-159 West 108<sup>th</sup> Street between 1951 and 2005. During reconnaissance, gauges for four tanks were observed. Operator Mr. Schoemberg indicated fill ports were previously located in the middle of the first floor leading to the basement of each building. Mr. Schoemberg was unaware of tank closure or removal.

- Historical uses of the existing buildings included an automobile repair facility at 103-107 West 108<sup>th</sup> Street and a Cadillac Service Station at 143 West 108<sup>th</sup> Street, based on Sanborn Maps and interviews. Based on Sanborn Maps and interviews, there is also potential for prior use as vehicle maintenance at 151-159 West 108<sup>th</sup> Street. In addition to the tanks mentioned above, additional tanks and hydraulic lifts may also be present beneath the basement floor or where the vehicle maintained may have been performed.
- Chemical and material storage noted during inspections including: propane and concrete at 143 West 108<sup>th</sup> Street; plastic drums, bags, and smaller containers of paint, ammonia, floor stripper, floor finish, salt, and soaps at 145-149 West 108<sup>th</sup> Street; and bags of concrete, five gallon containers of silicone coating and paint, and propane tanks stored on the roof, as well as a 55-gallon drum of unknown material with some oily residue at the top in the basement of 151-159 West 108<sup>th</sup> Street. Based on the observed storage and uses, undocumented discharges may have affected subsurface conditions at the site.
- A sump with unconfirmed discharge point was observed in the basement of 143 West 108<sup>th</sup> Street building in the southeastern portion of the site.
- The surrounding area historically included factories, ConEd Substations, auto repair, and garages with gasoline USTs.
- Potential buried debris from former on-site structures that could contain historic fill of unknown origin and/or abandoned USTs.

***Other On-site Environmental Concerns (items outside the scope of ASTM E1527-13 such as ACM, LBP and/or PCBs in building materials or fill/debris)***

- Based on the age of the existing buildings, suspect asbestos-containing materials (ACM) may be present. Suspect ACM observed included: suspected historic in-ground hydraulic lifts at 143 West 108<sup>th</sup> Street and 151-159 West 108<sup>th</sup> Street, vinyl floor tile, vinyl stair cover, and associated mastic; suspended ceiling tile; thermal pipe insulation; electrical panel partitions; plaster; wallboard; and roofing materials, which were noted to be in good condition.
- Based on the age of the buildings, window caulking, fluorescent lighting fixtures and electrical equipment in these buildings may utilize polychlorinated biphenyl (PCB)-containing components. Fluorescent lights may contain mercury. The hydraulic building elevator at 145-147 West 108<sup>th</sup> Street and current and former hydraulic lifts at 143 West 108<sup>th</sup> Street and 151-159 West 108<sup>th</sup> Street and may utilize PCB-containing oil.
- Based on the age of the buildings, suspect lead-based paint may be present. Painted surfaces were observed to be in poor to good condition.
- Potential fill materials and/or demolition debris in the Property subsurface may contain lead-based paint, ACM, and/or PCBs.

**Potential for Vapor Migration**

This Phase I ESA identified a potential for subsurface vapors, and thus a potential for vapor migration into future buildings at the Property, based on the RECs noted above.

**RECOMMENDATIONS**

- Prior to undertaking subsurface disturbance, a subsurface investigation should be performed, including the collection and laboratory analysis of subsurface samples. It is possible that this

investigation may uncover evidence of a petroleum spill or other situation reportable to NYSDEC and/or other regulatory agencies.

- Future development entailing soil (or bedrock) disturbance could encounter contaminated soil and/or bedrock. AKRF recommends that, if evidence of contaminated soil or rock (e.g., stains or odors) is encountered, these materials (and all other materials requiring off-site disposal) should be disposed of in accordance with applicable federal, state and local regulations. Any encountered spills should be reported and remediated in accordance with applicable regulatory requirements. Fill, soil and/or bedrock intended for off-site disposal should be tested in accordance with the requirements of the receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc.
- Past and/or present petroleum storage tanks have been identified by the Phase I ESA. If abandoned tanks are discovered, they should be properly registered, if required, with the NYSDEC and/or the New York City Fire Department, and closed and removed in accordance with all applicable regulations.
- Based upon the findings of the subsurface investigation, a determination should be made as to whether vapor mitigation measures should be developed and implemented for future buildings at the Property.
- Any containers of cleaning fluids and chemicals including paints and waste material should be properly disposed of in accordance with all federal, state and local regulations.
- Unless information or test results exist to indicate that suspect ACM do not contain asbestos, these materials should be sampled by a NYC-certified asbestos investigator prior to any renovation or demolition activities that may disturb them. Any ACM should be removed and disposed prior to the disturbance in accordance with local, state and federal requirements.
- Unless there is labeling or test data indicating that suspect PCB-containing fluorescent lighting fixtures, electrical equipment, elevators, and hydraulic lifts do not contain PCBs, and that fluorescent lighting fixtures do not contain mercury, if disposal is required, it should be performed in accordance with applicable federal, state and local requirements.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).
- If suspect ACM or PCB-containing equipment (e.g., fluorescent lighting fixtures or electrical equipment) are identified in fill or demolition debris beneath the Property, handling and disposal should be in accordance with applicable federal, state and local regulations and guidelines.

## **10.0 SIGNATURE PAGE**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.

---

Marc S. Godick, LEP  
Senior Vice President

Kathleen Brunner  
Senior Technical Director

## 11.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the Property, and to identify existing and/or potential environmental issues associated with the Property including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*.

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 8.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the Property at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the Property and the surrounding area, as well as a visual reconnaissance of current conditions.

