Credit Highlights

- S&P Global Ratings assigned its 'AAA' long-term rating to the New York City Transitional Finance Authority's (TFA) approximately \$1.3 billion future tax-secured (FTS) subordinate bonds fiscal 2023 series D, consisting of tax-exempt subseries D-1 (approximately \$950 million), taxable subseries D-2 (approximately \$210.44 million), and taxable subseries D-3 (approximately \$139.56 million).
- At the same time, we assigned our 'AAA' long-term rating to TFA's approximately \$70.885 million FTS subordinate bonds that will reoffer the authority's fiscal 1999, subseries A-1 bonds in fixed-rate mode upon conversion on Nov. 3, 2022.
- We also affirmed our 'AAA' long-term rating on the authority's senior and subordinate (second-lien) FTS bonds outstanding as well as our ratings on various issuances where the short-term ratings are based on the liquidity support provided by various financial institutions.
- The outlook is stable.

Security

Personal income tax (PIT) revenue and, if needed, sales and use tax revenue generated within the City of New York secure the senior and subordinate (second-lien) FTS bonds. The fiscal 2023 series D bond proceeds will fund the city's capital expenditures..

Credit overview

Coverage and liquidity metrics as well as economic fundamentals that support the 'AAA' rating remain very strong. That said, broader macroeconomic conditions are deteriorating, which is reflected in the city's conservative assumptions for the fiscal 2023 forecast. The forecast incorporates an 8% decline in PIT, caused in part by lower financial services sector profits following record PIT collections of \$16.7 billion in fiscal 2022. However, at \$15.3 billion

forecast for fiscal 2023, PIT is expected to remain above historical levels. Forecast sales tax revenue of \$8.6 billion in fiscal 2023 is approximately equal to fiscal 2022 sales tax revenue.

New York City's economic recovery continued throughout the summer and the unemployment rate dropped to 6.8% in August 2022, from 9.5% a year ago. Spring and summer travel activity, acceleration of hybrid work schedules by major employers, and the federal government's lifting of COVID-19 testing requirements for inbound international tourists spurred hiring in the leisure and hospitality sector, helping the labor market rebound. While employment reached 97% of pre-pandemic levels in August, a slowing economy may delay the city's full jobs recovery. At the same time, the steady pace of the city's economic activity continues, with office occupancy improving to 48% in mid-October, broadly in line with the average occupancy level in the 10 largest metro areas.

Also supporting the high investment-grade rating is the city's transfer of its rights, title, and interest in pledged revenue to the authority that enhances the statutory and legal mechanisms that separate control of the revenue from the city, supporting an obligor linkage we view as remote. However, risks remain that tether the priority-lien rating to the city's obligor's creditworthiness, which is equivalent to the general obligation (GO) rating. The City of New York GO rating is 'AA' and is constrained by the city's very weak debt and contingent liability profile, which strong and well-embedded management practices offset.

Other key credit considerations include:

- Consistent expansion and diversification of New York City's economy, which continues to recover from the COVID-19 pandemic downturn, although broader macroeconomic conditions are set to worsen in calendar 2023;
- Fiscal 2022 pledged revenues of nearly \$25.3 billion (17% above actual fiscal 2021 collections) that provided very strong 8x coverage of annual actual debt service in fiscal 2022. We expect maintenance of at least 4x maximum annual debt service (MADS) coverage on subordinate-lien debt service over the outlook period;
- Strong bond provisions, including what we consider a conservative additional bonds test (ABT) of at least 3x MADS and maximum MADS of \$1.32 billion for the senior-lien bonds, well above current MADS of \$32.2 million (following execution of the series D transactions and 1999 reoffering and calculated at the maximum variable rate), and at least 3x the sum of covenanted MADS of \$1.32 billion on senior-lien debt plus annual debt service on subordinate debt for the subordinate-lien bonds;
- Our view that nationwide income and sales use taxes have historically demonstrated low-to-moderate volatility, with the breadth of the city's sales and use tax base offsetting cyclical volatility associated with PIT; and
- The city's general creditworthiness, which does not constrain the rating but will remain a consideration, as we see risks that could impair pledged revenue if New York's economy and finances were to become pressured.

