

Project # SANDTWOBOR | Borough: Manhattan | Date Issued: 12/03/2025
The Brooklyn Bridge - Montgomery Coastal Resilience (BMCR) Project is an initiative to provide long-term flood protection on the south side of Manhattan.

Temporary Esplanade Width Reduction

From Market Slip to Pike Slip

Starting December 3, 2025, for up to eight (8) weeks

Ahead of final restoration, an extension of the fenced-in work zone under the FDR Drive is required to accommodate construction of the permanent base for future amenities. This will result in a narrower path along the esplanade between Market Slip and Pike Slip. Please follow all posted signs and flaggers.