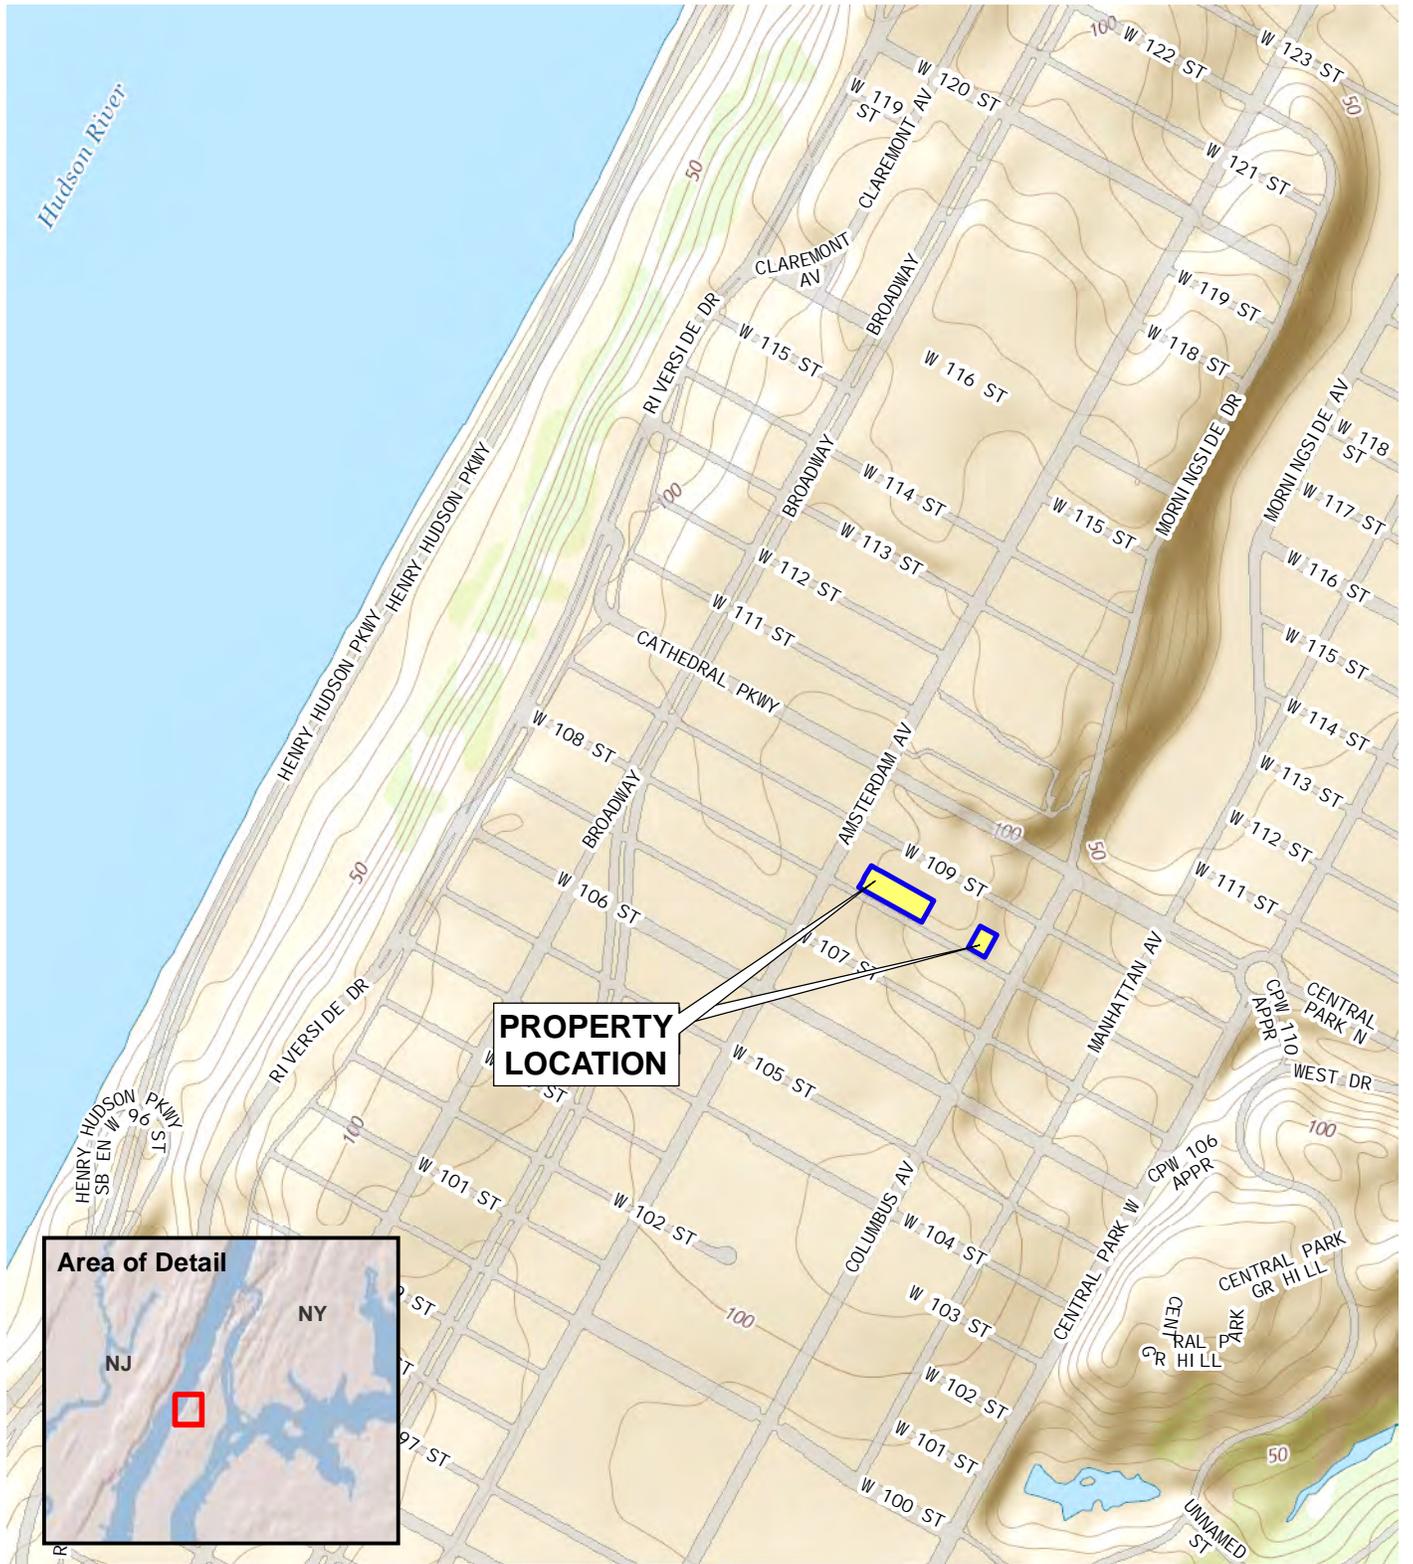

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the Property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than the NYC Office of Environmental Remediation and their successors or assignees, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RESEARCH SUMMARY

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

103-107 AND 143-159 WEST 108TH STREET  
NEW YORK, NY 10025

#### COORDINATES

Latitude (North): 40.8013000 - 40° 48' 4.68"  
Longitude (West): 73.9636000 - 73° 57' 48.96"  
Universal Transverse Mercator: Zone 18  
UTM X (Meters): 587427.1  
UTM Y (Meters): 4517005.0  
Elevation: 92 ft. above sea level

#### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 40073-G8 CENTRAL PARK, NY NJ  
Most Recent Revision: 1995

#### AERIAL PHOTOGRAPHY IN THIS REPORT

Portions of Photo from: 20100731, 20110705, 20110710

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Federal Delisted NPL site list***

Delisted NPL..... National Priority List Deletions

### ***Federal CERCLIS list***

FEDERAL FACILITY..... Federal Facility Site Information listing

### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP..... CERCLIS No Further Remedial Action Planned

### ***Federal RCRA CORRACTS facilities list***

CORRACTS..... Corrective Action Report

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***State- and tribal - equivalent CERCLIS***

NY SHWS..... Inactive Hazardous Waste Disposal Sites in New York State  
NJ SHWS..... Known Contaminated Sites in New Jersey

## EXECUTIVE SUMMARY

NY VAPOR REOPENED..... Vapor Intrusion Legacy Site List

### ***State and tribal landfill and/or solid waste disposal site lists***

NY SWF/LF..... Facility Register  
NJ SWF/LF..... Solid Waste Facility Directory

### ***State and tribal leaking storage tank lists***

NY HIST LTANKS..... Listing of Leaking Storage Tanks  
INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### ***State and tribal registered storage tank lists***

NJ UST..... Underground Storage Tank Data  
NY CBS UST..... Chemical Bulk Storage Database  
NY MOSF UST..... Major Oil Storage Facilities Database  
NY CBS AST..... Chemical Bulk Storage Database  
NY MOSF AST..... Major Oil Storage Facilities Database  
NY CBS..... Chemical Bulk Storage Site Listing  
NY MOSF..... Major Oil Storage Facility Site Listing  
INDIAN UST..... Underground Storage Tanks on Indian Land  
FEMA UST..... Underground Storage Tank Listing

### ***State and tribal institutional control / engineering control registries***

NY ENG CONTROLS..... Registry of Engineering Controls  
NJ ENG CONTROLS..... Declaration Environmental Restriction/Deed Notice Sites  
NY INST CONTROL..... Registry of Institutional Controls  
NJ INST CONTROL..... Classification Exception Area Sites  
NY RES DECL..... Restrictive Declarations Listing

### ***State and tribal voluntary cleanup sites***

NY VCP..... Voluntary Cleanup Agreements  
INDIAN VCP..... Voluntary Cleanup Priority Listing  
NJ VCP..... Voluntary Cleanup Program Sites

### ***State and tribal Brownfields sites***

NY ERP..... Environmental Restoration Program Listing  
NJ BROWNFIELDS..... Brownfields Database

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

ODI..... Open Dump Inventory  
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations  
NY SWRCY..... Registered Recycling Facility List

## EXECUTIVE SUMMARY

NY SWTIRE..... Registered Waste Tire Storage & Facility List  
NJ SWRCY..... Approved Class B Recycling Facilities  
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands

### **Local Lists of Hazardous waste / Contaminated Sites**

US CDL..... Clandestine Drug Labs

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/16/2014 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### ***Federal CERCLIS list***

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 8 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 15 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### **Federal institutional controls / engineering controls registries**

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 09/18/2014 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>HUDSON RIVER PCBS</b>	<b>NO STREET APPLICABLE</b>	<b>WNW 1/4 - 1/2 (0.450 mi.)</b>	<b>0</b>	<b>8</b>

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 09/18/2014 has revealed that

## EXECUTIVE SUMMARY

there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **State and tribal leaking storage tank lists**

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 03/19/2015 has revealed that there are 71 NY LTANKS sites within approximately 0.5 miles of the target property.

### **Records of Emergency Release Reports**

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 03/19/2015 has revealed that there are 67 NY Spills sites within approximately 0.125 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 51 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 11/25/2013 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### *EDR Exclusive Records*

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 12 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 31 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Pathway: SURFACE WATER PATHWAY  
Scoring: 4

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated 1.1 million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million (ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when the level of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabilize the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act (CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authorize a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action at the remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for parties potentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Site Description: The Hudson River PCBs Site includes a nearly 200 river-mile stretch of the Hudson River in eastern New York State from the Village of Hudson Falls to the Battery in New York City. The Hudson River has been designated an American Heritage River because of its important role in American history and culture. This federal Superfund Record of Decision (ROD) addresses the risks to people and ecological receptors associated with polychlorinated biphenyls (PCBs) in the in-place sediments of the Upper Hudson River. The Site is divided into the Upper Hudson River which is the length of river between Hudson Falls and the Federal Dam at Troy, New York and the Lower Hudson River which is the length of river between Federal Dam at Troy and the Battery. For purposes of this project, EPA further divided the Upper Hudson River area into three main sections known as River Section 1, River Section 2, and River Section 3. The Site also includes five Remnant Deposits, which are areas of PCB-contaminated sediment that became exposed after the river water level dropped following removal of the Fort Edward Dam in 1973. The Upper Hudson River portion of the Site extends from the Fenimore Bridge in Hudson Falls to the Federal Dam at Troy, a distance of just over 43 river miles. The Lower Hudson River extends from the Federal Dam to the southern tip of Manhattan at the Battery in New York City. The Mid-Hudson River, which is primarily a subset of the Lower

Hudson River, extends from the Federal Dam at Troy to just south of Poughkeepsie. The predominant sources of PCB contamination to the Upper Hudson River were two capacitor manufacturing plants owned and operated by GE. The plants are located adjacent to or near the Hudson River in the Village of Hudson Falls and the Town of Fort Edward. Over a 30-year period, the plants discharged a substantial amount of PCBs into the river. At the GE Hudson Falls plant, leakage of non-aqueous phase PCB-bearing oils through bedrock to the river continues to be a source of PCB contamination. Regarding the former outfall to the Hudson River from the GE Fort Edward plant, New York State Department of Environmental Conservation (NYSDEC) issued a Record of Decision in January 2000 that calls for the excavation of PCB-contaminated soil and sediment in this area of the Upper Hudson River shoreline in order to eliminate this source of PCBs to the river. EPA's analysis assumes a significantly reduced PCB loading to the river from these sources once the State's plans for remediation are implemented. PCBs, the chemicals of concern addressed in this decision document, have been classified by EPA as probable human carcinogens. They are also linked to other serious non-cancer adverse health effects based on observations in animals and emerging evidence in humans. Once discharged from the GE plants, the PCBs adhered to river sediment and accumulated downstream as they settled in impounded pools and other depositional areas. Historic fish and sediment data indicated PCBs were accumulating downstream of the old Fort Edward Dam as well as accumulating behind the dam. The removal of the dam in 1973 resulted in a remobilization and downstream distribution of PCBs that had accumulated behind the dam. Historically, the highest PCB sediment concentrations have been detected in the cohesive sediments within the Upper Hudson River. River scouring/ erosion and other mechanisms have mobilized PCB-contaminated sediments from the extensive cohesive deposits, redepositing them farther downstream all the way to the Battery. The preponderance of data indicates that burial of contaminated sediment by cleaner materials is not universally or uniformly occurring. Data also indicate that contaminated sediments in River Sections 1, 2 and 3 continue to serve as the major source of PCBs to the water column and the fish within the Upper Hudson River. During an approximate 30-year period ending in 1977, PCBs were used in capacitor manufacturing operations Hudson Falls and Fort Edward, New York facilities. PCB oils were discharged both directly and indirectly from these plants into the Hudson River. This included both non-permitted and permitted discharges. Even after permits were received in 1975, permit exceedances occurred. Estimates of the total quantity of PCBs discharged directly from the two plants into the river from the 1940s to 1977 are as high as 1,330,000 pounds (about 605,000 kg). Many of the PCBs discharged to the river adhered to sediments and accumulated with the sediments as they settled in the impounded pool behind the Fort Edward Dam, as well as other depositional areas farther downstream. Because of its deteriorating condition, the Fort Edward Dam was removed in 1973. Five areas of PCB-contaminated sediments were exposed due to the lowering of the river water level when the Fort Edward Dam was removed. These five areas are known as the Remnant Deposits. During subsequent floods, PCB-contaminated sediments from the Fort Edward Dam area were scoured and transported downstream. EPA notified the company that had the two plants of the remedy selected in the 1984 ROD and offered the company the opportunity to implement the selected remedy with respect to the Remnant Deposits and the Waterford drinking water supply evaluation. The company declined EPA's offer. NYSDEC, with funding provided by EPA, conducted the evaluation at the Waterford Water Works. In addition, NYSDEC prepared a design for the in-place containment of the Remnant Deposits. This design was completed in 1988. In March 1989, the company offered to assume responsibility for the implementation of the in-place containment remedy for the Remnant Deposits. EPA issued a September 27, 1989 Administrative Order on