Environmental, social, and governance

We view the environmental, social, and governance (ESG) factors that could affect the TFA's economic base on which pledged revenue is collected as somewhat similar to those of the city, particularly should exposure to severe weather events and other chronic physical climate risks disrupt economic activity or pledged revenue collections. A potential resurgence of the pandemic still presents a health and safety social risk that could stall the city's economic momentum and pose greater uncertainty for sales tax collections, though resilient PIT collection mitigates the risk. We also view the governance structure of the TFA's FTS statutory and legal mechanisms positively, as it protects the rights of

bondholders and limits the city's ability to divert revenue prior to debt service payment.

Outlook

The stable outlook reflects our view of growth in the TFA's pledged revenue, which has shown resilience through multiple economic cycles, including the most recent shock from the pandemic. As a result, the authority's annual debt service coverage and MADS coverage remain extraordinarily strong, and we expect this will continue.

Downside scenario

We could lower the rating or revise the outlook to negative in the unlikely event that pledged revenue falls substantially short of the forecast or that the TFA accelerates borrowing that leads to materially lower MADS coverage of less than 4x.

Credit Opinion

Economic fundamentals: Very strong

The sheer size of New York City's economy supports our very strong view of economic fundamentals. For example, the city's population across Bronx, Kings, Queens, Richmond, and New York counties is larger than that of 39 U.S. states and increased to 8.8 million with the 2020 census data. In addition, in 2020 the New York City metropolitan area's GDP remained the highest across the 10 largest metropolitan areas at \$1.8 trillion. Although GDP decreased 3.4%, it remains more than 50% larger than that of the next-largest metro area (Los Angeles-Long Beach-Anaheim). That said, S&P Global Economics now expects the U.S. will fall into a shallow recession in the first half of 2023 (for more details, see "Economic Outlook U.S. Q4 2022: Teeter Totter" published Sept. 26, 2022, on RatingsDirect), which in turn will have repercussions for New York City as an economic and financial hub.

The June 2022 financial plan updated the forecast for fiscal years 2023 through 2026 to reflect PIT collections of \$15.3 billion, \$14.9 billion, \$15.5 billion, and \$15.9 billion, sequentially. We believe the city's forecast is realistic but note that the national macroeconomic backdrop has since continued to worsen. Still, year-to-date the city's economy has continued to recover. Unemployment was down to 6.8% in August 2022, office occupancy was at 48% of pre-pandemic levels in mid-October, hotel occupancy was at 91% in June 2022, subway ridership averaged 64% since Labor Day compared with 48% in January 2022, and restaurant bookings were 68% on average in mid-October. We expect these trends will underpin robust pledged revenue collections. We expect the impact on New York City of the impending national recession will be cushioned by the ongoing diversification of the city's economy, as indicated by companies such as Meta, Amazon, TikTok, and Google signing large leases in midtown Manhattan. Finally, the city's reputable universities, access to first-class health care providers, investments by venture capitalists in technology startups, and attractiveness as a leisure and business travel destination support the city's resilient PIT and sales tax trends.

The city levies a 4.5% sales tax on a broad range of economic activity, including retail sales (also from online sales), utilities, communication sales, services, and manufacturing. In addition, it levies a 6% tax on receipts from parking, garaging, or storing motor vehicles. Taxable sales in the city doubled from 2004 to 2020 and, after declining in 2021,

rebounded to the pre-pandemic level of \$182 billion in 2022 (data from March 1, 2021, to Feb. 28, 2022).

Coverage and liquidity: Very strong

Our view of TFA's coverage and liquidity is very strong. In light of more difficult macroeconomic conditions, pledged revenue is forecast to fall by approximately 5% to about \$24 billion, in fiscal 2023. The decline is largely due to an expected 8% decrease in PIT to \$15.3 billion, while sales tax is forecast to remain broadly flat to fiscal 2022. The rise in fiscal 2022 sales tax was supported by robust recovery in economic and tourist activity, job growth, and return-to-office trends. Pledged revenue also provided extraordinarily strong annual debt service coverage in fiscal 2022 of 8x as well as MADS coverage of 6.7x based on the maximum rate on the variable-rate bonds and 6.9x based on the 4.25% budgeted adjustable rate. Even with expectations for lower pledged revenues in fiscal 2023, annual debt service coverage remains extraordinarily strong at 6.4x, as does MADS coverage of 6.3x based on the maximum rate on the variable-rate bonds and 6.6x based on the 4.25% budgeted adjustable rate. These coverage trends are consistent with our view of the 'AAA' rating.