Consent to the company which required the company to prepare a remedial design report for the construction of access roads to the Remnant Deposits and to submit a design for the in-place containment of the Remnant Deposits incorporating the NYSDEC-prepared design, plus any EPA-approved refinements to that design. EPA also issued a September 27, 1989 Administrative Order to the company requiring the company to construct and maintain the access roads to the Remnant Deposits. The company constructed the in-place containment of the Remnant Deposits under a 1990 Consent Decree with EPA. EPA will evaluate the need for further remedial action for the Remnant Deposits after completion of a 5-year review of the Remnant Deposit containment remedy, performed pursuant to CERCLA §121(c). The company's manufacturing plants in Hudson Falls and Fort Edward are listed under the New York State Inactive Hazardous Waste Disposal Sites Remedial program. The company currently is conducting remedial activities near the Hudson Falls and Fort Edward plants pursuant to Orders on Consent with NYSDEC. The company has thus far declined to implement the January 2000 NYSDEC Record of Decision for the Fort Edward plant Outfall 004. The NYSDEC is conducting the remedial design for that ROD. As one of America's great rivers, the Hudson has played and will continue to play a major role in the history, culture, and economy of the area. The Hudson has been designated an American Heritage River because of its important role in American history and culture. Current and reasonably-anticipated future land use and surface water use are described below. Current land use includes a variety of residential, commercial and industrial activities. Use of the river and lands surrounding the river are projected to remain the same. At this time, no changes in future land use are known, nor are any new uses expected. The Site passes through 14 different counties as the river flows to its final discharge point in New York Harbor. Four counties (Albany, Washington, Rensselaer, and Saratoga) lie adjacent to the more highly contaminated portions (areas of proposed active remediation in River Sections 1, 2 and 3) of the Upper Hudson River between Troy (Federal Dam) and Hudson Falls. Within these four counties, forests and farmlands surround urban centers and historic villages. There are apple orchards and dairy farms, parks, nature preserves and gardens. In addition to the GE Hudson Falls and Fort Edward plants, the area is home to technology companies, oil service companies and food companies. Saratoga and Washington Counties have experienced population growth between 1990 and 1999 of 10.2 percent and 1.4 percent, respectively, while Rensselaer and Albany Counties have experienced population declines of 1.9 percent and 0.3 percent, respectively. Total population of these four counties, according to July 1999 estimates by the US Department of Commerce Bureau of the Census, is just under 700,000. Warren County, in which the City of Glens Falls is located, has a population of just over 60,000 and is just to the northwest of the Hudson River PCBs Site. A Record of Decision (ROD) addressing operable unit 1 (OU 01) was completed in September 1984. A Record of Decision addressing OU 2 was completed in February 2002.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "TIPPLE"5/12/04 - AUSTIN - TRANSFERED FROM MULQUEEN TO TIPPLE - END8/23/05 - Raphael Ketani. Case transferred to Jeff Vought.8/6/09- Complete file review by Intern EM Ibeh and DEC Vought.File being reviewed is SP# 9812614, PIN# 00841, spill date- 1/12/99 at W 108 St./Amsterdam Ave. Caller's remarks state " (2) 30gal. drums left on sidewalk, some material has spilled. Request response". Neither spill nor PBS records found.Undated letter from Tibbe to Milro Associates, Inc. stating that they were contracted by NYSDEC to perform emergency site remediation at the above site and in doing so, 2x55gallon drums of waste oil with sand and Speedi-Dry were collected. That Milro was to transport materials back to their yard and store till test analysis could be performed and proper disposal arrangements developed.1/15/99- PIN number request from DEC Tibbe.1/25/99- Fax from Joanne Sokaris requesting for a PIN.3/4/99- Hazardous Waste manifest.3/21/00- ISR to Albany08/14/09-Vought-Vought and Ibeh reviewed site with DEC Austin and spill closed as spill on concrete sidewalk from abandoned drums that was addressed by PIN contractor. Spill cleaned via speedy dry. Ibeh spoke with NYSOAG Bechard and they had no record of spill. Due to age of spill (greater than six years) cost recovery not possible due to statute of limitations and no known RP. Vought left message for DEC Farrar to determine whether Final ISR is required.08/18/09-Vought-Spoke to DEC Farrar and as "Att. Gen. Close Date" box is filled out in UIS, no Final ISR needed.  
Remarks: 2 30 gallon drums left on side walk some material has spilled request response asap

 DEC Memo:

Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "ENGELHARDT"e2mis 12051110/14/98 13:03 O.S UG-N P.REIDMILLER(52281) REPORTS WHILE DOING A ROUTINE INSPECTION IN MH60621 S/S W.109TH ST 398' W/O AMSTERDAMAVE FOUND 16 OUNCES OF UNKNOWN FLUID.. HAVE 5 GALLONS OF WATER. CONTAINED AND NO RELEASE,UNABLE TO VERIFY CRACKS INSUMP. NO SUMP RUNNING,NO SEWER CONNECTION NO ENTRY INTO SEWER OR WATERWAYS.. SAMPLE TAKEN AND TAG #10664 INSTALLED...CLEANUP PENDING RESULTSIf this is a Con Edison manhole it contains electrical cable and splices. Many manholes have a sealed sump in the floor which is used to allow runoff when pumping the structure. A hose is place in this sump and water on the floor will flow into the sump allowing the floor to be cleaned. If cleaned prior to analysis of the fluid, the structure will be cleaned as >50 PPM and all liquid and waste will be manifested accordingly. The structure will be double washed with a

MANHAOLE 60621 (Continued)

S103572946

degreaser, i.e. Slix. All cleaning material and PPE will also be treated as >50. If any sludge is found within a manhole it is treated as lead contaminated and manifested accordingly. The spill identification tag will remain secured to the structure until the analysis is completed and if <500 PPM the signage will be removed. If the analysis is >499 PPM, a grid will be prepared for wipe testing the area. Until the analysis of the wipes are proven to be <10ugs/100cme2 all additional waste produced from the structure will be treated as the original analysis.If this spill occurred in a transformer vault containing a sump pump and there was a possible release, the drainpipe trap will be dismantled to determine if oil wasreleased. Sludge found in a vault, through historical analysis, has been determined not to contain lead.10/14/98 13:37 cig(roach) advised.....

 DEC Memo:

Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "O'CONNELL"2/16/00: ERT Piczsatowski - removing transformer from vault, being transported to Astoria Yard. Oil leaked from broken switch. Most was contained on trailer. Are now moving switch to second vehicle. Treated as 50-499 for cleanup.  
 (JHO)-----e2mis no. 130002:At approximately 09:30, I received a call from Mr. Richard Byrne, Transportation, that a leak had occurred and been discovered on top of trailer # H0315. The leak was from a broken part of a switch in which approximately 50 gallons spilled out onto the trailer with approximately 1 gallon onto the roadway. the discoverer Dan Crawford, Transportation immediately contained the spill using his attack pac and received assistance and material from M-Cut of pads, pigs, etc. No sewers or waterways were

 DEC Memo: 156111On 11/4 @ 09:50 Rivera # 10395 reported to me that at 09:35 while at the W110 st Substation he noticed that a capiacitor can blew up in the capacitor bank and approx 5 gallons of insulating fluid spilled on the concrete floor. The source of the spill was the Capacitor bank and the cause was a ruptured containing can. No sewer/waterway affected. The insulating fluid is a non-PCB substance., Environemntal tag # 000708 was hung. No samples will be taken. Pads and balonies were used to contain end soak up the spill area.1/10/05On Nov 4, the capacitor was taken out of service. the spill was cleaned up using pads and simple green. The damaged cans were replaced with new ones.  
 Remarks: 5 GALLONS OF ISOLATING FLUID: NO TO 5 QUESTIONS: CONED # 156111

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Registry ID: 110004355616

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Transformer #4 - Feeder 38M34 onto the concrete pad located at the West 110 Street Substation. The oil is leaking from the bolts or gasket on the tap changer compartment door of Transf. #4 and spilled along the door and dripped onto the concrete pad. Spill tag #S00457 was installed. No samples taken. Previous PCB history is less than 1 ppm as per Lab Sequence #99-09578, dated 9/13/99. Cleanup was initiated at 13:55 hrs. by mechanics from the Transformer Group who were in the station doing other work. On November 16, 2000 station operator Fred Snow verified that the transformer maintenance group attempted to make repairs on October 24, but the transformer is still leaking. Repairs will require an outage. Snow also verified that the initial spill had been cleaned up. The leak has been repaired, final clean-up has been completed. S. Hanebuth 3/14/02 This incident has been closed and submitted to DEC for final approval.  
CLEAN WILL BE DONE AFTER THE 2 HOUR TIME PERIOD REF #133789

DEC Memo: #157346. On 2/23/05 at 07:52 F. Snow # 29335 of Substation Operations at the W. 110 St substation called to report that at 07:45 he discovered a spill of dielectric fluid. Hestates that 1/2 gallon of dielectric fluid had leaked out of the can on cap bank # 5. The fluid landed on concrete & is contained in the caged area. He hung a tag # 000300. He will turn this in for repairs. This will not be cleaned within 2 hrs. Cap bank has to be deenergized & grounded up before any work can be done. There were no sewers or waterways affected. No smoke or fire was involved. No injuries were related to the spill. No private property was affected. He states the the fluid in Non PCB \*\*\*\*\* R. Bruns # 21106 \*\*\*\*\*3/1/05On 2/23/05 at 15:38. Sr substation operator F. Snow reported that the unit was de-energized for access. The oil was cleaned up using pads and simplegreen. Thedefective capacitor was replaced. The unit is now repaired and in service.

Remarks: NO TO THE 5 QUESTIONS: CONED # 157346: ASSOCIATED WITH CAP BANK #5:

 DEC Memo: e2mis 1488486/24/03 218 W 108St - At 1000 C. McCallion, EH&S, reported to the ERC that at 0935 a construction crew (Brown) excavating for a gas leak in the vicinity of a fuel oil filler pipe found fuel oil, about an oz.) in the soil. They are reporting it as a third party spill. They will not be doing a clean up. The fuel oil does not appear to have entered any waterways or sewers. S. Porcelli 718831021 Notified CIG, Marcinek. Logger Chris McCallion (86578) 25-JUN-2003 - This is a third party spill discovered by Con Ed while excavating. No free product was observed, only wet/stained soil. Heavy fuel oil smell. Material was placed back in the hole where it came from. Con Ed did not clean this up. It was reported to the DEC for their followup. Excavation has been backfilled. I am changing the Opn Status to "-CLODE" for submittal for DEC closure.8/19/09 - Austin - minor soil staining localized to fill port - no further action necessary - closed - end

DEC Memo: \*\*\*\*\*PBS: 2-290963\*\*\*\*\*Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "DEMEO"3/22/04 Tipple updating//Tim DeMeo responding to site.see also spills # 03-13925 and 03-13928K&C transport stated that they hooked up to 205 West 107 th street's fill line and the fill line came disconnected from the building during the delivery. Two little girls age 11 and 12 were covered with the oil form the spray. Zoie Gross, the 11yr old was transported to a local hospital and was treated for first degree burns, she is now home and is being attended to by her mother Josephhine Lippman (212-865-9860).Miss Manshel has been cleaned up and sent to school by her father Andrew Manshel (212-316-5148).The delivery person and the building personnel did nothing to assist the two little girls except wipe a bit of oil from near the 11yr old's eyes.A PBS search was conducted and the tank is unregistered.The building personnel from 205 West 107th Street stated to Mr. Demeo that the city had replaced the sidewalk and damaged the remote fill at that time, and that each delivery after the sidewalk replacement there was oil coming up out of the sidewalk.3/24/04 tjdSoil contamination letter sent to property owner. DLE to issue to criminal summons for the failure to notify and the unregistered tank.Property ownerOscar Milian Apt 1E10/06/05-Jacob-File send to environmental enforcement (Phil Lodico)4/26/06- Jacob : file is going back to region 2Transferred from CO ("jbtambe")11/16/06 - Austin - Reassigned to Rahman for followup/review - end12/03/08 I rec'd a call from Charles Nicholas,counsel for 205 W 107th Street.He sent an affidavit signed by Oscar Milan,resident at 205 W 107th Street in 2004.AS per the affidavit, the spill was all cleaned up the same time it occurred.Later on, the fill port area was also replaced by the City and there was no problem thereafter with the fill port.Letter and pictures are in edocs.As per the incident report, the spill was approx. 5 gallons.Based on previous report and affidavit, the case can be closed.(sr)  
Remarks: about 5 gallons of oil spilled. the pipe that broke was the owner of the building. the spill is being cleaned up

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "O'CONNELL"e2mis no. 152362:P Abernathy #02605 reports that while doing an inspection at w.110 st sub station he discovered that 1/2 pint of dielectric fluid had leaked from a can on cap bank #3 onto the concrete pad. Samples do not have to be taken as to generator knowledge of non-hazardous material. Cleanup is pending the deenergization of the cap bank.On 3/3/04 An outage was obtained to clean up and replaced defective Capacitors. Clean up performed by Abernathy 02605 using absorbent pads and simple green. Capacitors replaced by 2000 hrs on 3/4/04.

Remarks: WHILE INSPECTING CABUSTER BANK(EQUIPMENT) CREW FOUND 1/2 PINT OF FLUID. CLEANING PENDING ,DUE TO FIXING PROBLEM, NO SMOKE, FIRE,SEWER, WATERWAYS OR PRIVATE PROPERTY:

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "ENGELHARDT"NOTE: This is the "Master Spill Number" for Transformer #3. It is to remain open until all repairs on this equipment and remediation are completed. (JHO, 3/24/06)See eDocs for 2007 Substation Inspection Findings and for response from Con Edison relative to this spill. Breen8/4/08: Cleanup completed. As per 9/18/06 agreement between NYSDEC and Con Edison, approved engineering controls (valve bags, drip pans, absorbents, etc.) are in place and are being maintained for minor drips and small leaks. Repairs to be tracked and completed under Con Ed's MAXIMO Work Order. See eDocs for final emis report. Close out. (JHO)-----Con Ed e2mis #121568 (master):11/30/98 1020hrsFound 1-2 drops transformer oil leaking from TR#3, pump#1. Cleaned it up with diapers. History <1ppm PCB.11/30/98 1100hrsResults received 11/21/98. Drip pan under leak. 1 drop was on floor.11/30/98 Operator report cleanup including scrubbing twice with simple green. Leak is active at a very slow rate. Pads were placed to contain leak pending repairs. Will assume 50-499ppm pending sampling.-----e2mis no. 126634 (sub):19-JUL-1999 08:49TRANSF #3 -- W 110 ST SS -- Found spill approx 1/4 oz transformer oil on concrete pad from drain valve plug. Drip rate 2 drops per day. Tag #S00894 Hung. lab Seq #98-13260 <50 ppm pcb.Cleanup started, pads placed.21-JUL-1999 This leak was repaired and cleanup completed on 7/20/99 by mechanics. The drain valve plug was removed, cleaned and then put back with Permatex sealant. Cleanup completed with absorbent pads and Simple Green.The repairs were not effective and the unit has started to leak again, oil is present near the weld on the drainplug.-----e2mis no. 148079 (sub):On 4/25/03 at 09:12 F. Snow # 29335 of Substation operations found that 1/2 oz had leaked from transformer #3 on the no load tap changer onto the concrete pad. He has placed pads on the concrete pad & put a drip pan under the spill. He will turn this into the transformer group for repairs. He did not take any samples. He states that as per prior history it is less than 1 ppm pcb count with a lab sequence # 01-11723 with a date of 12/20/01.Permanent repairs pending outage. one or two DROPS of fluid leaked from pump - clean up complete.spill

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

10/23/06 - See e-docs for Con Ed report detailing cleanup and closure. Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "FOLEY" Con Ed e2mis #150237:9/08/03 Brent Morris #20208, Substation Operations, reported at 10:23 hrs. that he found at 10:10 hrs. approx. 1/4 ounce of dielectric fluid leaked from A phase pothead of Fdr. 38M32 located in transformer vault #3 at the West 110th Street Substation. The street address of the station is 464 West 110th Street. The dielectric fluid leaked from the pothead sampling valve onto the bluestone. He was performing a station inspection when he discovered the spill. The source of the spill was the pothead and the cause was a leak from the sampling valve. Spill tag #001903 to be installed. No samples taken since feeder has to be de-energized in order to take samples. Cleanup started at 10:20 hrs. The affected bluestone will be picked and removed and absorbent pads will be placed to contain any further leaks. Update: 9/8/03 Fred Snow, Senior Substation Operator reported at 10:56 hrs. that the cleanup was completed. A spill pan with absorbent pads (engineering control) was placed to contain any further leak. Manhattan Environmental Desk called the Substation Operator to find out if the pothead was still leaking. Fred Snow reported at approx. 11:15 hrs. that the pothead is leaking and the drip rate is approx. one drip per hour. The feeder will have to be de-energized in order to make repairs.

Remarks: 1/4 oz will be cleaned up

Substation. The street address of the station is 464 West 110th Street. He was performing a station inspection when he discovered that the capacitor can had ruptured and leaked dielectric fluid on the concrete pad. No samples were taken since this is a known non-PCB substance. No initial cleanup action was taken. Capacitor bank #3 must be de-energized and grounded before any cleanup action can be taken. Update: 8/5/03 Fred Snow #29335, Senior Substation Operator, reported that the cleanup was completed at 15:25 hrs. R. Pellegrino #386208/7/03 On Aug 6, 2003 the maintenance group replaced the capacitor. The incident is closed.

Remarks: broken capacitor can -non pcb oil - ref #149660

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

VAULT 6400 (Continued)

S106971184

1.5 quarts of unknown oil and 1.5 gallons of water in V6400, which is located at the opposite 1012 Amsterdam Ave. K. Sell # 53414 was at this location to flush and clean when he found the spill, he was working under account number #W3483. There was no fire or smoke involved and no sewers or waterways were affected. There were no injuries related to this spill and the weather conditions did not contribute to the hazards of this spill. There was no private property affected. The source and the cause of this spill is unknown at this time. There is oil filled equipment in V6400. The water is standing. There are no substantial cracks or holes in V6400. A yellow environmental tag numbered #38847 was hung in V6400. There were two samples taken from V6400; one for ID and one for PCB's. The samples were marked priority E. The chain of custody form number is #EE00064. Absorbent pads were placed in V6400. The cleanup is pending test results and possible Transformer removal. Logger : M.Casalta #12684.05/21/05 16:16. Lab Sequence Number: 05-04780-001. Oil Identification. no oil extracted from sample for analysis. Logger : M.Casalta#1268405/21/05 16:25. Lab Sequence Number: 05-04781-001 Aroclor 1242 < 1.0 ppm EPA 608/8082Aroclor 1254 < 1.0 ppm EPA 608/8082Aroclor 1248 < 1.0 ppm EPA 608/8082Aroclor 1260 < 1.0 ppm EPA 608/80825/22 @ 02:35. Since we received Lab results of no PCB's and the ID results indicated that there was no oil extracted in the sample I had a Vactor truck do a Flush and clean in the structure and completed the cleanup at 02:30 on 5/22/2005. The Environmental tag # 38847 was removed. Crew....Chaput # 06344....Grier # 50671. Logger R Pagano # 48703Closed. 7-26-05. George Breen  
1 1/2 qts of unknown oil on 1 1/2 gallons of water. cleanup pending test results. 158706.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "O'CONNELL"LEAKING FROM FEEDER - LEAKING ONE DROP PER MINUTE - CON ED IS SENDING A TEAM TO REPAIR THE LEAK FROM THE POTHEAD - SPOKE TO MR. ANDREW PETE.9/13/95 (Katz notes) - contained on 9/12/95 @2:50 PM. Using sorbent pads to absorb oil. According to Lou First, the unit cannot be permanently repaired until the unit/grid goes off-line for some reason. He indicated that he did not think the leak would get any worse. Lou First, W. 110th St. Substation (212) 338-4370.7/27/04: Con Ed submitted copy of 9/19/95 notification letter to DEP, which states: "Repairs and cleanup complete September 14, 1995." Close out. (JHO)