Discussions in early 2022 to increase the TFA's borrowing capacity have not resulted in legislation yet. Should this ultimately occur, we believe management would structure debt plans to ensure that pledged revenue continues to provide very high coverage in line with historical trends.

We do not view the TFA's variable-rate portfolio as a negative credit factor, given the authority's management of associated liquidity risk, which we incorporate into our analysis. In addition, given the TFA's historical and projected MADS coverage, we do not view the lack of a fully funded debt service reserve as a negative credit factor.

The senior-lien bonds have a conservative ABT of at least 3x covenanted MADS of \$1.32 billion, well above current MADS of \$32.2 million (calculated at the maximum variable rate). The subordinate-lien bonds have an ABT of at least 3x the sum of covenanted MADS of \$1.32 billion on senior-lien debt plus annual debt service on subordinate-lien debt. We believe the city's long-time target of maintaining debt service at less than 15% of tax revenue, along with its reliance on residual PIT and sales tax revenue to fund normal operations, provides bondholders assurance that leveraging pledged revenue up to the ABT for the subordinate bonds is unlikely to occur. Furthermore, the TFA has not issued parity senior-lien debt in recent years, and we expect no change to this. Although we do not include unpledged revenue in our calculation of coverage, New York City has prepaid a portion of TFA's debt service from its general fund, represented as a grant to the TFA, which stood at \$1.96 billion to benefit fiscal 2023 results, down from nearly \$2.7 billion in the year prior. By providing the grant from the general fund for payment of debt service, PIT revenue that the TFA retains is reduced, allowing the city a larger amount for operations.

Revenue volatility: Very-low-to-low

Pledged PIT and sales tax revenue are critical sources that fund city operations, collectively accounting for more than one-third of budgeted city tax revenue in fiscal 2022. Nationwide PIT volatility is historically very low, while sales taxes volatility has been low, and this informs our view of the pledged revenues' combined volatility. However, we believe New York's PIT revenue is cyclical and more sensitive to general economic and tourism trends and is susceptible to certain market conditions. At the same time, we believe the breadth and diversity of the city's economy provide a broader base for sales and use tax collection, reducing its volatility compared with nationwide trends, even in current economic conditions.

Although each revenue source has seen cyclical growth and decline, the overall growth trend for both is positive. Either tax source easily covered annual debt service in fiscal 2022, with PIT receipts providing 5.3x coverage and sales tax collections 2.7x.

The PIT is the TFA bonds' primary source of security, generating about 66% of statutory revenue in fiscal 2022. Since the TFA was established, PIT revenue has fully covered debt service without any use of sales taxes. In 1966 New York City imposed a PIT, and in 2006 it returned to a lower schedule of base rates and a 14% surcharge, which resulted in a maximum rate of 3.648%. In 2010, the base rate increased, resulting in a maximum rate of 3.876%. The base rate and the 14% surcharge are scheduled to expire on Dec. 31, 2023. Unless legislation passes extending the base rate and the 14% surcharge, a lower rate schedule with a maximum rate of 1.48% will take effect. Previously scheduled to drop on several occasions since 1989, the base rate was always extended, most recently in April 2020.

Obligor linkage: Remote

The state legislature created the TFA under the New York City Transitional Finance Authority Act. The act authorizes TFA to issue debt secured by revenue that the state grants to the authority. The state collects pledged revenue, and PIT revenue is held in trust and transferred to the trustee by the state comptroller. Pledged revenue is not subject to appropriation by the city or state. The TFA indenture creates a lien for the benefit of bondholders that the city and state have covenanted not to limit or alter until the bonds are paid or discharged.

A board of directors manages TFA with the power to approve bond issuances. Five voting directors govern the authority: the director of the office of management and budget, the finance commissioner, the commissioner of design and construction, the comptroller, and the city council speaker. Two of the members are elected officials, the other three are appointed by the mayor, and all are in some way obligated to the residents of the City of New York.

We have also received a legal opinion that the pledged revenue is no longer property of the city under Section 902(1) of the bankruptcy code and would not be treated as such. In the event of a city bankruptcy, a plan of adjustment that contradicts this right and determination by the state would violate state law and thus should not be confirmable.