Remarks: LEAKING FROM FEEDER 3M33 POT HEAD

**MANHOLE #60415 (Continued)**

**S105141264**

Remarks: connection. ChemLab picked up PCB sample. Transmission Operations crew at approx 19:00 on 8/6/01 found fresh oil in manhole. Upon entering manhole, a leak was found on the 1" semi-stop bypass piping. This is the leak referenced by e2mis 138704. All further updates will be in 138704. PCB results indicate <1ppm. (KMF 8/7/01) e2mis no. 138-704: Clean Harbors pumped out manhole and temp clamp installed at 01:45 8/7/01. Custom barrel for pipe, clamp and valve being fabricated. Clean Harbors power washed manhole.  
ABOVE MATERIAL DISCOVERED AT ABOVE LOCATION ON TOP OF 300 GALLONS OF WATER. SAMPLE TAKEN AND CLEANUP IS PENDING TEST RESULTS. CON ED # 138716.

DEC Memo: Sangesland explained to the caller that the city/state guidelines allow "unrestricted" black smoke to flow for 15 minutes upon startup of the building boiler. The black smoke is "incomplete combustion" which happens until the boiler is up to it's normal high operating temperature. In this cold weather, the boilers turn on and off several times a day. On each "start up" they are allowed 15 minutes of black smoke. Nothing can be done.3/2/11 - Austin - Complaint was passed to Div. of Air for possible action. They dispatched an investigator on 3/1/11 to investigate the boiler emission complaint. The contact for the building indicated that there was a smoke condition occurring due to incomplete oil combustion, but that was rectified. DEC inspector saw no opacity violations during his inspection. - end

Remarks: Caller states that a thick black smoke is in the air and it is affecting the air quality in the neighbor hood. The owner of the building is John Klein, City Prime Realty 212 217-0262 is the company that rents space in the building

DEC Memo: 06/17/13-Hiralkumar Patel.alternate address: none.other spill 0800858 was reported on 04/21/2008 due to tightness test failure for 6,000 gal #6 oil tank. leak found in vent line. after repair, tank system passed the test. no contamination found. case closed.no PBS record found for 220 W 107th St, but PBS # 2-093556 is listed in spill # 0800858 and it is registered with address 210 W 107th Street.PBS #: 2-093556 is for 6,000 gal #6 oil AST (in contact with soil) which was installed in Jan. 1975. the PBS registration expired on 03/05/2013.3:43 PM:- spoke with Robert. he tested an empty 6,000 gal AST sitting on floor. after initial failure, company repaired the manhole, but tank system failed again. Robert mentiond that he was working to company named HiTech and he believes that someone else performed isolation test.3:47 PM:- spoke with Jim at HiTech. he mentioned that heating system is being converted from #6 to #4 oil. they cleaned the tank and before delivering any oil to the tank, tightness test was performed and it failed. then ABC Tank performed isolation test and found leak in bottom of the tank. as per proposal, ABC Tank will remove cement floor from around the tank, lift the tank, build new floor and saddles, put old tank on saddles and then re-weld the tank's interior.3:52 PM:- left message for Donna at ABC Tank.06/18/13-Hiralkumar Patel.11:12 AM:- received message from Donna.1:21 PM:- spoke with Donna. she is working on price quote to lift tank, fix it and re-install in same location on saddles. asked her to call back once work scheduled.1:25 PM:- spoke with Mr. Friedman. inquired him about site address. he mentioned that buildings 210 and 220 are separate buildings, but owned by same company and have one tank/boiler room. he mentioned that the tank is located in building 220. informed him about expired PBS registration. asked him to submit required forms within a week to renew PBS registration.220 West 107 LLC. \*\*property owner\*\*c/o West 107

**FINDS:**

Registry ID: 110004316758

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "KOLLEENY"DEC'S KOLLEENY SPOKE TO TIMOTHY OF ASCENSION CHURCH (212-222-0666), HE SAID R & D WAS GOING TO TEST THE TANK AND WANTED TO HAVE IT TOPPED OFF PRIOR TO TEST. KOLLEENY ALSO SPOKE TO JIM CAREY OF CASTLE OIL, WHO SAID GAUGE READ 600 GAL., CUSTOMER ORDERED 1,500 GALS, SPILL OCCURRED AFTER ABOUT 1,300 GALS HAD BEEN DELIVERED. SPILLED OUT VENT PIPE ONTO SIDEWALK, A LITTLE ALSO SPILLED IN BASEMENT; CASTLE OIL PERFORMED CLEANUP. CASTLE THOUGHT TANK HELD 2,500, BUT OUR REGISTRATION SAYS IT'S A 2,000-GAL TANK. KOLLEENY INFORMED CASTLE OF THIS, THEY MEASURED TANK AND CONFIRMED OUR PBS DATA THAT IT'S ~2,000. THEY STILL MAINTAIN GAUGE IS FAULTY AND HAVE SENT A LETTER TO THE CHURCH RECOMMENDING THEY REPLACE IT; CASTLE AWAITING APPROVAL OF DIOCESE.

Remarks: DEFECTIVE GAUGE ON BUILDING LED TO OVERFILL - CLEAN UP CREW ON SCENE

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Phone: (718) 579-3410  
DEC Memo: 11/17/10-Hiralkumar Patel.9:28 AM:- spoke with Rob Hill at Castle. Castle oil hired Casenova Fuel to deliver oil at the building. before delivery begins, the hose on pump broke and spilled about 10-15 gal oil on street only. spill was cleaned up by Casenova and Castle crew.9:33 AM:- spoke with Perfirio (917-573-8760), building super. he mentioned that oil sprayed on two cars and street, but all cleaned up last nightcase closed.  
Remarks: Delivery vehicle for Casenova Fuel hose broke when pumping delivery into tank. Spill onto sidewalk. No resource affected. Cleanup crew in route.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "RODRIGUEZ"E2MIS 148662On 6/9 @ 21:23 d Pace # 13149 of I&A North reported to me that while working on FDr 17M95 he found approx 20 gal of Deiletric fluid and 300 gal of water in V-1262. These amounts were calculated by me from the dimensions of the structure given to me which is a structure of 12' X 12' and there was 1/4" of oil and 5-3/4" of water. There was no sewer/waterway affected. The piping to the strret was taken apart and it was found to be dry. The piping was then cut. The oil migrated to the V-0796 and the piping was in V-180.The source of the spill is the Trnsformer and the cause was due to heavy rust on the Unit. Two samples were taken for PCB and ID.NOTE::: Warehouse PCB sample history as of 1/10/2003 is 7 PPM - LSN # 03-00256-005UPDATE - 6/10/2003 @ 00:04 HRSCleanup will be started ASAP as ordered by DEP. Astoria Transportation notified of the need for an "Over 50" tanker and faxed documentation. UPDATE 6/10 @ 04:10D Pace ordered a flush truck to the jobsite to complete cleanup operations as per D Pontecorvo of ERTLlab results for LSN # 03-04815-001TOTAL PCB 20 ppm6/10/03 cleanup has been completely done in V-0796 and a partial cleanup in V-1262. The tanker removed approx 1800 gallons of mixed liquid form the Vaults and 300 gallons from the Unit. V-0796 was double-washed and "SLIX: was used and V-1262 was sinle washed with "SLIX". 7/24/03 cleanup in vault V1262 was completed. Solid removed were sludge, dirt & debris picked up by the Vactor truck. Liquids removed were 100 gallons of oil & water mixed. The vault floor was double washed with Bio-Gen.UPDATE New transformer installed 8/4/2003

Remarks: heavy rust on unit is cause for spill clean up pending

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "KRIMGOLD" SPILL NO. WAS TRANSFERRED FROM MARK TIBBE.see spill 001132001/26/04Reassinged from Rommel to Austin02/17/04: Reassigned from AUSTIN to KRIMGOLD.11/01/2005 - Changed DEC lead from Krimgold to Zalewski. (Zalewski)3/13/2006 - Reviewed file. Last correspondence dated February 21, 2002 indicating that the remedial system was constructed and about to be started up. Placed a call to Dean Devoe (Gannett Fleming). He no longer works there. I was referred to Eric Lockler. I left a voice mail message requesting a call back. (Zalewski)3/15/2006 - Returned a phone call to Eric Lockler (Gannett Fleming). Left a voice mail message requesting a call back. (Zalewski)3/17/2006 - Placed a phone call to Eric Lockler. He said that they constructed the remedial system, which consists of horizontal wells, a collection sump in the elevator shaft, and an oil/water separator. Steel wells were installed to allow for the injection of boiler steam, but to his knowledge steam has not been introduced due to concerns about contaminant migration to off-site basements. They did some initial performance monitoring, but have not been involved at the site since 2002. His recollection is that there was very little product accumulation in the oil/water separator observed during the initial monitoring they conducted. (Zalewski)3/17/2006 - Transferring back to Region 2. Recommended next step is to request an update from the Jewish Home and Hospital on the corrective action activities conducted to date. This includes groundwater sampling data from site monitoring wells and performance monitoring data for the recovery system. The data should then be reviewed to determine if the system is operating effectively or should be optimized. (Zalewski)Spill transferred back to Region 23/10/08 - Austin - Spill assigned to Ahmed for followup -

end06/30/08-Hasan Ahmed- Checked PBS records, registration expired on 06/18/07. Called Jewish Home and Hospital (212 870 4886) and left a voice message. Called Gannett Fleming office (212 967 9833) and left a voice message. Ed of Jewish Hospital (212 870 4886) returned call. As per him Island Environmental removed the tanks and cleanup the soil and operated the oil/water separator system. He didn't know about Gannett Fleming, he has been working for Jewish Hospital only for last six months. He said he will try to get the background and current status of the remedial system and call me back on 07/02/08. 07/07/08-Ahmed-This spill closed and referred to open spill #0512881 being currently managed by DEC Ketani at same location. See also closed spill #0609452.

Spiller Address: 120 WEST 106TH ST  
Spiller City,St,Zip: NEW YORK, NY  
Spiller County: 999  
Spiller Contact: ISLAND TANK CORP/ VINCENT  
Spiller Phone: (718) 967-9424  
Spiller Extention: Not reported  
DEC Region: 2  
DER Facility ID: 396989  
DEC Memo:

TTF Letter sent to PBS Address - See eDocs3/21/12 PBS settlement conference held today. Edward Meehan Director of Facility Management attended the meeting on behalf of the Jewish Home. He stated that the tank failed because the technician failed to close off the piping to the day tank prior to the test. He also stated that the tank was retested 3 to 4 weeks later and passed. He said that he will get the passing test report and a letter explaining what happened to me within two weeks. His e-mail: emeehan@jhha.org. bf5/10/12 Called Ed Meehan requesting info to close spill. bf5/11/12 bf: Received email and replied with the following comments:Ed, I received your phone call as well as your e-mail. I am responding to you by e-mail so that you can forward my comments to your contractor to correct the deficiencies below. The document that you sent me (the test report and invoice) is attached. 1. The invoice for the repair states that the tank is a 5000 gallon tank. The spill case is in reference to a 550 gallon tank. 2. If the invoice does refer to the tank involved with the spill case, documentation stating whether or not any indication of a petroleum release was found during the repairs. 3. The invoice states that the repair was made to a bushing at the top of the tank which is not consistent with our conversation yesterday where you told me that the vent pipe was repaired. 4. The tank test report states that the calculated pressure is greater than the applied pressure. The calculated pressure is 1.43 psi and the applied pressure is 1.4 psi. 5. The tank test report states that after the applied test pressure was reached the test began immediately. On the report, refer to the time data of when the test pressure was reached, the blower was turned off, and the test began. According to the report, all three happened at 9:31 AM. The test method requires holding the test pressure constant for at least three minutes prior to turning off the blower.

-----end-----Mr. Meehan called me back and stated that he is going to call his contractor (Vinnie) and have information corrected. bf5/17/12 Called Ed Meehan for update since corrected documentation was not received. He is waiting for docs from contractors. He will call contractors and call me back today. bf6/4/12 CASE REFERRED TO GENERAL COUNSEL. bf8/6/12 Attempted conference call to Ed Meehan with OGC (J. Byrne). Left voicemail message. bf8/30/12 On 8/20/12, Ed meehan called me because his contractor "dropped of the paper work." The documents received were a tank tightness test report and a repair invoice. The sipill case can not be closed because of iunsufficient information. There is no statement from the 3rd party regarding a petroleum release. The tank tightness test report dated 3/28/12 is not sufficient because the calculated p[ressure is greater than the applied pressure and it is missing the technician's signature. See PBS file 2-150177 regarding this. On 8/28/12, phone call made with J. Byrne of OGC to E. Meehan.

Remarks: I explained that the documentation that was provided is not sufficient to close this case. Mr. Meehan stated that he will have his contractor, Vinnie, call me. As of today at 8:49 AM, I have not received a call. bf.12/6/12 Yesterday received letter dated 11/9/12 from Vincent Lovari of Island Environmental Tank Tersting Corp. Tank failed test because of fitting on the vent line. No petroleum release. NFA. bf  
retest and/or removal pending

DEC Memo: 02/07/06-Hiralkumar Patel. Spoke with Vinny at Island. they have reported odor in building. when vinny check on site, he found a rock on top of PLASTIC vent pipe. because of pressure, vent pipe has busted off from elbow. vent pipe is south side of building. spill happened on soil. vinny found that there was no glue at fittings in vent pipe. he has dug out 3-4 drums of contaminated soil. he will continue digging tomorrow until he hit clean soil and send out samples for testing. as per Vinny, approximately 10-15 gal was spilled. spill happened at location of 15,000 gal tank. once vinny done with soil excavation, he will test each tank. as per vinny, there is less odor in building now as they are digging soil. At the end, they will put vent pipe in secondary containment. Engineer at site: Mr. Mark Scioia (skee-o-ah)(212) 870-4886. 2/16/06 - Raphael Ketani. I tried calling the engineering department at the site ((212) 870-4886), but no one was there to talk to me. I just left a message. I tried calling Island Tank, but no one picked up the phone. 2/17/06 - Raphael Ketani. Mr. Scioia returned my call. He said that 55 drums of material were taken away. He said that the insurance company wanted him to have the tank and its system tightness tested, but they found that some things needed replacing. So they are in the process of replacing many of the seals to the tank. He also said that they are repairing the venting system. However, there are no odors in the building. Mr. Scioia added that they are installing a double walled containment for the fill pipe and the vent pipe. I told him that I will be waiting for a report once everything is done, including end point sample results. He said that I will receive it. 3/17/06 - Raphael Ketani. I spoke to Mr. Scioia about the cleanup. He said they are still waiting for the end point sample results and that the double walled pipe for fill pipe containment took long to get. I told him to send me the analytical results as soon as he gets them. He said he would. 4/18/06 - Raphael Ketani. I tried to reach Mr. Scioia, but could only leave a voice mail message. 4/21/06 - Raphael Ketani. I tried to call Mr. Scioia, but could only leave a voice mail. 6/20/06 - Raphael Ketani. I tried calling Mr. Scioia, but could only leave a voice mail. 7/5/06 - Raphael Ketani. I contacted Mr. Scioia. He said that he is still trying to get the guy who did the soil tests to submit the results. However, the guy keeps telling him that he is very busy and will get to it later. I told Mr. Scioia to keep

trying.7/6/06 - Raphael Ketani. Vinny of Island Tank called (718) 967-9424. He said that his company is working on repairing the tank system and he had to order parts from Cardinal Tank. He said the vent line is being replaced, a fuel line, removal of debris and other work. He said he will send a report soon, but he still has some things to straighten out at the site.7/19/06 - Raphael Ketani. Alan Walsh of Island Tank called to say that there has been no work on the site as Mr. LaGuardia is out of town. 8/2/06 - Raphael Ketani. I couldn't get ahold of Vinny so I spokewith Mr. Walsh. He said that Vinny will be going out to the site to do some work. However, he will have him give me a call back.8/8/06 - Raphael Ketani. I tried calling Vinny, but he wasn't in. So I spoke to Mr. Walsh. He said that he thought there was still work to be done at the site and that there is paperwork to be processed.8/23/06 - Raphael Ketani. I tried calling Vinny, but could only get Mr. Walsh. He said that Vinny was still doing repairs at the site. However, Mr. Walsh said he will find out for sure and get back to me. 11/7/06 - Raphael Ketani. I tried to contact Vinny, but could only leave a message with the receptionist. I contacted Mr. Scioia and he told me he just got the soil analyticals. He is going to FAX me the results tomorrow after he reviews them tonight. I told him that I will also need a cover letter stating what the tank system problem was, what was done to repair the system, and what the final outcome was for the tank (it's being removed despite the fact that it is in good shape - it's an insurance liability issue). He said that the tank was actually for another building, but that building is going to use gas. So the tank will be removed. I told him to send a revised PBS registration form. He said he will. 3/21/06 - Raphael Ketani. I tried to get ahold of Mr. Scioia and Vinny, but could only leave voice mails. 7/26/07 - Raphael Ketani. The PBS case is #2-150177. The 15,000 gal. tank is listed as in service even though it has been removed.I tried to reach Vinny, but could only leave a message with the answering service. I told the operator that the message is urgent and to have Vinny call me back as soon as possible. I tried to reach Mr. Scioia, but could only leave a message.Vinny called me back. He said that he had half the tank out now, but he had to hire a structural engineer to look over the situation. He had to shore up and reinforce a loading dock area before removing the other half of the tank. He thought it will be at least 3 weeks before he finishes his work. His cell is (718) 708-3425. 10/17/07 - Raphael Ketani. I tried to contact Vinny, but got his wife. She said that he had to postpone completing the work as his father had a stroke. She said that he will get back to me. 10/18/07 - Raphael Ketani. Vinny called me back. He said that it's still a big job left to do. He said that he has to take more soil out and then take end points and do other work. 12/3/07 - Raphael Ketani. I spoke to Vinny. He said that they dug down to the footing of the building to remove the #6 oil that was there. This was 18 feet. He said they can't go any further. I told him to send DEC an official letter stating why they can't dig further. He said they pulled the 1100 gal. tank and found #6 oil under it, too. He said they are digging this oil out. He added that they hand dug under the loading dock where there is more #6 oil. He said that the 15,000 gal. tank is out, too. The only tank that is left to pull is the 5000 gal. tank. Vinny told me that there are no vapors in the building. He said this is because the oil is congealed. He thinks it's very old oil. He's hoping to finish the digging and the job soon. 1/31/08 - Raphael Ketani. I spoke to Vinny. He said that they just need to clean the