These factors inform our belief that the legal structure is an intended true sale of the pledged revenue that renders the revenue unavailable to fund operations, and contains other securitization features that segregate pledged revenue prior to the payment of debt service from the city's other revenue and cash balances. Therefore, we view pledged revenue as more insulated from potential operating shortfalls or budgetary pressure wherein it is neither legally nor practically available for operations. However, we believe risks remain that could result in the impairment of the revenue if the city were to become stressed, meaning bondholders cannot be completely isolated from the city's financial and economic condition.

Rating linkage to New York City

The GO rating on the city serves as an assessment of the city's overall creditworthiness and is a key determinant of the authority's ability to pay bonds secured by revenue. Although the high investment-grade rating denotes little risk of the city falling into distress, in our view, the potential for lowering the GO rating cannot be disregarded.

For more information on New York City, see our report published Sept. 23, 2022.

Ratings above the sovereign

We rate the TFA bonds above the sovereign because we believe it can maintain better credit characteristics than the U.S. in a stress scenario, based on the locally derived pledged revenue for bondholders and our view that pledged revenue supporting debt service on the bonds is at limited risk of negative sovereign intervention. The rating above the sovereign is based on our criteria "Ratings Above The Sovereign: Corporate And Government Ratings--Methodology And Assumptions," published Nov. 19, 2013.

Many issues are enhanced by bond insurance.

Certain terms used in this report, particularly certain adjectives used to express our view on rating relevant factors, have specific meanings ascribed to them in our criteria, and should therefore be read in conjunction with such criteria. Please see Ratings Criteria at www.standardandpoors.com for further information. Complete ratings information is available to subscribers of RatingsDirect at www.capitaliq.com. All ratings affected by this rating action can be found on S&P Global Ratings' public website at www.standardandpoors.com. Use the Ratings search box located in the left column.

No content (including ratings, credit-related analyses and data, valuations, model, software or other application or output therefrom) or any part thereof (Content) may be modified, reverse engineered, reproduced or distributed in any form by any means, or stored in a database or retrieval system, without the prior written permission of Standard & Poor's Financial Services LLC or its affiliates (collectively, S&P). The Content shall not be used for any unlawful or unauthorized purposes. S&P and any third-party providers, as well as their directors, officers, shareholders, employees or agents (collectively S&P Parties) do not guarantee the accuracy, completeness, timeliness or availability of the Content. S&P Parties are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, for the results obtained from the use of the Content, or for the security or maintenance of any data input by the user. The Content is provided on an "as is" basis. S&P PARTIES DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs or losses caused by negligence) in connection with any use of the Content even if advised of the possibility of such damages.

Credit-related and other analyses, including ratings, and statements in the Content are statements of opinion as of the date they are expressed and not statements of fact. S&P's opinions, analyses and rating acknowledgment decisions (described below) are not recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security. S&P assumes no obligation to update the Content following publication in any form or format. The Content should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. S&P does not act as a fiduciary or an investment advisor except where registered as such. While S&P has obtained information from sources it believes to be reliable, S&P does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives. Rating-related publications may be published for a variety of reasons that are not necessarily dependent on action by rating committees, including, but not limited to, the publication of a periodic update on a credit rating and related analyses.

To the extent that regulatory authorities allow a rating agency to acknowledge in one jurisdiction a rating issued in another jurisdiction for certain regulatory purposes, S&P reserves the right to assign, withdraw or suspend such acknowledgment at any time and in its sole discretion. S&P Parties disclaim any duty whatsoever arising out of the assignment, withdrawal or suspension of an acknowledgment as well as any liability for any damage alleged to have been suffered on account thereof.

S&P keeps certain activities of its business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain business units of S&P may have information that is not available to other S&P business units. S&P has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

S&P may receive compensation for its ratings and certain analyses, normally from issuers or underwriters of securities or from obligors. S&P reserves the right to disseminate its opinions and analyses. S&P's public ratings and analyses are made available on its Web sites, www.standardandpoors.com (free of charge), and www.ratingsdirect.com (subscription), and may be distributed through other means, including via S&P publications and third-party redistributors. Additional information about our ratings fees is available at www.standardandpoors.com/usratingsfees.