**JEWISH HOME & HOSPITAL FOR THE AGED (Continued)**

**U001833370**

foundation and epoxy it. He said that the paperwork will follow in about 2 weeks.3/31/08 - Raphael Ketani. I tried to contact Vinny (cell (718) 708-3425/(718) 967-9424), but could only leave a message.4/4/08 - Raphael Ketani. Vinny called me back. He said that he had been out for awhile because he had family issues to deal with. He said that he had essentially completed the remediation report and that DEC should get it very soon. I told him that the DEC has been waiting for a long time for this report and that we're very anxious to get it. He said we'll get it soon.07/01/08-Vought-See also closed spill #0609452 at same location. (This case involves the finding of an old fuel tank that had been concreted shut. Every time it rains, some oil comes through the walls of the building. Vinny will investigate it. - Raphael Ketani)7/24/08 - Raphael Ketani. I tried to contact Vinny regarding the closer report he said I would soon receive. However, I could only leave a message.Vinny called me back. He said that he finally received payment for the work he did from the Jewish Home. He said I should receive the report by the end of next week. 8/15/08 - Raphael Ketani. I tried to contact Vinny to request the closure report, but could only leave a message with his secretary.8/18/08 - Raphael Ketani. I spoke to Vinny. He said he is still working on the closure report. He said he hopes to walk it over to DEC next week. He said the problem was that the oil kept seeping back and he didn't want it to contaminate his clean fill. So he was collecting a little at a time. He said he wanted to do a thorough job and get the problem fixed for once and for all.The case is being prepared for transfer due to a case realignment within the unit. The case manager will have to make followup calls to request the closure report from Vinny.9/9/08 - Raphael Ketani. I received a remediation report dated 8/27/07 from Vinny Lovari. The report dealt only with the removal of the 20,000 gal. tank, and associated contaminated soil, that was the subject of spill #0609452 - an associated case. There is no mention of the 1100 gal. tank, nor the 5000 gal. tank. I sent Vinny Lovari a letter requesting an update on the status of the remediation of the locations where these two tanks are (or were) and a remediation report for them.9/16/08 - Raphael Ketani. Vinny Lovari called to give me an update. He said that the tank discussed in the 8/27/07 report is 20,000 gals. He said that from the dimensions, the capacity was calculated. It's NOT 18,500 gals. Also, he said that he will pull the 1,080 gal. tank. A 15,000 gal. tank and a 550 gal. tank are in service with #2 oil and are under the driveway. There is a 5,000 gal. tank under the sidewalk along 106 Street, but the Jewish Home and Hospital hasn't decided what to do with it. A vent pipe is also being replaced. DEC will get the vent pipe report and the 1,080 gal. tank removal report sometime next week.9/31/08 - Raphael Ketani. I received the 15,000 gal. tank vent line remediation and replacement report dated 6/7/06. The soil samples showed contamination that was well below TAGM. I had no comments.10/21/08 - Raphael Ketani. I spoke to Ed Meehan, Head of Engineering at the Jewish Home and Hospital (212) 870-4886. He was calling to clarify what the situation was at the site regarding all of the remediation work. He said that all of the work had been done at the site for removal of the leaking 20,000 gal. tank and the associated contaminated soil. He said this is spill case #0609452 and was closed by Sharif Rahman of Region 2 Spills. He said that the 15,000 gal., 5,000 gal. and 550 gal. tanks are all in service, and are not part of the remediation project. He said that the only other remediation items were the vent line replacement and soil remediation. Mr. Meehan said that this was the only thing that

belonged to case #0512881. I told Mr. Meehan that I had received the report and that the soil analytical results were below TAGM. He added that a 550 gal. diesel tank had been removed some years ago, but it was replaced with another 550 gal. diesel tank. Lastly, he said that the 1,080 gal. tank (NOT a 1,000 gal. tank as currently listed) was removed in order to get to the 20,000 gal. tank. Mr. Meehan said that this tank never had a problem - it was just right in the way. He asked whether I had ever received the 1,080 report. I told him that I hadn't. He said that he will speak to Vinny and get him to send this report. I told him that PBS case #2-150177 shows the 15,000 gal. tank, 550 gal. tank, and 1,000 gal. tank as in service and the 18,500 gal. tank, a 550 gal. tank and a 10,000 gal. tank as closed and/or removed. I told him that the PBS registration has to be corrected to reflect the correct capacity and status of each tank. He said he will make the corrections himself. A little while later, Vinny called me up. He said that he will deliver the 1,080 gal. tank removal report. I told him that will be fine. Based upon the 6/7/06 remedial report and the 8/27/07 remedial report, I am closing the spill case. 10/29/08 - Raphael Ketani. Today I received the UST Closure Report from Island Environmental Tank, Inc. for the 1080 gal. tank removal. I reviewed the report. It contained soil end point sample analytical results. The results were all either non-detect or very low hits. Soil manifests and pictures were included in the report. I had no comments.

**Environmental Interest/Information System**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

**AIR SYNTHETIC MINOR**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: 05/02/06-Hiralkumar Patel. REceived call from Mr. Lewis from Eastmond. as per him, property has 2000 gas AST on legs. tank outside walls are dry. when he did test again, he found leak from one of the welding joints. reapirod it and tested again. tank passed the test. REceived closure report in fax. work performed on site:- cut open tank, pumped out squeegee cleaned and gas freed tank- removed partial cement block jacket for visual inspection- discovered interior seam with signs of seperation.- welded seam from interior and welded patch back in place- perform tank only test and tank passed- perform line test. - fill and vent lines showed signs of corrosion. customer has been advised to have fill and vent lines replaced before next heating season. suction and return lines passes air test and appear to be in good condition.- tank is sitting on cement saddle (about 3" above grade), and wrapped in cement block (as secondary containment)- four cement blocks with staining were removed.based on available information, case is closed.

DEC Memo:

Sent Contaminated Soil Letter Accord Realty 55 West 45th St - 7th flr New York, NY 10036 Attn: Noel Intner 05/17/05 - Sawyer - Site visit performed on 5/5/05. There was contamination and a stain around the boiler and the concrete was saturated. Borings in this area must be analyzed for the extent of contamination. 12/20/05-Sharif// I called Accord Realty (Noel Intner, 212-278-0660) to follow up about the remedial work and left message. 02/23/06 Sharif Rahman- I spoke with Lilly Castillo of Accord Realty and faxed (212-278-0889) her a letter asking necessary documentation regarding the spill clean up. The letter was sent to the attention of Noel Intner. 05/08/06 Sharif Rahman- I called Noel Intner, (212) 278-0660 this morning and he indicated that a consultant has been hired to do the investigation and remediation work. 05/17/06 Sharif Rahman- AL Eastmond was retained to do the investigation and clean up. Eastmond broke cement floor from three sides of the boiler and took end point samples. Samples came back clean. No visible stain or odor were present. NFA required.

Remarks: Caller states oil pump constantly leaks oil, fire department comes and shuts it off, landlord puts it back on. accord reality is aware of the violation and is not cooperating in fixing the pump or cleaning the spill.

Remarks: is wet and smelt like urine not oil. No apparent leak/spill on the tank system.  
 Historical leak in the fuel line in mid April 2005. This was fixed but another slow leak was found. This spill was also fixed but the clean up from the first spills was never done. Material is still accumulating in the basement at a slow rate. Floor is broken up concrete. Caller has reported this before and had no response. Caller is getting ill from the petroleum odor in the building. Chris Sawyer was notified during the original spill. Super never followed through with the clean up instructions.

DEC Memo: 12/28/05 Transferred to E. Hampston under Spill Initiative. Forwarded letter to owner requesting update and documentation of cleanup. Spill transferred back to R-23/7/08 - Austin - Assigned to Ketani for further investigation - end 7/24/08 - Raphael Ketani. I reactivated the case today. There is no paper file. The E-docs has just one letter written by the previous DEC case manager. The letter is dated 12/29/05 and requests further information regarding the spill. The letter was addressed to Rebecca Levine and Mark Gilbert of Amherst-Cortland Condominium Association, 11 Riverside Drive, NY, 10025. However, the site location address is 504-516 W. 110 Street or 510 W. 110 Street - it's probably a large building on the corner. The spill happened on 12/13/94. The cause of the spill is human error. The notes state that "product contained in the basement. A.L. Eastmond was cleaning up the product." There is no further information. The PBS is #2-188182. It shows one 7500 gal. tank with #6 oil which is active. The site address is listed as 504 W. 110 Street. Mail goes to Iris Whitaker at the Argo Corp., 50 W. 17 Street, NY, 10011. Her phone is (212) 896-8382. I tried calling Ms. Whitaker, but the phone number now belongs to another company. I tried finding the owners in Property Shark, but the 11 Riverside Drive address belongs to a completely different location. The other addresses didn't show up. I tried the NYC Property Tax database and found the property. It is block and lot 1881 and 7501. Mail goes to 110 E. 59 Street, 20th Floor, NY, 10022-1333. The location is listed as Cathedral Parkway, but this is just another name for West 110 Street. I sent a CSL to Amherst-Cortland and to the Argo Corp., which still exists and can be contacted at (212) 896-9600. I also called up the Argo Corp. and left a message requesting a dialogue regarding the site. 7/31/08 - Raphael Ketani. I tried to contact Ms. Whitaker at (212) 896-8682, but could only leave a message regarding 504 W. 110 Street. 8/13/08 - Raphael Ketani. On 8/7/08 I received a FAX with a copy of my 7/24/08 letter from Iris Whitaker of ARGO Corp. The FAX requested that I contact her to discuss what DEC needs from Amherst-Cortland. I tried to contact Ms. Whitaker again, but could only leave a message requesting a discussion. So I e-mailed her at IrisW@Argo.com and requested that an investigation plan be submitted for the basement. 8/14/08 - Raphael Ketani. Ms. Whitaker e-mailed me back. She said that she will have to bring the idea of doing a subsurface investigation up to the condo board. She said that she will meet with the board on Monday,

Remarks: 8/18/08.8/18/08 - Raphael Ketani. The case is being prepared for transfer due to a case realignment within the unit. A followup phone call or e-mail needs to be sent to Ms. Whitaker asking what the outcome of the condo board meeting was and emphasizing that DEC can't wait longer for an investigation to take place.10/27/11 - Austin - Spill Transferred from Ahmed to Vought - end  
INSPECTION SHOWS PRODUCT CONTAINED IN BASEMENT - A.L. EASTMAN CONTRACT WILL CLEAN UP.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

a lubricating oil. May 18, 2005 @ 21:59 Ug, Splicer J. Montalvo #87325, reported to T. Haynes 82326. Clean-up was completed @ 21:20. Structure was double-washed. He stated that he cleaned the structure with a 5 gal bucket of slix. Tanker removed 200 gallons of water/oil mixed. 7-bags of debris was removed also. Environmental tag 38698 removed. See clean-up crew on people involved screen. Source of spill; 2-3c cables were found open, with nails and wires in them. Ends were not capped. Splicer Montalvo, sealed and capped the ends, 2-3c cables and EPR cables. Removed nail and wires.

Remarks: no to the 5 questions and two samples were taken: coned # 158577

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001  
Tank Id: 35721  
Material Code: 0003  
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None  
D01 - Pipe Type - Steel/Carbon Steel/Iron  
F06 - Pipe External Protection - Wrapped  
I05 - Overfill - Vent Whistle  
J02 - Dispenser - Suction Dispenser  
K99 - Spill Prevention - Other  
L09 - Piping Leak Detection - Exempt Suction Piping  
C01 - Pipe Location - Aboveground  
E00 - Piping Secondary Containment - None  
H00 - Tank Leak Detection - None  
G03 - Tank Secondary Containment - Vault (w/o access)  
I04 - Overfill - Product Level Gauge (A/G)  
B05 - Tank External Protection - Jacketed

Tank Location: 1  
Tank Type: Steel/Carbon Steel/Iron  
Tank Status: In Service  
Pipe Model: Not reported  
Install Date: 05/01/1963  
Capacity Gallons: 5000  
Tightness Test Method: NN  
Date Test: Not reported  
Next Test Date: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SANGESLAND"8/7/2001 - 6,000 gal tank in the basement of 255 West 108th St gave way and released to the containment room and out into the boiler room. Early in the day Mr. Dunne (super) stated that the 6,000 gal tank contained 2,300 gal of #6 oil. At about 10:30 AM Castle Oil Corp. delivered an additional 3,000 gal. The delivery was uneventful and Castle left the site. At approx. 3PM Mr. Dunne said he entered the boiler room ans saw a stream of oil pouring from the tank containment room across the boiler room floor into the sump pump

area. Mr. Dunne shut down the sump pump unit and called Castle Oil who in turn contacted the New York State Spill Hotline. Petroleum Tank Cleaners(PTC) was contacted and on the scene by 6:30 PM. PTC began with a vac out of the tank, tank containment room and eventually moved to the boiler room itself. By evening of 8/7 most of a temporary fuel system had been installed with the exception of a #6 fuel oil transfer line. Upon the second DEC inspection of the site on the afternoon of 8/8, the main boiler room was 80% clean and the vac truck was back and they continued to vac out from various low points around the basement. 8/13/2001 - Sangesland met at the site with property manager Julia Kodis (212-350-2859), a representative of the Co-op Board and representatives of a tank replacement consulting engineering firm (Lawless & Mangione Architects & Engineers LLP - Jamal Taha P.E. and J.C.Chou Sr. Structural Engineer. 914 423-8844 / 212-475-0870) The plan of action from this meeting was: 1) Have PTC finish the cleanout of the basement. There was still oil in various pits and speedie dry piles were around both the boiler room and the containment room. 2) Lawless with prepare a plan to replace the tank, waterproof the walls and secure the containment area. 3) Submittal of this "Plan of Action" is Sept 7, 2001. Sangesland said another site visit needs to be made after the floor had been properly cleaned. If the floor of the tank containment room looks like it had cracks, borings and a partial digout may be required. 9/25/2001 Sangesland spoke to Julia Kodis (manager). The bids for the tank removal/room repair/tank rebuild were due today. The contract will be awarded at 9/27 board mtg. Removal of the existing tank will probably not happen before week of 10/9/01. Julia Kodis did say that the building has purchased an oil/water separator for the boiler room sump pump. 2/14/2002 Sangesland spoke with Julia Kodis at Insignia. She said the contractors have been set and have submitted a schedule for removal of the old tank and major portions of the old boiler. Right now the contractor is scheduled to remove the existing tank on 2/21 & 2/22. After the tank is removed, the area along the south wall of the tank room will be excavated as required by the DEC. Ms. Kodis confirmed that the excavation will not be filled in again until AFTER it has been inspected by the DEC. 2/27/2002 Sangesland went to the site and inspected the empty tank room. A trench was dug approx 2' deep, 2' wide and the full 30' width along the south edge of the tank room. The trench had some water in it, no sign of petroleum product. Sangesland said it was OK to close up. Contractor will close up the floor, lay a new 4" cement pad, waterproof the room up to a height of approx 4ft. The whole room will be painted with epoxy paint. The room will have a liquid alarm which will alert the super to come into the room and actively pump out the room. Contractor was also asked to take photos of each stage of the project, provide a summary of the original problem along with all the steps done to solve the problem. 4/1/2004 Despite repeated attempts to get the proper closure documents from Ms. Conti at Insignia Residential Mgt. nothing has been submitted. Since Sangesland saw the tank room after the old tank was removed and the trench area was clean, DEC is closing this case out.

Remarks:

TANK FAILURE AT ABOVE LOCATION. MATERIAL SPILLED IN BASEMENT OF BUILDING. SUPM PUMPS HAVE BEEN TURNED OFF. PETROLEUM TANK CLEANERS OF BROOKLYN HAS BEEN CONTACTED FOR CLEANUP.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "TIPPLE"10/3/03 tipple sent letter requiring documentation.10/4/05. SA. Reviewed the file. As per DEC letter dated June 25,2004, Out of 3 required work to be done, they performed only one (property managers letter dated June 29, 2004). Talked to Cheryl Lathan, property manager. Sent a letter to her on 10/05/05 requesting to provide documents regarding other 2 required works.2/6/2005: As the position of the tank is above ground and per letter dated June 1, 2004 installed new burner. This spill may closed after site visit.8/12/08: Changed Lead\_DEC field to 'unassigned'. Superintendent lives at an alternate address so I could not get in the building during my unannounced previous site visit. Misplaced contact number for supt. 10/2/09 - Austin - Spill transferred from Albany staff(Grathwahl) to Ketani, for further investigation - end10/6/09 - Raphael Ketani.

APARTMENT COMPLEX (Continued)

S105135554

There are no E-docs. The spill was called in on 9/26/01 as a tank test failure due to the presence of an old epoxy patch. Crown Leak Detection (516) 939-2959 called it in. The site is a 5 story pre-war, brick veneer apartment building. The block and lot are 1846 and 59. The address is 282 Manhattan Avenue, NY. There are no alternate addresses. According to Property Shark, the site was sold by Harlem Valley Housing Development Fund Co. to Neighborhood Restorehousing Development Fund Co. on 8/14/02. The PBS is #2-609458 and shows only one 2,000 gal. AST with #2 oil that is active. Manhattan Valley Management Co. at 75 W. 108th Street, NY, 10025 (212) 678-4410 takes care of the building. I called up Manhattan Valley Mngmnt., but could only leave a voice mail for the property manager, Guito Lavoile (la-vole). There is a package of documents in the case file dated June 1, 2004 dealing with the replacement of the boiler and the burner, but it does not describe any repairs to the oil tank. There were no other documents describing work that took place. 12/15/09 - Raphael Ketani. I made an unannounced site visit and met the super., Frank Blunt (917) 662-2878. He let me into the building's lobby at the bottom of the stairs. Immediately, I noticed a moderate odor of oil vapors. The PID meter registered from 10 ppb to 30 ppb. The air was warmer than average for an unheated stairway and stagnant. We went to the tank room in the basement. The tank was inside a room of its own. It looked like a fairly recently installed tank on metal pedestals. I noticed some staining on top of the tank. Some of the staining extended along the sides, but there were no stains on the floor, except a slight stain by one pedestal. I didn't see the epoxy patch that was mentioned in the spill report (see E-docs). This looked like an intact tank. There were absolutely no odors in tank room. Next, we went to look at the boiler. It was in a small room by itself. My PID meter registered from 20 ppb to 137 ppb of vapors. However, there were no signs of leaking oil inside of the boiler room, nor were there any stains on the floor. I thanked Mr. Blunt for showing me the site and left. As there were no pools of oil on the floor of the tank room, as the epoxy patch wasn't present and was either replaced or the tank was replaced, as there were no large stains on the floor, and as there were no indications that there were any problems with the tank, except for maybe a need for some minor fitting tightening, and as the boiler was not releasing oil, I have determined that there is no threat to people or the environment. Therefore, I am closing the spill case. Additionally, I found the management company to still be Manhattan Valley Management Co., 73 W. 108th Street, NY, 10025, (212) 678-4410.

Remarks:

CALLER STATES THEY FOUND AN OLD EPOXY PATCH ON THE TANK WHICH HAS TO BE REPLACED.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

**AIR SYNTHETIC MINOR**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: 08/31/07-Vought-Off hours spill responder. Vought performed site visit and vapors throughout building. Spill caused by disconnected overhead fill line in basement that was missing one foot section due to current fill line replacement and boiler repair. Spill came out of fill and sprayed over basement including work tables and impacted boxes and drywall. Concrete floor is sealed and no pathways to subsurface. Spill also affected sump pit next to boiler. Vought spoke to super (Abidan 646-284-8385) and Hess made delivery during that day. Hess hired Eastmond who is immediately coming to clean site. 09/05/07-Vought-Called Issac (Eastmond)-Left message for Issac to send invoice to DEC. 6/11/10-Vought-After further review, spill closed by Vought as spill on concrete with no impacts to subsurface and cleanup by Eastmond Co.

Remarks: Caller reports a leak or overflow in the basement. FDNY is starting cleanup. Unk who is responsible for the spill per caller.

DEC Memo: 7/10/07 bf: Sent ttf letter to:Michelle MoralesPinnacle GroupP.O. Box 1920New York, NY 1011610/16/07 Received message from Chris Tommassello of Advanced Site Restoration. ph.:212-809-1110. Wants to discuss this case. bf10/17/07 Called him back and left message. bf10/18/07 Spoke with C. Tommassello. Tank was installed partially into rock in the basement. Borings were taken in basement, but could not be go down far (unknown depth at time of conversation). Two feet of soil was dug out and they encountered rock. Encountered rock while drilling outside building. Appears building is constructed into rock. Tank failed at holes in cradle. holes in tank at poits where tank was touching rock. He wants to place Biorem solution it into the excavation. Walls to be pressure washed. Tank is planned to be repaired and placed into service. He will send me a plan within the next few days. bf 12/18/07 Plan received on 12/3/07. Product is trapped in cracks of bedrock beneath the building. They plan on treating the unrecoverable product with BIO REM H 10. I was concerned that the treatment may push product out of other openings. They want to treat to prevent odors in the future. I recommended that they consult with the powner of the building prior to doing so. NFA. bf

Remarks:

CALLER REPORTING TANK TEST FAILURE. TEST USED WAS EZ 3 LOCATOR PLUS.
